3. Has provisions for bolting to floor. (Order inverted base)

### G. Enclosure accessories:

1. Doors, Sides and Panels
2. Work/Writing Surfaces
3. Accessories:  
Drawers, slides, writing shelves, chassis guides, card cages, fans, blowers, ventilation grills, hardware, and casters.  
Available in 22 standard colors.

## INTRODUCING THE ZERO GUARDIAN™ EXTRA DUTY CABINET...

Do you need a catalog EIA rack with no modifications in four days?

☐ Yes ☐ No

Do you need a catalog EIA rack with modifications?

☐ Yes ☐ No

Do you need a noncatalog rack to fit your special application?

☐ Yes ☐ No

Do you need a special enclosure to fit your product concept?

☐ Yes ☐ No

 Do you need all of the above with not much difference in cost and no NR costs? ☐ Yes ☐ No

### You No Longer Have to Conform To Someone Else's Design or Catalog!

#### SUITS YOUR DESIGN

The frame consists of four components. A top, bottom, and two side structures which are welded together as shown in figure 1, along with tolerances and weld information. The dimensions of the frame openings and of the component parts can be changed to suit your design with only a few limitations. The size must fit into a maximum envelope of 48x 72x84 inches and the Vertical side panel face must be 1.44" wide when a shielded and/or environmentally sealed door is required.

#### FLEXIBLE IN CONFIGURATION AND DIMENSION

The two photographs in the upper portion of the facing page are examples of applications that took advantage of this flexibility. Also note that slopes are available and you are not restricted to the angle of the slope.

The ZERO GUARDIAN is not the usual catalog enclosure. It was developed to fulfill your need for the flexibility in enclosure design that will make your product distinctive. This is especially important in today's economy in

which defense companies need to develop and deliver product to the commercial markets, not to any set specification as in the military, but to their own individual concepts. The ZERO GUARDIAN's design flexibility, being based upon Concept Engineering, gives you the freedom to develop an individual and unique product. You no longer have to conform to someone else's design or catalog.

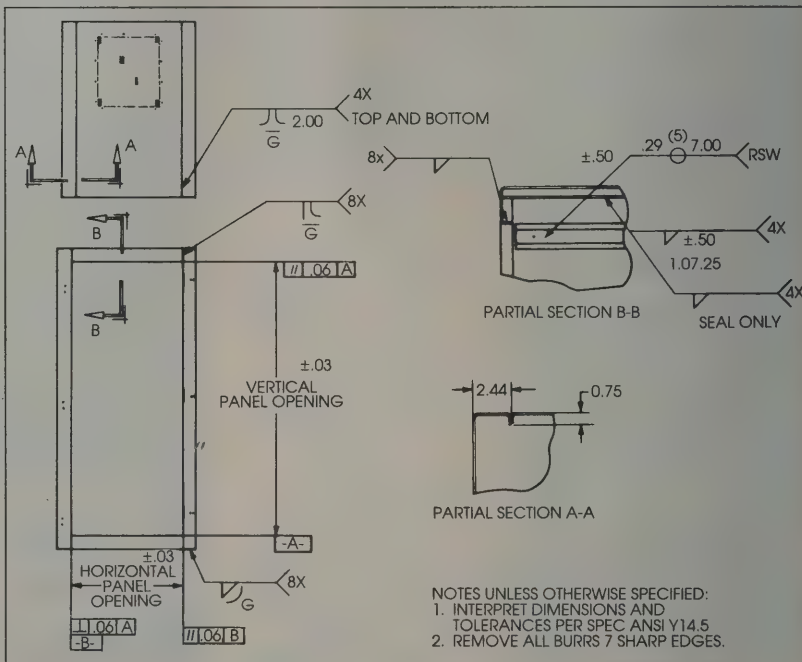

#### CHOOSE YOUR MATERIALS

The Guardian enclosures are available in steel and aluminum. The frames are .125 aluminum or 12

gage steel and the doors are .063 aluminum or 16 gage steel.

#### MULTIPLE BAYS?

Baying can be accomplished by bolting together individual bays or by making multiple bays in a one piece construction as shown in the photograph. This is restricted to three bays in length. If your requirement is for more than three bays, multiple one pieces can be bolted together. The benefits of the one piece construction are lower cost and ease of shielding or environmental sealing since the seams between bays are eliminated.

## CHOOSE YOUR OWN SIZE, FINISH AND CONFIGURATION

### CHOOSE YOUR DOORS

The photograph below shows the Zero patented "Paddle" latch. Zero also offers the "Flush" latch and both latching systems are multipoint and are used on both mid and high shielded units, as well as drip proof doors. The paddle latch is suggested for applications where two gaskets are being compressed as in the case of a combination shielded and drip proof enclosure. There is also an unshielded door latching system we call the "Slam" latch which automatically latches when the door is closed. This is a two point latching system.

### EMI SHIELDING?

Figure 2 shows the shielding effectiveness levels achieved by the ZERO GUARDIAN. The Tests were performed per MIL STD 285 and reports are available. The gasket material is tin plated copper clad steel wire mesh over a neoprene sponge core.

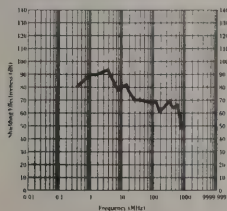

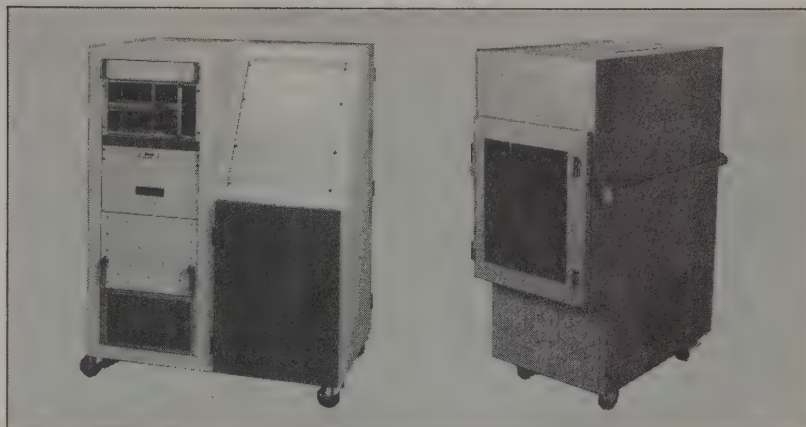

FIGURE 2

The gasket is stuffed into a groove on the door, so there is little effort in changing a gasket if it ever becomes necessary. There is no glue separation or special fasteners to worry about.

### FINISH?

All finishes unless otherwise specified will be a water base textured bake top coat. This is for environmental purposes as well as it being more economical. All other coatings must have a VOC content of 3.0 pounds per gallon of coating or less. Pretreatment for aluminum is a chemical film per Mil-C-5541 and an iron phosphate per TT-C-490 for steel. In the case of a steel shielded unit, the gasket areas are arc sprayed with a .008 thick coating of a Tin/Zinc alloy. This also achieves electrolytic compatibility.

### CHOOSE YOUR ACCESSORIES

The following is a list of some of the many accessories available:

- Leveling feet
- Casters
- Dollies and bases with fork lift provisions
- Packaged blowers
- Fan trays
- Chassis slides
- Buss bars
- Power strips
- Connector panels

- Air conditioning units
- Writing surfaces
- Drawers
- Blank panels
- Equipment shelf angles
- Desk top cabinets (27 sizes)

### 4-DAY QUICK SHIP NEEDED?

We ship 19" opening models in 4 working days - ask for "Quick-Ship." We ship custom designs in as little as 6 weeks - ask for "Prelim. Spec. Sheet."

| Table 1 - "Quick Ship" Models |       |
|-------------------------------|-------|
| Front Opening                 | Depth |

## CASE TECHNOLOGY EXPERTS FOR OVER 40 YEARS

Whether you need...small, compact, portable cases for personal utility or larger cases for protection, transport and storage, Zero has the case you need. Here are the experienced case design engineers who

understand the technologies critical to performance in any environment...who know how and when to use plastics for maximum utility...who can design just the right configuration to protect your products.

### Transitainer Roto-Molded Cases

#### Applications:

- Field portable
- Test equipment

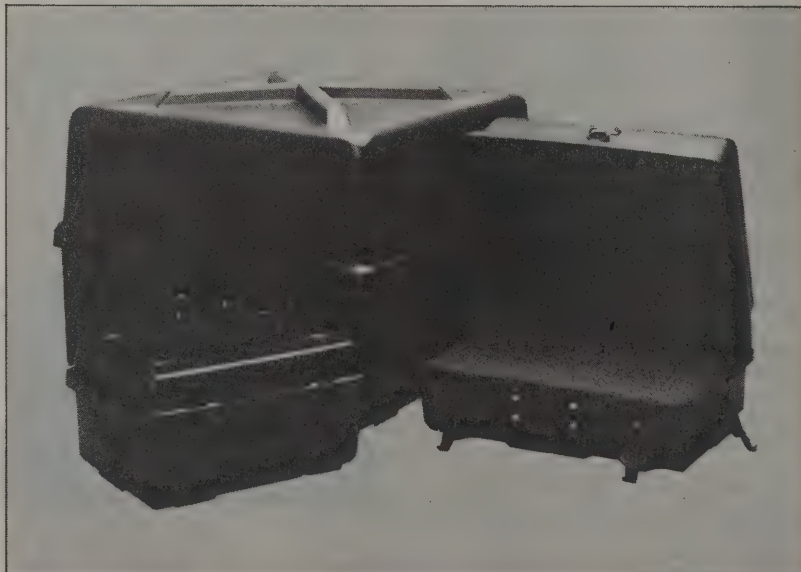

#### Benefits:

- Total packaging
- Resists most chemicals
- Gasketed for weathertight protection

#### Features:

- Made from rotationally molded polyethylene plastic
- Compounded color impregnated directly into durable polyethylene plastic shells
- Recessed hardware for added protection
- Numerous sizes available from 6x6x10 to 48x52x19 from stock

### Valulite Shipping/Carrying Cases:

#### Applications:

- Meets tough military specs at a low cost
- Makes your equipment transportable via common carrier, truck, airline or hand carry

#### Benefits:

- High density polyethylene plastic
- Weathertight seal for equipment protection
- Proven performance and reliability

#### Features:

- Polyethylene thermoformed with molded-in closure area and gray molded-in color shells
- Cam action, positive locking, black latches
- Raintight, shock resistant and vibration, dust and humidity protected.
- Standard options available: colors, foam

## TRANSIT CASES • INSTRUMENT CASES • CARRYING CASES • COMBINATION TRANSIT/INSTRUMENTATION CASES

### Rotorack Versatile Instrument Cases

#### Applications:

- Field portable, sensitive electronic instruments
- Military applications, monitoring equipment
- Seismic, pollution control instrumentation
- Various test equipment
- Field computer and communications systems

#### Benefits:

- Quick and easy installation of rack-mounted equipment
- Total accessibility from front and rear to instruments and contents
- Specially designed for stacking

#### Features:

- Rotationally molded shell and covers of high density polyethylene
- 19" rack frame on shock mounts provide 30G forces of protection
- Newly engineered latch allows covers to be removed or replaced while stacked
- Equipment design load 80 lbs.

### Style-Life Cases

#### Applications:

- Transport computers, electronic instrumentation, medical electronics, electrocommunications, and sensitive electromechanical devices.
- Portable unit for testing and diagnostic equipment
- Product display and samples

#### Benefits:

- Multiple sizes on both standard and heavy duty styles
- Lightweight and durable
- High impact plastic shells

#### Features:

- Constructed from textured ABS thermoformed plastic
- Black or grey morocco grain outside, smooth finish inside
- Available options include separable hinged cover, inner lid assembly, flanged closure, flange hole patterns with floating #10-32 threaded inserts and gaskets. (All flange hole patterns must be supplied by customer.)
- Standard foam packs and diced foam packs available
- Panel mounting brackets and locking latches

**CALL TODAY FOR SPECIAL AND CUSTOM ORDERS (413) 267-5561  
FAST SHIPPING**

Stock items ship in 1 to 5 days.

Non-stock cases require 4 to 6 weeks

Custom cases ship in 8 to 10 weeks

All shipments are F.O.B. Zero Plastics, Monson, Massachusetts

We'll ship your cases any way you specify!

#### Government Orders

Zero Plastics is certified as a qualified source by the Defense Contractor Management Area Operations (DCMAO). All manufacturing operations are in compliance with MIL-I-45208 quality standards. Equipment calibration is to MIL-STD-45662, with color matches FED-STD-595.

## STANDARD DEEP DRAWN ENCLOSURES

### DEEP DRAWN ALUMINUM ENCLOSURES

Zero Corporation is the leader in quantity, quality and delivery of deep drawn aluminum enclosures. Offering over 75,000 sizes pretooled, each is created with a standard tool ensuring consistency. For seamless, draft-free construction in aluminum enclosures look to Zero!

**Size Range:** 1 cubic inch to 8 cubic feet (height in 1/16" increments)

**Material:** Selected aluminum alloys and gauge designations are used. Different aluminum alloys can be drawn on special order.

**Heat Treated:** Available as a special order item.

**Accessories:** Various covers are available.

### PRECISION MINIATURES

Zero Corporation also now offers precision deep drawn miniature enclosures in a multitude of materials. Still featuring the same seamless deep drawn construction.

**Size Ranges:**

**Round Enclosures:** enclosures and covers are offered from 0.375" to 3.375", in depths up to 3.875".

**Rectangular Enclosures:** enclosures and covers are available ranging in size from 0.19" wide x 0.80" long to 3.938" wide x 4.625" long, in depths to 3.7".

**Square Enclosures:** enclosures and covers measure from 0.531" x 0.531" to 3.016" x 3.016" in depths to 3.00".

**Materials:** Aluminum, cold-rolled steel, brass, mu-metal and copper.

**Accessories:** Various covers are available.

Zero Corporation is also the source for total custom draw or modification capabilities. For strictly aluminum deep drawn enclosures, or precision miniatures in a multitude of materials call Zero Corporation first.

### DEEP DRAWN ALUMINUM ENCLOSURES

- Secondary Operations Available: piercing, welding, trimming, louvers, painting, anodizing, silk screening or engraving.
- Custom sizes and shapes available on special order.
- Complete fabrication and assembly available.
- Accessories include nutplate assemblies, gaskets and various covers.
- Heat treat also available.

### PRECISION MINIATURES

- Secondary Operations Available: piercing, soldering, welding, brazing and special finishes.
- Custom sizes and shapes on special order.

choose ZERO**  
**THE WORLD LEADER IN DEEP DRAWN ENCLOSURES**

Over 75,000 sizes available with no tooling cost.

Large, modern manufacturing facility  
with new state-of-the-art equipment.

Sophisticated  
Management  
Information Systems  
link material inventory,  
production, scheduling  
and shipping to provide  
accuracy and faster  
delivery.

Zero is positioned to protect the environment through  
investment in the best available technology waste  
water treatment facility. Allows for water purification  
and recycling.

## SIZES:

From less than a cubic inch to over eight cubic feet (smaller  
than a thimble or larger than a bathtub!)

### Rectangular standard sizes from

.19" x .80" to 27.25" x 37.25". Covers available.

### Square standard sizes from

.531" to 28.25". Covers available.

### Round standard sizes from

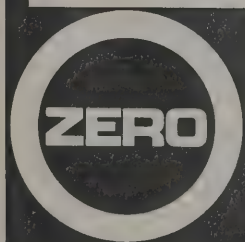

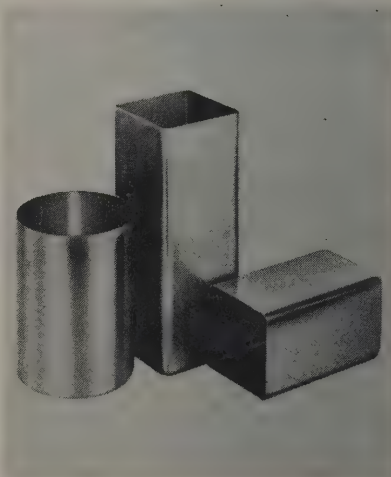

.375" to 13.09". Covers available.

**Choose a Carrying Case if** your total carrying weight does not exceed 45 pounds. Carrying Cases pass requirements for various drop test heights. Typical application examples are:

- Personal Transport
- Small, Sensitive Electronics
- Product Display
- Sales Presentations
- Cameras and Video Equipment
- Special Sports Equipment
- Courier Transport
- Field Diagnostics Equipment
- Portable Testing
- Tool or Technician Cases

#### Case Performance Specifications

**Drop:** Carrying and Instrument Cases are tested to perform at a 12" drop; Transit and Combination Cases at an 18" drop.

**Choose an Instrument Case if** the case needs to protect an instrument or even become part of the instrument. These cases pass requirements for various drop test heights. Many Zero Instrument Cases are stackable with protected hardware. Typical applications are:

- Monitoring Systems
- Medical Instrumentation
- Telecommunications
- Environmental Measurement Devices
- Electronic Testing
- Geophysical Instrumentation
- Computer Products

#### Case Performance Specifications

**Watertight:** Water directed at the case from any angle does not enter. Suitable for weather exposure and transient submergence.

**Splash Proof:** Water spray or solid particles directed at the enclosed equipment or its mounting surface have no harmful effect on operation.

## ALUMINUM CASES 335 STANDARD SIZES IN 14 STYLES

### Choose a Transit Case if

you are shipping and storing equipment. Zero Transit Cases pass requirements for various drop test heights. Typical applications are:

- Field Portable Instrumentation
- Sensitive Electronics
- Test Equipment
- Diagnostic Equipment
- On-location Broadcast Systems
- Airport and Flight Guidance Systems
- Field Computer Systems

### Case Performance Specifications

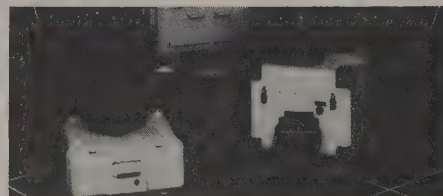

**Drip Proof:** Water or solid particles falling on the case under most conditions have no harmful effect on equipment operation.

**Salt Exposure:** Salt spray resistance.

### Transit Cases

### Choose a Combination Transit / Instrument Case if

you need to select both features. The Combination Case will protect the instrument and its accessories from environmental conditions during operation, shipment or in storage. Combination cases pass requirements for various drop test heights. Typical applications are:

- Space Exploration & Controls
- Emergency Telecommunications
- Weapon Systems
- Radar Systems
- Aircraft Ground Support Test Equipment
- Shipboard Equipment

### Case Performance Specifications

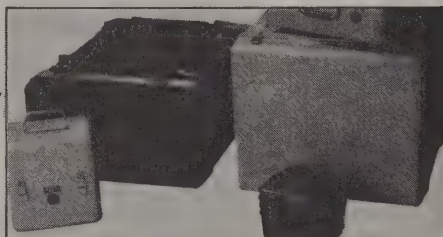

**Dust Proof:** Enclosure prevents entry of dust.

**Temperature:** -20°F to >160°F

### Combination Transit/Instrument Cases

# ELECTRIC CONTACT LUBRICANTS

**NYE**  
Designer  
Lubricants

Lubricants are insulators in bulk. When one is faced with the need to lubricate an electrical contact, a first reaction might be that an electrically conductive lubricant is required. However, this is not the case. Under the boundary conditions present in contact lubricant sliding, sufficient metal contact occurs to provide electrical continuity when opposing contacts are mated. When in operation, sliding induces film formation, the dielectric properties of the lubricant tend to dampen arcing, and both friction and wear are reduced.

## Switch Contact Greases

Greases for lubrication of sliding electrical contacts, as in electric switches, should have the same qualities as required for straight-forward mechanical sliding: good film strength, appropriate high and low temperature fluid range and 'stay-in-place' capability. These greases are relatively 'additive-clean' to simplify the chemistry of grease degradation, which will inevitably occur if there is arcing in the lubricant's presence. Butt contacts, where no sliding takes place, are best left unlubricated.

| Product               | Temperature Range, °F | Characteristics                                                                         |
|-----------------------|-----------------------|-----------------------------------------------------------------------------------------|
| Rheolube 362          | -65 to 250            | Light, synthetic hydrocarbon-based grease for wide temperature applications.            |
| NyoGel® 782D          | -10 to 200            | Non-melting polyether gel which degrades to volatiles with arcing.                      |
| Instrument Grease 737 | -65 to 225            | Light, synthetic hydrocarbon-grease for automotive instrumentation. Resists salt-water. |
| Rheolube 789DM        | -40 to 300            | Non-melting, polyol ester-based grease for higher temperature switch needs.             |
| NyoGel® 760D          | -20 to 250            | Synthetic hydrocarbon-based heavy gel for distribution switchgear.                      |

## Potentiometer Lubricants

A potentiometer is a variable resistor, usually with low voltage and very low current; arcing is not likely. A sliding electrical contact is inherently involved. Oils and light greases based on synthetic esters have shown good performance, especially in wire-wound potentiometers. With many newer designs, using unusual material combinations, such as metal wipers on a conductive plastic or ceramic-metal matrix, special silicone formulations have provided the only workable solutions, especially when very low or very high operating temperatures are encountered.

| Product                 | Temperature Range, °F | Characteristics                                                                      |
|-------------------------|-----------------------|--------------------------------------------------------------------------------------|
| Synthetic Oil 203       | -65 to 250            | Polyol ester contact oil with additives for wire-wound pots.                         |
| Fluoroether Grease 833B | -40 to 300            | Wide temperature fluoroalkyl polyether grease with resistance to fuels and solvents. |
| Rheolube 799            | -65 to 250            | Light polyol ester-based grease with lubricity additives.                            |
| Fluorocarbon Gel 813    | -100 to 400           | Soft, non-melting silicone grease for extreme temperature needs.                     |

## Electrical Connector Lubricants

For stationary separable electric contacts, or connectors, the purpose of a lubricant is to reduce wear from repeated insertions and withdrawals and, equally important, to prevent tarnish of a pollution-vulnerable contact surface. Heavy oils applied from dilute solutions in selected solvents are used on noble-metal connectors. Where fretting corrosion occurs, as may happen with tin-lead, a relatively thick film of thixotropic grease has proved useful. The 500-series products listed below are applied from volatile solvent dispersions.

| Product                                | Characteristics                                                                             |
|----------------------------------------|---------------------------------------------------------------------------------------------|
| NyeTact 568<br>NyeTact 570             | High performance fluorinated ether oil/gel dispersions using an ozone-safe solvent.         |
| Synthetic Oil 438<br>Synthetic Oil 439 | 5-Ring and 6-Ring polyphenyl ether oils each available in a variety of solvent dispersions. |
| Synthetic Oil 174A<br>NyeTact 517M     | Oil/solvent dispersion based on synthetic hydrocarbons providing thin protective film.      |
| NyoGel 759G<br>NyeTact 502M            | Soft, thixotropic synthetic grease/dispersion for tin-lead/fretting corrosion problems.     |

## Damping Greases

"Controlled-shear" gels or damping greases are frequently used to reduce free motion and to quiet operating noise of loosely-fitting components in electro-mechanical devices, including the mechanical elements of electrical switches and potentiometers. These greases work as "motion-control compounds" where damping of free motion is needed. They have proved especially useful on the shafts of hand-operated potentiometers where they can provide a "velvet feel" and can eliminate coasting. They are all tacky or adhesive to a greater or lesser degree.

## NyeBar® Barrier Films to prevent oil creep

Certain types of electrical contacts must be protected from lubricant films. Examples are the relay contacts of telephone systems or butt contacts where no sliding occurs during actuation. The NyeBar barrier films are fluorinated polymers applied from very dilute solvent solutions which, by covering a surface with an ultra-thin film of extremely low surface energy, can render that surface non-wettable by oils or other fluids. Oil creep from nearby lubricated areas can be controlled or eliminated. Current flow and signal integrity are not affected by the presence of a very thin NyeBar film.

Send details of your product application and a sample of a recommended lubricant will be sent at no charge. Write for Nye's 12-page summary catalog describing specialty products for electrical contacts.

LEADERSHIP IN PC BOARD RETAINER TECHNOLOGY

- Electronic Packaging Products
- Custom Metal Fabrication
- Printed Circuit Board Hardware

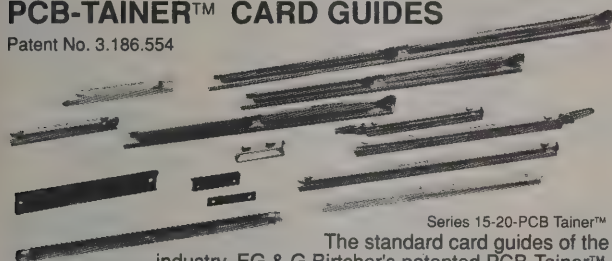

## SERIES 340-WEDGE-TAINER™

EG&G BIRTCHER'S Series 340 Wedge-Tainer™ locking retainers are designed for heavy shock, vibration, and heat dissipation, in cold plate/heat sinking applications.

## PCB-TAINER™ CARD GUIDES

Patent No. 3,186,554

The standard card guides of the industry, EG & G Birtcher's patented PCB-Tainer™ card guides provide an economical way of securely fastening PC boards. EG & G Birtcher PCB-Tainer™ card guides come in standard or made-to-spec versions. They are made of cold rolled steel or beryllium copper for rivet, weld or adhesive bonding installation. They provide heat dissipation, electrical grounding, retention in shock and vibration applications.

## LOK-TAINER® RETAINERS

Pat. No. 3,970,198

Series 24  
Lever Actuated  
Lok-Tainer®

Series 127  
Screw Actuated Lok-Tainer®

EG&G Birtcher patented screw and lever actuated Lok-Tainer® locking retainers are designed to provide high resistance to heavy shock and vibration while maintaining maximum contact for heat dissipation.

## SERIES 40 WEDGE LOK™

Meets or exceeds the performance requirements of drawing 84103 Rev. E, Defense Electronics Supply Center, Dayton, OH 45444.

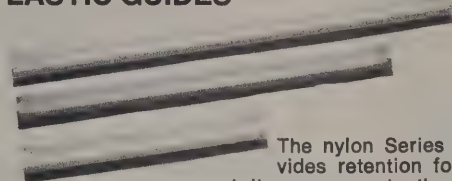

## EXTRACTORS CARD HANDLES, AND INJECTOR/EXTRACTORS FOR PC BOARDS

Injectors/Extractors

Extractors provide for quick, damage free, removal of PC card. Injector/Extractors function in two different directions allowing the card to be easily inserted into the connector as well as providing quick removal.

## PLASTIC GUIDES

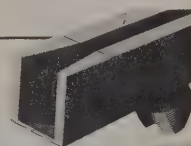

Series 26  
Plastic Guides

The nylon Series 26 Guide provides retention for the PC card and its components through a unique gripping action. It is self-lubricating, non conductive with superior strength and durability.

## DEEP CHANNEL GUIDES

Nylon Type 6/6  
For 1/8" and 1/2" P.C.B.'s

## SPACE SAVER GUIDES

Nylon Type 6/6  
For 1/8" P.C.B.'s

## WEDGE-LOK™ LOCKING RETAINERS

For high-rel performance in commercial, industrial or military applications, secure PC boards with Wedge-Lok™ locking card retainers. **LOW COST STANDARD VERSIONS ARE AVAILABLE FROM STOCK.**

## SERIES 41 WEDGE-LOK™ RETAINERS LOW PROFILE VERSION OF 40 SERIES

## SELF-ALIGNING FIVE-PIECE WEDGE-LOK™ RETAINERS

Pat. No. 4,823,951

EG&G Birtcher offers self-aligning Wedge-Lok™ Series, 40-5 and 42-5 designed for heavy shock, vibration and heat dissipation, in cold plate/heat sinking applications. Features zero entry force for insertion and removal of PC boards. Other standard and custom styles available. Visual indicator for locked and unlocked position available as an option.

LEADERSHIP IN DESIGN SOLUTIONS TO YOUR PCB SHOCK, VIBRATION AND THERMAL PROBLEMS

### \* NOTCHED TO FIT 22/44 CARD EDGE CONNECTOR. NOTCHED BOARDS AVAILABLE IN ANY SIZE.

Special cuts available in sensitized boards to 12" x 18", non-sensitized boards available to 36" x 48". There is no charge for special cuts. Please specify coating and type from above chart. Perforated breadboards available in various sizes and patterns: .042, .062, .093. MICROWAVE MATERIAL AVAILABLE.

POSITIVE ARTWORK

NEGATIVE ARTWORK

Copper clad laminates available as:

1. Uncoated;
2. Negative resist coating; or
3. Positive resist coating.

WE ARE AFFILIATED WITH A QUALITY PC HOUSE FOR PROTOTYPES AND SMALL TO LARGE RUNS AS WELL AS MULTI-LAYER BOARDS AND PHOTO PLOT SERVICES.

### ELECTRONIC CHEMICALS

For the preparation and preservation of your PC Boards and Electronic Devices.

**COMPUTER CLEANER—NO CFCs**  
**CONTACT CLEANERS**  
**CONFORMAL COATINGS—NO CFCs**  
**DEGREASERS**  
**DEVELOPERS**  
**DRIVE WHEEL CLEANER**  
**ETCHANTS—feric chloride, sodium persulfate**  
**FREEZER SPRAY—NO CFCs**  
**PLOTTER PEN RESIST INK AND SOLVENT**  
**RESIST INK PENS—fine, med., extra fine**  
**STRIPPERS**  
**TAPE HEAD CLEANER**  
**TAPE HEAD CLEANING STICKS & FOAM SWABS**

### NEW

#### POSITIVE PHOTO RESIST #PC197

A liquid Positive Photo Resist which is used to coat your own materials in order to make them photo-sensitive. A high quality Positive Resist which will cause less pinholing. Available in 2 oz., 8 oz., 16 oz., 32 oz., 1 gal. sizes.

### NEW

#### DRILLED BREADBOARDS

Unclad; 1 oz 1 side copper; 1 oz 2 sides copper. Glass epoxy, "P" pattern, .042 holes on .1 centers. Available up to 12"x18".

### No. PC557F ULTRAVIOLET LIGHT SOURCE

Use to expose positive or negative sensitized material. 15W 18" bi-pin

### CIRCUIT BOARD DRILL BITS

Specially designed for smooth, burr-free drilling in printed circuit boards. Made of high speed tool steel or CARBIDE.

### CARBIDE BITS AVAILABLE IN THE ABOVE SIZES

### KIT 551

Photo reversing kit produces professional positives or negatives: 3 sheets 4" x 6" film, developer, fixer, toner, 75W black light bulb and instructions.

### NEW CLEAR FILM

### KIT 650

Photo-etch kit using boards with negative DRY FILM resist: 2-3" x 4" neg. sensitized single side boards, exposure glass, tray, chemicals, drill bit, spring clips and complete instructions and exposure lamp.

### NEW KIT 750

Photo-etch kit using 2 sided boards with either negative Dry Film or Positive Acting Resist. Specify 750F or 750P. Contains: 2-3x4"sens. boards, exposure glass, spring clips, chemicals, exposure lamp, drill bit, and more. Complete instructions.

### KIT 850

Photo-etch kit using boards with positive resist: 2-3" x 4" pos. sensitized single side boards, glass, tray, pen, art aids, chemicals, clips, drill bit, exposure lamp and complete instructions.

### NEW

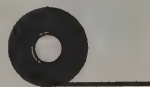

#### NON-AEROSOL PRODUCTS

Non-pressurized products that are SAFER to use. These products have a non-aerosol hand pump that allows control of the force of the product that is being used. The nozzle is adjusted to a choice of spray or stream.

**CONTACT CLEANER**  
 #999-6P 6 oz.  
**PENETRATING OIL**  
 #818-16P 16 oz.

### DRAFTING AIDS

#### PC22

#### DRAFTING TAPE

648" rolls of etch resist tape in widths of: .031, .040, .062, .080, .093, .125, .156, .200 and .250 inches. Pressure sensitive.

#### PC23

#### DONUT TERMINAL PADS

Pressure sensitive, etch resistant in sizes from .062" with .031 hole up to .500" with .062" hole in ten sizes. Pkgs of 40, 250 or 1000 depending on size.

#### PC28

#### DUAL IN-LINES

Pressure sensitive, .002" accuracy. 1:1 and 2:1 ratio. Pin pads: 8, 14, 16, 18, 20, 22, 24, 28 and 40. Pkgs. of 8 or 100.

### SUPER JET AIR - COMPUTER CLEANER

#### NEW-ENVIRONMENTALLY SAFER

#### Aerosol Dust Remover

SUPER JET AIR is a pressurized chemical at 120 PSI which is used for blowing dust, lint and dirt from electronic instruments as well as projection and camera lenses. It is ideal to use in computers and other precision instruments where a moisture and lint free dust remover is necessary. Replaces the use of a brush or cloth which may disturb circuitry or break fine wiring. NEW VARIABLE SPEED TRIGGER CONTROL.

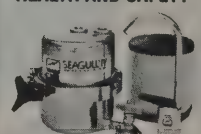

#### SUPER JET AIR

No. 9 E 10 oz. spray can

#### No CFCs

### HEALTH AND SAFETY

# The OMNI Switch PCB

## Membrane Switches Flexible Printed Circuits Printed Circuit Boards

- Single, Double, Multi-Layers PCB
- Carbon-Printed Through Holes PCB
- Silver Ink Jumper PCB

Besides the good quality, price, and delivery of OSI, there's more you can rely on:

### • Fast Shipping

You can receive the board in two days by airfreight. (Production time is three weeks.)

### • Quality Shipping

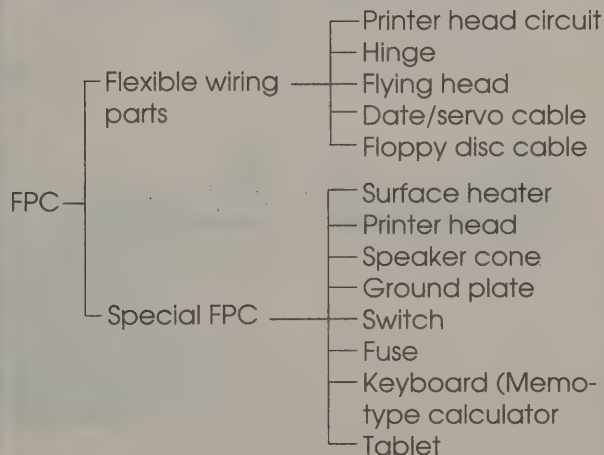

Although you won't have a problem with OSI, we still guarantee you the full replacement or compensation of loss for defective PCB.

## Membrane Switch

**Examples of what OMNI Does On Membrane Switches:**

- Embossed Overlays
- Polyester and Metal domes
- UV Curing on face
- EMI, REI, and ESD shielding
- Graphics in Polyester or Polycarbonate
- Keyboard
- Solder pin Attachment
- Multi-color, reverse side printing

# ANYTHING IS POSSIBLE WHEN YOU HAVE THE RIGHT CONNECTIONS

What's your pleasure? Control applications? Instrumentation? Automation?

You name it. Altech can help you achieve it — with unmatched speed, versatility and economy. And at a level of quality that meets or exceeds national and international standards.

We offer a wide variety of snap-on DIN rail mount control devices—from basic to special function terminal blocks to interface and electronic modules, circuit breakers and more—as well as a host of products for panel mount and printed circuit board applications.

Look to Altech for the finest in:

- ▶ Terminal Blocks
- ▶ Enclosures
- ▶ Circuit Breakers
- ▶ Custom-Built DIN Rail Assemblies

The key word is "service." At Altech, we work closely with our customers to provide solutions that meet stringent requirements. Superior products and state-of-the-art technology at competitive prices. That is the Altech commitment. That is the Altech guarantee.

**Please contact us for more product information.**

**Connector terminology** is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

**Shape**—Circular, cylindrical, and rectangular.

**Electrical application**—High voltage, RF, microwave, input/output, etc.

**Mechanical application**—Printed circuit, rack & panel, cable, etc.

**Conductor type**—Coaxial, flat cable, ribbon cable, flex circuit, etc.

**Termination method**—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

**Contact**: The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

**Contact alignments**: Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

**Male vs. female**: In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

**Closed entry**: A female contact which prevents entry of a male contact larger than a specific size.

**Open entry**: A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

**Hermaphrodite**: Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

**Hermetic seal**: Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

**Waterproof seal**: May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

**Printed circuit connector**: Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

**Edgeboard**. May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

**Two-piece**: One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

**Readout**: Describes the arrangement at the terminating edge of a PC board.

May be single or double. A double read-out PC board has termination strips on each side not usually interconnected.

**Ribbon connectors**: A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

**Ribbon contact connector**: Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

**Solderless terminal**: Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

**Crimp termination**: A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

**Insulation displacement**: Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

**Service rating**: The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

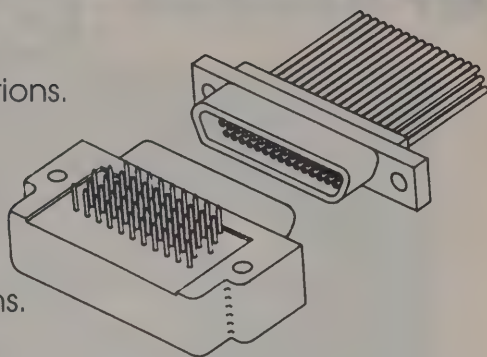

**Withstanding voltage**: Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

# Connectors

- Printed wiring board and cable to board applications.
- Right angle and straight through pin to socket connectors to **Mil-C-55302**.
- Right angle and straight through Micro-miniature connectors to **Mil-C-83513**.
- Also designs for high reliability, custom applications.

## .100"

### W-Series

2-, 3-, and 4- row subminiature connectors on .100 centers from 6 to 200+ contacts. Qualified to **Mil-C-55302**. Many modified and custom designs available.

## .075"

### R-Series

2-, and 3- row subminiature connectors on .075" centers from 10 to 300 contacts. Qualified to **MIL-C-55302**. Also many modified and custom designs, including SMT types, available.

## .050"

### M-Series

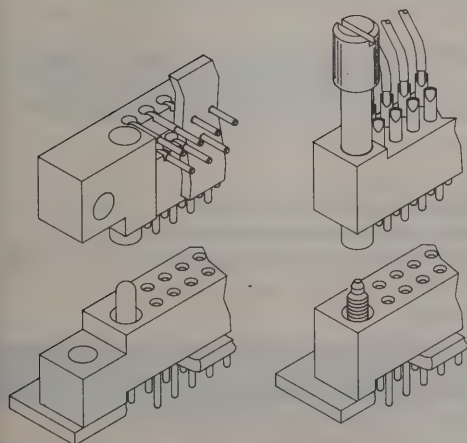

2-, 3- and 4- row microminiature connectors on .050" centers from 9 to 100 contacts. Qualified to **Mil-C-83513**. Also many modified and custom designs, including SMT and STRIP configurations, available.

## CABLE HARNESS

Military and commercial discrete wire, shielded, overmolded, cad design service and custom specification our speciality.

Distributors: Hall-Mark: .050" and .075", B.G. Electronics, Carrollton, Texas; D.C. Electronics, Timonium, Maryland; Erik-A Electronics, Monrovia, California; Gemini Electronics, Elmsford, New York; Spirit Electronics, Scottsdale, Arizona.

# ALDEN

## Standard Products

Alden Products Company has been designing, tooling, and producing quality standard and custom insert molded products since 1929. We are innovative pacesetters combining interconnect expertise and advanced molding technology to serve customers in the medical, environmental, military, instrumentation, laser, and business equipment markets worldwide.

### CRT Anode Connectors

Standard and low profile connectors for most applications.

### High Voltage Connectors

A complete line of connectors for applications to 75KVDC.

### Detachable Feedthroughs

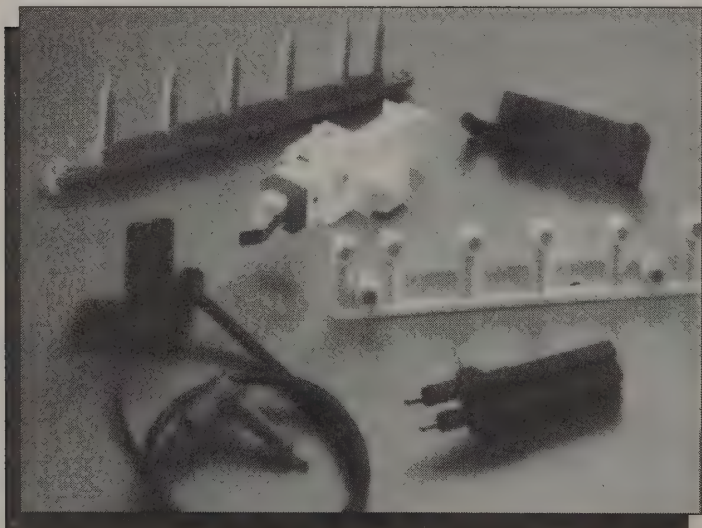

Dielectric oil-immersible feedthrough connectors.

### Environmental Connectors

Autocoupling and sealing connectors for signal, high voltage, and high amperage.

## Custom Products

Alden also specializes in developing problem-solving connectors and devices. Our custom designed solutions include molded circuitry, ozone exhaust systems, EMI/RFI suppressors, adapters, electro-mechanical devices, molded housings, and specialized cable assemblies. Often many functions can be combined into unitized assemblies for lower acquisition costs and single-sourcing.

### Connectors and Contacts

Complete capabilities from concept to production to fulfill any interconnect or contact requirement.

### Encapsulated Circuitry

Molded components, circuits and networks, or combined with other functions.

### Cables and Electromechanical Assemblies

Complete harnessing and fabrication capabilities for standard terminations and custom cables.

### Prototypes

Fast delivery of machined or liquid resin cast functional prototypes for developmental or short run parts.

*To obtain a custom product from Alden, simply fax your electrical, mechanical, and environmental requirements for our review. We will provide a prompt quote and design concept for your consideration. Skilled craftspeople using advanced equipment produce quality prototypes for functional testing in the shortest possible time at minimal cost, and allows for design modifications prior to production tooling.*

All dimensions are in inches

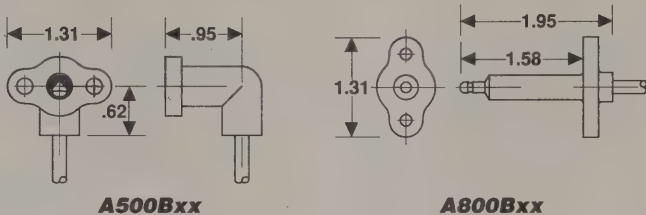

CRT Anode Connectors

- J200YCxx** For JEDEC styles J1-21, J1-22, J1-30  
Silicone rubber insert molded boot
- J300Bxx** For JEDEC style J1-21
- J400Bxx** Thermoplastic elastomer cap
- J203Bxx** For JEDEC style J1-21  
Silicone rubber cap

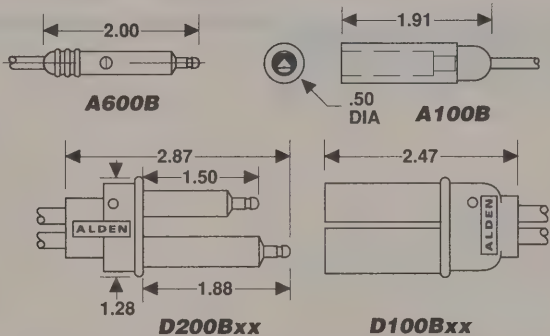

10KVDC

- Molded in 94V-O flame retardant polypropylene
- 30 KVDC UL/CSA listed wire (xx specifies length)
- Molded directly to wire for optimum performance
- Other styles and custom modifications available

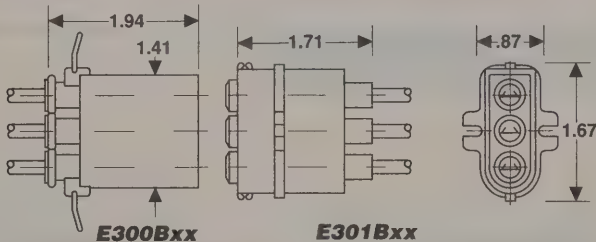

15KVDC

- Molded in 94V-O flame retardant polypropylene
- 30 KVDC UL/CSA listed wire (xx specifies length)
- Molded directly to wire for optimum performance
- Other styles and custom modifications available
- Industry standard for HeNe lasers
- Panel mount styles available

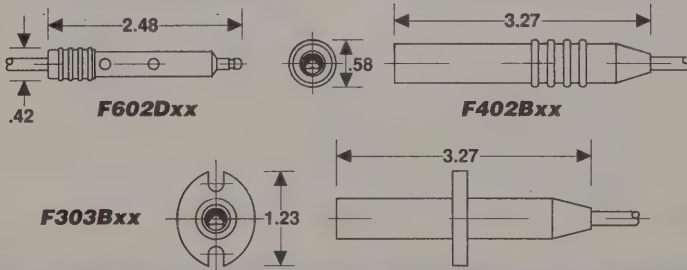

20KVDC

- Polarized 2 and 3 circuit connectors
- Molded in 94V-O flame retardant polypropylene
- 30 KVDC UL/CSA listed wire (xx specifies length)
- Molded directly to wire for optimum performance
- Locking rings for added retention
- Custom modifications available

25KVDC

- Molded in 94V-O flame retardant polypropylene
- 30 KVDC UL/CSA listed wire (xx specifies length)
- Molded directly to wire for optimum performance
- Other styles and custom modifications available

# ALDEN

All dimensions are in inches

## 35KVDC

- Twist-locking with moisture resistant seal
- 40 KVDC UL/CSA listed wire (xx specifies length)
- Molded directly to wire for optimum performance
- Other wires and custom modifications available

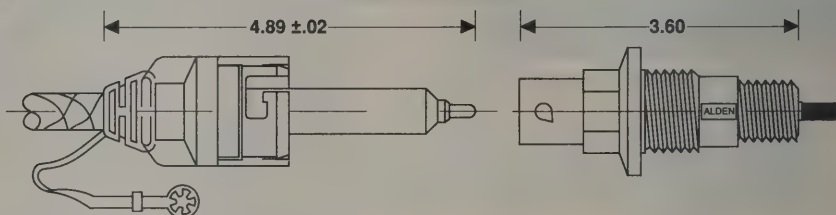

B200Dxx

B100Dxx

## 55KVDC

- Oil tight receptacle
- Right angle plug option
- Low profile options
- J-slot mating action
- Mammography x-ray standard

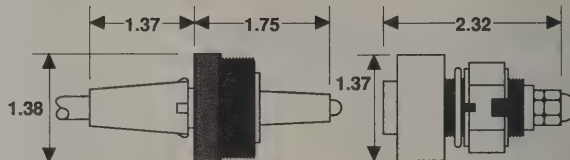

P503BHxx

P500

## 60KVDC

- Miniature size
- Oil tight receptacle
- Square or round flange option
- Self-grounded, fully shielded design
- Easily installed, no potting needed

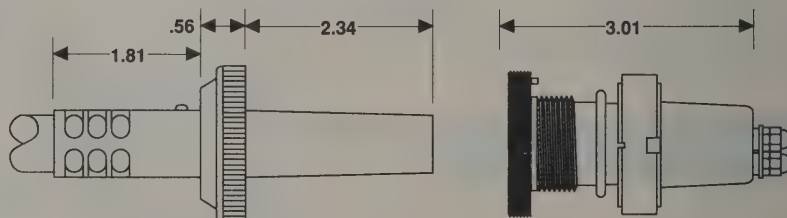

P602RSxx

P601

## 75KVDC

- Half the size of federal standard 72
- Oil tight receptacle
- Dry mate, no grease required
- 1-5 pins available
- Polarized for easy keying

P701QSxx

P700

## Auto-Coupling Connector Systems

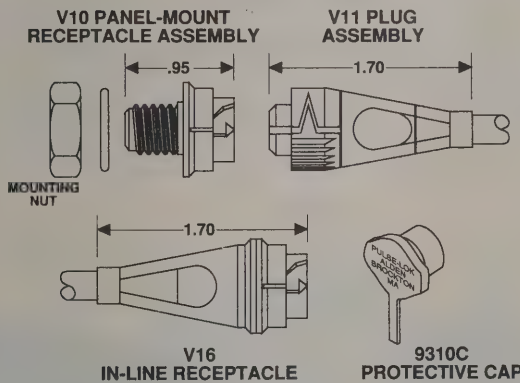

### Features

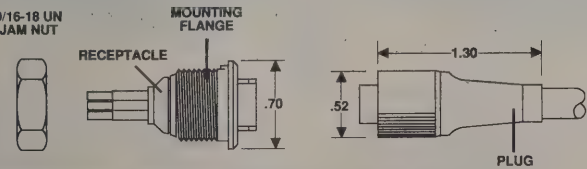

- Autocoupling self-locking, quick release
- Blind mating aids positive, sequential keying
- Environmentally sealed splash-proof, submersible
- Corrosion resistant rugged, lightweight plastic housing
- Low insertion force precision formed, gold plated contacts

## PULSE-LOK™

### AVAILABLE HOUSING STYLES

## mini-pulse

New MINI-PULSE series connector features the same autocoupling and sealing as the PULSE-LOK series in a reduced size. Consult our factory for details.

Alden Product's V1 Series, *PULSE-LOK* connector system features an innovative coupling mechanism that sets new performance standards for multi-pole interconnects. This user-friendly connector provides both audible and visible feedback that connector pairs are fully mated. Fool-proof, quick-mate features qualify this package as an ideal candidate for instrumentation, emergency medical and consumer applications.

### Our Standard, Your Custom

*PULSE-LOK* connectors are available in several standard contact and wire configurations to meet most signal, high current and high voltage applications. Custom Contact requirements are easily accommodated by the *PULSE-LOK* connector's modular construction.

### V1 and V2 Series Part Numbering Code Table

## THE RIGHT CONNECTION

Today's design engineer can achieve modern, reliable, cost-effective wire terminations with Altech's terminal blocks. As systems and equipment have become more sophisticated, barrier strips and wire lugs are no longer efficient for electrical connections. Altech's terminal blocks meet today's requirements for high density, dead front safety, modularity, flexibility, reliability, reduced cost, plus national and international acceptance. Altech will make your design and selection process an easy one.

- PC Board - Pluggable
- PC Board - Fixed
- Eurostrips®
- Panel Mount
- DIN Rail Mount
- Interface and Electronic Modules

At Altech, we work closely with our customers to provide tailor-made solutions that meet stringent individual requirements. Superior products, state-of-the-art technology, and helpful people. Whether your application calls for standard or custom designs, Altech provides cost effective solutions in a timely manner.

## PRINTED CIRCUIT BOARD TERMINAL BLOCKS - PLUGGABLE

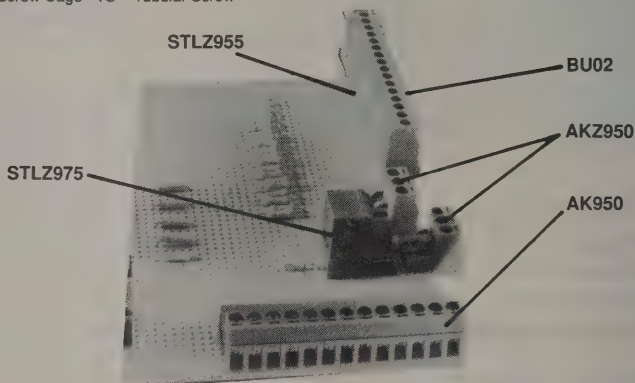

Two-piece plug and header design "pluggables" speed and simplify board and device replacement, and reduce costly downtime and misconnections. Altech offers a wide selection of single mold and modular terminal blocks with screw-cage or economical tubular screw clamps.

- Single Mold or Modular Construction
- Screw-Cage or Tubular Screw Clamps
- Front and Top Wire Entry
- Metric and Inch Spacings
- Optional Keying, Factory Marking
- UL/CSA Recognized, IEC/VDE

Screw-Cage Clamp Design Pluggable Terminal Blocks

## PLUGS

### AK950, AKZ950 Plugs

Wire entry in same direction as plug-in. 5mm (.197") or 5.08mm (.200") pin spacing. 22-12 AWG. AK950 mates with STL950, STLZ955, STLZ975 headers.

### AK950 Plug 5mm (.197") pin spacing

| No. of Poles* | Type     | Length mm (in.) |
|---------------|----------|-----------------|
| 2             | AK950/2  | 10.0 (.39)      |
| 3             | AK950/3  | 15.0 (.59)      |
| 4             | AK950/4  | 20.0 (.79)      |
| 5             | AK950/5  | 25.0 (.99)      |
| 6             | AK950/6  | 30.0 (1.18)     |
| 7             | AK950/7  | 35.0 (1.38)     |
| 8             | AK950/8  | 40.0 (1.58)     |
| 10            | AK950/10 | 50.0 (1.97)     |
| 12            | AK950/12 | 60.0 (2.36)     |
| 14            | AK950/14 | 70.0 (2.76)     |
| 15            | AK950/15 | 75.0 (2.95)     |

### AKZ950 Plug 5.08mm (.200") pin spacing

| No. of Poles* | Type      | Length mm (in.) |
|---------------|-----------|-----------------|
| 2             | AKZ950/2  | 10.16 (.40)     |
| 3             | AKZ950/3  | 15.24 (.60)     |
| 4             | AKZ950/4  | 20.32 (.80)     |
| 5             | AKZ950/5  | 25.40 (1.00)    |
| 6             | AKZ950/6  | 30.48 (1.20)    |
| 7             | AKZ950/7  | 35.56 (1.40)    |
| 8             | AKZ950/8  | 40.64 (1.60)    |
| 10            | AKZ950/10 | 50.80 (2.00)    |
| 12            | AKZ950/12 | 60.96 (2.40)    |
| 14            | AKZ950/14 | 71.14 (2.80)    |
| 15            | AKZ950/15 | 76.22 (3.00)    |

\* Available in up to 24 poles by special order.

## PLUGGABLE, SCREW-CAGE CLAMP DESIGN

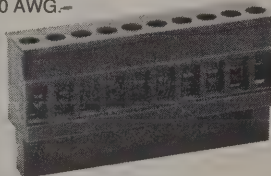

For industrial applications and/or applications where frequent wire terminations occur. Single mold offers maximum strength. Plugs mate with headers listed below. UL, CSA, IEC/VDE, 15A, 300V. Standard Color: Green.

- Industry Standard Compatible
- Horizontal or Vertical, Open or Closed End Headers
- Single and Double Level Headers
- Captive Screws

### BU02 Plug

Vertical construction with grip top makes it easy to insert and remove plug. Wire entry perpendicular to plug-in direction, on locking tab side. 5.08mm (.200") pin spacing. 22-10 AWG.

Mate with STLZ950, STLZ955, STLZ970, STLZ975 headers.

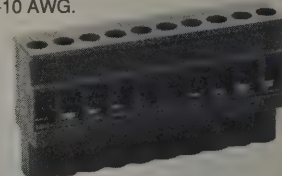

| No. of Poles* | Type    | Length mm (in.) |
|---------------|---------|-----------------|
| 2             | BU02/2  | 10.16 (.40)     |
| 3             | BU02/3  | 15.24 (.60)     |
| 4             | BU02/4  | 20.32 (.80)     |
| 5             | BU02/5  | 25.40 (1.00)    |
| 6             | BU02/6  | 30.48 (1.20)    |
| 7             | BU02/7  | 35.56 (1.40)    |
| 8             | BU02/8  | 40.64 (1.60)    |
| 10            | BU02/10 | 50.80 (2.00)    |
| 12            | BU02/12 | 60.96 (2.40)    |
| 14            | BU02/14 | 71.14 (2.80)    |
| 15            | BU02/15 | 76.22 (3.00)    |

\* Available in up to 16 poles

### BU04 Plug

Vertical construction with grip top makes it easy to insert and remove plug. Wire entry perpendicular to plug-in direction, opposite locking tab side. 5.08mm (.200") pin spacing. 22-10 AWG.

Mate with STLZ950, STLZ955, STLZ970, STLZ975 headers.

| No. of Poles* | Type    | Length mm (in.) |
|---------------|---------|-----------------|
| 2             | BU04/2  | 10.16 (.40)     |
| 3             | BU04/3  | 15.24 (.60)     |
| 4             | BU04/4  | 20.32 (.80)     |
| 5             | BU04/5  | 25.40 (1.00)    |
| 6             | BU04/6  | 30.48 (1.20)    |
| 7             | BU04/7  | 35.56 (1.40)    |
| 8             | BU04/8  | 40.64 (1.60)    |
| 10            | BU04/10 | 50.80 (2.00)    |
| 12            | BU04/12 | 60.96 (2.40)    |
| 14            | BU04/14 | 71.14 (2.80)    |
| 15            | BU04/15 | 76.22 (3.00)    |

## HEADERS FOR SCREW-CAGE CLAMP PLUGS

### STL950/STL2950 Headers Horizontal Closed End\*\*

Industry standard compatible, single mold construction; color: green. STL950 mates with AK950. STL2950 mates with BU04, BU02, AKZ950 Plugs. 5.00mm (.197") and 5.08mm (.200") pin spacing. (Also available with open ends.)

#### STL950 5.00mm (.197") pin spacing

| No. of Poles* | Type        | Length mm (in.) |
|---------------|-------------|-----------------|
| 2             | STL950/2-w  | 11.20 (.44)     |
| 3             | STL950/3-w  | 16.20 (.64)     |
| 4             | STL950/4-w  | 21.20 (.84)     |
| 5             | STL950/5-w  | 26.20 (1.03)    |
| 6             | STL950/6-w  | 31.20 (1.23)    |
| 7             | STL950/7-w  | 36.20 (1.43)    |
| 8             | STL950/8-w  | 41.20 (1.62)    |
| 10            | STL950/10-w | 51.20 (2.02)    |
| 12            | STL950/12-w | 61.20 (2.40)    |
| 14            | STL950/14-w | 71.20 (2.80)    |
| 15            | STL950/15-w | 76.20 (3.00)    |

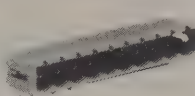

#### STL2950 5.08mm (.200") pin spacing

|    |              |              |
|----|--------------|--------------|
| 2  | STL2950/2-w  | 11.36 (.45)  |
| 3  | STL2950/3-w  | 16.44 (.65)  |
| 4  | STL2950/4-w  | 21.52 (.85)  |
| 5  | STL2950/5-w  | 26.60 (1.05) |
| 6  | STL2950/6-w  | 31.68 (1.25) |
| 7  | STL2950/7-w  | 36.76 (1.45) |
| 8  | STL2950/8-w  | 41.84 (1.65) |
| 10 | STL2950/10-w | 52.00 (2.05) |
| 12 | STL2950/12-w | 62.16 (2.45) |
| 14 | STL2950/14-w | 72.32 (2.85) |
| 15 | STL2950/15-w | 77.40 (3.05) |

\* Available in up to 24 poles by special order  
\*\* Open-End Available

### STL955/STL2955 Headers Vertical Closed End\*\*

Industry standard compatible, single mold construction; color: green. STL955 mates with AK950. STL2955 mates with BU04, BU02, AKZ950 Plugs. 5.00mm (.197") and 5.08mm (.200") pin spacing. (Also available with open ends.)

#### STL955 5.00mm (.197") pin spacing

| No. of Poles | Type        | Length mm (in.) |
|--------------|-------------|-----------------|
| 2            | STL955/2-w  | 11.20 (.44)     |
| 3            | STL955/3-w  | 16.20 (.64)     |
| 4            | STL955/4-w  | 21.20 (.84)     |
| 5            | STL955/5-w  | 26.20 (1.03)    |
| 6            | STL955/6-w  | 31.20 (1.23)    |
| 7            | STL955/7-w  | 36.20 (1.43)    |
| 8            | STL955/8-w  | 41.20 (1.62)    |
| 10           | STL955/10-w | 51.20 (2.02)    |
| 12           | STL955/12-w | 61.20 (2.40)    |
| 14           | STL955/14-w | 71.20 (2.80)    |
| 15           | STL955/15-w | 76.20 (3.00)    |

#### STL2955 5.08mm (.200") Pin spacing

|    |              |              |
|----|--------------|--------------|
| 2  | STL2955/2-w  | 11.36 (.45)  |
| 3  | STL2955/3-w  | 16.44 (.65)  |
| 4  | STL2955/4-w  | 21.52 (.85)  |
| 5  | STL2955/5-w  | 26.60 (1.05) |
| 6  | STL2955/6-w  | 31.68 (1.25) |
| 7  | STL2955/7-w  | 36.76 (1.45) |

| 10 | STL2955/10-w | 52.00 (2.05) |
| 12 | STL2955/12-w | 62.16 (2.45) |
| 14 | STL2955/14-w | 72.32 (2.85) |
| 15 | STL2955/15-w | 77.40 (3.05) |

### STL2970/STL2975 Headers Vertical and Horizontal Open End

Double level, industry standard compatible, modular construction; color: green. Mates with AKZ950 and BU02, BU04 Plugs. 5.08mm (.200") pin spacing.

#### STL2970 5.08mm (.200") pin spacing

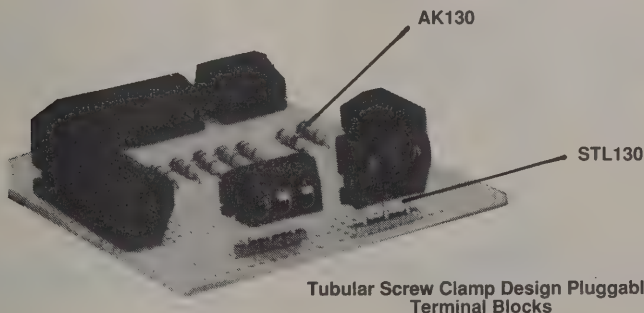

| No. of Poles* | Type       | Length mm (in.) |
|---------------|------------|-----------------|
| 4             | STL2970/4  | 12.26 (.48)     |
| 6             | STL2970/6  | 17.34 (.68)     |
| 8             | STL2970/8  | 22.42 (.88)     |
| 10            | STL2970/10 | 27.50 (1.08)    |
| 12            | STL2970/12 | 32.58 (1.28)    |
| 14            | STL2970/14 | 37.66 (1.48)    |
| 16            | STL2970/16 | 42.74 (1.68)    |
| 18            | STL2970/18 | 47.82 (1.88)    |
| 20            | STL2970/20 | 52.90 (2.08)    |
| 22            | STL2970/22 | 57.98 (2.28)    |
| 24            | STL2970/24 | 63.06 (2.48)    |

#### STL2975 5.08mm (.200") pin spacing

|    |            |              |
|----|------------|--------------|
| 4  | STL2975/4  | 12.26 (.48)  |
| 6  | STL2975/6  | 17.34 (.68)  |
| 8  | STL2975/8  | 22.42 (.88)  |
| 10 | STL2975/10 | 27.50 (1.08) |
| 12 | STL2975/12 | 32.58 (1.28) |
| 14 | STL2975/14 | 37.66 (1.48) |

| 18 | STL2975/18 | 47.82 (1.88) |
| 20 | STL2975/20 | 52.90 (2.08) |
| 22 | STL2975/22 | 57.98 (2.28) |
| 24 | STL2975/24 | 63.06 (2.48) |

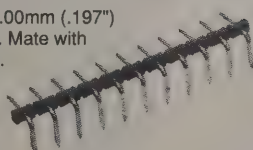

## PLUGGABLE, TUBULAR SCREW CLAMP DESIGN

For cost sensitive, lighter duty requirements. Modular construction offers convenience of simplified ordering and reduced inventory. Interlock 2 and 3 pole modules for multipole assemblies. Standard wire protectors. Dual contact system provides optional front and top wire entry. UL, CSA, IEC/VDE. 5.00mm (.197") pin spacing. 22-14 AWG, 10A, 300V, Standard Color: Gray. Straight and right angle open pin headers are supplied in strips up to 12 poles, or in 24 pole strips for field cutting.

### STL140 Right Angle Header

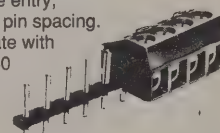

Pin-Type, 5.00mm (.197") pin spacing. Mate with AK130 plug.

| No. of Poles | Type      | Length mm (in.) |
|--------------|-----------|-----------------|
| 2            | STL140/2  | 10.0 (.39)      |
| 3            | STL140/3  | 15.0 (.59)      |
| 4            | STL140/4  | 20.0 (.79)      |
| 5            | STL140/5  | 25.0 (.99)      |
| 6            | STL140/6  | 30.0 (1.18)     |
| 7            | STL140/7  | 35.0 (1.38)     |
| 8            | STL140/8  | 40.0 (1.58)     |
| 9            | STL140/9  | 45.0 (1.77)     |
| 24           | STL140/24 | 120.0 (4.72)    |

### AK130 Plug

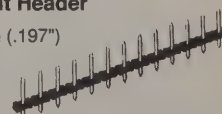

Front or top wire entry, 5.00mm (.197") pin spacing. Color: Gray. Mate with STL130, STL140 headers.

| No. of Poles | Type      | Length mm (in.) |
|--------------|-----------|-----------------|
| 2            | AK130/2wp | 10.0 (.39)      |
| 3            | AK130/3wp | 15.0 (.59)      |
| 4            | AK130/4wp | 20.0 (.79)      |
| 5            | AK130/5wp | 25.0 (.99)      |
| 6            | AK130/6wp | 30.0 (1.18)     |
| 7            | AK130/7wp | 35.0 (1.38)     |
| 8            | AK130/8wp | 40.0 (1.58)     |
| 9            | AK130/9wp | 45.0 (1.78)     |

### STL130 Straight Header

Pin-Type, 5.00mm (.197") pin spacing. Mate with AK130 plug.

| No. of Poles | Type      | Length mm (in.) |
|--------------|-----------|-----------------|
| 2            | STL130/2  | 10.0 (.39)      |
| 3            | STL130/3  | 15.0 (.59)      |
| 4            | STL130/4  | 20.0 (.79)      |
| 5            | STL130/5  | 25.0 (.99)      |
| 6            | STL130/6  | 30.0 (1.18)     |
| 7            | STL130/7  | 35.0 (1.38)     |
| 8            | STL130/8  | 40.0 (1.58)     |
| 9            | STL130/9  | 45.0 (1.77)     |
| 24           | STL130/24 | 120.0 (4.72)    |

## PRINTED CIRCUIT BOARD TERMINAL BLOCKS - FIXED

Altech's terminal blocks for fixed mounting provide the optimum selection to meet your application requirements. We offer both screw-cage clamp and cost-effective tubular screw clamp designs which provide high density, dead front safety and flexibility. Their modular construction offers the convenience of simplified ordering and reduced inventory. Interlock 2 and 3 pole modules to create multipole assemblies. Order preassembled or assemble yourself. Several wire entry options facilitate wiring and increase accessibility.

### Quick Reference to Fixed Terminal Blocks

### FIXED, SCREW-CAGE CLAMP DESIGN

Rock solid, reliable connections for demanding industrial applications and applications where frequent wire terminations occur. Modular 45°, front or top wire entry. Closed bottom. UL, CSA, IEC/VDE. 22-12AWG, 15A, 300V. Standard Color: Type AK300 is dark gray, all other types are green.

- Front, Top or 45° Wire Entry
- Single and Double Level

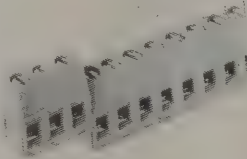

#### AK300

45° wire entry; 12.5mm (.49") high; x 12.5mm (.49") deep; 5.0mm (.197") pin spacing; color: gray.

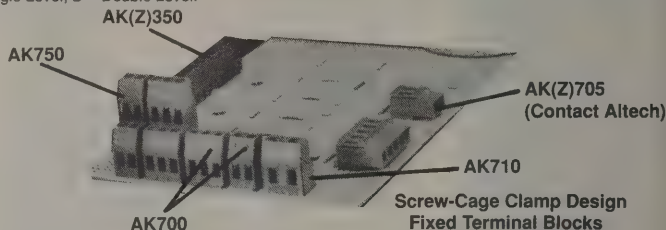

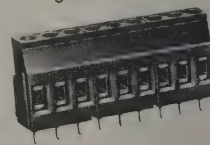

#### AK350

Front wire entry; 13.5mm (.53") high; x 9.0mm (.35") deep; 5.0mm (.197") pin spacing; color: green.

#### AK700

Front wire entry; 19.0mm (.75") high; x 10.5mm (.41") deep; 5.0mm (.197") pin spacing; color: green.

## FIXED, TUBULAR SCREW CLAMP DESIGN

Economical tubular screw clamps provide reliable connections for lighter duty applications with strict budgets and infrequent wire terminations. Modular construction, front or top wire entry with wire protectors. UL, CSA, IEC/VE. 300V, 15A, 22-14 AWG. Standard Color: gray

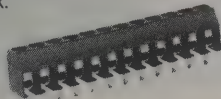

- Front and Top Wire Entry
- Wire Protector Standard (Available Without Wire Protector)

Tubular Screw Clamp Design  
Fixed Terminal Blocks

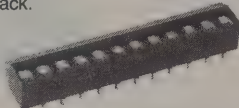

### AK550

Front wire entry; 8.3mm (.33") high x 6.5mm (.26") deep; 3.5mm (.138") pin spacing; color: black.

### AK555

Top wire entry; 6.5mm (.26") high x 8.3mm (.33") deep; 3.5mm (.138") pin spacing; color: black.

### AK110

Front wire entry; 12.5mm (.49") high x 9mm (.35") deep; 5.0mm (.197") pin spacing; color: green.

| No. of Poles** | Type     | Length mm (in.) |

## DIN RAIL MOUNT TERMINAL BLOCKS

Altech's DIN rail mount terminal blocks combine multiple functions on a standard rail, enhancing design capabilities, saving space and reducing installation time. Screw-cage clamps increase efficiency and reliability.

- Feed-Through, High Current, Multi-Level, Ground
- Disconnect, Fuse, Thermocouple, Integrated Electronics
- Assemblies for 15, 32, and 35mm DIN Rail

The standard terminal blocks feature a universal foot for 35mm or 32mm DIN rails. Ground blocks are designed for either 35mm or 32mm rail, as indicated by the suffix in their Type designation. Designed for high density, they all feature screw-cage clamps. Material: polyamide 6.6. Voltage ratings: 600V and 300V, UL, CSA, VDE. All blocks have dead front designs to prevent dangerous electrical shocks and shorts.

Select the appropriate terminal block for your application from TABLE I in conjunction with the SELECTOR ILLUSTRATION number (SI#). Then choose the accessories required for each terminal block selected from TABLE II in conjunction with the SELECTOR ILLUSTRATION number (SI#). Select DIN Rail, Marking Tags and Ferrules as required (see next page).

### SELECTOR ILLUSTRATION (SI)

The Selector Illustration calls out the various terminal block and accessory definitions as they are shown on this and following pages.

## DIN RAIL

Rails are made of steel and have zinc chromate plating. They are perforated for easy mounting. Rail length: 2 meters (6'-6"). Also available in 1 meter (3'-3") lengths.

| Type     | Sl# | Part No.  | Description                     |
|----------|-----|-----------|---------------------------------|
| TS35x7.5 | 1   | 2094.0/2m | Flat mounting rail 35mm         |
| TS32     | —   | 2093.0/2m | Asymmetrical mounting rail 32mm |

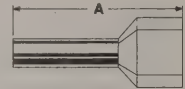

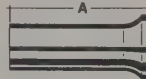

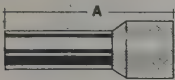

## MARKING TAGS

| Type     | Sl# | Part No. | I.D.  | Use with Terminal Block Widths |

## PANEL MOUNT TERMINAL BLOCKS

### Panel Mount Sectional Terminal Blocks and Assemblies

Cost effective terminal blocks and assemblies replace outdated barrier strips and eliminate the need for wire lugs. Compact and convenient to use where space is a constraint. Modular design allows for changing requirements. Snap together individual components to create multipole assemblies. Order preassembled or assemble yourself.

- Individual, Snap-Together Sections
- Standard or Custom Assemblies Available
- Jumpers Available
- 300V, 36A, 22-12 AWG
- Accepts Standard Marking System
- Screw-Cage Clamp Design
- High Density - 50 or 60 Terminations per Foot.

### BAKA2.5

Screw-Cage Clamp Terminal Blocks & Assemblies  
300V, 20A, 22-12 AWG. UL rated. 5mm (.197") pole spacing; 22mm (.866") wide x 23mm (.905") high.

| No. of Poles | Type       | Length mm (in.) |
|--------------|------------|-----------------|
| 2            | BAKA2.5/2  | 24.5 (.96)      |
| 3            | BAKA2.5/3  | 29.6 (1.17)     |
| 4            | BAKA2.5/4  | 34.6 (1.36)     |
| 5            | BAKA2.5/5  | 39.8 (1.57)     |
| 6            | BAKA2.5/6  | 44.9 (1.77)     |
| 8            | BAKA2.5/8  | 55.1 (2.17)     |
| 10           | BAKA2.5/10 | 65.3 (2.58)     |
| 11           | BAKA2.5/11 | 70.4 (2.77)     |
| 12           | BAKA2.5/12 | 75.4 (2.97)     |
| 13           | BAKA2.5/13 | 80.6 (3.17)     |
| 14           | BAKA2.5/14 | 85.7 (3.37)     |
| 15           | BAKA2.5/15 | 90.9 (3.77)     |
| 16           | BAKA2.5/16 | 95.8 (3.58)     |
| 18           | BAKA2.5/18 | 106.2 (4.18)    |
| 20           | BAKA2.5/20 | 116.2 (4.57)    |

## INTERFACE AND ELECTRONIC MODULES

Link incompatible systems, or expand the capabilities of your logic system with Altech interface and electronic modules and carriers. These DIN rail or panel mounted printed circuit board modules, sub systems and carriers give design flexibility, simplify panel layouts and reduce maintenance and downtime.

Modules are supplied completely assembled, with ready to wire screw-cage clamp terminal blocks in an extruded track, and can be mounted on 35 or 32mm DIN rail or directly to panels. Order ready made modules or mount your own printed circuit boards into Altech mounting tracks.

If your needs go beyond our comprehensive range of standard interface and electronic modules, Altech can custom design modules that meet even the most sophisticated requirements.

### Interfaces

- Ribbon Cable
- Sub-D
- Eurocard Holders
- Diode
- Component Carriers
- Fuse
- Indicator
- Surge Suppressor

### Electronic Modules

- Isolated Relays (8A and 6A)
- Bussed Relays (8A and 6A)
- High Current Relays (15A)
- Cradle Relays
- Octal Socket Carriers
- I/O Module Mounting Carriers
- DIP Socket Carriers

### Power Supply Modules

### Mounting Tracks

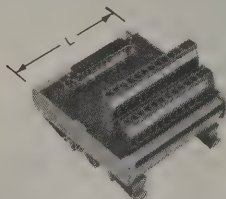

### Custom Modules

### Interfaces

Provide a flexible, cost-effective transition between high density connectors, Eurocards and high quality screw-cage clamp terminal blocks in communications, data processing, process control and other industrial applications. Equipped with component solder pads for easy insertion of circuit building components.

#### Sub D Modules

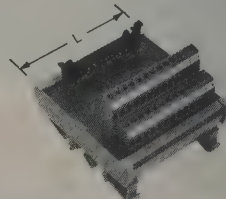

Interface between high density connectors with up to 50 poles and discrete wires. No special tools are required. Equipped with male or female connectors. All terminal blocks are individually marked to correspond to the numbers on the connector pins or sockets. 250V AC, 4A; 22-12 AWG.

| No. of Poles | Female Type | Male Type | Module Length mm (in.) |
|--------------|-------------|-----------|------------------------|
| 9            | SD-F9       | SD-M9     | 35 (1.38)              |
| 15           | SD-F15      | SD-M15    | 58 (2.28)              |
| 25           | SD-F25      | SD-M25    | 81 (3.19)              |
| 37           | SD-F37      | SD-M37    | 114 (4.49)             |
| 50           | SD-F50      | SD-M50    | 137 (5.39)             |

#### Ribbon Cable Modules

Interface between multiwire flat cables with up to 64 conductors and discrete wires. No special tools are required. Supplied with short strain relief ejector latches (long latches are available). Terminal blocks are individually marked to correspond to the numbers on the header pins. 250V AC, 3A; 22-12 AWG.

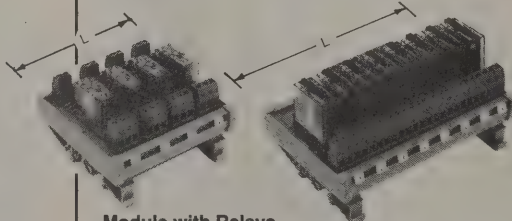

| No. of Poles | Type  | Module Length mm (in.) |
|--------------|-------|------------------------|
| 10           | FBK10 | 47 (1.85)              |
| 14           | FBK14 | 47 (1.85)              |
| 16           | FBK16 | 69 (2.72)              |
| 20           | FBK20 | 69 (2.72)              |
| 26           | FBK26 | 80 (3.15)              |
| 34           | FBK34 | 103 (4.06)             |
| 40           | FBK40 | 114 (4.49)             |
| 50           | FBK50 | 148 (5.83)             |
| 60           | FBK60 | 170 (6.68)             |
| 64           | FBK64 | 170 (6.68)             |

### Electronic Modules

Altech's electronic modules include miniature relay, optocoupler, diode, fuse, varistor and custom modules.

#### Miniature Relay Modules

Traditional relay interfaces in a high density package. Protect equipment, devices and components from feed-back and cross-system overvoltages by isolating electrical and electronic circuits. Bussed or isolated channels, with two contact configurations. Equipped with screw-cage clamp terminal blocks, LED coil voltage indicator and reverse DC polarity LED protection. Available up to 220V DC and 220V AC, with up to 16 channels. 250V, 8A (SPDT) or 6A (DPDT); 22-12 AWG.

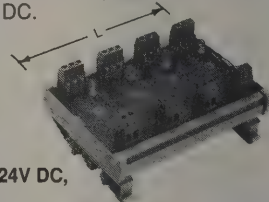

Module with Relays  
Isolated, 24V DC, Single Pole Double Throw

| No. of Channels | Type   | Module Length mm (in.) |
|-----------------|--------|------------------------|
| 1               | RM1G1  | 21 (.83)               |
| 2               | RM1G2  | 40 (1.57)              |
| 4               | RM1G4  | 79 (3.11)              |
| 8               | RM1G8  | 157 (6.18)             |
| 16              | RM1G16 | 311 (12.24)            |

#### I/O Module Mounting Carriers

Mount standard optocoupler input/output (I/O) modules in a high density arrangement for logic output to field devices, or for input of field data to the controller. I/O modules optically isolate ICs and PLCs from damaging field voltage spikes and line noise. Altech I/O carriers can accept up to 16 industry standard .6 in. (15.24mm) I/O modules in any combination: Input, Output, AC or DC from most manufacturers. 1, 2 and 4 isolated position versions with 5, 15 and 24V DC and 4, 8 and 16 bussed position versions with 5 to 24V DC.

Isolated, 24V DC, Red LED

| No. of Poles                      | Type  | Module Length mm (in.) |
|-----------------------------------|-------|------------------------|
| 1                                 | IO/1G | 34.5 (1.36)            |
| 2                                 | IO/2G | 57.8 (2.28)            |
| 4                                 | IO/4G | 114.0 (4.49)           |
| <b>Isolated, 5V DC, Green LED</b> |       |                        |
| 1                                 | IO/1B | 34.5 (1.36)            |
| 2                                 | IO/2B | 57.8 (2.28)            |
| 4                                 | IO/4B | 114.0 (4.49)           |

We have only shown a small sampling of our module line here. Please request our full line catalog.

## EUROSTRIPS®

Compact, easy to use double row tubular screw terminal strips are a safe, cost-effective alternative to barrier strips. Ideal for HVAC, appliance, power distribution and more. Offered in standard easy-to-cut 12 pole strips or they can be ordered precut. Available with a flat base for minimum clearance applications or standoff feet for increased wiring efficiency.

- Housing: White Polyamide 6.6
- Tubular Screw Clamps
- Captive Screws and Contacts
- With or Without Stainless Steel Wire Protectors
- Panel Mount or Free Float
- UL/CSA Recognized, IEC/VDE

**Ready for immediate wire hookup.  
Just strip the wire, insert and tighten  
the screw...never use wire lugs!**

## Feed-Through Eurostrips®

### TS1.5

Flat base, pole spacing 8mm (.315")

| 10           | TSF16/10wp | 146.0 (5.75)    |
| 11           | TSF16/11wp | 161.0 (6.34)    |
| 12           | TSF16/12wp | 176.0 (6.93)    |

## High Temperature Eurostrips®

Heat resistant, double row feed-through tubular screw terminal strips are ideal for wire-to-wire connections when temperatures exceed 130°C (265°F). Typical applications include hand dryers, ovens and hot melt guns. Offered in standard easy-to-cut 12 pole strips, or order precut.

- Housing: Black Polyphenylene Sulfide
- Temperature Resistant to 200°C (392°F)
- Flammability Rating: 94V-0
- With or Without Wire Protectors
- Captive Screws and Contacts
- Panel Mount or Free Float
- UL/CSA Recognized, IEC/VDE

### TST2.5

Flat base, pole spacing 10mm (.394")  
Mounting hole diameter 3.5mm (.14")  
Width 22.5mm (.87"). 480V, 30A, 18-12 AWG. (Also available with standoff feet.)

| No. of Poles | Type        | Length mm (in.) |
|--------------|-------------|-----------------|
| 2            | TST2.5/2wp  | 17.0 (.67)      |
| 3            | TST2.5/3wp  | 27.0 (1.06)     |
| 4            | TST2.5/4wp  | 37.0 (1.46)     |
| 5            | TST2.5/5wp  | 47.0 (1.85)     |
| 6            | TST2.5/6wp  | 57.0 (2.24)     |
| 7            | TST2.5/7wp  | 67.0 (2.64)     |
| 8            | TST2.5/8wp  | 77.0 (3.03)     |
| 9            | TST2.5/9wp  | 87.0 (3.43)     |
| 10           | TST2.5/10wp | 97.0 (3.82)     |
| 12           | TST2.5/12wp | 117.0 (4.61)    |

We have only shown a small sampling of our terminal block line here. Please request our full line catalog and free samples.

## Need More Information?

Call the AMP  
Product  
Information Center  
**1-800-522-6752**

The Product Information Center is staffed with specialists well versed in all AMP products worldwide. The Center can provide you with:

- Catalogs
- Technical Support
- Product Samples

### **AMP FAX Service**

Instant information by FAX,  
24 hours a day, 7 days a week.

- Catalog Pages
- Product Drawings
- Instruction Sheets (IS#)
- Product Specifications
- Application Specifications
- Latest Revision of Catalog Pages
- AMP Authorized Distributors Locations
- Instructions for AMP FAX Service

### **Tooling Assistance Center**

**1-800-722-1111**

Correspondents can provide you with:

- Tooling Recommendations for Specific Applications
- Assistance in Servicing AMP Tooling
- Spare Parts Support —Quick Solutions to Costly Down Times

**NEW**

**Electronic Application Design Systems (EADS)**  
**1-717-780-4214**

**FREE** 3D and 2D images for your CAD system.

- IGES CAD Models of Connectors, Footprints and Panel Cutouts
- TIFF Images (Product Drawings, Application Notes, Instruction Sheets, Electrical Performance Reports, etc.)
- ISO 9660 CD-ROM Format (for DOS, Apple, & UNIX)
- Zero Drawing Time Saves You Time and Money
- Call to register and receive new/updated CDs automatically!

Look for products displaying the "EADS/CD-ROM icon."

## ***A big resource, from a local source... your AMP Sales Engineer or your AMP Authorized Distributor***

This catalog shows the most popular AMP product lines. They represent the items most often purchased and which meet a majority of your requirements. If the items shown in this catalog do not meet your application needs contact your local AMP Sales Engineer or Authorized Distributor.

### **Sales Engineer**

Thoroughly trained in the application of AMP Products, the Sales Engineer is the best source for the original equipment manufacturer (OEM) for information and assistance with your specific AMP product requirement.

### **Authorized Distributors**

AMP has established a network of local, regional and national distributors to service your needs. This select group maintains an inventory of popular AMP Products, many of them are included in this catalog. This vital source will provide fast turn-around for prototype needs through production quantities. Your local needs for inventory as well as value-added services, such as kitting, cable assemblies and packaging to name a few can be met by your local authorized distributor.

### **Field Engineering**

Our Field Engineering Department is ready to help Customers resolve any

problems regarding AMP products and application equipment. In addition they will provide training in the proper operation and maintenance of all application equipment. For immediate access to technical assistance, information or to order spare parts for application tooling, call our toll-free, nationwide Field Engineering hotline, 1-800-722-1111.

### **Regional Warehouses**

AMP maintains five regional warehouses in Pennsylvania, Illinois, North Carolina, Texas and California. These terminals can provide over-night shipping of Industry Standard Products for prototyping and other emergency needs throughout the continental United States.

### **Value-added Assemblies**

AMP provides advanced tooling to cable co-operatives, value-added distributors and custom assemblers for fast response and prototyping so that we can accommodate very high volume needs directly, or supply the machinery and components you need to do it yourself.

### **International Division**

So that we may provide complete service to our worldwide Customers, AMP has established a network of distributors, agents or direct representatives in over 30 countries.

*Specifications subject to change.*

Call 1-800-522-6752 for product information and 1-800-722-1111 for tooling information.

PIDG and PLASTI-GRIP Terminals and Splices are Listed by Underwriters Laboratories Inc., File No. E13288 and Certified by the Canadian Standards Association, File No. LR7189.

PIDG Terminals meet or exceed the requirements of MIL-T-7928, Type II, Class 1 and 2.

Ultra-Fast and Ultra-Fast Plus FASTON Receptacles are Listed by Underwriters Laboratories Inc., File No. E66717 and Certified by the Canadian Standards Association, File No. LR7189.

Ultra-Fast Plus has been tested by TUV (File No. E9071003) as suitable for end product certification to the following standards:

EN 60 950/09.87  
DIN IEC 380/VDE 0806/08.81  
DIN IEC 601-1 Part 1/VDE 0750 T1/05.82  
DIN VDE 0700 T1/02.81

## DIP Sockets

DIPLOMATE Dual Leaf (DL)  
Contact Sockets - Economy  
(Open Frame)

Socket accepts .008-.014  
[0.2-0.36] thick IC leads

## Material and Finish:

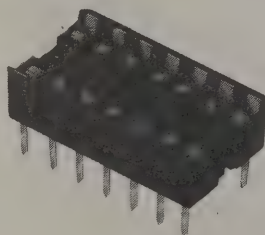

**Housing**—Glass-filled thermoplastic, black  
**Contacts**—Phosphor bronze, tinned

| Number of Positions | Part Numbers <sup>1</sup> |               |

## SIMM Sockets

### DIPLOMATE SIMM Standard Vertical Sockets

#### Material and Finish:

**Housing**—Liquid crystal polymer (LCP), glass filled, 94V-0 rated

**Contact**—Beryllium copper, bright tin-lead plating

| Number of Positions <sup>1</sup> | Single Row | Double Row<br>.300 [7.62] Centerline |
|----------------------------------|------------|--------------------------------------|
| 22                               | 643922-1   | —                                    |
| 30                               | 643930-1   | 2-382230-1 <sup>2</sup>              |
| 35                               | 643935-1   | —                                    |
| 42                               | 643942-1   | —                                    |

<sup>1</sup>Other sizes and variations can be made available upon request.

<sup>2</sup>Packaged in slide tube for robotic assembly.

### DIPLOMATE SIMM Low Profile (Angled) Sockets

#### Material and Finish:

**Housing**—Liquid crystal polymer (LCP), glass-filled, 94V-0 rated

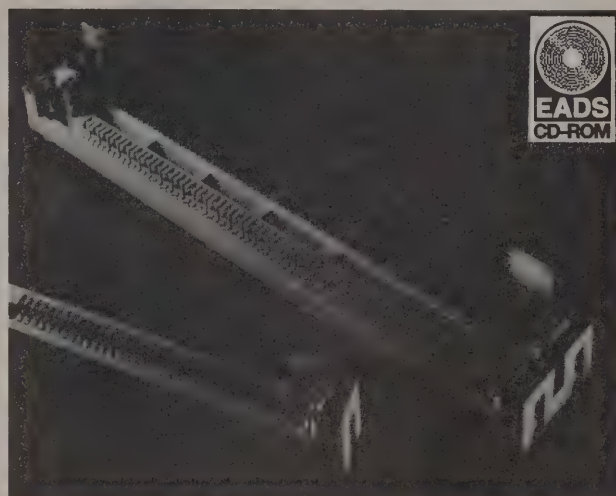

**Contact**—Beryllium copper, bright tin-lead plating

| Number of Positions <sup>1</sup> | Single Row | Double Row |
|----------------------------------|------------|------------|
| 30                               | 2-382030-1 | 2-382130-1 |
| 35                               | 382035-1   | —          |
| 42                               | 382042-1   | —          |

<sup>1</sup>Other sizes and variations can be made available upon request.

### Memory Module Extraction Tool

Part No. 382264-1

### MICRO-EDGE SIMM Connectors with Metal Latches, .050 [1.27] Centerline

#### Material and Finish:

**Housing**—Liquid crystal polymer, 94V-0 rated

**Contact**—Phosphor bronze with tin-lead plate over nickel plate

**Latch**—Brass with nickel plate

### Vertical Single Row Connectors with Center Post

#### Standard Polarization

| Number of Positions | Part Numbers |
|---------------------|--------------|
|                     | Tin Plate    |
| 40                  | 822021-1     |
| 64                  | 822021-2     |
| 68                  | 822021-3     |
| 72                  | 822021-4     |
| 80                  | 822021-5     |

**Note:** Connectors without center posts and with gold plating are also available.

#### Reverse Polarization

##### 72 Position

Part No. 822030-3

### Vertical Dual Row Connectors with Center Post

| Number of Positions | Part Numbers |
|---------------------|--------------|
|                     | Tin Plate    |
| 64                  | 822090-2     |
| 68                  | 822090-3     |
| 72                  | 822090-4     |

**Note:** Connectors without center posts and with gold plating are also available.

### MICRO-EDGE SIMM Connectors with Metal Latches, .100 [2.54] Centerline

#### Material and Finish:

**Housing**—Liquid crystal polymer, 94V-0 rated

**Contact**—Phosphor bronze with tin-lead plate over nickel plate

**Latch**—Brass with nickel plate

### Vertical Single Row Connectors

## .100 [2.54] Centerline

| Number of Dual Positions | Part Number |
|--------------------------|-------------|
| 30                       | 1-530826-0  |
| 36                       | 530826-1    |
| 40                       | 530826-2    |
| 43                       | 1-530826-2  |
| 50                       | 530826-3    |

## .125 [3.18] Centerline

| Number of Dual Positions | Part Number |
|--------------------------|-------------|
| 18                       | 530384-8    |
| 30                       | 530384-1    |
| 36                       | 530384-2    |
| 50                       | 530384-3    |

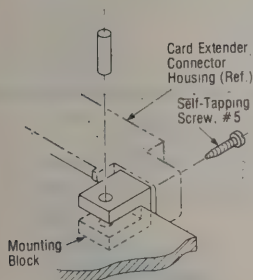

### Material and Finish:

**Housing** - 94V-0 rated, glass-filled polyester, black  
**Contacts** - Phosphor bronze  
**Finish** - Gold over nickel accu-plating in contact area, .000030 [0.00076] thick; tin plated posts

## Mounting Block

### Material and Finish:

Natural Color Nylon  
**Kit Part No. 531250-1**  
 Each kit includes 2 mounting blocks, 2 self-tapping screws, #5 x .375 [9.52] 2 roll pins, .075 x .25 [1.57 x 6.35]

Short Keying Plug Part No. 650025-2

### Material and Finish:

**Housing**—Polyphenylene sulfide  
**Contacts**—Phosphor bronze, plated gold over nickel in mating area, tin over nickel on solder tails

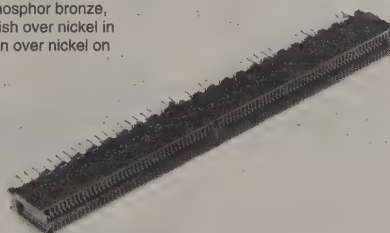

| No. of Dual Positions | Post Length* | Part Numbers | Configuration        |

Note: Connectors without mounting ears and with mounting ears with threaded inserts are available, consult AMP Incorporated.

### Snap-In Polarizer

**Material:** Black thermoplastic, 94V-0 rated

#### Part Nos.:

**499991-2** (Packaged 50 per bag)

**499991-3** (Packaged 1000 per box)

Specifications subject to change.

Call 1-800-522-6752 for product information and 1-800-722-1111 for tooling information.

## AMP-LATCH Ribbon Cable Connector System

### Card Edge Connectors without Mounting Ears

#### Housing Assembly with Cover (Preassembled)

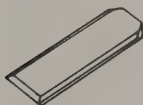

#### Material and Finish:

**Housing & Cover**—Black thermoplastic, 94V-0 rated  
**Contacts**—Phosphor bronze (Plating—See table below chart.)

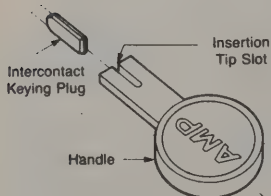

### Keying Plug

**Material:** Natural color thermoplastic, 94V-0 rated

**Intercontact Keying Plug,  
Part No. 88113-1**  
(Use insertion Tool No. 91233-1)

**Insertion Tool  
No. 91233-1**

A—.000015 [0.00038] gold on post/pin mating end, .000100-.000200 [0.00254-0.00508] bright tin-lead on termination end, with entire contact underplated .000050 [0.00127] nickel.  
B—.000030 [0.00076] gold on post/pin mating end, .000100-.000200 [0.00254-0.00508] bright tin-lead on termination end, with entire contact underplated .000050 [0.00127] nickel.

Latches for Ejection Style Pin Headers and Pinless Headers

Material: Black thermoplastic, 94V-0 rated.

Latch Part No. 102320-1

For use with Recessed Cover and Strain Relief

Latch Part No. 102186-1

Latch Part No. 102312-1

For use with Recessed Cover

Latch Part No. 102185-1

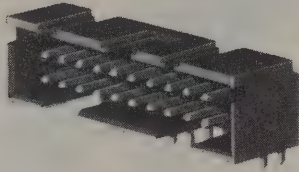

Latch Part No. 746469-1

For use with Shielded Receptacle with .240 [6.1] wide cover

For more information request Catalog 82012

# Low Profile Shrouded Headers (AMP-LATCH) Double Row .100 x .100 [2.54 x 2.54] Centers .150 [3.81] End Dimension

.025<sup>2</sup> [.04<sup>2</sup>]  
Right-Angle Posts

## Features:

- Available in .000015 [0.00038] and .000030 [0.00076] gold duplex plated posts.
- Available in .025 [0.64] square, four-sided, mateable, drawn wire posts.
- Wash out clearance for flux removal.
- Uses AMP-LATCH snap-in military polarization keys.

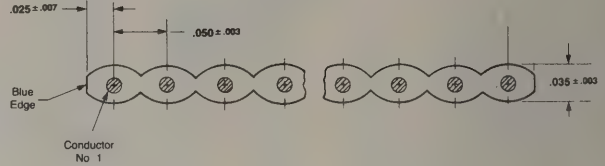

## Material and Finish:

**Housing** – Black thermoplastic, 94V-0 rated.  
**Contacts** – Copper alloy

| Number of Positions | Right-Angle Post Part Numbers |                     |
|---------------------|-------------------------------|---------------------|

HDF-20 Low Profile Metal Shell and All Plastic Connectors  
(for Round Conductor Flat Ribbon Cable)

**Material and Finish:**  
**Front Shell**—Steel, tin-plated  
**Housing, Cover & Cable Stabilizer**—94V-0 rated thermoplastic, black  
**Threaded Inserts**—Brass, unplated  
**Threaded Self-Locking Insert**—Brass, color coded red  
**Contacts**—Phosphor bronze, duplex plated .000030 [0.00076] gold on mating end, tin-lead on termination end, with entire contact nickel underplated

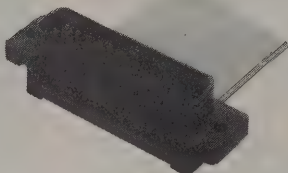

Plug Assemblies

Metal Shell Connectors  
(with Grounding Indents)

Housing and Cover are  
Preassembled; Cable Stabilizer  
is Separate

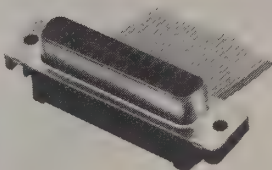

All Plastic Connectors

Housing and Cover are  
Preassembled; Cable Stabilizer  
is Separate

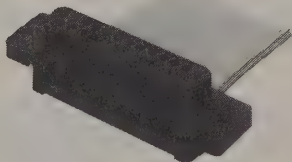

Receptacle Assemblies

Metal Shell Connectors

Housing and Cover are  
Preassembled; Cable Stabilizer  
is Separate

All Plastic Connectors

Housing and Cover are  
Preassembled; Cable Stabilizer  
is Separate

| .560<br>14.22    | 4-40           | Yellow Chromate | —                            | —            | 207719-1                 |
|                  |                | Clear Chromate  | —                            | —            | 207719-3                 |

\*Each part is individually bulk packed for multiple kit orders.

- Notes:
1. All parts are packed unassembled.
  2. Each kit includes two female screwlocks, lockwasher and hex nuts, and four flat washers.
  3. One or two flat washers may be required for panel thicknesses less than .060 [1.52]
  4. 2-56 is the male thread size. The female thread is 4-40.

#### Cable-to-Panel Hardware Kits

For Front Panel Mount  
.062-.125 [1.57-3.18]  
Part No. 553636-2

For Rear Panel Mount  
.062-.093 [1.57-2.36]  
Part No. 553636-3

Metric Screw Lock Hardware Kit for 24-Position IEEE-488

# AMP

AMP INCORPORATED, HARRISBURG, PA 17105

C•1180

For manufacturers' sales offices, see yellow pages

Specifications subject to change.

and 1-800-722-1111 for tooling information.

EEM 1993

Shielded CHAMP Latch  
Panel Mount Connectors

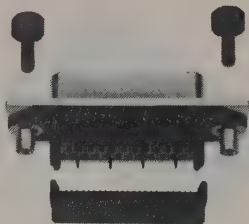

**Material:**  
**Housing and Strain Relief Clip**—Thermoplastic (black)  
**Terminals**—Gold over nickel plated high strength copper alloy on mating face and gold flash over nickel plate on terminating side  
**EMI Shield**—Nickel plated die casting

<sup>1</sup>Does not have boss feature.  
<sup>2</sup>SCSI applicable.  
<sup>3</sup>Can be used with Interface Bus Applications per IEEE-488.

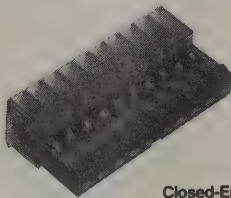

Preassembled Shield

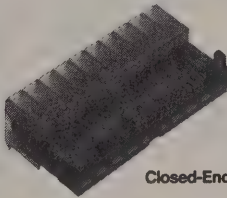

Part No. 554808-1  
(Metric Screw Lock Hardware Kit for 24-Position IEEE-488, Preassembled, Part No. 554808-1 Rear Panel Mount Only)

MTA-100 Receptacles  
.100 Centers

**Material:**  
**Housing**—Thermoplastic 94V-2 rated  
**Contacts**—Tin plated phosphor bronze

## Wire-to-Board Receptacle

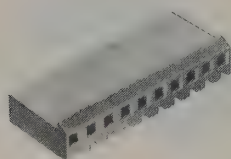

### Housing Assemblies

#### .156 [3.96] Centers

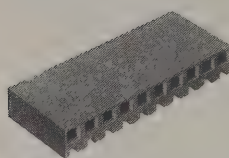

Housing with and without  
Locking Ramp

#### Material:

Thermoplastic, 94V-0 rated

With Locking Ramp

Without Locking Ramp

#### Application Note:

Contact No. 640252 has a higher mating and unmating force than contact No. 350980 and is recommended to be used only in housing with 1 through 12 positions. Contact No. 350980 can be used in any size housing but

is recommended to be used in housings with 13 through 24 positions. Contact No. 770476 is recommended for use in any size housing. Its mating force is similar to No. 350980 while unmating force is similar to No. 640252.

#### Contacts

## Double Row MT Receptacle Connectors

### Housings Preloaded with Standard Pressure Contacts

#### Material and Finish:

**Housing and Cover**—Black thermo-plastic, flame retardant

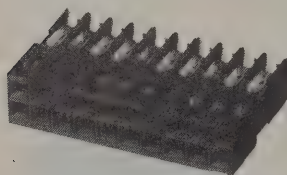

**Contacts**—Copper alloy, duplex plated with .000030 [0.00076] gold on mating area, .000050 [0.00127] min. tin-lead on termination area, all over .000050 [0.00127] nickel

**Insulation Wall Thickness:** .015 [0.038] max.

**Insulation Diameter:** .050 [1.27] max.

**Mating Post Length:** .222-.273 [5.64-6.94] max.

### Housings Preloaded with High Pressure Contacts

#### Material and Finish:

**Housing and Cover**—Black thermo-plastic, flame retardant

**Contacts**—Copper alloy, duplex plated with .000030 [0.00076] gold on mating area, .000050 [0.00127] min. tin-lead on termination area, all over .000050 [0.00127] nickel

**Insulation Wall Thickness:** .015 [0.038] max.

**Insulation Diameter:** .050 [1.27] max.

**Mating Post Length:** .200-.273 [5.08-6.94] max.

## AMPMODU .025 [0.64] Breakaway Headers

### Features

- Headers may be purchased in full sticks or in desired sizes from your local distributor.
- Design and inventory versatility—headers can be broken into any size needed.
- Substantial time labor savings—install all posts at one time.
- Popular sizes: 1 thru 40 positions (single row); 2 thru 80 positions (double row).
- Copper alloy, drawn wire posts.
- Flame-retardant, black thermoplastic housings; 94V-0 rated.
- Headers are available with board retention posts.

### Typical Board Retention Post Detail (Minimum 2 Posts per Header)

For available header sizes and part numbers, call the AMP Product Information Center: 1-800-522-6752.

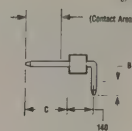

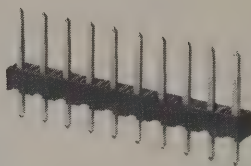

### Cutting Tools

#### Pistol Grip Cutter

- For low volume applications
- AMP Part No. 314818-1

#### Products/90 Cutter

- For mid-range volume applications
- Manually operated gang of blades
- Model No. GFHC-200
- For ordering information, call: 213-515-3425 (Products/90, CA)

For more information request Catalog 82187

### HDP-22 Basic Shielding Hardware Kits

#### Each kit contains:

- Connector
- Inner shield
- Outer shield

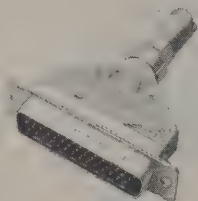

Contacts and ferrules must be  
purchased separately.

#### Material and Finish:

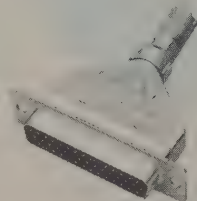

**Connector Shell**—Steel, tin plated

**Connector Insert**—94V-0 rated  
thermoplastic, black

**Shields**—Steel, tin plated

**Notes:** 1. Plugs accept size 22 DF pin contacts and receptacles accept size 22 DF socket contacts.

2. Components of the kits are shipped unassembled and bulk-packaged in quantities of 100 pieces.

### HDP-22 Shielding Hardware Enclosure Kits

#### Each kit contains:

- Connector
- Inner shield
- Outer shield
- Enclosure
- Two jackscrews

Contacts and ferrules must be  
purchased separately.

#### Material and Finish:

**Connector Shell**—Steel, tin plated

**Connector Insert**—94V-0 rated  
thermoplastic, black

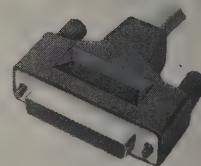

**Shields**—Steel, tin plated

**Enclosure**—94V-0 rated thermoplastic,  
black

**Jackscrews**—Zinc alloy

- Notes:** 1. All connectors are preloaded with insulation displacement contacts. Pins in plug connectors and sockets in receptacle connectors. Contacts accept a max. wire insulation thickness of .015 [0.38] and a max. wire insulation dia. of .060 [1.52].  
 2. HDE connectors are designed for terminating solid or stranded (7-strand max.) wire.  
 3. Individual conductor strands should be .005 [0.13] diameter or larger.  
 4. **Extraction Tool No. 91232-1** is used to remove pin or socket contacts.

# HDE-20 Basic Shielding Hardware Kits

## Material and Finish:

**Connector Shell**—Steel, tin plated

**Connector Insert**—94V-0 rated thermoplastic, black

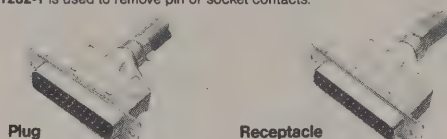

**Shield**—Steel, tin plated

**Contacts**—Phosphor bronze

**Contact Finish**—Duplex plated:

**A**—.000030 [0.00076] gold on mating end, tin-lead on termination end, with entire contact nickel underplated.

**B**—Gold flash on mating end, tin-lead on termination end, with entire contact nickel underplated.

**Notes:** Components of the kits are shipped unassembled and bulk-packaged in quantities of 100 pieces.

# HDE-20 Shielding Hardware Enclosure Kits

## Each kit contains

- Connector
- Inner shield
- Outer shield
- Enclosure
- Two jackscrews

Ferrules must be purchased separately.

## Material and Finish:

**Connector Shell**—Steel, tin plated

**Connector Insert**—94V-0 rated thermoplastic, black

**Shield**—Steel, tin plated

**Enclosure**—PVC, black

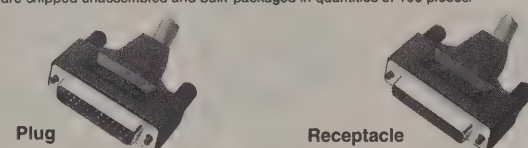

**Jackscrews**—Zinc alloy

**Contacts**—Phosphor bronze

**Contact Finish**—Duplex plated:

**A**—.000030 [0.00076] gold on mating end, tin-lead on termination end, with entire contact nickel underplated

**B**—Gold flash on mating end, tin-lead on termination end, with entire contact nickel underplated

## HD-20 Solder Cup Basic Shielding Hardware Kits

### Each kit contains

■ Connector with preloaded, nonremovable contacts

■ Inner shield

■ Outer shield

Ferrules must be purchased separately.

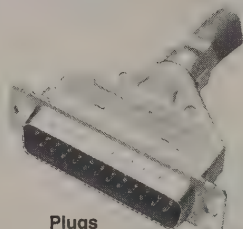

### Materials and Finish:

**Connector Shells**—Steel, tin plated

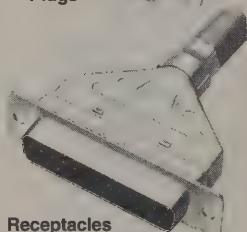

**Connector Insert**—94V-0 rated thermoplastic, black

**Shields**—Steel, tin plated

**Contacts**—Phosphor bronze; duplex plated with gold flash on mating end, tin-lead on solder cup, with entire contact nickel underplated

## HD-22 Front Metal Shell Right-Angle Posted Connectors 350 Mount

### Materials and Finish:

**Front Shell**—Steel, tin plated

**Housing**—94V-0 rated thermoplastic, black

**Eyelets**—Brass, tin or tin-lead plated

**Threaded Inserts**—Zinc

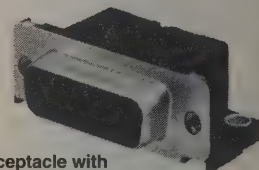

**Female Screwwlocks**—Zinc

**Contacts (Posted):**

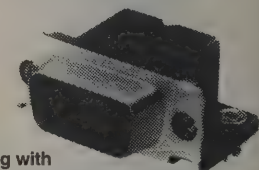

**Socket**—Phosphor bronze

**Pin**—Brass

**Contact Finish:** Duplex plated: .000030 [0.00076] gold on mating end, tin-lead on termination end, with entire contact underplated with .000050 [0.00127] nickel.

## HD-20 Front Metal-Shell Right-Angle Posted Connectors 318 Mount

### Material and Finish:

**Front Shell**—Steel, tin plated  
**Housing**—94V-0 rated thermoplastic, black  
**Eyelets**—Brass, tin plated  
**Threaded Inserts**—Zinc  
**Female Screwlocks**—Zinc  
**Boardlocks**—Copper alloy, tin-lead plated  
**Pin Contacts (Posted)**—Brass

**Socket Contacts (Posted)**—Phosphor bronze  
 Contacts duplex plated as follows:  
**A**—.000030 [0.00076] gold on mating end, tin-lead on termination end, with entire contact nickel underplated.  
**B**—Gold flash on mating end, tin-lead on termination end, with entire contact nickel underplated.

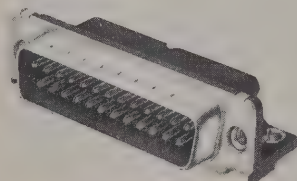

Plug with Grounding Indents  
and Grounding Straps

**Notes:** 1. All plugs and receptacles are preloaded with size 20 DF posted pin or socket contacts.  
 2. Recommended pc board thickness is .062 [1.57] for connectors with boardlocks and .093 [2.36] max. for all others.  
 3. Male screw retainers are used as mating hardware for connectors with 4-40 female screwlocks.

## HD-20 Right-Angle, Metal-Shell Connectors (AMPLIMITE III) 318 Mount Plugs

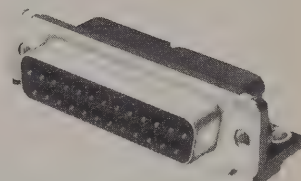

### Material and Finish:

**Shell**—Steel, tin plated  
**Housing**—94V-0 rated thermoplastic, black  
**Eyelets**—Brass, tin plated  
**Threaded Inserts**—Zinc  
**Female Screwlock**—Zinc  
**Boardlock**—Copper alloy, tin-lead plated

**Pin Contacts (Posted)**—Brass duplex plated as follows:  
**A**—.000030 [0.00076] gold on mating end, tin-lead on termination end with entire contact nickel underplate.  
**B**—Gold flash on mating end, tin-lead on termination end, with entire contact nickel underplated.  
**C**—.000010 [0.000254] gold on mating end, tin-lead on termination end, with entire contact nickel underplated.

## HD-20 Front Metal-Shell Right-Angle Posted Connectors 590 Mount

### Material and Finish:

**Front Shell**—Steel, tin plated  
**Housing**—94V-0 rated thermoplastic, black  
**Eyelets**—Brass, tin plated  
**Threaded Inserts**—Zinc  
**Female Screwlocks**—Zinc  
**Boardlocks**—Copper alloy, tin-lead plated  
**Pin Contacts (Posted)**—Brass  
**Socket Contacts (Posted)**—Phosphor bronze  
 Contacts duplex plated as follows:  
**A**—.000030 [0.00076] gold on mating end, tin-lead on termination end, with entire contact nickel underplated.  
**B**—Gold flash on mating end, tin-lead on termination end, with entire contact nickel underplated.

 2. Male screw retainers are used as mating hardware for connectors with 4-40 female screwlocks.  
 3. Consult AMP Incorporated for replacement contact numbers.

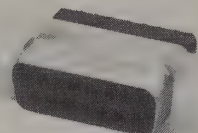

## HDP-20 Full Metal Shell Straight Posted Connectors

### Material and Finish:

**Shell**—Steel, tin plated  
**Insert**—94V-0 rated thermoplastic, black  
**Contacts (Posted)**—  
**Pin**—Brass  
**Sockets**—Phosphor bronze  
 Contacts plated as follows:  
**A**—.000030 [0.00076] gold on mating end, tin-lead on termination end, entire contact underplated with .000050 [0.00127] nickel.  
**B**—Gold flash on mating end, tin-lead on termination end, entire contact underplated with .000030 [0.00076] nickel.

\* Post length is .188 [4.78].  
 .125 [3.18] post length is recommended for pc board thickness of .062-.093 [1.57-2.36].  
 .188 [4.78] post length is recommended for pc board thickness of .125 [3.18].

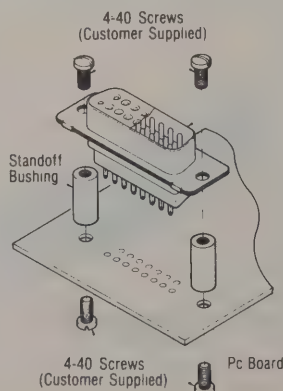

**Notes:** 1. All connectors are preloaded with size 20 DF posted contacts.  
 2. Special loading of contacts can be arranged upon request.

## Standoff Bushings for Full Metal Shell Straight Posted Connectors

### Material:

Aluminum

**Kit Number 205933-3**  
 (two bushings per package)

## Keying Plug (for Size 20 Socket Contacts)

### Material:

Polyphenylene oxide

Part No. 206509-1

# AMP

AMP INCORPORATED, HARRISBURG, PA 17105

Specifications subject to change.  
 Call 1-800-522-6752 for product information  
 and 1-800-722-1111 for tooling information.

For more information request Catalog 82068

## HD-20 Front Metal Shell Straight Posted Connectors

### Material and Finish:

**Shell**—Steel, tin plated

**Housing**—Thermoplastic, black,  
94V-0 rated

**Threaded Inserts**—Brass, unplated

**Female Screwlocks**—Zinc

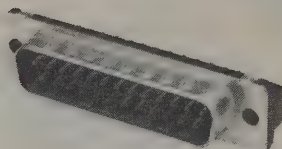

**Pin Contacts (Posted)**—Brass

**Socket Contacts (Posted)**—Phosphor  
bronze

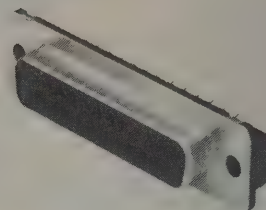

**Contact Finish**—Duplex plated

**A**—.000030 [0.00076] gold on mating  
end, tin-lead on termination end,  
entire contact underplated with  
.000050 [0.00127] nickel.

**B**—Gold flash on mating end, tin-lead  
on termination end, entire contact  
underplated with .000030 [0.00076]  
nickel.

\*.125 [3.18] post length is for recommended pc board thickness of .062-.093 [1.57-2.36] max.; .170 [4.32] post length is for recommended pc board thickness of .093-.125 [2.36-3.18]; .250 [6.35] post length is for special applications.

**Notes:** 1. All plugs are preloaded with size 20 DF posted pin contacts and all receptacles are preloaded with size 20 DF posted socket contacts.

2. Special loading of contacts can be arranged upon request.

3. Male screw retainers are used as mating hardware for connectors with 4-40 female screwlocks.

## HD-20 All-Plastic Straight Posted Connectors with ACTION PIN Contacts

### Material and Finish:

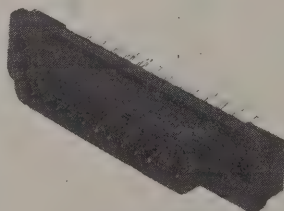

**Housing**—Thermoplastic, black,  
94V-0 rated

**Threaded Inserts**—Brass, unplated

**Female Screwlocks**—Brass, nickel  
plated

**ACTION PIN Contacts**—Copper alloy,  
duplex plated as follows:

**A**—.000030 [0.00076] gold on mating  
end, tin-lead on ACTION PIN post  
surface, with entire contact nickel  
underplated.

\*.125 [3.18] post length is for recommended pc board thickness of .062-.093 [1.57-2.36] max.; .170 [4.32] post length is for recommended pc board thickness of .093-.125 [2.36-3.18]

Notes: 1. All plugs and receptacles are preloaded with size 20 DF posted contacts.

2. It is recommended that these connectors be secured with appropriate hardware to a pc board and/or panel.

3. Male screw retainers are used as mating hardware with 4-40 female screwlocks.

## HD-20 Front Metal Shell Right-Angle Stacked Connectors, Series I

**Plug over Plug (shown),  
 Receptacle over Plug, Plug over Receptacle  
 Post Size - .026 Dia.**

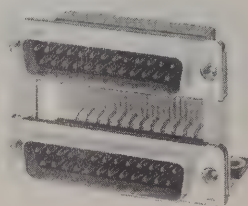

### Material and Finish:

**Front Shells and Brackets**—Steel, tin plated  
**Housings**—94V-0 rated thermoplastic, black  
**Pc Board**—94V-0 flame retardant glass epoxy  
**Eyelets**—Brass, unplated  
**Threaded Inserts**—Stainless steel  
**Female Screwlocks**—Steel, nickel plated  
**Boardlock**—Copper alloy, tin-lead plated  
**Contacts (Posted):**  
**Pin**—Brass  
**Socket**—Phosphor bronze

Contacts duplex plated as follows:

**A**—.000030 gold on mating end, tin-lead on termination end, with entire contact nickel underplated

**B**—Gold flash on mating end, tin-lead on termination end, with entire contact nickel underplated

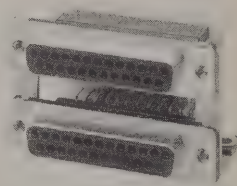

**Receptacle over Receptacle  
 Post Size - .026 Dia.**

Notes: 1. All connectors are preloaded with size 20 DF posted contacts; plugs with pin contacts and receptacles with socket contacts.

2. Recommended pc board thickness is .062 for connectors with boardlocks and .093 max. for all others.

3. Male screw retainers are used as mating hardware for connectors with 4-40 female screwlocks.

## Shielded AMPLIMITE .050 Series Connectors (.050 X .100 [1.27 X 2.54] Centerline) Series III

For more information request Catalog 82068

### Introduction

Shielded AMPLIMITE .050 Series connectors offer a high-density D type interface. Featuring .050 x .100 [1.27 x 2.54] contact centerline spacing, these compact and reliable connectors are available in 20 through 120 positions. Their construction offers exceptional EMI/RFI shielding effectiveness.

**Shielded AMPLIMITE .050 Series Connectors, Series III, are approved to SCSI-2, SCSI-3, EIA RS-232, IPI-2, and HIPPI standards.**

Connectors are available in cable-mount and panel mount versions and vertical and right-angle mount pcb headers. The headers feature high temperature housings, tight tolerances and registration features to make them suitable for robotic assembly and high temperature reflow soldering.

Cable and panel connectors use insulation displacement contacts for fast termination of discrete, round-to-flat laminated, and ribbon cable. Recommended wire size is 28 AWG [0.08-0.09 mm<sup>2</sup>] or 30 AWG [0.05 mm<sup>2</sup>], solid or 7 strand, with a .029-.036 [0.74-0.89] insulation diameter.

## Shielded AMPLIMITE .050 Series Connectors (.050 x .100 [1.27 x 2.54] Centerlines)

For more information request Catalog 82068

### Cable Assemblies Small Computer Systems Interface (SCSI) and RS-232

**Note:** .050 centerline ribbon cable assemblies are available in single or double ended versions. These assemblies are made using AMPLIMITE .050 Series panel mount connectors, AMPLIMITE .050 Series all-plastic connectors and AMP-LATCH Novo receptacle. Consult AMP Incorporated.

**Note:** Each backshell kit includes upper and lower backshells, two spring latches or two male jackscrews or two female jackscrews, one strain relief staple and two 2-56 screws. All are packaged unassembled.

### Shielded Enclosure Kits, with Male Jackscrews

#### Materials and Finish:

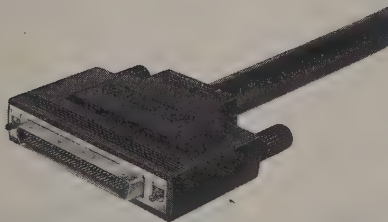

**Backshells**—Zinc

**Boot**—PVC, black

**Jackscrews**—Carbon steel and PVC, black, plated .000200 [0.00508] min. zinc, black chromate

**Staple**—Carbon steel, plated .000050 [0.00127] min. tin-lead over .000050 [0.00127] min. nickel

**Screws**—Stainless steel

| No. of Pos. | Max O.D.     | Part No. with #2-56 Threads |
|-------------|--------------|-----------------------------|
| 68          | .520 [13.21] | 750752-1                    |

**Note:** Each enclosure kit contains two backshells, one boot, two jackscrews, one staple and two screws. All are packaged unassembled.

### Shielded Enclosure Kits, With Spring Latches

#### Materials and Finish:

**Backshells**—Zinc

**Spring Latches**—Stainless steel

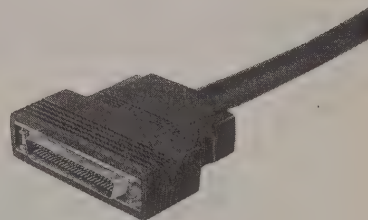

**Handles**—PVC or polyester, black

**Boot**—PVC, black

**Staple**—Carbon steel, plated .000050 [0.00127] min. tin-lead over .000050 [0.00127] min. nickel

**Screws**—Stainless steel

**Note:** Extra pin contact protection is provided by rails, which facilitate a straight-out unmating motion. A side-to-side rocking motion should not be used to disengage the connector system.

.029-.036 [0.74-0.89] insulation

diameter.

**Wire must be approved by AMP engineering.**

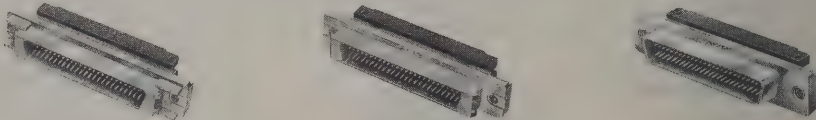

**Note:** Extra pin contact protection is provided by rails, which facilitate a straight-out unmating motion. A side-to-side rocking motion should not be used to disengage the connector system.

**Shielded AMPLIMITE .050 Series  
Slimline Connectors**

**Product Facts**

■ Compact design, profile for the right-angle header 1.230 x .588 [31.24 x 14.94], vertical header 1.230 x .433 [31.24 x 11.00], right-angle stacked headers 1.230 x .803 [31.24 x 20.40]

■ Housings and covers made of UL 94V-0 rated thermoplastic

■ Headers are compatible with surface mount reflow solder processes

■ Header footprint for right-angle and stacked configurations is .100 x .050 [2.54 x 1.27] staggered centerlines

■ Header footprint for vertical configuration is .100 x .075 [2.54 x 1.90] staggered centerlines

■ Right-angle and stacked headers feature integral boardlocks for positive board retention and grounding

■ Vertical headers feature 8 below the board, retentive contact legs for mechanical retention before and after soldering

■ Vertical headers feature polarized grounding posts to assure correct header-to-board orientation

■ Stacked headers reduce overall total header volume by 48% and PC board area by 38%

■ Stacked headers offer optional contact shield for additional EMI/RFI protection

■ Plugs preloaded with insulation displacement contacts (IDC) provide fast, reliable and economical terminations

■ Aesthetically designed backshell kits feature easy-to-use finger grip jackscrews to secure mated connectors

■ Choice of three keying positions, plus non-keyed inserts for assurance against mismatch mating

■ Listed and complies with UL 1863, Communication Circuit Accessories, File No. E81956

■ Certified by Canadian Standards Association File No. LR7189A

## AMPLIMITE .050 Series Terminators

### Introduction

Terminators must be present at both ends of the SCSI bus as shown in Figure 1. The SCSI bus behaves as an electrical transmission line and must be properly terminated at each end to prevent reflections when signals reach the end of the bus. The magnitude of the reflections will depend on the impedance mismatch between the cable and the terminator. The ideal terminator will match the characteristic impedance of the cable.

In many applications, passive terminators have been used successfully. However, as the clock rates and signal transition speeds increase, and noise margins decrease, the passive terminator can no longer ensure a reliable signal. It is expected that the SCSI-3 SPI standard will recommend a single-ended active terminator to replace the passive terminator.

An active terminator, already recommended in the SCSI-2 standard, can significantly improve the signal integrity. Through the use of a voltage regulator, it has an immunity to TERM-PWR voltage variations. Additionally, the lower impedance of the active terminator, typically 110 ohms, more closely matches that of the cable.

The SCSI-2 and SCSI-3 standard designates that the RESERVE lines must be connected to ground in the terminator. A SCSI device should have these lines open, but may connect them to ground. This requirement can cause problems when mixing devices on a bus.

Terminators may be internal or external to a SCSI device. The initiator (normally the host adapter) supplies power to the terminator and must be capable of maintaining the minimum required voltage, at the terminator, of 4.25 volts for single-ended applications and 4.00 volts for differential applications.

Considerable work was put into the development of the terminator specifications, most of which is beyond the scope of this document. However, most SCSI applications will work very well with one of the terminators listed in the following pages. For special applications or information on obtaining an analysis of your SCSI bus contact AMP Engineering.

### Product Facts

Typically, there are two design configurations for terminators. One design may consist of a connector with a resistor network on a ceramic substrate. The other design may use a SIP (single in-line pin) or DIP (dual in-line pin) package, or discrete resistors on a printed circuit board. Electronic components included in these designs are:

**Resistor**—Provides the necessary resistance to match system characteristic impedance.

**Capacitor**—Provides filtering to control transmission and power line surges. Two commonly used types are:

Ceramic—Filters noise  
Tantalum—Controls voltage excursions

**Voltage Regulator**—Regulates Term Power line at 2.85 volts.

**Light Emitting Diode (LED)**—Indicates power on condition for the Term Power line

**Types of Terminators**—SCSI (Small Computer Systems Interface), Electrical Alternatives

For more information request Catalog 82068

■ **Single-Ended**—Allows up to 5 megabytes per second, cable lengths up to 6 meters:

**A. Passive**—220/330 Ohms for lower data transmission rates.

- Termination of each signal consists of 220 Ohms to terminal power line and 330 Ohms to ground.
- 36 resistors
- Ideal impedance match — 132 Ohms

**B. Active**—Also referred to as "Regulated" or "boulay." These terminators include a voltage regulator along with resistors and capacitors. They support applications requiring longer cable lengths and faster data transmission rates

- 18—110 Ohm resistors
- 3—capacitors
- 2—power divider resistors
- 1—voltage regulator

■ **Differential**—allows up to 10 megabytes per second, cable lengths up to 25 meters.

- Requires more powerful drivers than single-ended. Cannot be incorporated on the SCSI controller chip. This dictates a need for an external chip requiring additional space.
- Ideal impedance match—122 Ohms

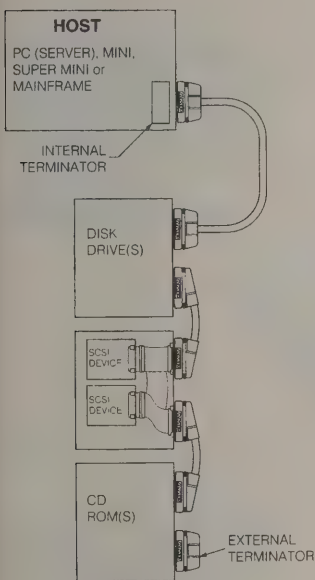

Figure 1

## AMPLIMITE .050 Series Terminators

For more information request Catalog 82068

### SCSI-2 Terminators with Die Cast Shield, with Spring Latches

#### Material and Finish:

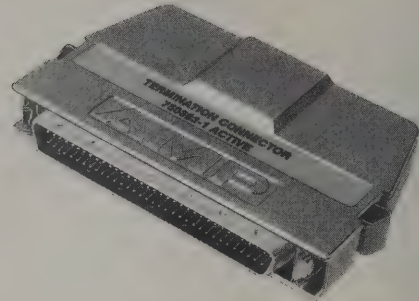

**Housing**—Zinc, plated nickel over copper

**Insert**—94V-0 rated thermoplastic, black

**Latches**—Stainless steel

**Contacts**—Phosphor bronze, duplex plated .000030 [0.00076] gold min. on mating end over .000050 [0.00127] min. nickel underplating

**Resistor**—Thick film network on alumina substrate

| Description                                                            | Part Number |
|------------------------------------------------------------------------|-------------|
| Plug, 50-Position; Single-Ended, Passive; Resistor Tolerance $\pm 5\%$ | 749535-2    |
| Plug, 50-Position; Single-Ended, Passive                               | 869329-1    |
| Plug, 50-Position; Single-Ended, Active; Resistor Tolerance $\pm 1\%$  | 750381-1    |
| Plug, 50-Position; Differential; Resistor Tolerance $\pm 5\%$          | 749541-1    |
| Plug, 68-Position; Single-Ended, Active; Resistor Tolerance $\pm 1\%$  | 750383-1    |

### SCSI-2 Terminators, Internal Shield, All-Plastic Cover, Low Profile, With Spring Latches

#### Material and Finish:

**Shell**—Steel, plated .000200 [0.00508] min. tin or tin-lead over .000050 [0.00127] min. copper

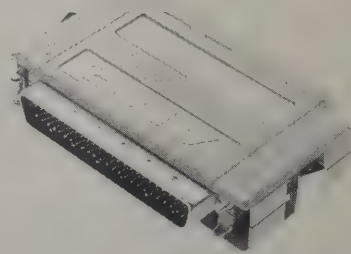

**Housing**—94V-0 rated thermoplastic, black

**Cover**—94V-0 rated ABS, gray

**Latches**—Stainless steel

**Contacts**—Phosphor bronze, duplex plated .000030 [0.00076] gold min. on mating end over .000050 [0.00127] min. nickel underplating

**Resistor**—Thick film network on alumina substrate

| Description                                                             | Part Number |
|-------------------------------------------------------------------------|-------------|
| Plug, 50-Position; Single-Ended, Passive; Resistor Tolerance $\pm 5\%$  | 750881-1    |
| Plug, 50-Position; Single-Ended, Active; Resistor Tolerance $\pm 1.5\%$ | 869546-1    |
| Plug, 50-Position; Differential; Resistor Tolerance $\pm 5\%$           | 869545-1    |

| Plug, 68-Position, With LED; Single-Ended, Active; Resistor Tolerance $\pm 1.5\%$    | 869536-1    |

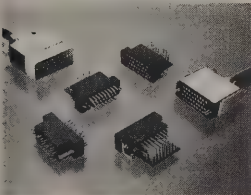

Other Connectors

CPC (Circular Plastic) and Metal-Shell CPC Connectors  
Request Catalog 82021

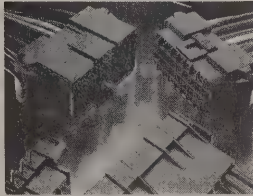

These plastic molded connectors provide substantial savings in both weight and cost. Crimp snap-in contacts are terminated by hand tool or automatic machine. A metal shell connector with a black thermoplastic insert is also available. These connectors are designed for such commercial applications as automotive, aircraft, instrumentation, computer and peripheral equipment.

M Series V.35  
Special Application Connectors  
Request Catalog 65541

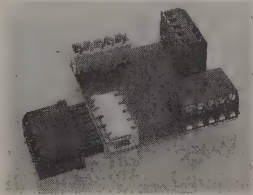

The 34-position V.35 Connector includes both printed circuit board mount and cable mount configurations. They offer dependable, convenient assembly in high-speed data transmission applications. Connectors meet the requirements of ISO 2593 for CCITT V.35 interface.

Metrimate Pin and Socket Connectors  
Request Catalog 82045

Connectors are true metric specification connectors designed for panel, free-hanging or pc board application. These connectors are ideally suited for equipment manufacturers engaged in both national and international markets. This connector line is designed to meet the general requirements of various testing and approval agencies, including UL, CSA, VDE and IEC.

TERMI-BLOK Stacking Connectors  
Request Catalog 65451

These versatile, modular terminal block connectors are widely used in the process controls, telecommunications, traffic control, and building equipment industries. The TERMI-BLOK connectors consist of one-piece right-angle and vertical mount pcb terminal blocks, and cable connectors with mating right-angle or vertical mount pcb headers.

Specifications subject to change.

Notes: 1. Socket contact—.010 [0.25] stock thickness. All other .012 [0.30].

2. Recommended for predominant use of 14 AWG wire.

3. There is no insulation barrel on this contact. Insulation maximum diameter is limited by the housing.

### Grounding Pin

(.100 [2.54] longer than standard pin). Can be used in either plug or cap housing.

24-18 AWG, .040-.100 [1.02-2.54] Ins.  
Dia. Range, Brass, Pre-tin, **Strip Form**  
**Part No. 770210-1**  
20-14 AWG, .060-.130 [1.52-3.3] Ins.  
Dia. Range, Brass, Pre-tin, **Strip Form**  
**Part No. 350654-1**  
**Loose Piece Part No. 350669-1**

### Split Pins

Can be used in either plug or cap housings.

\* In-line version.

Notes: 1. 94V-2 nylon material is natural color, 94V-0 nylon material is brick red color.  
2. Contacts are on .250 [6.35] centerlines.

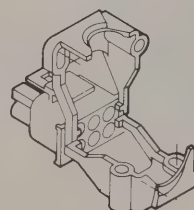

## Keying Plug

94V-2 Nylon material, natural color  
Part No. 1-640415-1  
94V-0 Nylon material, brick red color  
Part No. 1-640415-0

## Plug Housing Strain Reliefs

2, 3, 4, 5 and 8 Circuit, In-Line  
94V-2 Nylon material, natural color  
Part No. 1-350589-0  
94V-0 Nylon material, brick red color  
Part No. 350811-1

6, 9, 12 and 15 Circuit, Matrix  
94V-2 Nylon material, natural color  
Part No. 1-350590-0  
94V-0 Nylon material, brick red color  
Part No. 350812-1

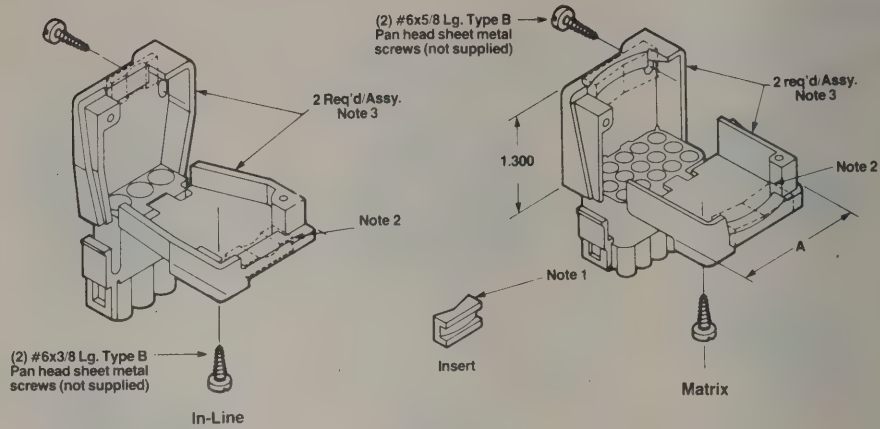

Specifications subject to change.

Call 1-800-522-6752 for product information  
and 1-800-722-1111 for tooling information.

Cap Housings  
Strain Reliefs

2, 3, 4, 5, 6, 9, 12 and 15  
Circuit (Enclosed)

Notes: 1. Cable clamping insert comes attached to strain relief. It can be used to provide additional adjustment for small wire bundles or discarded.  
2. Inserts to be positioned as shown by dotted lines.  
3. Strain relief part numbers represent one-half of a strain relief. Two of a part number are required for one connector.

Cap Housing Adapters

For all positions except  
2 and 6 Circuits  
94V-2 Nylon, natural color  
Part No. 641777-1  
94V-0 Nylon, brick red color  
Part No. 641778-1

For 2 and 6 Circuit  
Cap Housing Only  
94V-2 Nylon, natural color  
Part No. 643182-1  
94V-0 Nylon, brick red color  
Part No. 643182-2

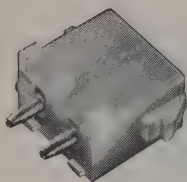

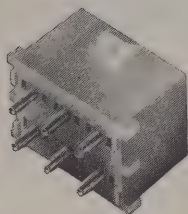

Printed Circuit Board  
Vertical Pin Headers

Material and Finish:  
Housing—94V-2 Nylon, natural color  
94V-0 Nylon, brick red color  
Contacts—Phosphor bronze

Pin and Socket Contacts  
(MR Connectors)

Material and Finish:

Phosphor bronze, pre-tin plated or .000050 [0.00127] nickel over entire contact and .000030 [0.00076] gold in contact area.  
.008 [0.2] stock thickness.

COAXICON SHV Series

Materials

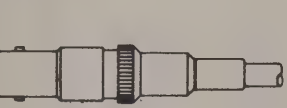

Beryllium Copper: QQ-C-530  
Silicone Rubber: ZZ-R-765  
Brass: QQ-B-626  
Copper: QQ-C-576  
TEFLON Insulation: MIL-P-19468  
Plating: Silver—QQ-S-365

Plugs

Jacks

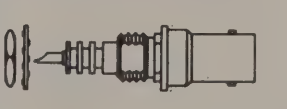

| RG/U Cable                   | Tarn. Res. Plate |
|------------------------------|------------------|
| 58, 58A, 58B, 58C            | 225087-4         |
| 59, 59A, 59B<br>62, 62A, 62B | 225087-5         |

Panel Receptacle

Part No. 51421-1—Silver Plating  
Part No. 51421-2—Tarnish-Resistant plating

Bulkhead Receptacle

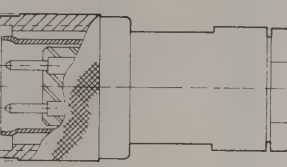

Part No. 51494-1—Silver Plating  
Part No. 51494-2—Tarnish-Resistant Plating

AMP Twin-Ax  
Interconnection  
System

Materials

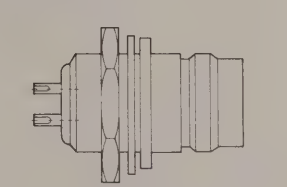

Brass: MIL-C-50  
ASTM B-136  
QQ-B-626  
Beryllium Copper: QQ-C-530 and  
QQ-C-533  
Copper Annealed: QQ-C-576  
Phosphor Bronze: ASTM-B-140  
(QQ-B-750)

Cable Plug

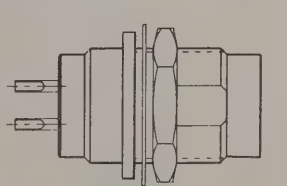

| Contact                | Part Number |
|------------------------|-------------|
| Solder Type            | 227241-1    |
| Crimp Type             | 227241-2    |
| Captivated Solder Type | 227241-3    |

Bulkhead Jack  
(Front Mount)

Part No. 228284-1

Bulkhead Jack  
(Rear Mount)

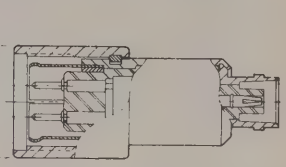

Part No. 228523-1

Plating:

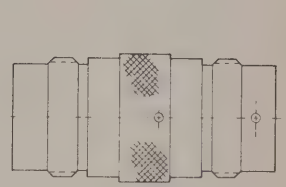

Silver—QQ-S-365  
Gold—MIL-G-45204  
Nickel—QQ-N-290  
Copper—MIL-C-14550  
Zinc—QQ-Z-363  
Tin—MIL-T-10727  
Silicone Rubber: ZZ-R-765  
Nylon: MIL-M-20693 Type I  
TEFLON TFE: MIL-P-19468  
Polypropylene: General purpose

Twin-Ax/BNC Adapter  
(Transformer)

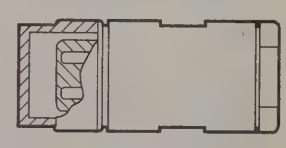

Part No. 227447-1

Cable Splice

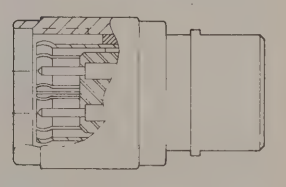

Part No. 227502-1

Cable Jack

Part No. 227682-1

Terminator (Resistor)

50 Ohm—Part No. 227504-1  
75 Ohm—Part No. 227504-2

## Ring Tongue Terminals

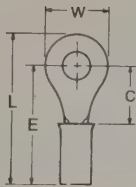

### PIDG

#### Material:

Insulation—Nylon

Terminal Body and Metallic Sleeve—  
Copper per QQ-C-576

Plating—Tin per MIL-T-10727

PIDG Terminals meet or exceed  
the requirements of MIL-T-7928,  
Type II, Class 1 and 2.

### PIDG Radiation Resistant

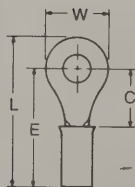

#### Material:

Insulation—Polyvinylidene Fluoride  
(PVF<sub>2</sub>)

Color—Natural

Terminal Body and Metallic Sleeve—  
Copper per QQ-C-576

Plating—Tin per MIL-T-10727

Flanged Spade  
Tongue Terminal

PIDG

Material:

Insulation—Nylon  
Terminal Body and Metallic Sleeve—  
Copper per QQ-C-576  
Plating—Tin per MIL-T-10727

PIDG Terminals meet or exceed  
the requirements of MIL-T-7928,  
Type II, Class 1 and 2.

Spade Tongue  
Terminals

PIDG

Material:

Insulation—Nylon  
Terminal Body and Metallic Sleeve—  
Copper per QQ-C-576  
Plating—Tin per MIL-T-10727

PIDG Terminals meet or exceed the requirements of MIL-T-7928, Type II, Class 1 and 2.

## Ultra-Fast Fully Insulated FASTON Receptacle and Tab

### Material:

Housing—Nylon type 6/6

Terminal—Tin-plated, copper alloy

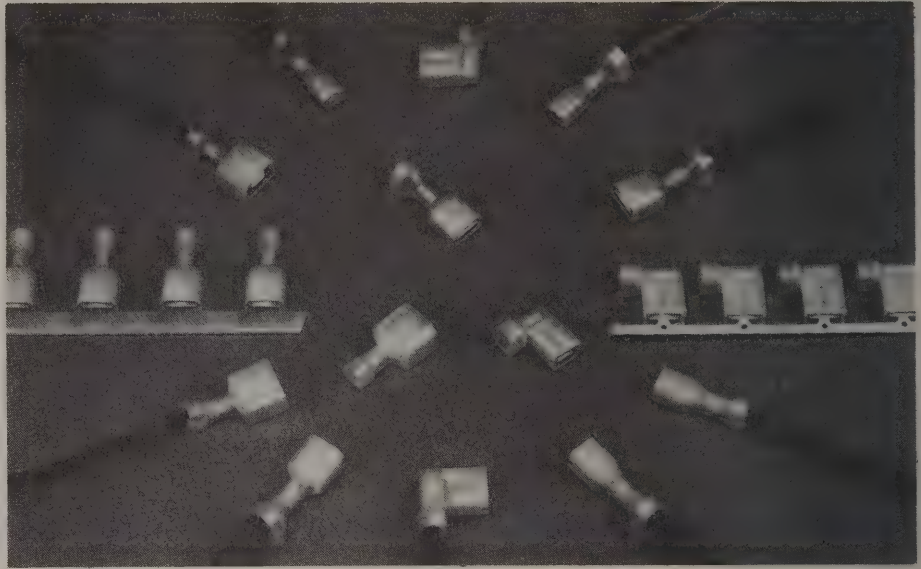

### Color Code (Translucent)

Violet—26-22 AWG [0.12-0.4 mm<sup>2</sup>]

Red—22-18 AWG [0.3-0.9 mm<sup>2</sup>]

Blue—16-14 AWG [1.25-2 mm<sup>2</sup>]

Yellow—12-10 AWG [3-6 mm<sup>2</sup>]

Ultra-Fast Fully Insulated FASTON Receptacle and Tab (Continued)

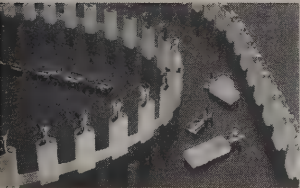

Ultra-Fast Plus—Fully Insulated FASTON Receptacles

**Material:**  
Housing-Nylon 6/6  
Terminal-Tin-plated, copper alloy

**Color Code (Translucent)**  
Red-22-18 AWG [0.3-0.9 mm<sup>2</sup>]  
Blue-16-14 AWG [1.25-2 mm<sup>2</sup>]

Ultra-Fast Plus has been tested by TUV (File No. E9071003) as suitable for end product certification to the following standards:  
EN 60 950/09.87  
DIN IEC 380/VDE 0806/08.81  
DIN IEC 601-1 Part 1/VDE 0750 T1/05.82  
DIN VDE 0700 T1/02.81

Ultra-Pod Fully Insulated FASTON Receptacles

**Material:**  
Housing-6/6 Nylon  
Terminal-Tin-plated, copper alloy

Notes: 1. Plug connector Part No. 552686-1 (B Slot) is available in thin flange housing with .187 [4.75] dia. mounting holes for panel mount applications. Available in 50 position only. Also available in Multiple Wire Plug Connectors.  
2. For thin flange panel mount plug connectors all standard mounting hardware may be utilized with the exception of bail lock mounting hardware.  
3. Acceptable connector insulations are polyvinyl chloride (PVC), polyethylene, irradiated polyethylene and polypropylene and Teflon. Maximum insulation diameter .045 [1.14] for tools that mass terminate conductors on one side at a time. For tools that insert one conductor per side at a time .043 [1.09] insulation diameter is the maximum. As a rule, for harder insulations, such as Teflon, smaller diameters are required.

Material and Finish:

**Housing, bracket, connector comb and terminal support plate**—Thermoplastic (black)  
**Terminals**—Selectively plated gold over nickel plated high strength copper alloy, tin plated tails.  
**EMI Shield**—Nickel plated die casting

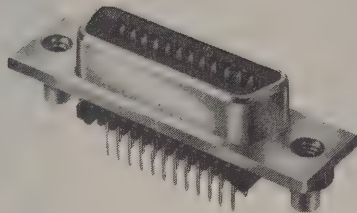

Preassembled Screw Lock

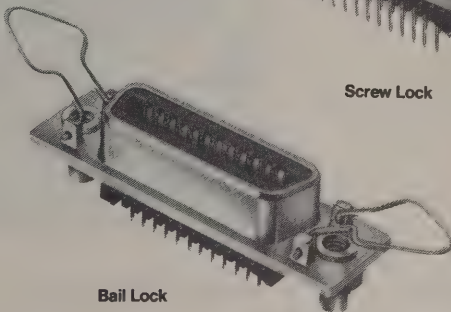

Shielded Vertical Mount  
Connectors

Material and Finish:

**Housing**—Thermoplastic, black  
**Terminals**—Selectively plated gold over nickel plated high strength copper alloy, tin plated tails  
**EMI Shield**—Nickel plated die casting

Screw Lock

<sup>1</sup>SCSI applicable with use of bail lock hardware kit. Part No. 554818-2.

<sup>2</sup>SCSI applicable.

<sup>3</sup>Can be used with Interface Bus Application per IEEE-488.

Modular Interconnection System

Printed Circuit Board  
Modular Jacks  
Standard Profile

With Center Latch  
and Offset Latch

Material and Finish:

**Housing**—Polyester (wave solder compatible)  
**Contact**—.014 [0.36] thick phosphor bronze; plated .000050 [0.00127] gold in contact area and .000080 [0.00203] tin-lead on solder tails, over .000050 [0.00127] nickel underplate

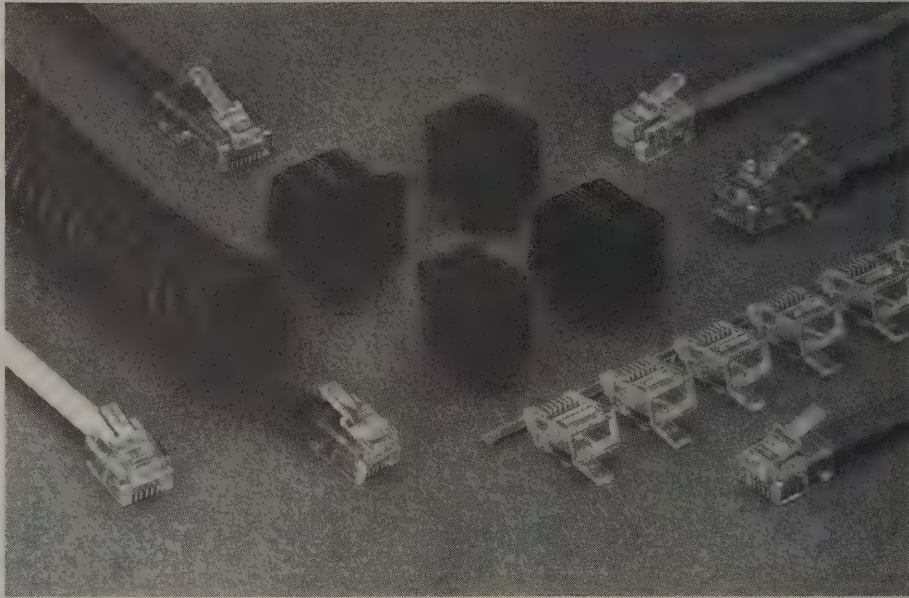

AMP Modular Plugs

Material and Finish:

**Housing**—Polycarbonate  
**Contact**—.014 [0.36] thick phosphor bronze; plated .000050 [0.00127] gold in contact area and gold flash on remainder of contact, over .000050 [0.00127] nickel underplating.

### HIGH DENSITY INTERCONNECTION SOCKETS and CONNECTORS

**Commercial Grade**

**PLCC, SIMM, DIP, AND DRAM  
Sockets, Pin Headers & Connectors**

**ONE STOP SHOPPING FOR ALL OF YOUR INTERCONNECTION NEEDS**

### ANDON'S COMMERCIAL GRADE STAMPED AND FORMED SOCKETS AND EDGE CARD CONNECTORS ARE STOCKED FOR IMMEDIATE DELIVERY.

Andon's economy grade sockets and edge card connectors are designed for commercial application and complement our line of precision screw machine products. The economy grade product line includes;

- **PLCC Sockets:** available in 20, 28, 32, 44, 52, 68, 84 and 100-pin patterns in soldertail and surface mount configurations.
- **DRAM Option Sockets:** designed for future upgrade of memory chips. Available DRAM's include; 34, 38, (for upgrading an 18-pin one megabit chip to 20-pin 4 megabit chip), 42, 46 and 54-pin configurations.

- **Standard DIP Sockets:** .300 centers include 6, 8, 14, 16, 18, 20, 22, 24, and 28-pin patterns. .600 spacing includes 24, 28, 32, 40, 42, 48-pin configurations.
- **Coin cell battery holders**
- **Mini DIN Connectors**
- **Terminal Blocks**
- **6 and 12-pin Power Wafer Sockets, and Edge Card Connectors**
- **30 and 60-pin single and dual vertical and angled SIMM Sockets:** in two types of materials, Poly Butylene Terephthalate (PBT) and Liquid Crystal Polymer (LCP).
- **Single and dual straight and right angle Pin Headers and Box Headers:** Single headers are available in 5, 10, 15, 20, 25, 30, 35, and 40-pin configurations. Dual headers come in 10, 20, 30, 40, 50, 60, 70 and 80-pin configurations.

## Series 585 Hi-Reliability Interstitial PGA Socket

### FEATURES UNIQUE ANDON 1 OZ. INSERTION-CERTIFIED CONTACTS

- CONTACTS MADE IN HOUSE UNDER STRICT QUALITY CONTROL

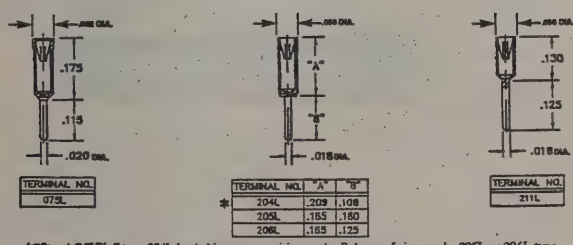

#### FEATURES

- Unique 1oz. insertion force (Per Pin)  
Contacts ease insertion and withdrawal  
of high density ASIC devices
- Contact design provides .005" (0,020mm) greater positional tolerance  
critical in high pin out device mating.
- Glass epoxy socket insulator matches  
thermal coefficient of expansion of PCB.

## Universal & Pin Specific ZIF Programming/Test/Burn-in Sockets

Aries offers one of the most extensive ranges of test, programming and burn-in sockets in the industry, with a version to accommodate just about every package

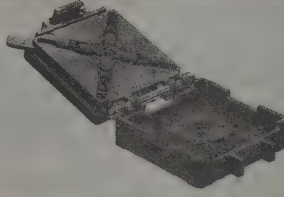

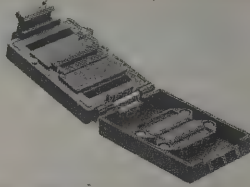

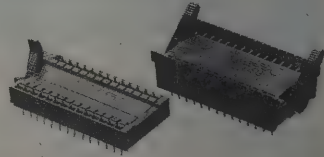

style and application need. Aries' exclusive Universal ZIF socket, available in DIP, PGA, PLCC and SOIC package styles, lets you use just one socket to

handle a whole range of device sizes, footprints, and pin counts.

### Package Styles:

| UNIVERSAL ZIF<br>DIP SOCKETS                                                                                                                                                                                                                                                                                                                                                                           | PIN SPECIFIC<br>ZIF PGA SOCKETS                                                                                                                                                                                     | PIN SPECIFIC<br>ZIF PLCC SOCKETS                                                                                                                                                                                                  |

## Jumper Assemblies

Aries offers an amazing selection of jumper assemblies for easily and reliably making board-to-board and on-board

wiring connections. Choose from thousands of standard cable and connector combinations — or consult Aries' engi-

neering department for the right custom assembly for your application.

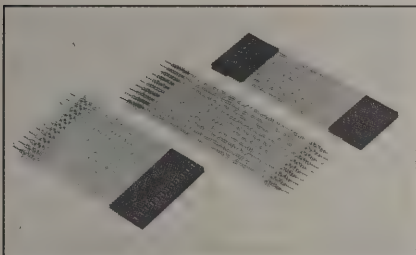

### Series 152FB Fusion Bonded Cable Jumpers

These rugged cable jumpers can be plugged directly into PC boards or Aries pin line sockets. The 26 AWG stranded copper conductor features a fusion bonded overcoat of tin for easy solderability and/or pluggability. The extruded PVC insulation features a polarization stripe along one edge.

Series 152FB jumper assemblies can be furnished with up to 22 conductors on .100 (2,54) centers. Cable lengths range from 1 (25,40) up. All jumpers are shipped with PROTECTO-TAB ends which are easily removed when the jumper is soldered or socketed.

### Series 171-175 Flat Pin Staked Flex Jumpers

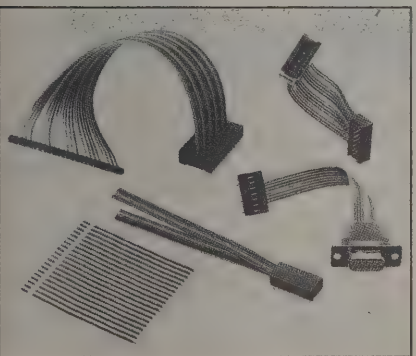

These series feature thin, flexible solid copper conductors embedded within tough, flexible, flame retardant polyester film insulation. The cable is terminated with flat pins which are securely crimped to the conductors through the insulation. This staking action forms a gas-tight electrical connection. The pins are designed for easy connection into PC board holes

or to a variety of connection hardware.

These jumpers are available from 4 to 40 conductors with flat male pins or female receptacles crimped to each conductor at either or both ends. Females are contained in a 94V-O plastic housing. Both tin and gold plating are available.

### DIP Jumpers / Special Jumper Configurations

Aries offers a uniquely broad range of jumpers and jumper assemblies. Cables can be terminated with DIP plugs, female sockets, combination plug/sockets, D-subminiature connectors, or virtually any special connector that can be soldered or mass terminated. Other options for the cable ends include fanning the cable out on a unique "pitch" bar, with tinned conductors held on .100 (2,54) pitch, ready to be soldered into any standard thru hole board. Or, one end can be simply cut, ready for you to terminate with your own IDC device. DIP plugs can be oriented up

or down perpendicular to the cable, or parallel to the cable. All of these choices are available for either end of the jumper.

Ideal for non-standard pin counts and special wiring sequences, these jumpers can be furnished with a broad range of cable choices, including 28 AWG stranded (standard, color coded per EIA standards), as well as twisted pair, flat conductor cable, and .100 (2,54) pitch cable (which can be terminated with sturdy in-line male pins in a rugged housing).

NOTE: Aries specializes in custom design and production. In addition to the standard products shown on this page, special materials, platings, sizes, and configurations can be furnished, depending on quantities. Consult factory for details.

## DIP/SIP Sockets and Headers

Who else but Aries could offer such a vast assortment of DIP and SIP sockets and headers? Whether you need standard size or low-profile body type, wire-wrap or solder tail termination, eight or

48 pins...you'll find a standard Aries socket to suit just about any application requirement. If not, try our specials! Aries also manufactures a complete line of DIP headers and covers for mounting

a wide variety of components, plus strip and pin-line headers for board interconnect applications. All headers are available with stamped or screw machined contacts.

## DIP/SIP Sockets (Angled & Elevated)

Choose from Aries' wide selection of display sockets to find exactly the right package for your LEDs, incandescent lamps, DIP switches or other components. To mount devices horizontally or

at 30°, 45°, 60° or 90° angles to the PC board, select an Aries Vertisocket. When you need to gain some height, use an Elevator socket to lift your display from 1/4" to 1-1/4" above the board.

All display sockets are available with a broad range of standard pin counts and contact styles to accommodate your particular application requirements. And, of course, we do specials like no one else!

## Square Pin Products

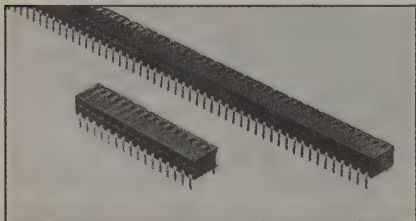

Aries offers a broad assortment of .025 (0,63) and 0.20 (0,51) square pin products in package variations to meet a

multitude of .100 (2,54) and 2 mm board-to-board interconnect needs. If you don't find the square pin product

that's just right for your application, just tell us what you need and we'll work with you.

### .100 SquareStix™ Products

#### BC Series Female Box Connectors

This .100 (2,54) Squarestix series is designed to mate with .025 (0,63) square or round posts. It is available in up to 63 positions, and features twin beam redundant contacts with excellent force and wiping action to ensure reliable perfor-

mance. Selective gold plating and tin-lead plating are standard with others available.

Tail spacing is .100 (2,54) along the connector length and .310 (7,87) between rows. End-to-end stackable connectors can be provided.

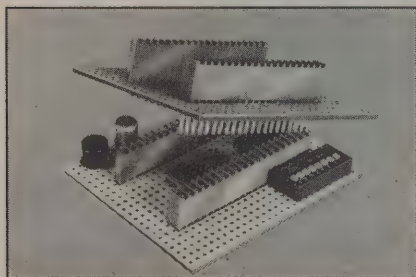

#### Series BV and BH Female Box Connectors

These female box connectors are offered in up to 40 positions in single vertical and horizontal packages. Selective gold plated or tin-lead plated phosphor bronze twin beam redundant contacts provide outstanding electrical performance, as well as optimum insertion/withdrawal forces and cycling capability.

The glass filled thermoplastic insulator can withstand high soldering temperatures without distorting. Solder standoffs facilitate flux removal. The connectors are stackable end-to-end.

#### Press-Lok™ Stackable Female Connectors

For applications requiring the stacking of 1.0625 (1,59) PC boards on .500 (12,70) or .600 (15,24) board centers, Press-Lok connectors come in two styles: with solder tail pins or with a stackable style pin, allowing infinite board stacking. (Connectors with stackable pins can plug into each other or into the solder tail version in the mother board.)

Press-Lok connectors are available in stan-

dard 20 and 40 pin dual row .100 x .100 (2,54 x 2,54) grids or 20 pins in a single row. Pin counts from 4 thru 38 pin (dual row) or 2 thru 19 pin (single row) are also available.

All Press-Lok connectors are side-to-side stackable. For end-to-end stacking, just skip one pin position.

90° Press-Lok connectors are available as Series 5935 SquareStix female connectors.

#### Stax-Stix™ PC Board Spacers

Aries Stax-Stix spacers provide another low cost means of stacking PC boards. Available in single or dual row configurations, these spacers feature .025" (0,63) square, 1.25 (31,25) long pins, tin

(standard) or gold plated. Boards can be spaced at any height from .200 (5,08) to 1.140 (28,96).

## Square Pin Products (Continued)

### .100 Squarestix Products (Continued)

#### Series 900 Squarestix Headers

These .025 (0,63) square pin headers are

offered with either straight or 90° pins and in single row (1-40 pins) and dual row (2-80 pins) packages.

Full length strips can be broken to any number of pins without loss of pins. Pin lengths from .430 (10,92) to 1.230 (31,24) are available.

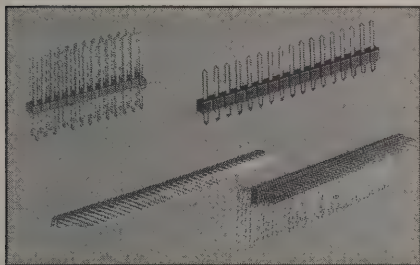

Straight Squarestix can be butted end-to-

end and side-to-side on a .100 (2,54) matrix; the 90° versions are end-to-end buttable.

All Series 900 headers feature a glass-filled UL94V-O rated insulator, gold, tin or gold/tin over phosphor bronze pins, and a standoff to facilitate cleaning and prevent solder wicking.

### 2mm Squarestix™ Products

#### Series 29XX 2mm Male Squarestix Headers

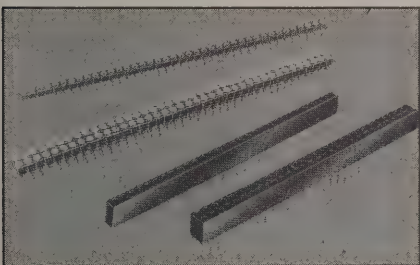

The Series 29XX headers, available in either straight or 90° angle configurations, feature .020 (0,51) square pins on 2 x 2 mm spacing. They are equally useful for making board-to-board connections or for mating with Aries socket strip products.

Aries 29XX headers are available in either single rows of 1-50 pins or double

rows with 2-100 pins. Users can also take advantage of the "break" feature to split the headers to any desired size and pin count.

Pins are phosphor bronze with tin/nickel plating. The body material for all 29XX headers is polyphenylene sulfide (PPS).

#### Series 079 2mm Female Strip Sockets

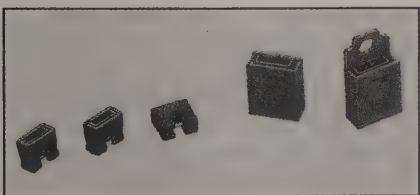

Aries' Series 079 female socket strips give designers flexibility in socketing just about any device on 2 mm spacing — including, of course, the Aries 29XX Series headers.

For even more flexibility, choose one of two contact styles: collet pin or stamped pin. Both contact styles have solder tail terminations for soldering to PC boards

with 2 x 2 mm grids.

The collet pin type sockets are supplied in 1-50 pin single-row strips or 2-100 pin dual-row strips and can be broken to any desired length. Stamped pin socket types come in standard sizes of 30 and 40 pins (single row) and 60 to 80 pins (double row); additional sizes are available to suit individual requirements.

### Mini-Link Jumpers

Aries offers both 2 mm and .100 (2,54) Mini-Link Jumpers. The ME-079 jumper is a .137 (3,48) high shorting plug with 2 mm spacing. Designed for use with 29XX Squarestix headers, this Mini-Link can be used either row-to-row or pin-to-pin. Body material is glass-filled thermo-

plastic. The .100 (2,54) Mini-Links are ideal for jumpering from row to row or from .025 (0,63) square pin to pin. They can be stacked. A convenient test probe slot is provided on ML-100. They can also be furnished with or without a handle for ease of inserting and extracting.

NOTE: Aries specializes in custom design and production. In addition to the standard products shown on this page, special materials, platings, sizes, and configurations can be furnished, depending on quantities. Consult factory for details.

## Programming Devices

For factory- or user-programmable on-board interconnections, Aries offers a variety of programming devices. These versatile components act like a DIP switch...

with a unique characteristic: they can be individually programmed to make a permanent, unalterable switch selection. As always, Aries offers a variety of package

designs and a nearly infinite number of programming alternatives.

### Series 680 Programmable Headers and Covers

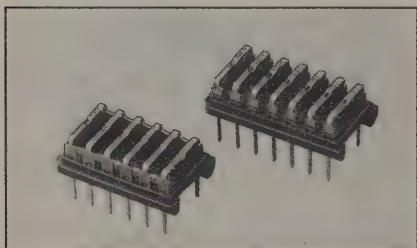

Aries Series 680 programmable headers and covers provide a simple, cost-effective means for achieving custom programming within the header itself. In applications where the programming will not be changed, this series eliminates the need for more costly DIP switches. The headers are available with 4 thru 24 pins on .300 (7,62) centers.

Series 680 headers can be user pro-

grammed with an inexpensive hand tool available from Aries, or an arbor press for high volume applications. They can also be pre-programmed by Aries or by any of our stocking distributors. Programmed headers can be protected with a plain press-on cover. A "Top-Slot" press-on cover is also available for programming through the square openings with a pointed probe (Aries P/N T-680).

### Series 675 DIP Program Headers

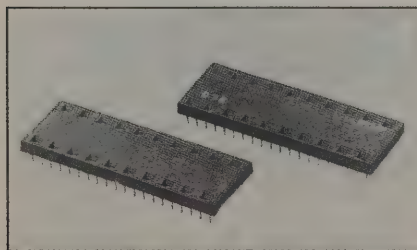

Aries Series 675 DIP Program Headers offer unusual versatility for programming by the user within the header itself. They can be individually programmed using needle nose pliers or the Aries Program Header Tool (Aries P/N T-675) to remove the interconnecting sections. Adjacent pins and opposing pins are interconnected until the pre-slotted section is snapped out by the pliers or tool. An almost infinite

number of programs can be attained by merely leaving or removing interconnection sections.

Series 675 headers are available with 4 thru 20 pins on .300 (7,62) centers. A low profile protective snap-on cover can also be marked to identify the program within the header.

### Pre-Programmed Circuit-Bridges™

This unique, low profile — .140 (3,56) high — component allows you to eliminate extra PC board layers and achieve a tamper-proof DIP switch capability. Circuitry is programmed by Aries to your specifications via a miniature PC board which is insert molded inside the device. The Circuit-Bridge is available on .300 (7,62) centers with 14 thru 24 pins and

.600 (15,24) centers with 24 thru 40 pins. Aries' Circuit-Bridge is ideal for replacing DIP switches and hard wired adapters, for programming at the PCB level, for eliminating jumpers and shunts...even for achieving limited daughterboard capabilities by adding resistors, diodes, etc. prior to insert molding.

### More Aries Programming Devices

Aries gives you even more ways to achieve low cost programming capabilities, including:

- The Aries DIPATCH which acts as a single circuit programmer or shorting

plug when plugged into a .300 (7,62) center socket.

- Aries .040 (11,01) dia. pin products, including DIP shorting plugs (SP200) and jacks (SJ200), with compatible

male or female strips. The strips can be snapped apart to achieve the desired length. Aries also offers .040 (1,01) loose pins for these products.

NOTE: Aries specializes in custom design and production. In addition to the standard products shown on this page, special materials, platings, sizes, and configurations can be furnished, depending on quantities. Consult factory for details.

## Series 85 Single-piece (fixed) blocks economical, with low profile

These Eurostyle terminal blocks are single-piece styles for permanent mounting to PC boards. Our most economical terminal blocks, a screw clamp system is used for securing wires. They are one of the smallest of their type on the market.

Made in the USA, all Eurostyle terminal blocks embody the highest quality standards in the industry—using the finest materials and world class manufacturing processes. They meet or exceed all applicable industry standards.

### Features

- Economical screw clamp system.
- Low profile, small footprint.
- Made for multiple mating.
- Widest range of wire sizes.
- Molded to lengths from 2 to 24 positions.
- High flammability rating.

## Series 88 & 89 Single-piece (fixed) blocks with rising cage pressure clamps

These Eurostyle terminal blocks are single-piece styles for permanent mounting to PC boards. They offer the superior reliability of rising cage pressure clamps for securing wires. The product features a closed-bottom design to prevent solder wicking.

Made in the USA, all Eurostyle terminal blocks embody the highest quality standards in the industry—using the finest materials and world class manufacturing processes. They meet or exceed all applicable industry standards.

### Features

- Holds wires for a secure, reliable contact.
- Molded to length.
- High flammability rating.
- Closed bottom prevents solder wicking.
- Extra-high conductivity contacts.
- Widest range of wire sizes.
- Small footprint.

### Technical Specifications

#### Electrical

UL Class B Comm'l 20 Amps@ 250V 12 AWG  
Class C Ind'l 10 Amps@ 300V 12 AWG  
CSA 15 Amps@ 300V 12AWG  
VDE 0110 Gr.C 16 Amps@ 250V 2.5mm<sup>2</sup>

#### Mechanical

Tightening torque 5in.-lbs, max  
Wire strip length .250 in. or 6mm  
Wire range 12 to 30 AWG

#### Environmental

Operating temp -55°C to +100°C

### Approvals/Registry

# Beau Interconnect Systems

## CONSIDER THE ADVANTAGES OF BEAU THERMOPLASTIC STRIPS

Beau thermoplastic strips offer many significant advantages. The strong, resilient barriers. The quality and uniformity of the product. Our determined commitment to engineering excellence. And, with our large selection, you're sure to find the strip you need. Design in or cross over to Beau thermoplastic strips — the advantage is yours.

## BEND BARRIERS WITHOUT BREAKING

Resilient thermoplastic reduces breakage dramatically. Production line and in-field damage are virtually eliminated.

## TERMINAL TAILS ENCLOSED

Cavities are eliminated around solder terminal tails. Allows mounting on PCB without affecting circuit isolation. Eliminates entrapment of foreign matter. Reduces solder wicking.

## CLOSED-SIDE STRIPS OFFER EXTRA PROTECTION

Closed side serves as a wire stop. Permits mounting components close to strip without shorting. Wires or screwdrivers can't pass through closed side to contact other wires, leads or PCB components.

## HIGHEST U.L. RATING

Our thermoplastic materials all carry the highest U.L. flame retardant rating: UL 94V-0 (self-extinguishing).

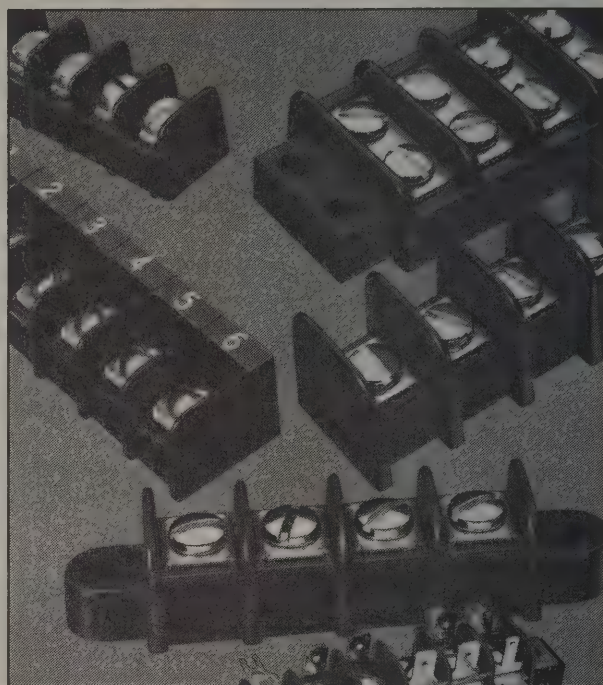

## NEAT, ACCURATE MOUNTING ENDS

All our thermoplastic strips are molded to length. None are cut down from longer strips. They're neater, without ugly saw cuts. And they are precisely the same length every time.

## WIDE VARIETY OF TERMINALS

There is a broad selection of top-side and bottom terminals—including quick-connect terminals which speed assembly time, cut costs and improve connections.

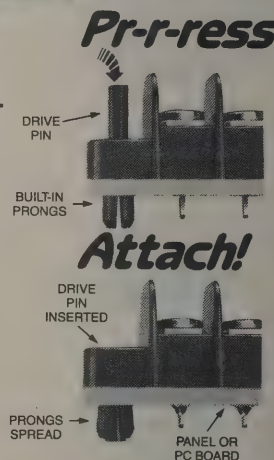

U.L. RECOGNIZED. CSA CERTIFIED.

## RAP-ATTACH™ MOUNTS SAVE 40% OF INSTALLED COST

Rap-Attach mounts (option) are the rapid new way to attach barrier terminal strips to PCBs or panels. Just press in the drive pins. The built-in prongs spread like a blind rivet. It's so easy, you can cut installed cost dramatically.

**Non-conductive mounting.**  
**Strain-free joints.**  
**Wave solderable.**

# Beau Interconnect Systems

## VERSATILE PHENOLIC STRIPS CROSS WITH THE POPULAR SIZES

Vernitron offers one of the widest lines of phenolic barrier terminal strips available anywhere—and we have a wide variety of options to go with them. We have all the most popular sizes and styles. Compare our quality, price and lead times — we think you'll cross over to Beau.

## SINGLE-ROW STRIPS IN MANY STYLES

Series 12 and 13 have high-impact glass-filled phenolic bases for excellent breakage resistance; color, green. The other single-row series are made of general-purpose phenolic; color, black. All styles are available with a wide choice of terminals, marker/insulation strips, imprinting, with or without mounting ends, and many other options.

## DOUBLE-ROW STRIPS RANGE FROM 10 TO 50 AMPS

Available in general-purpose phenolic; color, black. Wide choice of terminal styles, marker/insulation strips, imprinting, with or without mounting ends, and many other options.

## WIDE VARIETY OF TERMINALS

There is a broad selection of top-side and bottom terminals — including quick-connect terminals which speed assembly time, cut costs and improve connections.

## OUR HIGHEST CURRENT STRIP

Series 28 is rated at 50A. It's our highest current strip. Series 28 is a direct cross with series 603.

## LOW-COST RIVETS OFFER GREATER SECURITY

Three series of single-row strips come with either screw or rivet (option) construction. Low-cost rivets are vibration resistant and offer greater in-field security. These strips are exact replacements for the styles shown in the table below.

**C&C JETRONIC****CONNECTORS & CABLE ASSEMBLIES****COAXIAL & CIRCULAR CONNECTORS****CUSTOM CABLE ASSEMBLIES**

- Free corporate logo
- Special packaging and labeling
- Design support and documentation
- Connectors from card edge, Din, RF....etc.
- Programmed Hi-Pot testing
- Ionic cleanliness for finished products
- RS 232C applications
- High torque capabilities

- Multiple termination
- Multi gauge conductors
- Gradual or acute angles
- 100 million flex cycles
- Temperatures -100 +500F
- Neoprene jacketing
- 100% tested
- Reduce EMI/RFI emissions
- "In house" mold tooling

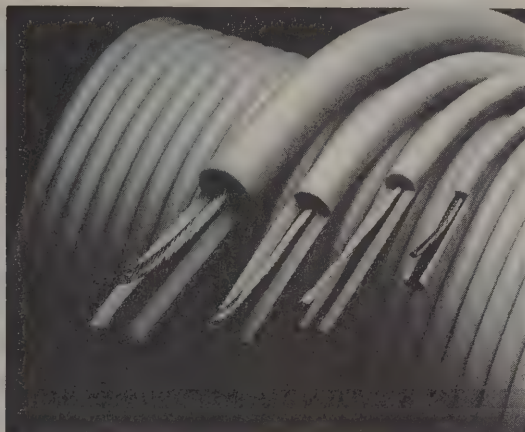

- Meet UL, CSA, VDE and FCC requirement
- Cable capabilities include PU, PVC, P-P, Hytrel, Neoprene tyle wire or custom combinations
- From prototype harnesses to interconnection systems
- MIL-STD-2000 soldering, MIL-I-45208A, MIL-STD-454, MIS-S-45734E, WS-6536S, MIL-Q-9858A
- Pull, bend, abrasion, hardness and flame testing, extension/retraction life tester, Insertion/withdraw force meter
- High voltage(5KV to 1000KV) for radar, laser, electro beam, X-ray, capacitor discharg systems

## The CC SERIES

- **High Voltage Applications**
- **Single and Multi-Conductor**
- **7 Standard Sizes**
- **Operating Voltage: 10 to 40KVDC**
- **Dielectric: Silicone**
- **Wire Size: 16 to 22 AWG**
- **Corona Free Performance**
- **Applications:** Radar Installations, Accelerators, Electron Beam & Medical Scanning Equipment, Ground-to-Ground and Air-to-Air Missiles.

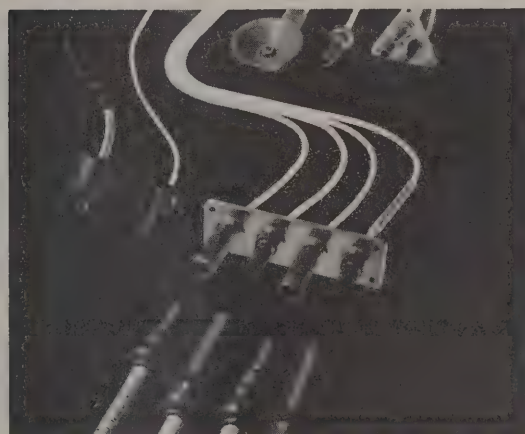

Over the past 18 years Caton has been challenged with and met hundreds of opportunities to supply High Voltage Corona-Free cable assemblies for military and commercial requirements.

Often applications required a custom design; however many did not. Until now, the availability of a "standard" high voltage cable assembly with the reliability of a "Caton Custom Assembly" was non-existent. The customer had little choice but to opt for the custom design and higher cost and longer delivery!

***NOW THERE IS A CHOICE!!....***

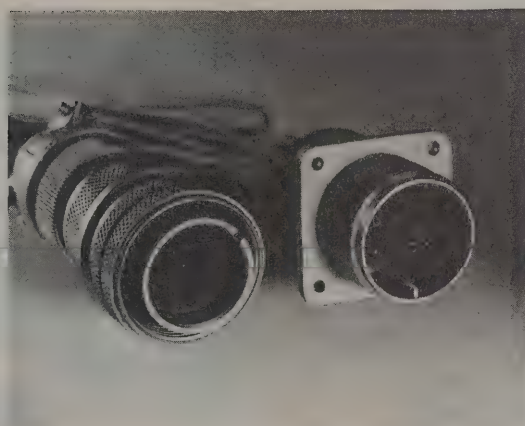

## The 14 SERIES

- **High Voltage Applications**
- **In-Line Single Conductor**
- **3 Standard Sizes**
- **Molded Silicone Body**
- **Operating Voltage: 10 thru 45KVDC**
- **Current Rating: 4 - 10 AMPS**
- **Plug Insert: Silicone Rubber**
- **Applications:** Radar Installations, Photo Copy, Laser & Scanning Equipment., Printing Presses and Laboratory hook-ups.

## The 16 SERIES

- **High Voltage Applications**
- **Single and Multi-Conductor**
- **10 Standard Shell Sizes**
- **Mil-C-5015 Style Shells**
- **15 Different Insert Configurations**
- **Molded Silicone Body**
- **Operating Voltage: 5 thru 75KVDC**
- **Current Rating: 4-16.5 AMPS**
- **Plug Insert: Silicone Rubber**
- **Applications:** Radar Installations, Power Supplies, Laser & Scanning Equipment.

We have applied our years of experience in building the most reliable High Voltage Corona-Free cable assemblies and have placed this technology into each of our standard designs.

**CATON**  
Caton Connector Corporation

Jones River Industrial Park, 20 Wapping Road, Kingston, MA 02364  
Tel: 617-585-4315 FAX: 617-585-2973

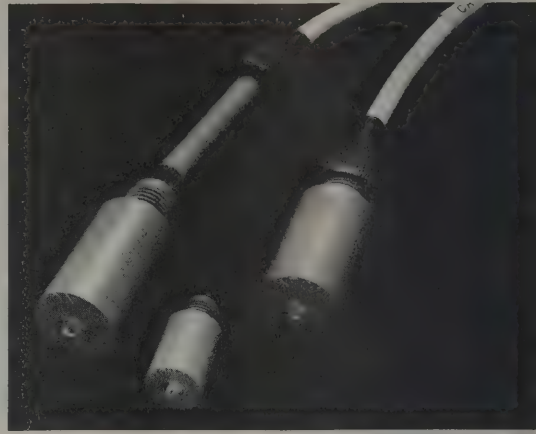

Our new catalog features these 6 standard product series, each of which began as a "Caton Custom" design. We have expanded the available configurations of each design and stock all components to keep manufacturing time minimal!

Caton prides itself as a leader of innovative designs that meet extraordinary applications. If your requirement cannot be met by a standard product, please call to discuss your custom requirement.

Please call 1-800-966-7667 to request a catalog or 1-617-585-4315 ext. 3015 or 3016 to discuss your application further.

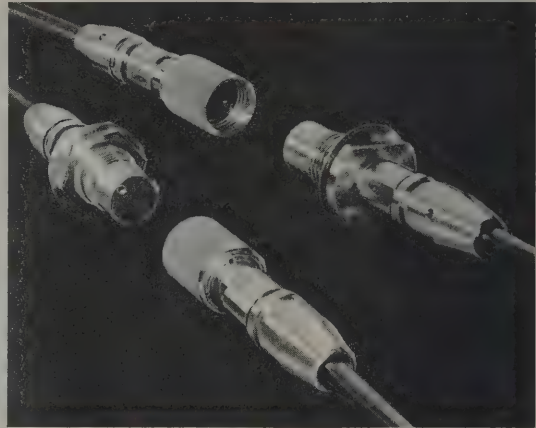

## The 17 SERIES

- **High Voltage Applications**
- **Single Conductor**
- **3 Standard Sizes**
- **Operating Voltage: 15 to 40KVDC**
- **Current Rating: 10 AMPS**
- **Plug Insert: Silicone Rubber**
- **Receptacle: Diallyl Phthalate**
- **Corona Free Performance**
- **Applications:** Power Supplies, Radar Installations, Laser Equipment, Satellite Navigational Equipment, Ground-to-Air and Air-to-Air Missiles.

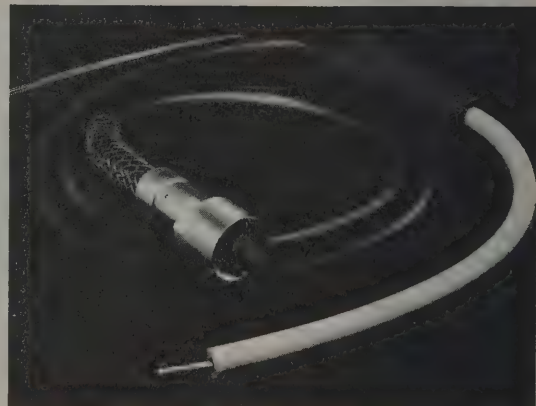

## The 18 SERIES

- **Field Assembled**
- **Single Conductor for HIGH VOLTAGE applications.**
- **Operating Voltage: 20KVDC**
- **Current Rating: 20 AMPS**
- **Corona Extinction: 5.3KVRMS**
- **Use with RG-214 Cable**
- **Plug Insert: Silicone Rubber**
- **Bulkhead Receptacle Insert: Thermoset Diallyl Phthalate**
- **Applications:** Radar Installations, Electron Microscopes, Accelerators, Electron Beam & Medical Scanning Equipment

## The 19 SERIES

- **High Voltage Applications**
- **Single Conductor**
- **3 Standard Sizes**
- **Operating Voltage: 60KVDC**
- **Current Rating: 20 AMPS**
- **Plug Insert: Silicone Rubber**
- **Receptacle: Diallyl Phthalate**
- **Corona Free Performance**
- **Applications:** Power Supplies, Radar Installations, Laser Equipment, Satellite Navigational Equipment, Ground-to-Air and Air-to-Air Missiles.

## CATON'S ACQUIRED PRODUCTS

The acquired products division of Caton Connector Corporation is comprised of connectors and assemblies that have been transferred by the original manufacturer under a licensing agreement to Caton. In most cases, original tooling is still used to manufacture the products. Where new tooling has been made, Caton has adhered to strict confirmation of the original tooling specification. If any deviation from the original specification has occurred, it is usually changed to upgrade the molding material.

### Acquired from Burndy Corporation

#### The EC Series

Originally manufactured by H.H. Buggie, the EC series consist of printed circuit board type connectors which are mineral filled diallyl phthalate to meet various MIL-M-14F type requirements. Each series comes with plug and receptacle. Operating voltage is 250 volts AC rms with a current rating of 5 amperes. Operating temperatures range from -55°C to +125°C

#### The MMC Series

These are modular terminal blocks with crimp-type snap-in contacts. The MINILOK is designed for standard and miniature coax cable. The MODULOK is used with standard wire and standard coax. The CRABLOK is a sturdy terminal block which accommodates standard AWG8 - 22 wire sizes.

#### The PD Series

This is a general purpose rack & panel type connector originally used to connect power sources to receivers, modulators and transmitters. It consists of twelve #20 contacts with a pin diameter of .040 and three #20 contacts, with a pin diameter of .090 inches. The PD Series will accommodate wire sizes from 12 - 20 AWG. Connectors come with removable crimp-type and solder contacts (Sold Separately).

#### The ME Series

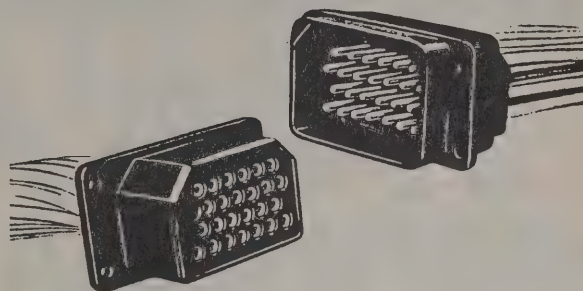

The ME HYFEN can be used in rack and panel and draw type applications. It utilizes crimp-type snap-lock contacts in 8, 13 and 26 place configurations for single conductors. All configurations have a one-piece molded insert. Inserts are interchangeable in shells providing a possible dead front on either side of the connectors. Molded-in metal ferrules allow frequent insertion and withdrawal of contacts. Optional features include an aluminum hood with cable clamp, latch and locking spring.

#### The Sealok Series

An environmentally sealed modular interconnection system that seals out moisture. This system is ideal for shipboard, aircraft, aerospace and industrial/commercial applications where protection against the environment is required. This system functions over a wide range of temperature, vibration and shock type conditions.

#### The YIC/YOC Series

An uninsulated Hyring designed for rapid and reliable grounding or terminating of shielded cable.

### Acquired from US Components, Inc.

#### The MI Series

Interchangeable and intermateable with IMI Series, the MI Series consists of 12 different rack and panel connector configurations from 7 to 75 contacts. This series is designed to accommodate #18 and #20 AWG wire.

#### 625 Series Rack & Panel Connector

This series may also be used as a P.C. type mated connector. It features .125 grid spaced crimp removable type female contacts and .025 square wire wrap male contacts. This connector has 36 contacts. The pin diameter is .062.

#### MIG Two-Piece Connector Series.

The MIG Series is a right angle plug and receptacle type connector with contact spacing on .100 centers. This series is offered in 5 different configurations from 11 to 50 contacts. The pin diameter is .040.

#### MH Series

This miniature Hex type connector comes with or without a locking mechanism. It consists of 4 different sizes from 4 to 9 contacts. The pin diameter is .040. This connector is designed to accommodate #20 AWG wire.

#### MIWC Series Rack & Panel Connector

This is a 104 contact center screwlock plug and receptacle type connector. Pin diameter is .062 with a center-to-center spacing of .150 inches. This connector is designed to accommodate #16 AWG wire.

#### UTP Series

The UTP Series is a test point type connector. It is available in a 5 and 16 pin configuration. The pin end of contact is .030 diameter. This series accepts a standard .080D test probe and retains probe with spring pressure.

#### U980/990 and 900 Series Power Connectors.

These are power connectors, some with power screw lock mechanisms. They vary in size from 7 to 34 contacts. Pin diameter is .062. These connectors are designed to accommodate #16 AWG wire.

#### UPCR/UP2CR Series

These are edge card type connectors that meet MIL-C-21097 standards. The UPCR is a single row receptacle with contacts on .156 centers. It is offered in 5 different configurations from 6 to 20 contacts and will accommodate .052 and .072 card thicknesses. The UP2CR is a double row solder type terminal receptacle with contacts on .156 centers.

For more information on these or other acquired products or for custom or modified assemblies, please call the Acquired Products Division of Caton Connector Corporation, at (617) 585-4315.

## RESISTOR COLOR CODES

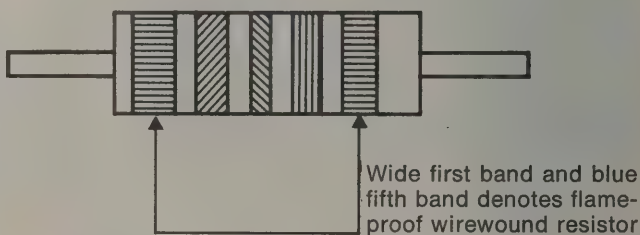

### EIA/MIL Resistor Color Codes

Color code for general-purpose industrial resistors

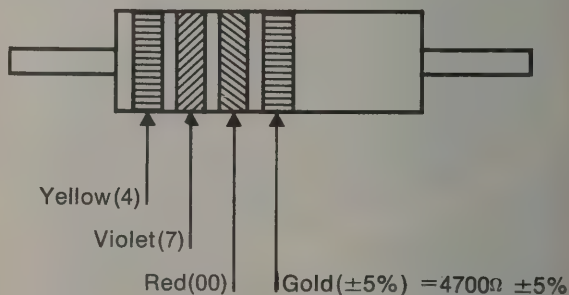

Color code for general-purpose wirewound resistors

| Color    | Significant digit | Multiplier | Tolerance |
|----------|-------------------|------------|-----------|
| Black    | 0                 | 1          | —         |
| Brown    | 1                 | 10         | ± 1%      |
| Red      | 2                 | 100        | ± 2%      |
| Orange   | 3                 | 1000       | ± 3%      |
| Yellow   | 4                 | 10,000     | ± 4%      |
| Green    | 5                 | 100,000    | —         |
| Blue     | 6                 | 1,000,000  | —         |
| Violet   | 7                 | 10,000,000 | —         |
| Gray     | 8                 | —          | —         |
| White    | 9                 | —          | —         |
| Gold     | —                 | 0.1        | ± 5%      |
| Silver   | —                 | 0.01       | ± 10%     |
| No color | —                 | —          | ± 20%     |

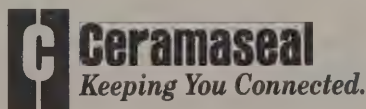

Example:

# PERKIN-ELMER, MIT, SANDIA, VARIAN, LAWRENCE LIVERMORE, RAYTHEON, GE, IBM AND NASA ALL CONNECT WITH CERAMASEAL

Your application may never need the rigorous performance that these facilities do. But every connection requires reliability — that's our strength. Ceramaseal has pioneered ceramic-to-metal seal technology for more than 40 years, and we're already working on the next 40 by developing new product designs and process capabilities for such applications as fiber optics, sensors and cryogenics. Our renewed commitment to you is to provide the highest quality customer service, prompt delivery and competitive pricing for our standard and custom-designed components.

For a free copy of our product catalog, call (800) 752-SEAL.

**CA****CIRCUIT ASSEMBLY CORP.****HIGH DENSITY NANOFLEX****I.D. SOCKET - .050 X .100****FEATURES**

UL recognized; mass-terminates with .025 center ribbon cable; mates with .027 X .019 post on .050 X .100 centers; patented 3 point IDC contact system; slots in cover permit easy insertion of test probe; molded on polarizing tab; dual leaf side wipe contacts; optional strain relief (ordered separately)

**MATERIALS**

Housing - glass filled polyester, blue, UL94V-0  
Contact - beryllium copper plated with 12µIN sel gold

**HIGH DENSITY NANOFLEX****SHROUDED HEADER - .050 X .100****FEATURES**

UL recognized; mates with NANOFLEX sockets on .050 X .100 grid; .106 long X .020 square solder tail; P.C.B. hole pattern on 4 row .050 X .075 staggered grid; latch ejectors for socket with/without strain relief

**MATERIALS**

Housing - glass filled polyester, blue, UL94V-0  
Contact - phosphor bronze plated with 12µIN sel gold

**NOTES**

for right angle tail exit: replace NFH with NFHR

**HIGH DENSITY NANOFLEX****BOX HEADER - .050 X .100****FEATURES**

UL recognized; mates with NANOFLEX sockets on .050 X .100 grid; .106 long X .020 square solder tail; P.C.B. hole pattern on 4 row .050 X .075 staggered grid; low profile

**MATERIALS**

Housing - glass filled polyester, blue, UL94V-0  
Contact - phosphor bronze plated with 12µIN sel gold

**HIGH DENSITY NANOFLEX****SOCKET - .050 X .100****FEATURES**

UL recognized; mates with .027 X .019 post on .050 X .100 grid; .106 long X .016 X .020 solder tail; P.C.B. hole pattern on 4 row .050 X .075 staggered grid; molded on polarizing tab

**MATERIALS**

Housing - glass filled polyester, blue, UL94V-0  
Contact - phosphor bronze plated with 12µIN sel gold

**HIGH DENSITY NANOFLEX****I.D. TRANSITION PLUG - .050 X .075****FEATURES**

UL recognized; mass-terminates with .025 center ribbon cable; .130 long X .016 X .024 solder tail; P.C.B. hole pattern on 4 row .050 X .075 staggered grid; can be soldered directly to P.C.B.; patented 3 point IDC contact system; slots in cover permit easy insertion of test probe

**MATERIALS**

Housing - glass filled polyester, blue, UL94V-0  
Contact - beryllium copper plated with 12µIN sel gold

CIRCUIT ASSEMBLY CORP.

**I. D. SOCKET - .100 X .100****FEATURES**

UL recognized, CSA certified; conforms to MIL-C-83503; mass-terminates with .050 center ribbon cable; mates with .025 square posts on .100 centers; stainless steel cover clips; single leaf side wipe contact; optional strain relief (ordered separately)

**MATERIALS**

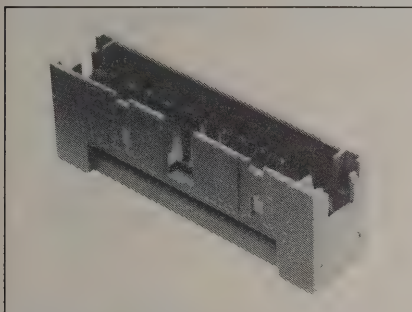

Housing - glass filled polyester, gray, UL94V-0  
Contact - beryllium copper plated with 30µIN sel gold

**NOTES**

for central polarizing tab: add suffix -SPT  
for 10µIN gold plating: replace -F with -B

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of Contacts | Connector   | Strain Relief |
|-----------------|-------------|---------------|
| 10              | CA-10IDS2-F | CA-SR10IDS2   |
| 14              | CA-14IDS2-F | CA-SR14IDS2   |
| 16              | CA-16IDS2-F | CA-SR16IDS2   |

| 26              | CA-26IDS2-F | CA-SR26IDS2   |
| 34              | CA-34IDS2-F | CA-SR34IDS2   |
| 40              | CA-40IDS2-F | CA-SR40IDS2   |
| 50              | CA-50IDS2-F | CA-SR50IDS2   |
| 60              | CA-60IDS2-F | CA-SR60IDS2   |

**I.D. HEADER - .100 X .100****FEATURES**

UL recognized, CSA certified; mass-terminates with .050 center ribbon cable; .025 square post mates with sockets on .100 centers; mounting ear option has .125 wide slot; optional latch ejectors for mating socket with/without strain relief

**MATERIALS**

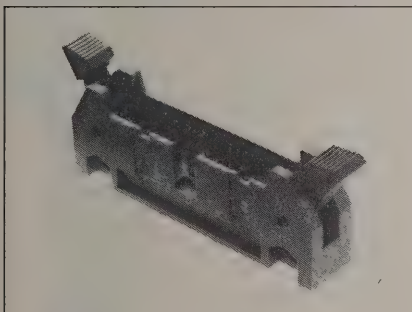

Housing - glass filled polyester, gray, UL94V-0  
Contact - phosphor bronze plated with 30µIN sel gold

**NOTES**

for loose latch ejectors for socket: order CA-IDHLE-43 for socket; order CA-IDHLE-57 for socket with strain relief; No tool needed to install, 2 required per connector

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of Contacts | Connector no ears | Connector with Ears |
|-----------------|-------------------|---------------------|
| 10              | CA-10IDH-3F-SPT   | CA-10IDH-2F-SPT     |
| 20              | CA-20IDH-3F       | CA-20IDH-2F         |
| 26              | CA-26IDH-3F       | CA-26IDH-2F         |

| 60              | CA-60JDPSL-1T |

**I.D. TRANSITION PLUG - .050 X .100****FEATURES**

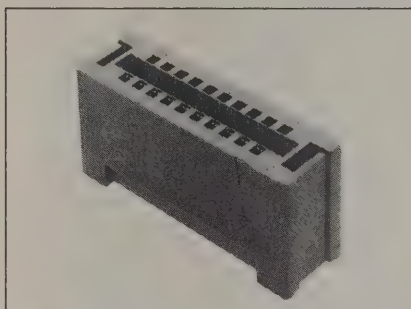

UL recognized, CSA certified; mass-terminates with .050 center ribbon cable; .100 long solder tail; P.C.B. hole pattern on 4 row .050 X .100 staggered grid; can be soldered directly to P.C.B.

**MATERIALS**

Housing - glass filled polyester, gray, UL94V-0  
Contact - beryllium copper plated with 250µIN tin

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of Contacts | Solder Tail   |
|-----------------|---------------|
| 10              | CA-10IDPCB-1T |
| 20              | CA-20IDPCB-1T |
| 26              | CA-26IDPCB-1T |
| 34              | CA-34IDPCB-1T |
| 40              | CA-40IDPCB-1T |
| 50              | CA-50IDPCB-1T |

**I.D. EDGE CARD - .100 CENTERS****FEATURES**

UL recognized, CSA certified; mass-terminates with .050 center ribbon cable; mates with standard .062 thick P.C.B. on .100 centers; mounting ear option has .125 wide slot; stainless steel cover latches; optional strain relief (ordered separately)

**MATERIALS**

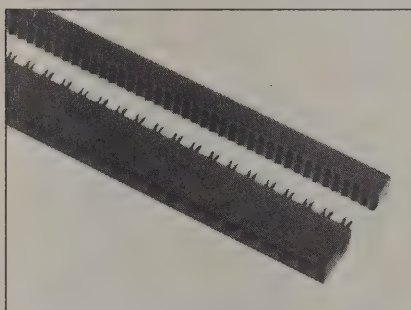

Housing - glass filled polyester, gray, UL94V-0  
Contact - beryllium copper plated with 30µIN sel gold

**NOTES**

for mounting ears: replace -3F with -2F

**CIRCUIT ASSEMBLY PART NUMBER**

| No. of Contacts | Connector    | Strain Relief |
|-----------------|--------------|---------------|
| 10              | CA-10IDEC-3F | CA-SR10IDEC   |
| 14              | CA-14IDEC-3F | CA-SR14IDEC   |
| 16              | CA-16IDEC-3F | CA-SR16IDEC   |
| 20              | CA-20IDEC-3F | CA-SR20IDEC   |
| 26              | CA-26IDEC-3F | CA-SR26IDEC   |
| 34              | CA-34IDEC-3F | CA-SR34IDEC   |
| 40              | CA-40IDEC-3F | CA-SR40IDEC   |
| 50              | CA-50IDEC-3F | CA-SR50IDEC   |
| 60              | CA-60IDEC-3F | CA-SR60IDEC   |

**I.D. STRIP SOCKET - .100 CENTERS****FEATURES**

UL recognized, CSA certified; mass-terminates with .100 center ribbon cable; mates with .025 square post on .100 centers; available in 10 through 36 contact positions (cut to size)

**MATERIALS**

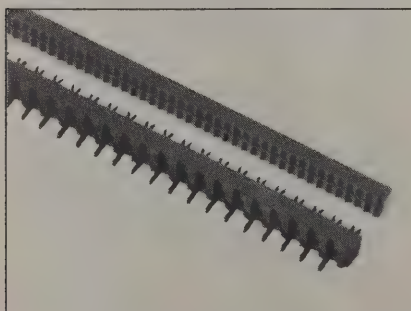

Housing - glass filled polyester, gray, UL94V-0  
Contact - beryllium copper plated with 30µIN sel gold

**NOTES**

for other sizes: replace 36 with desired contact count

**CIRCUIT ASSEMBLY PART NUMBER**

| No. of Contacts | Connector     |
|-----------------|---------------|
| 36              | CA-S36IDS-2-F |

**I.D. STRIP PLUG - .100 CENTERS****FEATURES**

UL recognized, CSA certified; mass-terminates with .100 center ribbon cable; .120 long X .025 square solder tail; can be soldered directly to P.C.B.; available in 10 through 36 contact positions (cut to size)

**MATERIALS**

Housing - glass filled polyester, gray, UL94V-0  
Contact - phosphor bronze plated with 150µIN tin

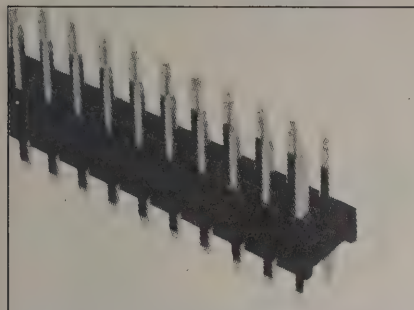

**NOTES**

for other sizes: replace 36 with desired contact count

**CIRCUIT ASSEMBLY PART NUMBER**

| No. of Contacts | Connector    |
|-----------------|--------------|
| 36              | CA-S36IDP-1T |

**CA****CIRCUIT ASSEMBLY CORP.****STRIP HEADER - .100 CENTERS****FEATURES**

UL recognized, CSA certified; .025 square post, .240 high, mates with sockets on .100 centers; .100 long X .025 square solder tail in straight and right angle tail exits; available in single, dual and triple row configurations; up to 40 positions per row (cut to size); many other contact lengths and configurations available

**MATERIALS**

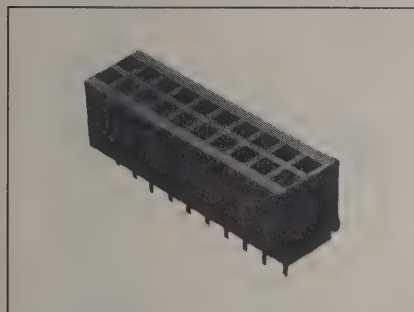

Housing - glass filled polyester, black, UL94V-0  
Contact - phosphor bronze plated with 15µIN sel gold

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of<br>Contacts | Straight<br>Tail Exit | Right Angle<br>Tail Exit |
|--------------------|-----------------------|--------------------------|
| 1X40               | CA-S40-24C-44         | CA-S40R-24C-10           |
| 2X40               | CA-D80-24C-44         | CA-D40R-24C-10           |
| 3X40               | CA-T120-24C-44        | CA-T120R-24C-10          |

**NOTES**

1 X 40 (single row): for other sizes, replace 40 with total number of contacts (01 thru 40)  
2 X 40 (dual row): for other sizes, replace 80 with total number of contacts (04 thru 80, multiples of 2)  
3 X 40 (triple row): for other sizes, replace 120 with total number of contacts (09 thru 120, multiples of 3)

**STRIP SOCKET - .100 CENTERS****FEATURES**

UL recognized, CSA certified; mates with .025 square post on .100 centers; .120 long solder tail; available in single and dual row configurations; up to 36 positions per row (cut to size); dual leaf edge wipe contacts; many other tail lengths available

**MATERIALS**

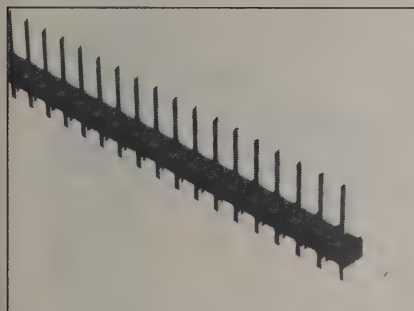

Housing - glass filled polyester, black, UL94V-0  
Contact - beryllium copper plated with 10µIN gold

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of<br>Contacts | Straight<br>Tail Exit | Right Angle<br>Tail Exit |
|--------------------|-----------------------|--------------------------|
| 1X36               | CA-S36VSC-12B         | CA-S36VSCR-12B           |
| 2X36               | CA-D72VSC-12B         | CA-D72VSCR-12B           |

**NOTES**

1 X 36 (single row): for other sizes, replace 36 with total number of contacts (01 thru 36)  
2 X 36 (dual row): for other sizes, replace 72 with total number of contacts (02 thru 72, multiples of 2)

**2MM STRIP HEADER - .079 CENTERS****FEATURES**

.020 square post, .150 high, mates with sockets on 2mm (.079) centers; .110 long X .020 square solder tail, straight exit; .120 long X .020 square solder tail, right angle exit; available in single, dual row configurations; up to 40 positions per row (cut to size)

**MATERIALS**

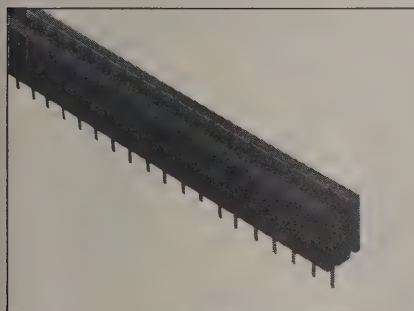

Housing - glass filled polyester, black, UL94V-0  
Contact - copper alloy plated with gold flash

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of<br>Contacts | Straight<br>Tail Exit | Right Angle<br>Tail Exit |
|--------------------|-----------------------|--------------------------|
| 1X40               | CA-SM40-15A-32        | CA-SM40R-15A-12          |
| 2X40               | CA-DM80-15A-32        | CA-DM80R-15A-12          |

**NOTES**

1 X 40 (single row): for other sizes, replace 40 with total number of contacts (01 thru 40)  
2 X 40 (dual row): for other sizes, replace 80 with total number of contacts (02 thru 80, multiples of 2)

**2MM STRIP SOCKET - .079 CENTERS****FEATURES**

mates with .020 square post on 2mm (.079) centers; .110 long solder tail; available in single and dual row configurations; up to 40 positions per row (cut to size); dual leaf side wipe contacts

**MATERIALS**

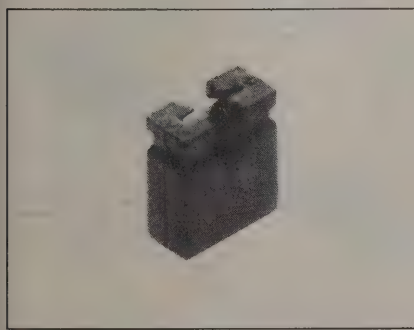

Housing - glass filled polyester, black, UL94V-0  
Contact - copper alloy plated with gold flash

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of<br>Contacts | Straight<br>Tail Exit |
|--------------------|-----------------------|
| 1X40               | CA-SM40VS-11A         |
| 2X40               | CA-DM80VS-11A         |

**NOTES**

1 X 40 (single row): for other sizes, replace 40 with total number of contacts (01 thru 40)  
2 X 40 (dual row): for other sizes, replace 80 with total number of contacts (02 thru 80, multiples of 2)

**SHORTING JUMPER - .100 OR .079 CENTERS****FEATURES**

SJO-A mates with .025 square post on .100 centers; SJO-MA mates with .020 square post on 2mm (.079) centers; open design allows easy attachment of test probe between two shorted pins

**MATERIALS**

Housing - glass filled thermoplastic, black, UL94V-0  
Contact - copper alloy plated with gold flash

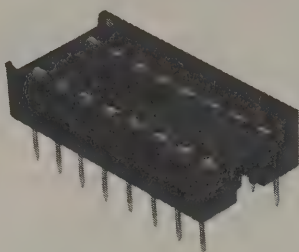

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of<br>Contacts | .100<br>Centers | 2mm (.079)<br>Centers |

| 2                  | CA-02SJO-A      | CA-02SJO-MA           |

**NOTES**

.100 centers: for other positions, replace 02 with total number of contacts (02 thru 20, multiples of 2)

**CA****CIRCUIT ASSEMBLY CORP.**

### DIP SOCKET .160 HIGH - .100 CENTERS

#### FEATURES

mates with .022 X .016 max. lead on .100 centers; .130 long solder tail; dual leaf side wipe contacts

#### MATERIALS

Housing - glass filled polyester, black; UL94V-0

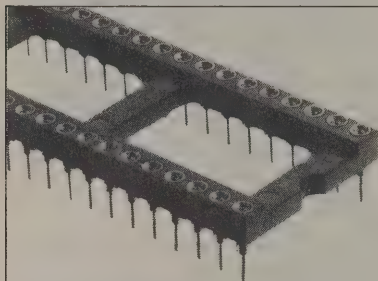

Contact - phosphor bronze plated with 150µIN tin

#### NOTES

for .300 between rows on 24 and 28 position: add suffix -3 for self-retaining solder tail: replace -1T with -2T

#### CIRCUIT ASSEMBLY PART NUMBERS

| No. of Contacts | Dimension between rows | Solder Tail |
|-----------------|------------------------|-------------|
| 6               | .300                   | CA-06SDL-1T |
| 8               | .300                   | CA-08SDL-1T |
| 14              | .300                   | CA-14SDL-1T |
| 16              | .300                   | CA-16SDL-1T |
| 18              | .300                   | CA-18SDL-1T |
| 20              | .300                   | CA-20SDL-1T |
| 24              | .600                   | CA-24SDL-1T |
| 28              | .600                   | CA-28SDL-1T |
| 32              | .600                   | CA-32SDL-1T |
| 40              | .600                   | CA-40SDL-1T |
| 48              | .600                   | CA-48SDL-1T |

### DIP SOCKET, SCREW MACHINE .177 HIGH - .100 CENTERS

#### FEATURES

mates with .022 max. round lead on .100 centers; .124 long X .018 round solder tail; open frame construction with screw machine contacts

#### MATERIALS

Housing - glass filled polyester, black; UL94V-0

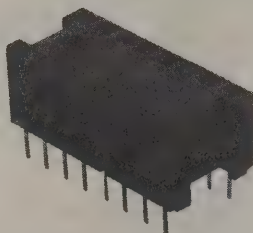

Contact - beryllium copper fingers plated with 10µIN gold, brass sleeve plated with 200µIN tin

#### NOTES

for .300 between rows on 24 and 28 position: add suffix -3

#### CIRCUIT ASSEMBLY PART NUMBERS

| No. of Contacts | Dimension between rows | Solder Tail |
|-----------------|------------------------|-------------|
| 6               | .300                   | CA-06MS-1C  |
| 8               | .300                   | CA-08MS-1C  |
| 14              | .300                   | CA-14MS-1C  |
| 16              | .300                   | CA-16MS-1C  |
| 18              | .300                   | CA-18MS-1C  |
| 20              | .300                   | CA-20MS-1C  |
| 24              | .600                   | CA-24MS-1C  |
| 28              | .600                   | CA-28MS-1C  |
| 32              | .600                   | CA-32MS-1C  |
| 40              | .600                   | CA-40MS-1C  |
| 48              | .600                   | CA-48MS-1C  |

### DIP SOCKET .300 HIGH - .100 CENTERS

#### FEATURES

mates with .022 X .020 max. lead on .100 centers; .128 long solder tail; dual leaf edge wipe contacts

#### MATERIALS

Housing - glass filled polyester, black; UL94V-0

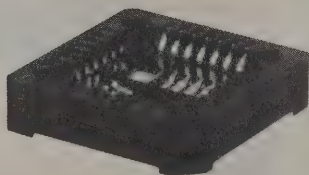

Contact - phosphor bronze plated with 10µIN gold

#### NOTES

for 250µIN tin plating: replace -10SD with -TSD for beryllium copper contact: add suffix -BC

#### CIRCUIT ASSEMBLY PART NUMBERS

| No. of Contacts | Dimension between rows | Solder Tail |
|-----------------|------------------------|-------------|
| 10              | .200                   | CA-10S-10SD |
| 14              | .300                   | CA-14S-10SD |
| 16              | .300                   | CA-16S-10SD |
| 18              | .300                   | CA-18S-10SD |
| 20              | .300                   | CA-20S-10SD |
| 24              | .600                   | CA-24S-10SD |
| 28              | .600                   | CA-28S-10SD |
| 40              | .500                   | CA-40S-10SD |

### PLCC SOCKET, SURFACE MOUNT, .177 HIGH - .050 CENTERS

#### FEATURES

designed for use with JEDEC PLCC Type A devices (J style lead); surface mount J-Style leads on .050 centers; open frame low profile construction permits visual inspection of solder pads; rated at 100 insertion/extraction cycles

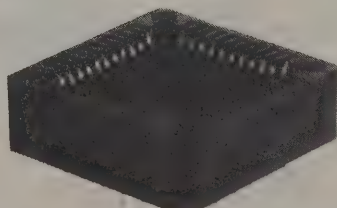

#### MATERIALS

Housing - glass filled polyphenylene, natural; UL94V-0

Contact - phosphor bronze plated with 250µIN tin

#### CIRCUIT ASSEMBLY PART NUMBERS

| No. of Contacts | Surface-Mount J-Style Lead |
|-----------------|----------------------------|
| 20              | CA-20SPCL-3T               |
| 28              | CA-28SPCL-3T               |
| 32              | CA-32SPCL-3T               |
| 44              | CA-44SPCL-3T               |
| 52              | CA-52SPCL-3T               |
| 68              | CA-68SPCL-3T               |
| 84              | CA-84SPCL-3T               |

### PLCC SOCKET .320 HIGH - .050 CENTERS

#### FEATURES

designed for use with JEDEC PLCC Type A devices (J style lead); .130 long solder tail, on .100 X .100 grid; converts .050 device centers to .100 X .100 grid

#### MATERIALS

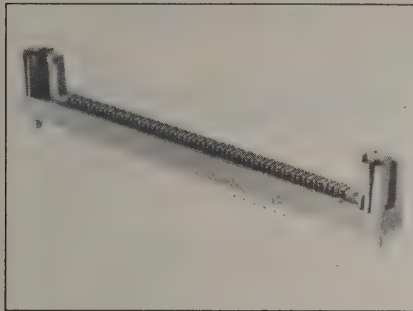

Housing - glass filled polyester, black; UL94V-0

Contact - phosphor bronze plated with 250µIN tin

#### CIRCUIT ASSEMBLY PART NUMBERS

| No. of Contacts | Solder Tail |
|-----------------|-------------|
| 20              | CA-20SPC-T  |
| 28              | CA-28SPC-T  |
| 32              | CA-32SPC-T  |
| 44              | CA-44SPC-T  |
| 52              | CA-52SPC-T  |
| 68              | CA-68SPC-T  |
| 84              | CA-84SPC-T  |

**CA****CIRCUIT ASSEMBLY CORP.****SIMM SOCKET - .050 OR .100 CENTERS****FEATURES**

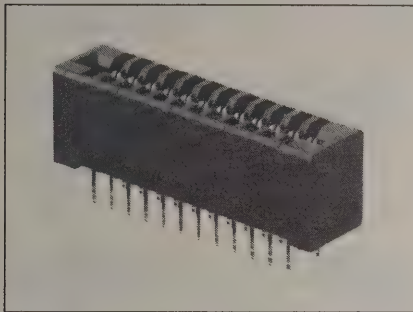

mates with standard .050 thick P.C.B. on .050 or .100 centers; .118 min. long solder tail; durable metal latch allows easy "Tilt and Snap" insertion of mating module; available in high density .050 centers for 72 position module or .100 centers for 30 position module

**MATERIALS**

Housing - liquid crystal polymer, natural, UL94V-0  
Contact - phosphor bronze plated with tin

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of Contacts | Single Module | Dual Module  |
|-----------------|---------------|--------------|
| 30              | CA-30SIM2-1T  | CA-60SIM2-1T |
| 72              | CA-72SIM2-1T  |              |

**EDGE CARD****.460 HIGH - .100 CENTERS****FEATURES**

UL recognized, CSA certified; mates with standard .062 thick P.C.B. on .100 centers; .165 long X .025 square solder tail (straight exit), .145 long X .025 square solder tail (right angle exit), both on .100 X .200 grid; mounting ear option with .128 diameter hole

**MATERIALS**

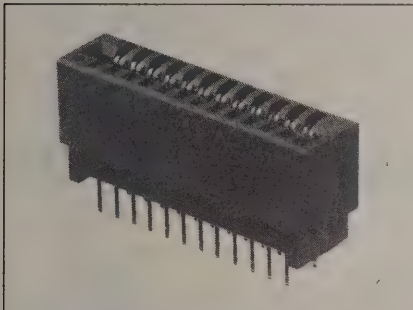

Housing - glass filled polyester, green, UL94V-0  
Contact - copper/nickel alloy plated with 20µIN sel gold

**NOTES**

for mounting ears with .128 diameter hole: replace -3 with -1

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of Contacts | Straight Tail Exit | Right Angle Tail Exit |

**CA****CIRCUIT ASSEMBLY CORP.****I.D. D-SUBMINIATURE****FEATURES**

UL recognized; mass-terminates with .050 center ribbon cable; mates with standard D-type connectors; metal shell with .120 clearance holes; optional strain relief (ordered separately)

**MATERIALS**

Housing - glass filled polyester, gray, UL94V-0

Shell - steel plated with tin

Contact - socket: phosphor bronze plated with sel gold flash, plug: brass plated with sel gold flash

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of<br>Contacts | Socket    | Plug      |
|--------------------|-----------|-----------|
| 9                  | CA-09DSID | CA-09DPID |
| 15                 | CA-15DSID | CA-15DPID |
| 25                 | CA-25DSID | CA-25DPID |
| 37                 | CA-37DSID | CA-37DPID |

**NOTES**

for metal shell with #4-40 threaded holes: add suffix -4  
for all plastic construction: add suffix -P  
for strain relief: order CA-SRXXDID, where XX = number of contacts

**D-SUBMINIATURE  
RIGHT ANGLE - .318 BODY****FEATURES**

mates with standard D-type connectors; .125 long solder tail; right angle metal shell construction with #4-40 threaded hole and loose standoffs; ground strap with self retaining fork

**MATERIALS**

Housing - glass filled polyester, black, UL94V-0

Shell - steel plated with tin

Contact - socket: phosphor bronze plated with gold flash, plug: brass plated with gold flash

**CIRCUIT ASSEMBLY PART NUMBERS**

| No. of<br>Contacts | Socket      | Plug        |

# COMM CON CONNECTORS INC.

Comm Con Connectors Inc. was established in 1982. From inception, our plan has been to offer the Electronics OEM marketplace a variety of header interconnects not available from the more traditional connector companies. Our product flexibility is a result of 14 different standard contact lengths (from .330 to 1.430), 3 plating options (tin, gold, duplex gold/tin), and plastic insulator options such as glass filled thermoplastic or high temp thermoplastic, in single, double and triple row versions. A great variety of additional customizing of these parts is possible including specific pins eliminated for keying, bypassing traces on a P.C.B., or locating the plastic at other locations on the pin. Creation of special bends is also possible.

All of our strip headers and socket connectors employ a "breakaway" feature, however, as a service to our customers, we will cut any of these products into the desired size at no charge.

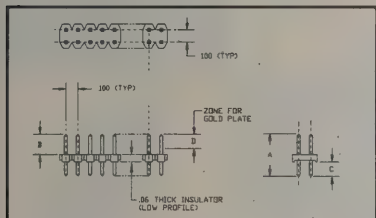

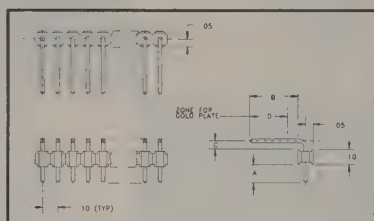

## SINGLE ROW; DOUBLE ROW; TRIPLE ROW STRAIGHT HEADERS

Our single row straight headers are available in 12 pin lengths, from .330 to 1.430, (in .100 increments). In addition to 35 standard "B" and "C" dimensioned parts, we offer an unlimited variety of customer specified parts.

## SINGLE ROW; DOUBLE ROW; TRIPLE ROW RIGHT ANGLE HEADERS

Our single row right angle .025 sq headers are available in both the low profile and high profile, as standards. Many choices in pin dimensions gives us the broadest package of right angle breakaway parts available.

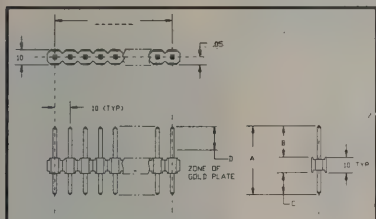

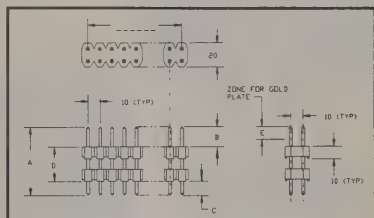

## MICRO HEIGHT HEADER SYSTEM

Available in single, double or triple row versions, our micro height headers utilize a .060 thick plastic, and a .330 long pin, which decreases the height .110 from the bottom of the PCB, vs the standard solder header.

## SINGLE AND DOUBLE ROW SPACER- HEADER INTERCONNECTS

This new concept allows the design freedom of interconnecting two PCB's with a pre specified mating length. Eliminates having both a plastic spacer, and a separate interconnect.

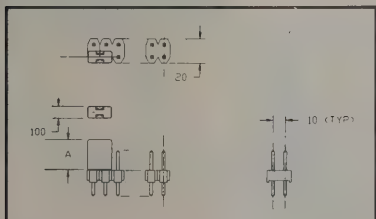

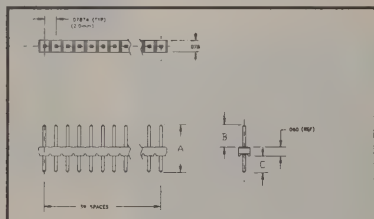

## HIGH TEMPERATURE HEADERS

For infrared or vapor reflow applications, we offer a high temp plastic insulator with a rating in excess of 260 C. Both single and double row parts available.

## MICRO SPACED CONNECTORS

Two series are available for tight circuit center designs, .050 and .079 (2mm). Both series include headers, sockets and shunts.

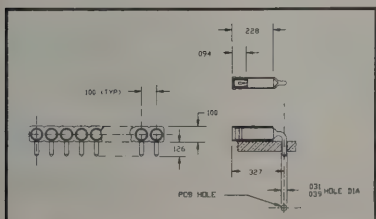

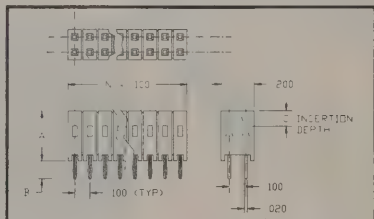

## BUSSING SHUNTS

We offer a variety of bussing shunts to cover most applications. These include 4 styles of .100 center parts, .100 center multiple shunts (2 to 10 attached together), and micro spaced .079 parts.

## STRAIGHT SOCKETS

For PCB disconnecting applications, we offer several different sockets, from .185 tall for low profile, to .315 standard applications. Designs include both modified box, and hi-rel screw machine contacts.

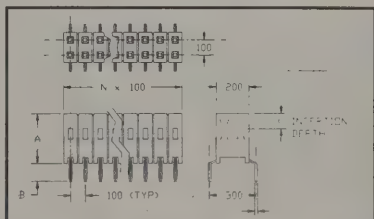

## RIGHT ANGLE SOCKETS

For right angle disconnects, we offer both single and double row socket versions. These parts utilize hi-rel screw machine sockets.

## BOTTOM ENTRY SOCKETS

To eliminate hand soldering of a socket to a PCB when a disconnect application is utilized, we offer a bottom entry socket that is soldered on the component side of the board. Access of the pin is through the PCB, into the bottom of the socket.

## Connectors, Sockets

### STANDARD, CUSTOMIZED AND NEW DESIGNS

Because we have so many parts tooled, we are an excellent choice to produce your new and customized designs. Using our large tool library and in-house tool and mold making facilities, we get you into production fast. **Call our engineers with your design ideas.**

Your order is expressly made to agreed specifications. As each requirement usually involves special features and combinations of materials and finishes, we do not stock finished products. However, we do

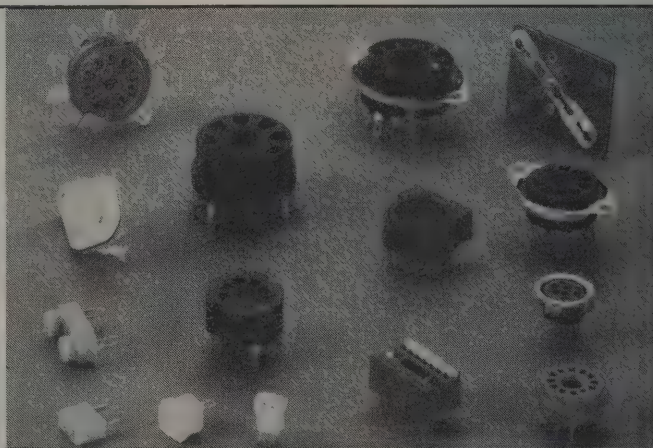

stock most of the materials, enabling us to manufacture your parts as needed to meet your schedule.

### ZERO DEFECT QUALITY

Our production facilities are fully integrated from raw materials to final assembly. We do our own stamping and molding. We also design and build our own automatic assembly equipment. This allows us to control our processes and thus serve you with our Zero Defect Program quality.

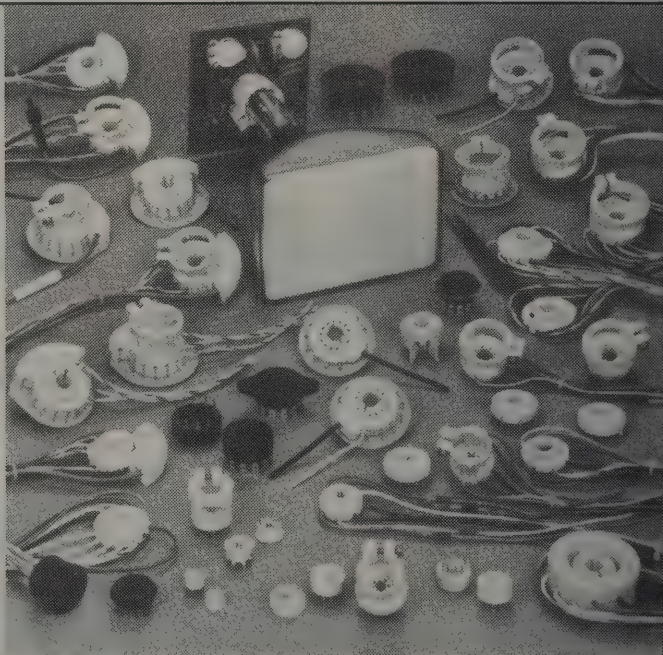

### SOCKETS

- **Tube/Relay:**  
4, 5, 7, 8, 9, 10, 11, 12, 14, 16, 20, 22 and other pin configurations. PC, solder tab and chassis mount. Molded and laminated constructions. Metal or molded saddle, top or bottom mount.
- **Transistor:**  
T03, 5, 9, 11, 12, 18, 33, 39, 40, 46, 52, 60, 66, 72, 104 and others.
- **Crystal:**  
.486" pin centers for HC-6/U, HC-13/U, HC-14/U, HC-27/U, HC-36/U & HC-48/U, MIL-S-12883/4; .273" pin centers for HC-46/U; .192" pin centers for HC-25/U, HC-42/U, HC-43/U, HC-49/U, HC-50/U and others.

### CRT SOCKETS

- For high resolution CRTs used in Avionics, CAD/CAM, Sonar, Radar, Information Displays, Medical and Measurement Instruments
- **Tube neck retaining clamp option available on most sockets.**
- Mate with most JEDEC and other base configurations.
- PC, solder tab and wire lead connections. PC and flying lead combination. New designs welcome.
- With or without Spark Gaps.
- In-line resistors, chokes and capacitors.

| DE-50F      | 50              | Female |

#### FEATURES

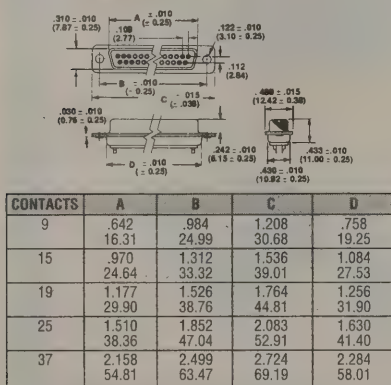

- Tinned plated steel shell
- Fixed contacts, gold over nickel plating
- Ground indents (male)
- 3.05 MM (.120") dia. mounting holes
- UL 94V-O rated insulator

Additional plating options are available; please contact factory.

|        | CFM-50      | 50              | IDC, Nickel-Plated Metal Shell |

### FEATURES

- All units supplied with strain relief
  - Female connectors standard with bail locks
  - Accepts 28 AWG stranded flat cable
- Additional plating options are available; please contact factory.

| CST-50      | 50              |
| CST-60      | 60              |
| CST-62      | 62              |
| CST-64      | 64              |

Additional plating options are available; please contact factory.

### FEATURES

- Double cantilever terminal creates firm contact
- Glass reinforced polyester, UL 94V-0 rated
- Use with 26 and 28 AWG cable (.050" centers)
- All units supplied with strain relief
- Gold flash over nickel contact plating

# SSSSSSUPER TTTTTIME SSSSSAVER!

**D**o you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If

somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your job has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516)227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, FAX Marie at (516)-227-1901. She'll FAX the IC Master subscription form back to you right away.

And, if you tell her you saw it in the 1993/94 EEM, she'll take \$10 off the subscription price!

## Power Entry Products

**Corcom, Inc.**  
**1600 Winchester Road**  
**Libertyville, Illinois 60048 USA**  
**TEL: 708-680-7400 FAX: 708-680-8169**

Corcom offers over 75 models of power entry products which provide the combination of functions to make a system easily adaptable for marketing anywhere in the world.

Both unfiltered and filtered models provide combinations of IEC connectors, fuse holders, voltage selectors, and on/off switches offering a cost-effective alternative to individual parts.

Filtered models are available with five levels of filtering for susceptibility and emissions applications including applications for FCC and VDE emissions levels.

All models have approvals from the major safety agencies in the world. The units are sold through a strong network of reps and distributors worldwide. For more detailed information, call or write for our catalog: *Corcom Power Entry Products.*

### Unfiltered Models

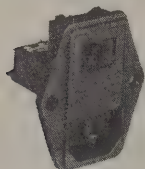

#### J Series

- 2 or 4 voltage selection
- North American fuse holder
- 6 amp current rating

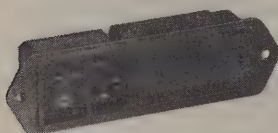

#### L Series

- North American OR European fuse holder
- Optional on/off switch or voltage selection
- 6 amp current rating
- Snap-in or flange mount

#### M Series

- North American AND European fuse holder
- 6 amp current rating
- Optional on/off switch
- Optional 2 or 4 voltage selection

#### M Series

- New Snap-in design
- Labor savings
- North American AND European fuse holder
- Optional 2 or 4 voltage selection

#### P Series

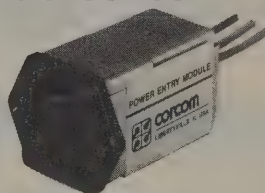

- IEC Connectors
- North American or European fuse holder
- Optional Switch
- 2 Voltage Selector
- Compact size
- 10 amp current rating

### Filtered Models

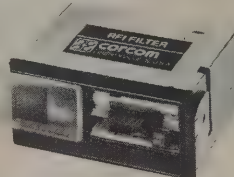

#### GG Series

- Compact size
- European fuse holder
- Filters rated for 1, 3 and 6 amps

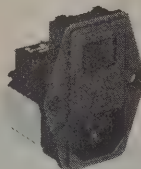

#### J Series

- Filtering for medical or or linear applications
- North American fuse holder
- 6 amp current rating

#### L Series

- Filtering for medical or linear applications
- North American OR European fuse holder
- Optional on/off switch OR voltage selection
- Current ratings of 1 to 6 amps
- Snap-in or flange mount

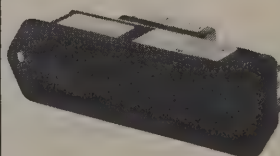

#### LA Series

- Three levels of filtering
- On/off switch
- North American AND European fuse holder
- 2 voltage selection
- Flange mount

#### M Series

- Four levels of filtering including medical applications
- North American AND European fuse holder
- Current ratings of 3 to 5 amps
- Optional on/off switch
- Optional 2 or 4 voltage selection
- Snap-in design available

See our pages in Vol. A, Section 2700; Vol. B, Section 4300.

# **corcom** **RFI Power Line Filters**

Corcom, Inc.

## P Series

## The Chameleon Power Entry Modules

**Worldwide Agency Approvals in process including UL, CSA, and VDE**  
**Call Corcom for details.**  
**Patent Pending**

### P Series

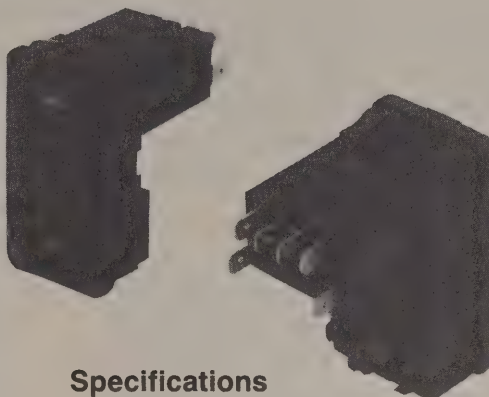

The P Series power entry module offers full flexibility of design in the most compact package.

As the first 10 amp module to provide all five power entry functions in one compact design, the "Chameleon" readily adapts to its environment and the needs of international markets.

- IEC power line connector
- Both North American and European fusing capabilities
- Two voltage selection
- Optional DPST on/off switch
- Filtering options available by early 1994

The Chameleon's compact design and modular construction will allow you to select all the power entry features you require—without altering the panel cut-out. And, the Chameleon, with adapters, will fit any standard panel cut-out you currently have designed.

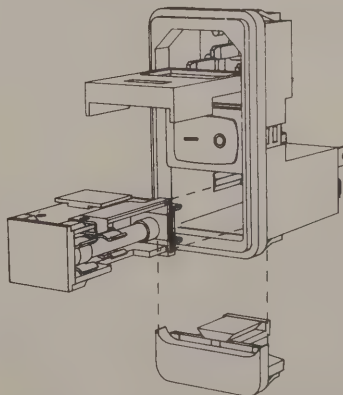

In addition, the Chameleon carries a full complement of safety agency approvals. Filtering for both susceptibility and medical applications is currently in tooling stages.

### Specifications

|                                       |              |
|---------------------------------------|--------------|
| Hipot rating (one minute):            |              |
| line-to-ground                        | 1500 VAC     |
| line-to-line                          | 1450 VDC     |
| Operating frequency:                  | 50/60 Hz     |
| Rated voltage:                        | 120/250 VAC  |
| Rated Current all nonfiltered models: |              |
|                                       | 10A @ 120VAC |
|                                       | 10A @ 250VAC |

|                          |                                              |
|--------------------------|----------------------------------------------|
| Operating Voltages:      |                                              |
| selectable or fixed      | 115/230 VAC                                  |
| Fuseholder:              |                                              |
| Accepts one or two fuses | 1/4" x 1-1/4"<br>or 5 x 20 mm                |
| Switch:                  | 10A/250                                      |
|                          | 10,000 operation at 51 amp inrush capability |

# **corcom** **Filtered Modular Jack**

**Corcom, Inc.**  
**1600 Winchester Road**  
**Libertyville, Illinois 60048 USA**  
**TEL: 708-680-7400 FAX: 708-680-8169**

Corcom's Signal Sentry Filtered Modular Jack provides a space saving and cost effective solution to signal line RFI emissions and susceptibility problems in telecommunications equipment, computers, terminals, workstations and peripherals.

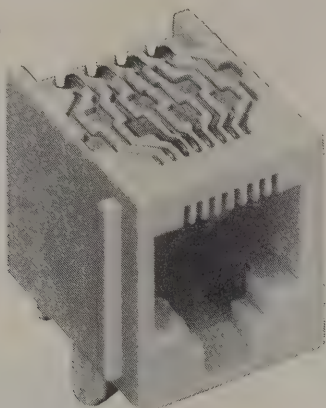

Conventional protection places separate filtering components on the printed circuit board near the connector, which adds to design/redesign requirements, uses valuable space, and sacrifices performance. The unique Corcom design, however, provides interference

suppression at its optimal location by integrating filtering into the RJ11 (6 position)/RJ45 (8 position) jack itself.

The Corcom Signal Sentry Filtered Modular Jack is the ideal connector to solve the RFI problems in your LAN, PBX, local I/O and ISDN interfaces to twisted pair or other multi-conductor cabling systems.

For detailed information, dimensions and PC board layout call or write for Signal Sentry Brochure.

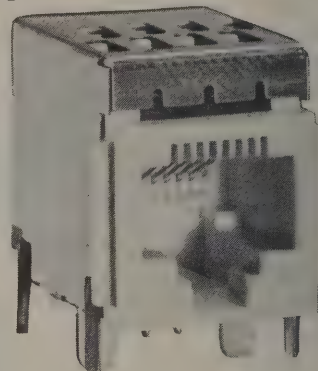

## L Models

L Models Inductive filtering in a direct retrofit size to standard unfiltered jacks. L models are offered with both standard ferrite sleeves and high performance ferrite block inductive filtering.

- Retrofit design
- RJ11, RJ45, and handset Jacks
- Available with metal shield for additional RF protection
- Ferrite block provides cost effective filtering
- Ferrite sleeves prevent cross talk

## LC Models

LC Models Inductive and capacitive filtering with metal shield. The ferrite blocks or ferrite sleeves are combined with ceramic chip capacitors for additional protection.

- Metal Shield with optional spring fingers for ground path across interface
- RJ11 and RJ45 Jack
- Ferrite Block provides cost effective filtering
- Ferrite sleeves prevent cross talk
- Available with terminals fully or partially loaded

# IDC Connectors

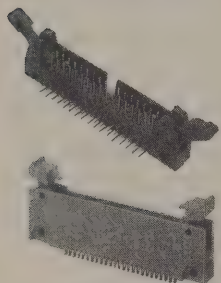

## SOCKET - IDC (Catalog C-2110 and C-2114)

- MIL-C-83503 qualified
- Patented contact
- Mates to .050" spaced conductors or NANO version to .025" spaced conductors
- 10 to 60 positions
- Choice of contact finish

## PCB - IDC (Catalog C-2110)

- MIL-C-83503 qualified
- Patented contact
- Mates to .050" spaced conductors
- 10 to 50 positions
- Choice of contact finish

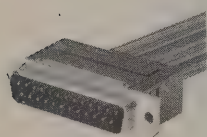

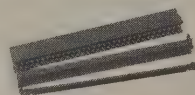

## HEADERS (Catalog C-2110 and C-2114)

- MIL-C-83503 qualified
- Easy mate or eject
- Polarization optional
- Contacts on .100" x .100" centers or NANO version on .050" x .050" centers
- 10 to 60 positions
- Choice of pin orientation, type, and finish

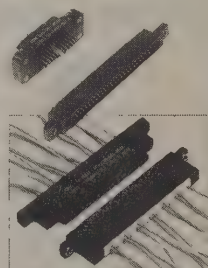

## AMERICAN DIN IDC CONNECTOR SYSTEM (Catalog MP 1188)

- Compatible to DIN connector system Spec 41612
- Patented contact
- Mates to .033" centered round conductor flat cable
- 96 positions
- Eliminates discrete wiring, soldering, crimping
- Choice of contact finish

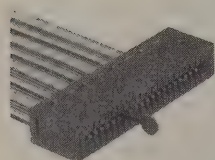

## D-SUBMINIATURE - IDC (Catalog C-2110)

- MIL-C-24308 qualified
- Patented contact
- Mates to .050" spaced conductors
- 9, 15, 25, 37 positions
- EMI/RFI shielding optional

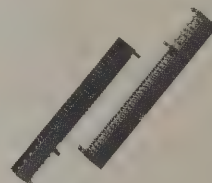

## MILITARY CONNECTORS (Catalog CWM 0291)

- Qualified to MIL-C-83503, MIL-C-24308, MIL-C-28804
- In-plant test facilities DOD qualified

## CARD EDGE - IDC (Catalog C-2110)

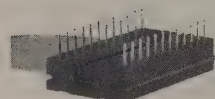

- Patented contact
- Mates to .050" spaced conductors
- Adjusts to PC board thickness variations
- 10 to 50 positions
- Polarization and mounting options

## CUSTOM CONNECTORS

Permit us to study and solve your unique connector problems. We engineer, design, develop, tool, automate, and test.

*Example: Dual-Purpose Connector for Unique Disk-Drive Application.*

## DIP - IDC (Catalog C-2110)

- MIL-C-83503 qualified
- Patented contact
- Mates to .050" spaced conductors and DIP sockets
- 14, 16, 24, or 40 positions
- Optional strain relief

See volume B, page B-1707 for our Switch products

## MINIGLOSSARY CONNECTORS

Connector terminology is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

**Shape**—Circular, cylindrical, and rectangular.

**Electrical application**—High voltage, RF, microwave, input/output, etc.

**Mechanical application**—Printed circuit, rack & panel, cable, etc.

**Conductor type**—Coaxial, flat cable, ribbon cable, flex circuit, etc.

**Termination method**—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

**Contact:** The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

**Contact alignments:** Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

**Male vs. female:** In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

**Closed entry:** A female contact which prevents entry of a male contact larger than a specific size.

**Open entry:** A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

**Hermaphrodite:** Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

**Hermetic seal:** Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

**Waterproof seal:** May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

**Printed circuit connector:** Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

**Edgeboard.** May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

**Two-piece:** One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

**Readout:** Describes the arrangement at the terminating edge of a PC board.

May be single or double. A double read-out PC board has termination strips on each side not usually interconnected.

**Ribbon connectors:** A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

**Ribbon contact connector:** Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

**Solderless terminal:** Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

**Crimp termination:** A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

**Insulation displacement:** Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

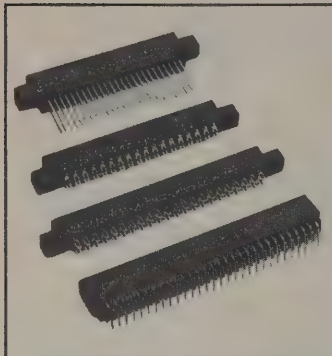

**Service rating:** The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

**Withstanding voltage:** Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

# MODELS EB4, EB6, EB7, EB8 Edgeboard Connectors

**150°C and 200°C Burn-In Connectors  
Dual Readout, High Temperature, Long Life**

## APPLICATIONS

Designed for burn-in oven and automatic temperature testing applications.

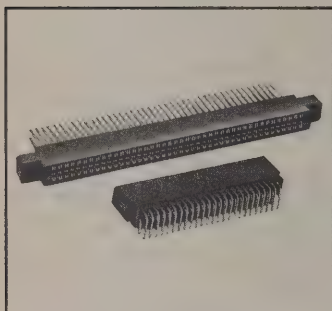

## SPECIAL NOTE:

When operating units at elevated temperatures, solder having a melting point 50°C above the operating temperature should be used. Contact factory for specific solder information.

## FEATURES

- **EB4**, .100" [2.54] C-C. **EB6**, .125" [3.17]. **EB7 and EB8**, .156" [3.96] C-C.
- Right angle styles included for all models
- High temperature, glass reinforced phenolic connector bodies - 150°C
- High temperature, glass reinforced PPS connector bodies - 200°C
- High reliability copper-nickel-tin alloy contacts
- Accepts P. C. board thickness of .054" - .071" [1.37 - 1.80]
- High reliability bifurcated bellows contacts
- Gold-plated contacts
- Card extender style terminals standard
- Variety of mounting styles available
- **Recognized under the Component Program of Underwriters Laboratories, Inc. Listed under File E65524.**

## MODEL EB4 Edgeboard Connectors Dual Readout, .100" [2.54] C-C Standard and Right Angle Terminals

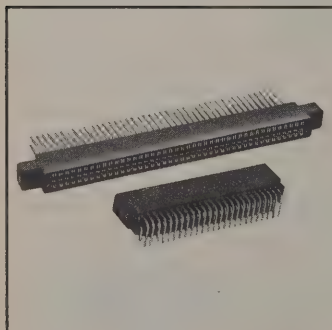

## FEATURES

- Grid Patterns: .100" C-C x .150" [2.54 x 3.81] and .100" C-C x .200" [2.54 x 5.08]
- Standard and right angle terminals
- Greater design latitude. 3 body materials: Diallyl phthalate, phenolic and glass-filled polyester. 7 contact termination styles: 3 Standard, 4 Right Angle. 20 body sizes and 6 mounting styles.
- Selective gold plating
- Accepts P. C. board thickness of .054" - .071" [1.37 - 1.80]
- Polarization between contact positions in all sizes. Between contact polarization permits polarizing without loss of contact position.
- **Recognized under the Component Program of Underwriters Laboratories, Inc. Listed under File E65524, Project 77CH3889.**

## APPLICATIONS

For use with .0625" [1.59] printed circuit boards requiring an edgeboard type connector on .100" [2.54] centers.

## MODEL EB6 Edgeboard Connectors Dual Readout, .125" [3.17] C-C Standard and Right Angle Terminals

## FEATURES

- Grid Patterns: .125" C-C x .150" [3.17 x 3.81], .125" C-C x .200" [3.17 x 5.08] and .125" C-C x .250" [3.17 x 6.35]
- Standard and right angle terminals
- Greater design latitude. 3 body materials: Diallyl phthalate, phenolic and glass-filled polyester. 7 contact termination styles: 3 Standard, 4 Right Angle. 19 body sizes and 6 mounting styles.
- Selective gold plating
- Accepts P. C. board thickness of .054" - .071" [1.37 - 1.80]
- Polarization between contact positions in all sizes. Between contact polarization permits polarizing without loss of contact position.
- **Recognized under the Component Program of Underwriters Laboratories, Inc. Listed under File E65524, Project 77CH3889.**

## APPLICATIONS

For use with .0625" [1.59] printed circuit boards requiring an edgeboard type connector on .125" [3.17] centers.

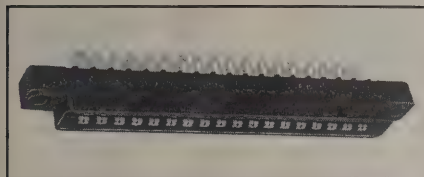

## MODEL EB7D Edgeboard Connectors Dual Readout

A COMPANY OF

VISHAY

DALE®

### FEATURES

- .156" C-C x .140" Grid [3.96 x 3.56]
- Bifurcated bellows contacts provide 2 flexing contact surfaces to assure positive contact under adverse conditions such as vibration or P. C. board irregularities
- Accepts P. C. board thickness of .054" - .071" [1.37 - 1.80]
- Polarization between contact positions in all sizes. Between contact polarization permits polarizing without loss of a contact position.
- Selective gold plating

- Polarizing key is reinforced nylon, may be inserted by hand, requires no adhesive
- Protected entry, provided by recessed leading edge of contact, permits the card slot to straighten and align the board before electrical contact is made. Prevents damage to contact which might be caused by warped or out of tolerance boards.
- Recognized under the Component Program of Underwriters Laboratories, Inc. Listed under File E65524, Project 77CH3889.

### APPLICATIONS

For use with .062" [1.57] printed circuit boards requiring an edgeboard type connector on .156" [3.96] centers.

## MODEL EB7S Edgeboard Connectors Single Readout

A COMPANY OF

VISHAY

DALE®

### FEATURES

- .156" [3.96] C-C
- Bifurcated bellows contacts provide 2 flexing contact surfaces to assure positive contact under adverse conditions such as vibration or P. C. board irregularities
- Accepts P. C. board thickness of .054" - .071" [1.37 - 1.80]
- Polarization between contact positions in all sizes. Between contact polarization permits polarizing without loss of a contact position.
- Selective gold plating

- Polarizing key is reinforced nylon, may be inserted by hand, requires no adhesive
- Protected entry, provided by recessed leading edge of contact, permits the card slot to straighten and align the board before electrical contact is made. Prevents damage to contact which might be caused by warped or out of tolerance boards.
- Recognized under the Component Program of Underwriters Laboratories, Inc. Listed under File E65524, Project 77CH3889.

### APPLICATIONS

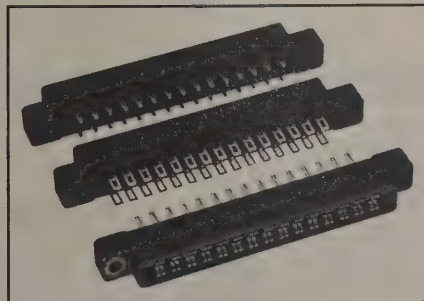

For use with .062" [1.57] printed circuit boards requiring an edgeboard type connector on .156" [3.96] centers.

## MODEL EB8 Edgeboard Connectors Dual Readout

A COMPANY OF

VISHAY

DALE®

### FEATURES

- .156" C-C x .200" Grid [3.96 x 5.08]
- Greater design latitude. 3 body materials: Diallyl phthalate, phenolic and glass-filled polyester. 6 contact termination styles, 8 body sizes, 7 mounting styles.
- Bifurcated bellows contacts provide 2 flexing contact surfaces to assure positive contact
- Accepts P. C. board thickness of .054" - .071" [1.37 - 1.80]
- Polarization between contact positions in all sizes
- Selective gold plating
- Recognized under the Component Program of Underwriters Laboratories, Inc. Listed under File E65524, Project 77CH3889.

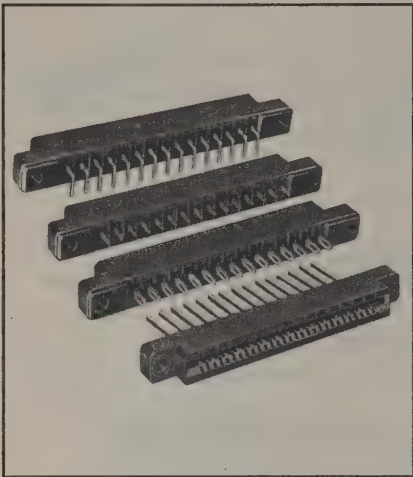

### APPLICATIONS

For use with .062" [1.57] printed circuit boards requiring an edgeboard type connector on .156" [3.96] centers.

## MODEL EBT156 Edgeboard Connectors

Single Readout

Dip Solder, Eyelet and Wire Wrap™ Termination

### FEATURES

- .156" [3.96] C-C
- Modified tuning fork contacts have chamfered lead-in to reduce wear on printed circuit board contacts without sacrificing contact pressure and wiping action.
- Accepts P. C. board thickness of .054" to .070" [1.37 to 1.78]
- Polarization on or between contact position in all sizes. Between contact polarization permits polarizing without loss of a contact position.
- Polarizing key is reinforced nylon, may be inserted by hand, requires no adhesive
- Protected entry, provided by recessed leading edge of contact, permits the card slot to straighten and align the board before electrical contact is made. Prevents damage to contacts which might be caused by warped or out of tolerance boards.
- Optional terminal configurations, including eyelet (Type A), dip-solder (Types B, C, D, R), Wire Wrap™ (Types E, F).
- Connectors with Type A, B, C, D or R contacts are recognized under the Component Program of Underwriters Laboratories, Inc. Listed under File 65524, Project 77CH3889.

### APPLICATIONS

For use with .062" [1.57] printed circuit boards requiring an edgeboard type connector on .156" [3.96] centers.

## MODEL 300 Printed Circuit Board Connectors

Dip Solder

### FEATURES

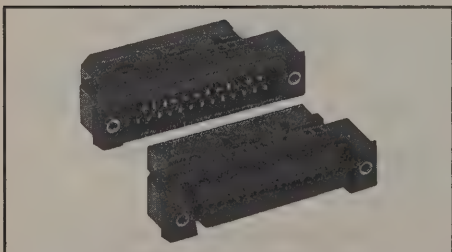

- Right angle or straight through dip solder terminals
- Threaded mounting studs
- Male contacts molded in
- Mating connector has solder cup or dip solder terminals
- Permanent mounting provides greater reliability
- Female contacts float to aid in alignment and resist vibration
- Polarization provided by contact arrangement and guide pin location

### APPLICATIONS

Where permanent mounting of male connector to printed circuit board is required with mating female connector available.

## MODEL DSEB Connectors

D-Subminiature/Edgeboard Hybrid

### FEATURES

- Combined technology of D-Subminiature and edgeboard into one connector
- Excellent alternative to surface mount technology
- Precision molded housing for accurate alignment during mating
- Selective gold plating in contact areas only to minimize costs
- Built-in locking features to hold in position in back panel of device
- Available with D-Subminiature pin or socket mating option

### APPLICATIONS

For use with any printed circuit board requiring a D-Subminiature Connector. Allows the elimination of soldering the D-Subminiature Connector to the printed circuit board by mounting the connector directly to the chassis.

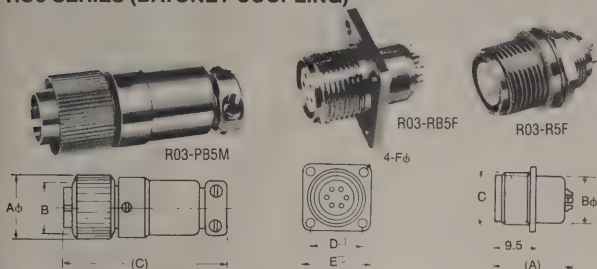

# QUALITY CONNECTORS of *TAJIMI/DSC*

## MINIATURE CIRCULAR CONNECTORS

Vibration, Moisture, Corrosion resistance: MIL-C-STD-202E.

### RO3 SERIES (THREADED COUPLING) RO5 SERIES (BAYONET COUPLING)

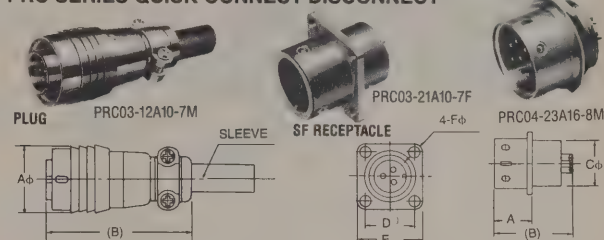

RO3 and RO5 series multipin circular connectors are small in size and high in reliability. Suitable for miniature and high density electronics equipment.

Material: Shell is brass & zinc alloy, nickel plated. Contacts: copper alloy, gold plated (Nickel based).

| No. of Contacts | A    | B           | C    | Cable O.D. | A    | B    | C           | D    | E    | F   |
|-----------------|------|-------------|------|------------|------|------|-------------|------|------|-----|
| 2, 3, 5         | 12.0 | M10.5P=0.75 | 32.0 | 5.2        | 18.0 | 9.0  | M10.5P=0.75 | 10.5 | 15.0 | 2.2 |
| 6, 8            | 15.5 | M14P=1      | 34.0 | 6.2        | 18.0 | 12.0 | M14P=1      | 13.0 | 17.5 | 2.2 |

### PRC SERIES QUICK CONNECT-DISCONNECT

PRC03, 04 and 05 series are quick release, lightweight, miniature multipin connectors with audible lock mechanism, and are also free of vibration and impact problems.

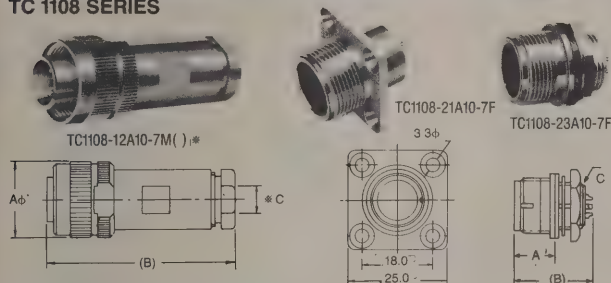

Material & Plating: PRC05. Brass-Nickel, PRC03. Zinc Alloy-Nickel, PRC04. Aluminum A/O coating.

## WATERPROOF CIRCULAR CONNECTORS

Vibration, Moisture, Corrosion resistance: MIL-C-STD-202E.

### TC 1108 SERIES

Tajimi TC1108 series connectors are waterproof up to 30 meters in depth. Economical and highly reliable construction also provides for applications in high humidity conditions. Hermetically sealed receptacles (Glass-to-Metal seal and Ceramic seal) are also available. Its applications are for vacuum pumps, inert gas tanks and oil pressure pumps.

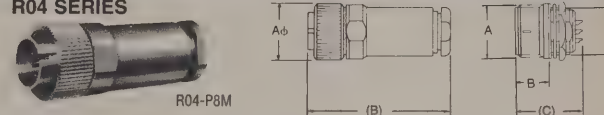

Material & Plating: Brass-Nickel. Contacts: Copper Alloy-Gold (Nickel based).

| Shell Size | No. of Contacts | A  | B    | Back-Nut I.D.* C              | Mounting Hole Dia. | Receptacle Bulk Head |      |      |

\*Select most suitable I.D. for cable jacket outer diameter.

\*CAPs are available for receptacle and Plug of TC1108 & R04 series.

### R04 SERIES

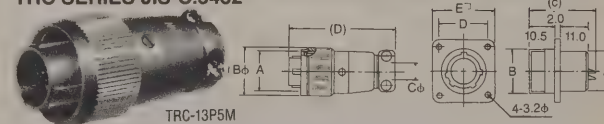

Tajimi R04 series connectors are miniature and waterproof up to 20 meters in depth. Its superior quality and small size offer design flexibility for a wide variety of applications including those for small electronics instruments and electromechanical devices which operate under high humidity conditions. Also available: Hermetically sealed receptacles (Glass-to-Metal seal and Ceramic seal).

Material & Plating: Brass-Nickel. Contacts: Copper Alloy-Gold (Nickel based).

| No. of Contacts | A    | B  | Cable O.D.       | A           | B   | C    | D          |

## JAPAN INDUSTRIAL STANDARD CONNECTORS

### TRC SERIES JIS-C.5432

TRC series meet to Japan Industrial Standard (JIS.C.5432)

This connector is applied to many Japan made instruments and machineries.

| Shell size | No. of Contacts | A Thread | B    | C    | D    | A  | B Thread | D  | E  |
|------------|-----------------|----------|------|------|------|----|----------|----|----|
| 13         | 3, 5            | M18P=1   | 21.5 | 8.5  | 46.0 | 16 | M18P=1   | 20 | 26 |
| 16         | 7, 10           | M22P=1   | 25.5 | 12.0 | 49.0 | 20 | M22P=1   | 23 | 29 |
| 21         | 10, 16          | M26P=1   | 29.5 | 14.5 | 53.0 | 24 | M26P=1   | 26 | 32 |

## Series 100- Dual-in-line IC Sockets with screw machined pins

### Material

- Pin (outer sleeve):  
Brass, machined CuZn38Pb2
- Clip (contact 4 finger):  
Beryllium Copper, heat treated
- Plating Pin (outer sleeve):  
Tin plated;  
2μm/80μ" nickel, 5μm/200 μ"tin-lead,  
Gold-plated;  
2μm/80μ" nickel, 0.25μm/10 μ"full gold
- Plating Clip (contact):  
2μm/80-μ"nickel gold and tin plating  
see table below
- Insulator body (black):  
Glass filled polyester Valox UL 94 V-O

### Mechanical

- Average insertion force with steel pin  
φ 0.46mm/.018"
- Average withdrawal with steel pin φ 0.46mm/.018"
- Insulator body (black):  
Glass filled polyester Valox UL 94 V-O

| 4FC | 6FC   |
|-----|-------|
| ≤3N | ≤1.3N |

| ≥0.4N | ≥0.2N |
|-------|-------|
|-------|-------|

- Mechanical life cycle: min. 200cycle
- Operating temperatures (continuous):  
Gold plated: -55°C to +125°C  
-67°F to +257°F  
Tin plated: -40°C to +105°C  
-104°F to +221°F
- Soldering temperature: +260°C, 10s max.  
+500°F, 10 s max.

## Series 145- Pin Grid Array

**Insulator body:** Polyphenylene-Sulfide (PPS), self extinguishing rated UL 94 V-O, black, resistant against detergents, mineral acids, solvents, greases and oils (short time), thickness 3mm/.118"

**Inner contact (clip):** Stamped beryllium copper with 6 fingers, gold-plated or tin-lead plated over 2-3 μm/80-120 μ" nickel plating, see pin code ref. table

**Outer sleeve (pin):** Screw machined brass (Q-Q-B-626), gold-plated 0.25μm/10μ" or tin-lead plated 5 μm/200 μ" over 2-3 μm/80-120 μ" nickel plating.

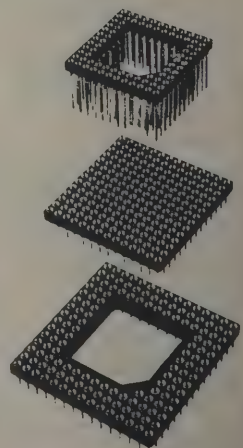

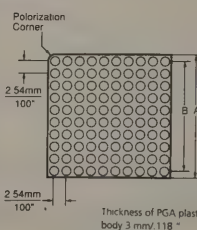

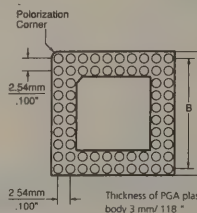

### Electrical

- Max current: 3A
- Contact resistance per contact:
- Insulation resistance:  
10<sup>9</sup> MΩ at U=100-10mΩ
- Max. operating voltage: 100 Vac/VDC
- Overload voltage: 1500 VRMS at 50 Hz
- Min. creepage distance: 0.67mm/.024"
- Capacity between two pins: <1 pF

### Mechanical

- Average press fit of pin in insulator body: 58N
- Average press fit of clip in pin: 65N
- Average insertion force with steel pin φ 0.56mm/.022": 12N
- Average withdrawal force with steel pin φ 0.40mm/.016": 0.3N

## CARD EDGE CONNECTORS

### Features

- Extensive, full line with over 435,000 different varieties of product.
- Over two million insulator bodies in stock at all times.
- All aspects of production and manufacturing done in house.
- All popular contact centers....050", .100", .125", .150", .156" and .200".
- Wide variety of card depth, row spacing and other options readily available. Large selection of mounting options.
- Both high and low profile insulators.
- Terminations include a variety of styles of dip solder P.C. tail, wire wrap, and wire hole in both single and dual row.
- Compliant pin (press fit) is available in all styles and sizes, utilizing our "Ultra-Mate" compliant section design that has been the preferred choice by most OEM engineers.
- Surface mount styles also available.
- Standard delivery in three weeks.
- Most industry standard bus structure connectors available.

### Specifications

- Insulator materials available include: Diallyl Phthalate, Polyester, Polyphenylene Sulphide, Polycarbonate and Nylon.
- Flammability rated at UL 94 V-O (except Nylon at UL 94 HB and Polycarbonate at V-2)
- Contact base materials include Phosphor Bronze Alloy CA-510, and Copper, Nickel, Tin Alloy CA-725.
- Contact plating options include selective plating, overall plating and gold inlay.
- Large variety of hardware, such as threaded inserts, bushings and card guides available.
- UL and CSA approved.
- An unlimited amount of special variations available.
- All processes are free of all ozone depleting substances.
- Customer engineering assistance available.
- Individual specifications of some of our most popular series are listed below.

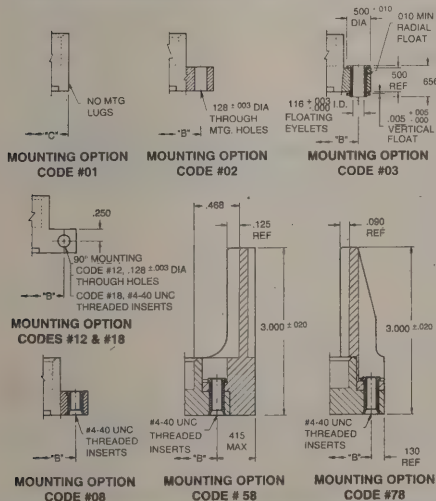

### Specifications

## EDAC RACK & PANEL CONNECTORS

### 516 SERIES PART NUMBER CODE

Example Part Number

516 - 038 - 500 - 2 1 2  
a b c d e f

- a) Series Code (b) Total Number of Contacts  
020, 038, 056, 090 or 120

- c) Contact Code

| Code | Description and Tail Size | Tail Length "G" |
|------|---------------------------|-----------------|
| 000  | No Contacts Assembled     |                 |
| 500  | Wire Hole .110" x .024"   | .245"           |
| 520  | P.C. Tail .025" x .024"   | .215"           |
| 540  | Wire Wrap .050" x .024"   | .600"           |
| 541  | Wire Wrap .026" x .024"   | .620"           |
| 542  | Wire Wrap .050" x .024"   | .790"           |

- d) Connector Style and Insulator Material

| Code | Style      | Insulator Material      |
|------|------------|-------------------------|
| 1    | Plug       | Green Diallyl Phthalate |
| 2    | Receptacle | Green Diallyl Phthalate |
| 3    | Plug       | Grey Polycarbonate      |
| 4    | Receptacle | Grey Polycarbonate      |

- e) Cover Description

| Code | Description                              |
|------|------------------------------------------|
| 0    | No Cover Assembled                       |
| 1    | Plastic Cover, Top Entry Standard Clamp  |
| 2    | Plastic Cover, Side Entry Standard Clamp |
| 3    | Plastic Cover, Top Entry Large Clamp     |
| 4    | Plastic Cover, Side Entry Large Clamp    |
| 5    | Metal Cover, Side Entry                  |
| 6    | Metal Cover, Top Entry                   |

- f) Hardware Code

| Code | Description                             |
|------|-----------------------------------------|
| 0    | No Hardware Assembled                   |
| 1    | Actuating Screw and Polarizing Hardware |
| 2    | Locknut and Polarizing Hardware         |

| Part Number | Description                    | Silhouette |
|-------------|--------------------------------|------------|
| 516-290-500 | Wire Hole                      |            |
| 516-290-520 | P.C. Tail                      |            |
| 516-290-540 | Wire Wrap                      |            |
| 516-290-541 | Wire Wrap                      |            |
| 516-290-542 | Wire Wrap                      |            |
| 516-290-590 | Crimp - Loose                  |            |
| 516-290-591 | Crimp - 1800 Contacts per reel |            |

### Notes for 516 Series Ordering Code

- Crimp contacts are also available for the 516 series connectors.
- Contacts may be ordered separately for pre-wired or select position assembly.
- For contact installation, removal and crimping tools, refer to Edac directly.
- Grey polycarbonate insulator material is not available for the 120 pin size connector.
- The 20 pin connector cover will not accept the length of the wire wrap contacts.
- Plastic covers with large clamps are only available for the 38 and 56 pin size connectors.
- Metal covers with side entry may be converted to top entry by removing side plate and changing clamp orientation.
- Covers may be ordered separately. Refer to Edac directly.
- Insulator design prevents improper mating of individual plug and receptacle.
- Polarizing hardware enables specific plug and receptacle mating combinations.

### 516 SERIES COVER ORDERING CODE

Example Part Number

516 - 230 - 5 56  
a b c d

- a) Series  
b) Cover Identification Code  
c) Cover Type

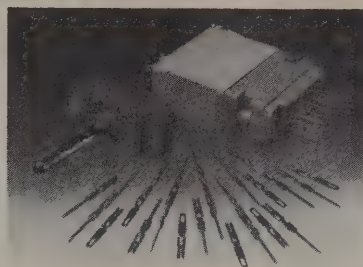

| Code | Description                              |
|------|------------------------------------------|
| 1    | Plastic Cover, Side Entry Standard Clamp |
| 2    | Plastic Cover, Top Entry Standard Clamp  |
| 3    | Plastic Cover, Side Entry Large Clamp    |
| 4    | Plastic Cover, Top Entry Large Clamp     |
| 5    | Metal Cover, Side Entry                  |
| 6    | Metal Cover, Top Entry                   |

- d) Cover Size

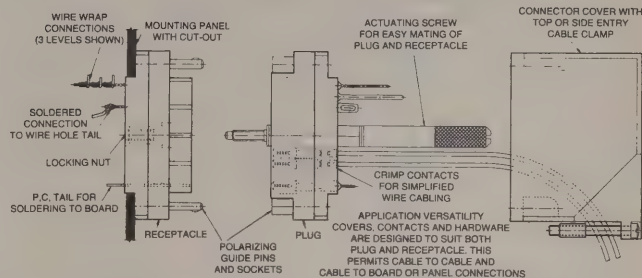

| Code | Fits Connector                          |
|------|-----------------------------------------|
| 12   | 516 Series 120 Pin                      |
| 20   | 516 Series 20 Pin and 519 Series 14 Pin |
| 38   | 516 Series 38 Pin and 519 Series 36 Pin |
| 56   | 516 Series 56 Pin                       |
| 90   | 516 Series 90 Pin                       |

### Notes for 516 Series Cover Ordering Code

- Plastic covers with large clamps are only available for the 38 and 56 pin size connectors.
- Metal covers with side entry may be converted to top entry by removing side plate and changing clamp orientation.
- The 20 pin connector cover will not accept the length of the wire wrap contacts.

RACK AND PANEL CONNECTORS

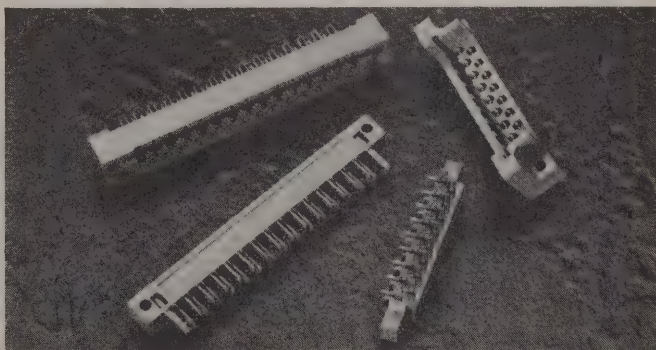

## EDAC METAL TO METAL CONNECTORS

### FEATURES

- Guide pins and socket ensure correct alignment and facilitate mating.
- Male can be used for 1/16" and 3/32" P.C. boards.
- Rigid insulator helps prevent P.C. board warp.
- Maintains exact spacing between contacts.
- One staking operation instead of two.
- Female has open ended card slot that will accept any width P.C. board.
- Many different contact terminations available.
- Five sizes: 17,23,29,35 and 41 contacts.
- Diallyl Phthalate insulators.
- Mated pair provides high reliability, gas tight connection.

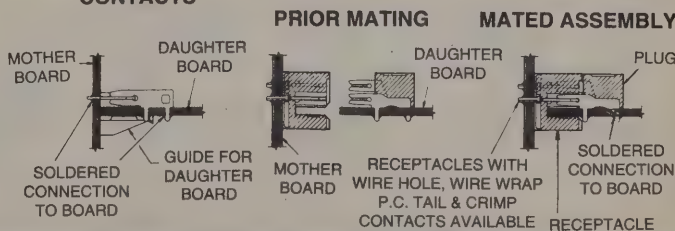

### SPECIFICATIONS

- Current rating: 10 amperes.
- Contact resistance: 10 milliohms, maximum.
- Contact material: phosphor bronze per QQ-B-750, Composition A.
- Standard Plating: 10 to 20 microinches gold over 30 to 150 microinches nickel. Other plating is available upon request.
- Insulation resistance: minimum of 25,000 megohms.
- Insertion and withdrawal force: 2 to 16 ounces per mated contact pair.

METAL TO METAL CONTACTS

METAL TO METAL CONNECTORS

YOUR CONNECTION TO QUALITY AND SERVICE

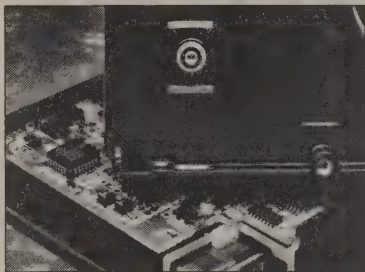

# When you need to save space and assembly time in a high density surface mount connection, think Elastomeric.

When it comes to complex connections, there's one company that thrives on turning design challenges into innovative solutions: Elastomeric. Our customers have recognized us for our smart solutions—we're a Q-1 Supplier to Ford and have received the Supplier Excellence Award from AT&T.

Here are a few ways we've used elastomeric technology to help create successful products.

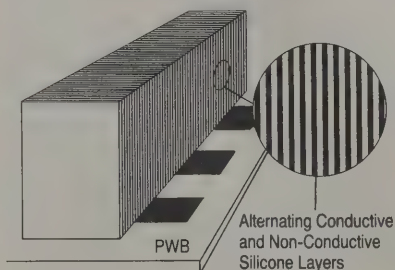

For a 3.5", 200MB disk drive, we custom-designed Elastomeric STAX™SD elements that permitted:

- Redundant connections on tin lead.
- Tight board-to-flex spacing.
- Power and signal on the same connector.

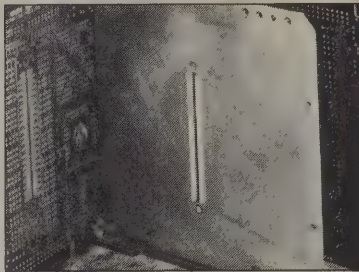

*An Elastomeric STAX™SD element saved parts, permitted a tighter board fit and simplified assembly in over 3 million disk drives.*

## STAX™ Layered Elastomeric Element

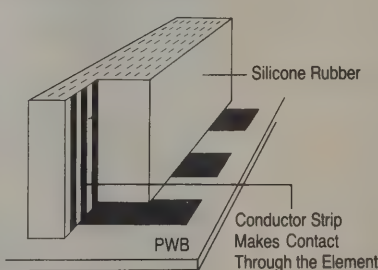

For a robot arm control module, part of NASA's Flight Telerobotic program, Elastomeric designed an Elastomeric MOE®MG (Metal On Elastomer) that provided:

- Very close board-to-board spacing (.090").
- Reliability under severe shock and vibration.
- Improved serviceability.

*An Elastomeric MOE®MG improved the performance and serviceability of a Telerobotic control module for NASA.*

## Matrix MOE® Element

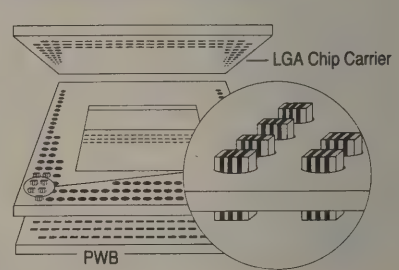

Two major IC manufacturers needed LGA test and burn-in sockets, one with 324 contacts on 0.040" centers, the other with 1,156 contacts on 0.050" centers that yielded:

- Compression force—65g per contact.
- Resistance—0.012 ohm per contact.
- Extended life test to 125°C.

*Sockets with up to 1,156 gold contacts and a compression force of less than 65 grams per contact are made possible with patent-pending Elastomeric MOE®DG technology.*

## Dedicated Matrix MOE® Element

Elastomeric connectors have brought finer pitches, higher operating speeds, greater functionality, and lower cost to hundreds of products. And we can do the same for yours. Whether your need is for an element or complete connector call Elastomeric. We're the smartest connection you can make.

## Automatic Daisy Chaining DIN

ept

Eliminate the need to jumper DataBus Paths for VME, VXI and Networking Products. The unique ept switching design guarantees switch over within .9mm of insertion of the male connector pin. Available in VME and in custom configuration.

## Pressfit for SMT

Straight up tool insertion and extraction speeds up manufacturing of SMT Daughter Cards. Up to 250 connectors per hour can be inserted with the ept semiautomatic insertion press shown on right.

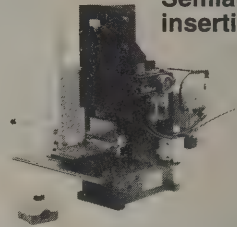

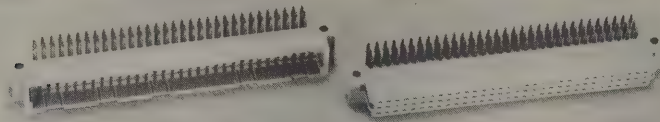

**96 Pin Male C series.**

.134" Tcom 103-60064

**96 Pin Female R series.**

.149" Tcom 116-60074

**Semiautomatic  
insertion press.**

## Discrete Wire Rail Mounted DIN

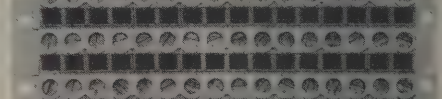

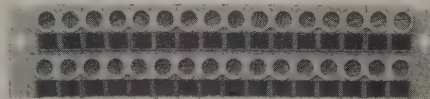

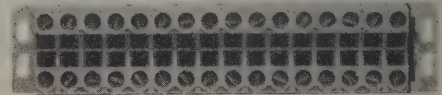

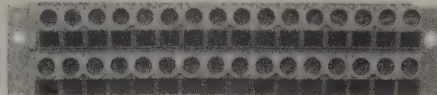

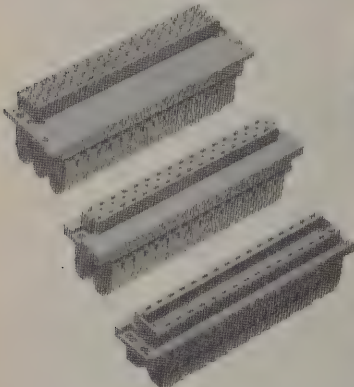

Series D, E, and F DIN Connectors with Screw on terminals for AWG 22-14 wire. Specifications: 6 Amps per pin- Contact Resistance <5mOhm - Connector body UL 94 VO

**D32f** PN. 301-432-02-000

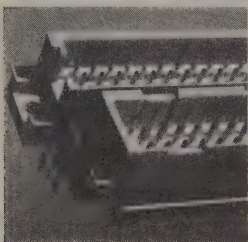

**E32f** PN. 302-432-02-000

**F32f** PN. 303-432-02-000 (zb)  
PN. 303-432-02-200 (zd)

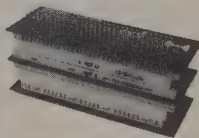

**F48f** PN. 302-448-02-000

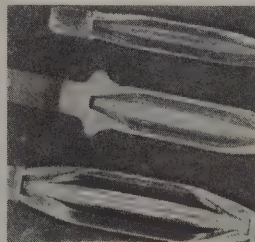

## Features - Options

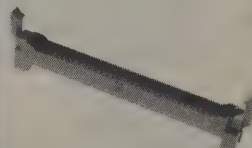

**Premating Contacts**  
For C and R male  
DIN. Up to 3 levels.

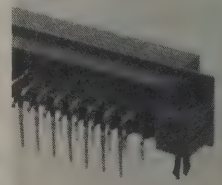

**Board Stacking.**  
Up to 10 boards  
consecutively.

**High Frequency/ low  
capacitance miniature  
Pressfit Sections.**

**Latched Shrouds**  
For 96 Pin IDC  
and daughter cards.

**Mounting Clips.**  
Eliminate labor  
and parts.

## ept

Technical drawing of a shaft-hub assembly. The drawing shows a shaft with a diameter of  $\phi 15_{-0.02}^{+0.00}$  mm and a hub with a diameter of  $\phi 15_{-0.02}^{+0.00}$  mm. The shaft has a length of  $8.25 \pm 0.1$  mm. The hub has a length of  $8.2 \pm 0.1$  mm. The assembly is shown with a fit of  $1.15 \pm 0.02$  mm. The drawing also shows a cross-section of the assembly with a diameter of  $\phi 15_{-0.02}^{+0.00}$  mm and a length of  $8.2 \pm 0.1$  mm. The drawing is labeled with dimensions and tolerances.

Technical drawing of a shaft assembly. The drawing shows a shaft with a central hole. Dimensions are given in inches: 0.375, 1.75, 0.59, 0.65, and 0.6. The shaft has a diameter of 0.59 and a hole diameter of 0.375. The assembly includes a nut and a washer.

Technical drawing of a shaft with dimensions: 23 7/8, 4.013, 0.525, 4.78 max, 58.023, 71.56, 0.36 min.

Technical drawing of a mechanical part, likely a bush or sleeve, showing a cross-section. The drawing includes dimensions: outer diameter 5.35, inner diameter 4.77, and a central hole with diameter 3.7. The part is labeled 96.

C-1319

## Production Tools

ept

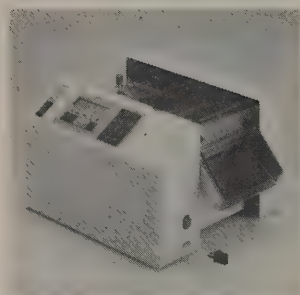

All tools have been thoroughly tested on our own production lines by our technicians and production personnel in typical daily operation. Tools and cutting machines are covered by a "return if not satisfied" Guarantee.

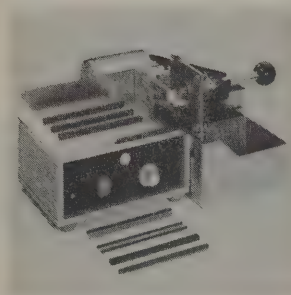

**302 PLCC-, PGA-Extractor  
PGA-Insertion**  
Universal tools for all component sizes.

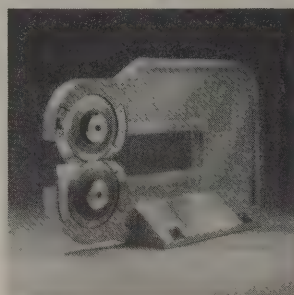

**303 IC-Butler**  
Pin straightening tool for IC components.

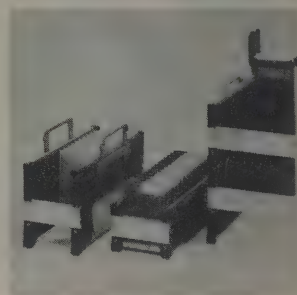

**305 FS 100 Universal Cutting Machine**  
Cuts Flat and Round Cable, Ribbon, Woven Material, Tubing, Paper etc.

**306 Strip Saw**  
To cut headers, and pin and socket strips – simplifies storage.

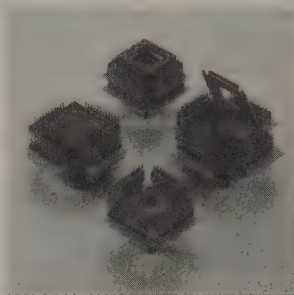

**307 MAESTRO PCB Cutter**  
Separates pre-scored PCB's cleanly, efficiently and easily.

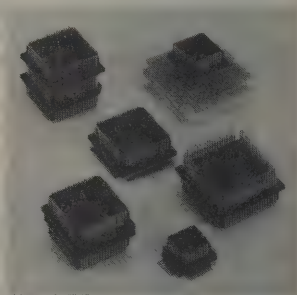

**304 PCB Rack**  
Stable and rigid. Suitable also for automated production.

## VLSI and Surface Mount Adapters

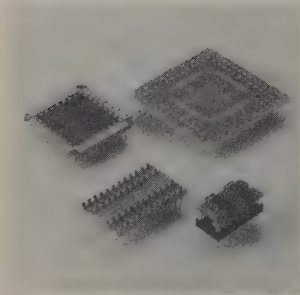

We develop and produce a comprehensive range of products in the area of laboratory test equipment. A specialty is solutions to customer specific problems, which are solved by our team of experts on short notice and at a fair price.

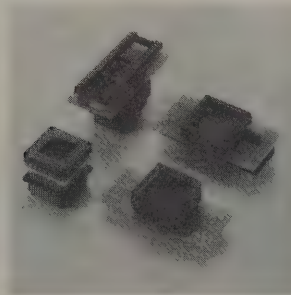

**203 PLCC-Test Sockets  
204 Combi-Sockets**  
LCC, PGA → PLCC

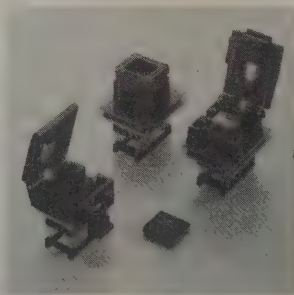

**205 PLCC Adapter**  
To insert and solder, 20 to 100 pole, in different component heights.

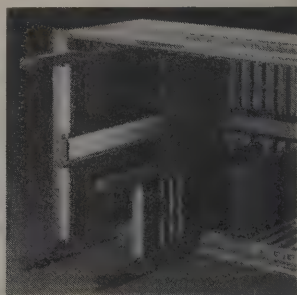

**201 Converter Sockets**  
Skinny-DIP, Shrink-DIP, SOJ → DIP  
PLCC, QFP → PGA

**201 Converter Sockets**  
DIP, PGA → PLCC,  
PLCC → DIP, Shrink-DIP

**202 Programming Sockets**  
PLCC → DIP  
SOJ → DIP

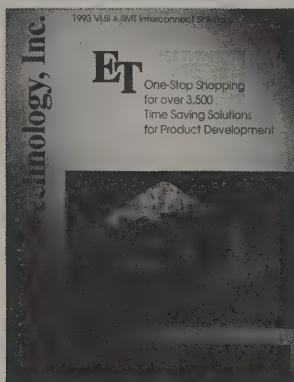

**206 19"- Test Adapter**  
19"- Laboratory Cards  
19"- Bus Wiring

For more information call toll free.

# ONLY ONE OTHER BOOK HAS SAVED MORE POOR SOULS THAN THIS ONE.

There's nowhere you can go, and no one you can talk to, that can deliver more of the things design and test engineers need to develop systems and components at the chip and board levels than we do. And the book that sums it all up, and delivers all the answers. The Emulation Technology 1993 catalog.

We call it the "Good Book". You might call it a "Life Saver". It's the one and only complete listing of more than 3000 items from programming adapters, to converters, to pods, to prototyping adapters, to debugging tools, to you name it.

And even though there are bigger books

out there, they don't list any more products, and they certainly don't list any better.

Plus they don't offer a combination of free technical support, a 10-day money back guarantee, and the fastest delivery in the business, including our "Red Plane" next day delivery. Of the items engineers want the most, if you order it today – it ships today.

All in all, no one gives engineers more of what they want, and gets it to them when they need it, than Emulation Technology.

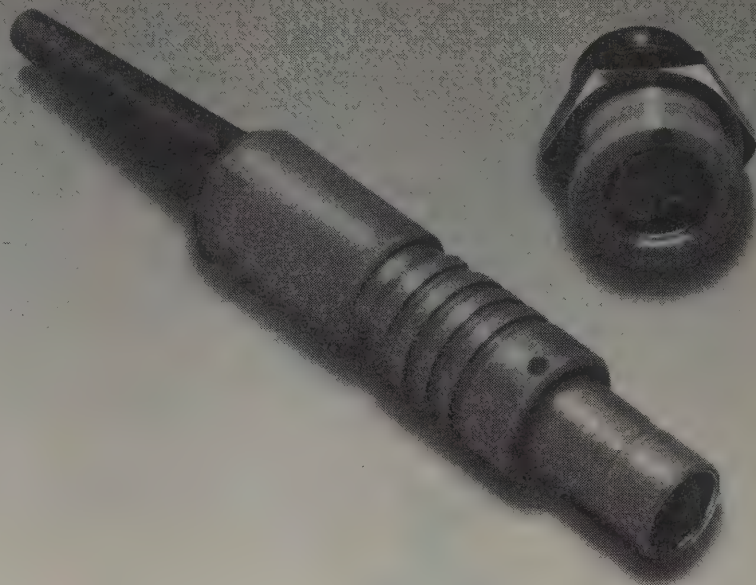

So next time you need the right solutions when things go wrong, get the good book. Call 1-800-995-4ET1 for the 1993 Emulation Technology catalog now.

ELECTRONIC CONNECTORS

## Fischer Connectors

*Providing high performance solutions for  
high-performance applications*

- **High Density** (to 55 contacts)
- **Waterproof** (to 600 feet)
- **Sterilizable** (Autoclave, ETO, Cidex™ or Steris™)
- **High Vacuum** (to  $10^{-8}$  Torr)
- **High Voltage** (to 55 kVDC)
- **High Temperature** (to 400°C.)
- **High Radiation** (to  $10^9$  rad)
- **Coax and Triax** (50 and 75 Ohm)
- **Mixed Contact Configurations**
- **Thermocouple** (J, K, and T Types)

Whenever reliable cable connections are required, W.W. Fischer Electronic Connectors has the solution. Their modular construction and the many available contact types, body styles, and accessories all combine to provide almost limitless options. Fischer hands the engineer a powerful tool to solve a wide variety of demanding medical, petroleum, computer, instrumentation, geophysical, or aerospace requirements.

*Call today and let us help provide the right solution for your next product design.*

#### SERIES 101

#### NIM-CAMAC Qualified

| Part Number      | Description                        | Test Voltage (kVAc) | Impedance (Ohms) | Ampacity | Cable Diameter (mm) | Typical Cable Type               |
|------------------|------------------------------------|---------------------|------------------|----------|---------------------|----------------------------------|
| D 101 A004-CINCH | Adapter, male RCA-CAMAC female     |                     |                  |          |                     |                                  |
| D 101 A004-IB11  | Adapter, male, BNC-CAMAC female    |                     |                  |          |                     |                                  |
| IB3C-D 101 A004  | Adapter, female, BNC-CAMAC, female |                     |                  |          |                     |                                  |
| IB3C-S 101 A004  | Adapter, female, BNC-CAMAC, male   |                     |                  |          |                     |                                  |
| K-K 101 A004     | Adapter, female-female             |                     |                  |          |                     |                                  |
| S 101 A004-CINCH | Adapter, female RCA-CAMAC male     |                     |                  |          |                     |                                  |
| SDL 101 A004     | Adapter, right angle               |                     |                  |          |                     |                                  |
| SDT 101 A004     | Adapter, "T"                       |                     |                  |          |                     | The following cables may be used |
| WD 101 A004      | Feed-through, female-female        |                     |                  |          |                     |                                  |
| S 101 A004       | Plug, solder                       |                     |                  |          | 1.5-3.0             | For cable                        |
| S 101 A004-2     | Plug, crimp                        |                     |                  |          | 3.0                 | Diameter:                        |
| S 101 A004-3     | Plug, crimp                        |                     |                  |          | 5.1                 | 1.5-3.0 mm                       |
| S 101 A004-7     | Plug, solder                       |                     |                  |          | 5.1                 | RG-174                           |
| S 101 A004-8     | Plug, gold body                    |                     |                  |          |                     | RG-178                           |
| SF 101 A004      | Plug, non-locking panel mount      |                     |                  |          |                     | RG-179                           |
| SM 101 A004      | Plug, shorting                     | 1.8                 | 50               | 2A (DC)  | 3.0                 | RG-180                           |
| WS 101 A004      | Plug, crimp, right angle           |                     |                  |          |                     | RG-187                           |
|                  |                                    |                     |                  |          |                     | RG-188                           |
|                  |                                    |                     |                  |          |                     | RG-198                           |
|                  |                                    |                     |                  |          |                     | RG-316                           |
| D 101 A004       | Receptacle, solder                 |                     |                  |          | 1.5-3.0             |                                  |
| DK 101 A004      | Receptacle, solder                 |                     |                  |          | 1.5-3.0             |                                  |
| DK 101 A004-2    | Receptacle, crimp                  |                     |                  |          | 5.1e                |                                  |
| DK 101 A004-3    | Receptacle, crimp                  |                     |                  |          |                     |                                  |
| DLP 101 A004     | Receptacle, PCB, angled, gold      |                     |                  |          |                     | For cable                        |
| DLP 101 A004-10  | Receptacle, PCB, angled, nickel    |                     |                  |          |                     | Diameter:                        |
| DP 101 A004-10   | Receptacle, PCB, straight, nickel  |                     |                  |          |                     | 5.1 mm                           |
| K 101 A004       | Receptacle, solder                 |                     |                  |          | 1.5-3.0             | RG-58                            |
| K 101 A004-2     | Receptacle, crimp                  |                     |                  |          | 5.1                 | RG-400                           |
| K 101 A004-3     | Receptacle, crimp                  |                     |                  |          |                     |                                  |
| SAW 101 A004     | Termination                        |                     |                  |          |                     |                                  |
| S 101 A005       | Plug, Triax                        | 0.8                 | —                | 3.0      | 1.5-3.0             |                                  |
| D 101 A005       | Receptacle, Triax                  | 0.8                 | —                | 3.0      |                     |                                  |

| 19.2   | 106    |
| 22.7   | 107    |

**Collet (Clamp) Type:**

- U** For use with unshielded cable or with shielded cable when shield is **not** terminated to connector body.
- S** For use with shielded cable braided or served when shield is terminated to connector body.

Omit if no cable clamp assembly is required (as for styles: SF, SFE, D, DEE, DB, DBEE, DBP, DBPE, DG, DGP, WDE)

**Contact Protection as a general rule:<sup>2</sup>**

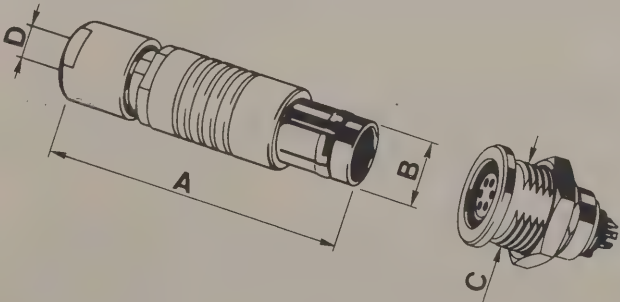

- A** Plugs have pins. Receptacles have sockets.
- Z** Plugs have sockets. Receptacles have pins.

**Code for Contact Configuration:**

See table of electrical ratings for corresponding type and series.

**Modifications:**

- Inquire about availability of various options like:
- crimp contacts
  - printed circuit contacts
  - black chrome finish
  - additional gold plating
  - cable strain relief
  - alternate keying

<sup>1</sup> General dimensions of unsealed standard connectors  
<sup>2</sup> Except certain high voltage connectors

# SILVER ZEBRA<sup>®</sup> LOW RESISTANCE ELASTOMERIC CONNECTORS

## Product Description

**FUJIPOLY** low resistance ZEBRA<sup>®</sup> elastomeric connectors are constructed of alternating parallel layers of electrically conductive and nonconductive silicone elastomer. The electrically conductive layer is filled with silver particles.

The composite alternating layers provide reliable electrical connection when placed between two aligned conducting surfaces.

The low resistance ZEBRA provides a redundant connection with a minimum of two conductive layers recommended per PC contact pad. The connector is available with insulating barrier or silicone supports. The connectors are used for connecting electroluminescent (EL) and plasma type displays to PC boards or for connecting hybrid circuits to PC boards, among other applications.

Low resistance ZEBRA connectors are positioned between two aligned surfaces and are mechanically clamped together with a lid or another PC board. The connectors may be free standing or positioned in a retainer depending on packaging profiles and design.

## Design Recommendations

Recommended deflection is 5-20% of free height. Minimum deflection will vary with packaging applications and should consider overall height, PC board warpage, finish, etc. (Contact **FUJIPOLY** Product Application Engineering for assistance.)

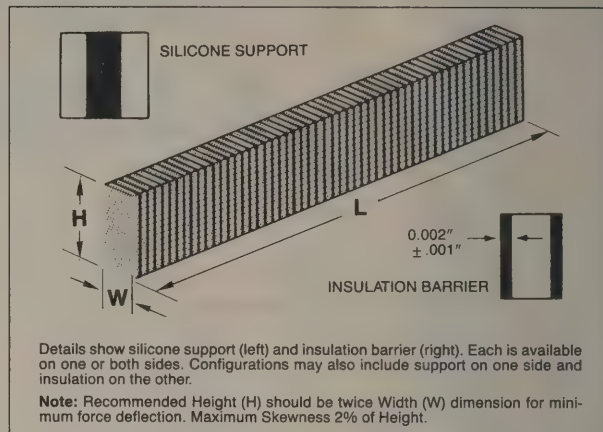

Design recommendations for solid ZEBRA over 0.400" deflect 0.050" typical. Silicone supported over 0.400" deflect 0.060" typical.

The use of an insulating barrier or silicone self-support material on one or both sides of the connector is recommended. The silicone support is utilized to reduce clamping force and provide an element of environmental protection for a cost-effective connection.

## Properties/Performance Characteristics

|                                                                                                                          |                                                                                                                  |

## Dimensional Specifications

Details show silicone support (left) and insulation barrier (right). Each is available on one or both sides. Configurations may also include support on one side and insulation on the other.

**Note:** Recommended Height (H) should be twice Width (W) dimension for minimum force deflection. Maximum Skewness 2% of Height.

## Dimensional Specification (For requirements over 4" consult factory)

|            | INCHES                       | MM                            |
|------------|------------------------------|-------------------------------|
| HEIGHT (H) | 0.040 ± .003 to 0.500 ± .007 | 1 ± .08 to 13 ± .18           |
| WIDTH (W)  | 0.030 ± .003 to 0.100 ± .005 | 0.762 ± 0.076 to 2.54 ± 0.127 |
| LENGTH (L) | 0.250 ± .005 to 4.000 ± .025 | 6.35 ± .12 to 101.60 ± .64    |

## Calculation of Resistance

For the purpose of calculating the resistance of silver ZEBRA connectors and testing them for compliance, please use the following formula:

$$R = \frac{H}{W \times Ew} \times .004$$

**WHERE:** R = Resistance in Ohms Ew = Electrode pad width, inches  
W = ZEBRA width, inches H = ZEBRA height, inches.

# Series 7000 & 8000—Low Resistance Connectors

## Description

The **FUJIPOLY** ZEBRA<sup>®</sup> Series 7000 and 8000 elastomeric connector elements are "D"-shaped, low durometer silicone elastomer core around which flat metallic conductors are vulcanized in a row parallel to each other. The tips of the metallic conductors are turned upward so that point contact can be effected; in addition, contact is made to the flat area

when the connector element is positioned between two printed circuit boards. The point contact will penetrate surface oxides or contaminants which might be present on the surface of the contact pads, thus assuring reliable electrical connection on two planes. Also available are standard board to board assemblies which include connector and holder.

## Series 7000 and 8000 Dimensional Specifications

| CONNECTOR DIMENSIONS | MINIMUM                              | MAXIMUM                            |
|----------------------|--------------------------------------|------------------------------------|
| Height "H"           | 0.100" ± 0.005" 2.54mm ± .127mm      | 0.500" ± 0.015" 12.70mm ± .381mm   |
| Width "W"            | 0.060" ± 0.005" 1.52mm ± .127mm      | 0.125" ± 0.010" 3.18mm ± .254mm    |
| Length "L"           | 7000 0.200" ± 0.005" 5.08mm ± .127mm | 3.500" ± 0.015" 88.90mm ± .381mm   |
|                      | 8000 0.200" ± 0.005" 5.08mm ± .127mm | 10.000" ± 0.030" 254.00mm ± .762mm |

**Note:** For good design practice and low deflection force requirements, the height "H" should be twice the width "W".

# Fujipoly Connector W Series (Elastomeric Connectors)

The high-accuracy rubber connectors of the Fujipoly W series with anisotropic conduction properties have 300-2000 fine metal wires per 1 cm<sup>2</sup> embedded in the thickness direction of the transparent silicone rubber sheet. After inserting the Fujipoly W series connectors between the opposite electrodes, all that is necessary is to apply the appropriate pressure to allow the electrodes to be properly connected. All fine metal wires are gold-plated. This finish ensures that requirements such as a low resistance and the ability to withstand a relatively high current flow can be met.

### Fujipoly Connector W Series Features

- Ensures proper solder-free connections by mere insertion between the electrodes and applying the pressure.
- The fine metal wires have a fine pitch (the average pitch in the linear direction is 80μ for the L pattern) to allow high-density mounting. This also eliminates the need for positional alignment of the connectors when mounting.
- The continuity (contact) resistance is extremely small (1Ω/mm<sup>2</sup> or less).

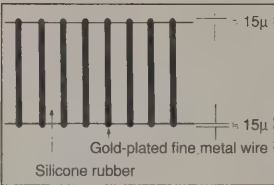

### Fujipoly Connector W Series Applications

- Mounting and inspection of chip carriers, QFP, TAB, PLCC, hybrid IC boards
- Mounting and inspection of display panels including LCD, LED and ECD.
- Connecting and inspection of printed circuit boards.

### Types of W Series Fujipoly Connectors

#### WS □ Type

This type of connector has straight fine metal wires embedded in a transparent silicone rubber sheet in a regular arrangement. The fine wires protrude slightly from both ends of the silicone rubber sheet to ensure a perfect connection at a very light touch. Suitable for mounting applications.

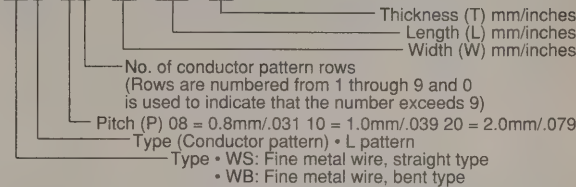

### Nomenclature

For ordering purposes, use the following numbering.

#### (1) For L-pattern conductor arrangement

Ex. Fujipoly Connector

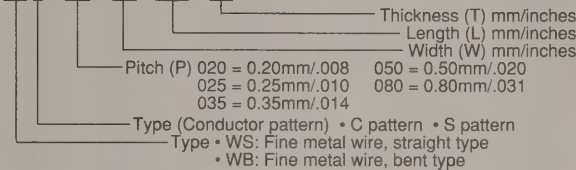

WSL-102-(2.0 x 20.0 x 0.5)

#### (2) For C-pattern, S-pattern conductor arrangement

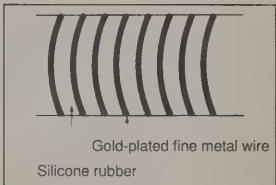

Ex. Fujipoly Connector

WSC-050-(5.0 x 20.0 x 0.5)

#### WB □ Type

This type of connector has bent or curved fine metal wires embedded in a transparent silicone rubber sheet in a regular arrangement. The fine wires are curved so that these connectors are ideal for application requiring repeated compression. Suitable for inspection applications.

# Zebra® Connectors for Liquid Crystal Displays

## High Resistance Connectors

FUJIPOLY ZEBRA connectors (see Figure 1) have alternating parallel layers of conductive carbon-filled and non-conductive silicone rubber. They make reliable connections by being deflected between contacting surfaces. ZEBRA connectors are

used for connecting any LCD, from small displays for watches to large area displays for instruments. Table A shows the different types of ZEBRA connectors available. Table B shows performance characteristics.

| Series | LCD Contact Spacing Center-to-Center* |                       | PITCH: Sum of the Thickness of an Adjacent Conductive and non-Conductive Layer |         | Conductive Layer per inch |                        | Individual Conductive and Insulating Layer Thickness |         | Available Lengths |

TABLE C

## Sponge Supported Connectors

The Self-Supporting Sponge Zebra connector utilizes standard 1002/2004 zebra connector elements supported by a silicone sponge rubber on one or two sides. The silicone sponge creates a larger width that can eliminate the need for a holder, and yet the force required for deflection is very low (See product technical sheets #4 & 5 for specific information). The

standard Self-Supporting Sponge Zebra connector is available in a host of widths to accommodate LCD's with a glass lip overhang of 0.060"/1.5mm minimum. The Self-Supporting Sponge Zebra connector is used to connect LCD's to printed circuit boards and eliminates bowing of the printed circuit board due to the low force required to make contact.

### Standard Sponge Self-Supporting Zebra Connector Widths

TABLE C

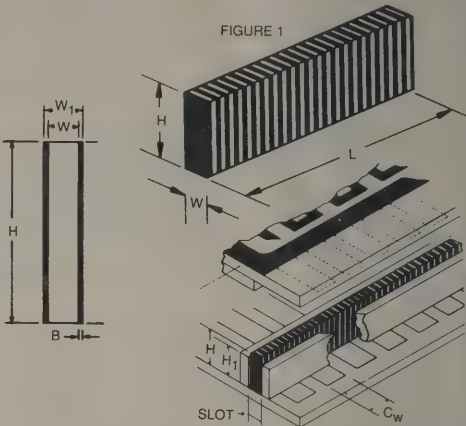

Figure 1 shows the three dimensions of the ZEBRA connector. When ordering, the three dimensions should be specified within the limits shown in Table C. For best overall performance, ZEBRA connectors must be ordered and used with a ratio of H/W equal to or greater than 1.5.

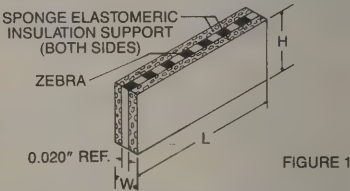

Figure 1 shows the three dimensions of a typical Sponge Supporting ZEBRA connector. Table A and B give the available sizes and tolerances.

# NOMOGRAPH VOLTAGE DROP

## NOMOGRAPH OF VOLTAGE DROP ACROSS LOAD SUPPLY LEADS (as a function of wire size and load current)

**THIS NOMOGRAPH  
CAN BE USED TO FIND:**

**Maximum current carrying  
capacity recommended for  
any standard wire size.\***

- 1) With a straight edge, connect from the wire size on Scale 2 to the point "A" on Scale 3.
- 2) Read  $I_{max}$  on Scale 1.

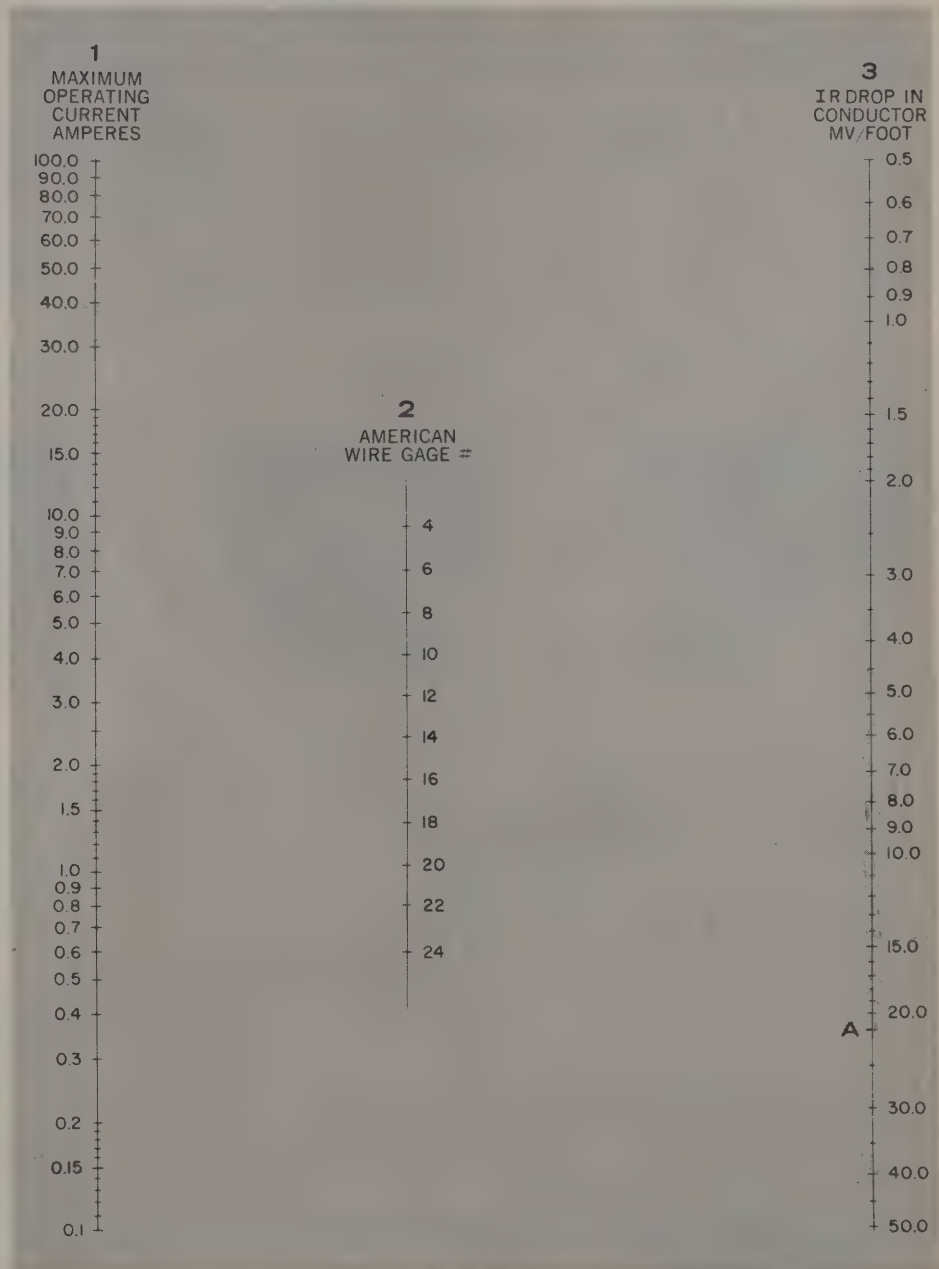

**Voltage drop in millivolts per  
foot for known wire size and  
operating current.**

- 1) With a straight edge, connect the known current on Scale 1 and the wire size on Scale 2.
- 2) Read voltage drop on Scale 3.

**Wire size required for known  
operating current and known  
maximum tolerable voltage  
drop across supply leads.**

- 1) Determine maximum tolerable drop in millivolts **per foot** of lead (sum of positive and negative leads).
- 2) Connect the value on Scale 3 (as determined in step 1) to the known current on Scale 1.
- 3) Read wire size on Scale 2.

*\* Based on an arbitrary minimum  
500 circular mils per ampere.  
High-temperature class insulation  
will safely allow higher  
currents.*

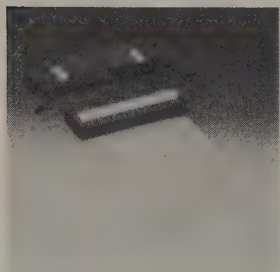

**NOTE:** A voltage stabilized Power Supply controls the voltage across its output terminals. Hence, the wire conductors used to connect the load must be considered as part of the load. At high load currents, the voltage drop across the supply leads may appreciably degrade stabilization at the load. Kepco models equipped with the *remote error sensing* feature can automatically compensate for voltage drops of up to 500 mV across each load supply lead.

## CONNECTORS

**FUJITSU**

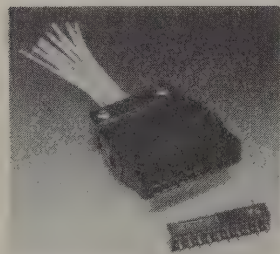

### IDC SOCKETS & HEADERS MODEL FCN-700, FCN-600

#### FEATURES:

The Model 700 connector has a superior ejector with a unique flexible hook. Header terminals are tin-plated and have superior cost performance; the solder dip section is made into a 0.5 mm (0.020 in.) square and can be used in a 0.8 mm (0.031 in.) through-hole. A special strain relief prevents wire breakage, and incorrect insertion is prevented by two kinds of keys and bump polarization. Connectors with 4 mm (0.157 in.) terminals have also been serialized for mounting on multi-layer PC boards. 10-64 positions. Stackable headers available.

### SOCKET HOUSINGS, CRIMP CONTACTS & HEADERS MODEL FCN-720, FCN-720M\*

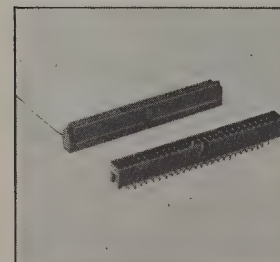

#### FEATURES:

The crimp connector has been designed for wide use, and comes in many shapes and contact arrangements (one and two rows). The Model 720 block headers are matable with the Model 700 and 740 sockets, and Model 720 sockets are lockable with Model 700 headers when a special cover is used. Female contacts are secured in the housing by a unique internal spring structure. High-pressure contacts are also available which prevent accidental disconnection in applications using only a few contacts. For the W and S type headers, insulation molds can be broken into the necessary size. 0.100 in. pitch (2.54 mm).

\* NEW. Also available in 2 mm pitch 0.079

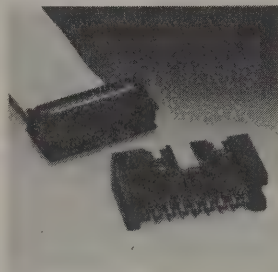

### BOX PLUG: FCN-724Q/728Q\*\*\*-G/\*M IDC SOCKET: FCN-727B/727J\*\*\*-G/\*M

#### FEATURES:

- Contact, terminal are arranged in 2.0mm (0.079in.) grid
- 1.0mm (0.039in.) pitch flat cable is applied
- Suitable for 2.5 in. HDD connection
- Bump type available
- SMT box plug available

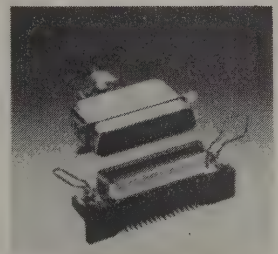

### MINI IDC SOCKETS & HEADERS MODEL FCN-740

#### FEATURES:

This mini-header and socket were developed to provide a compact set of connectors – their combined height is less than half that of the Model 700 connector. Unique plastic retention clips prevent disconnection due to vibration. There are up to 34 contact header and socket combinations, and the socket can be mated with all contact numbers of the FCN-700 header with S hooks and locked. The mini-header has an integral polarization to ensure correct insertion.

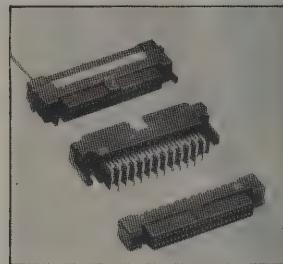

### RIBBON CONTACT TYPE CONNECTORS MODEL FCN-780/FCN-680

#### FEATURES:

- Matable with other ribbon-type connectors and have a sturdy metal shell that enables easy EMI shieldings
- Made of PBT, a superior solvent-resistant material, enabling flux cleaning with chlorisrin and other solvents
- UL-recognized (94 V-0) insulation material
- 1.27 mm (0.050 in.) pitch flat cable can be used.
- Accessories available
- Interface standards for SCSI, Centronics, HPIB, GPIB, IEEE 488

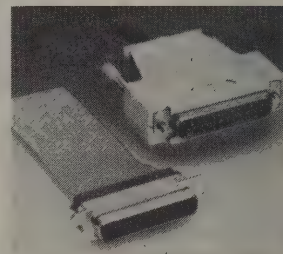

### FCN-210 SERIES BOARD PLUG/SOCKET, CABLE SOCKET AND PCB PLUG CONNECTORS.

#### FEATURES:

- 1.27 mm (0.05 in.) pitch contact arrangement in two rows enables high-density mounting
- Can be used for any type of connection between boards
- Terminals are spaced in a four-row zigzag array (1.27 mm (0.05 in.) x 1.905 mm (0.075 in.) for easy PC board design
- Insulation is UL-approved (94V-0) and is cleanable

### D-SUB CONNECTORS MODEL FCN-770/FCN-670

#### FEATURES:

- The 1.27 mm (0.050 in.) pitch flat cable can be used
- The connectors are matable with MIL specification D-type connectors
- Fujitsu-developed highly reliable U-contacts are used
- Molded and metalized (plated) holders are available
- UL recognized (94 V-0) insulation material is used
- RS232, 447, 449

### FCN-240R SERIES BOARD TO CABLE CONNECTORS

#### FEATURES:

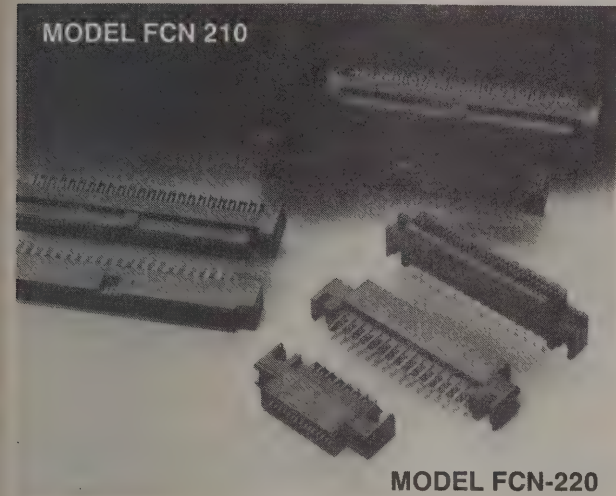

- The mating contact has a 1.27 mm (0.050 in.) pitch
- External connection type with high density mounting
- Ribbon contact provides excellent torsional strength
- IDC assembly with discrete wire
- Dual cover (plastic outercover & metal innercover) provides excellent EMI, ESD protection
- PCB-terminal has a four-row zigzag array (2.54 x 1.905 mm [0.100 x 0.075 in.]

FUJITSU

BOARD TO BOARD & I.O CONNECTORS  
CARD EDGE CONNECTORS

FEATURES

(ONE PIECE)

- 1.27 mm (0.05 in.) pitch contact arrangement in two rows enable high-density mounting.
- Can be used for any type of connection between boards.
- The card-edge connectors can accommodate double-sized independent PC boards of 1.6 mm (0.063 in.) in thickness.
- Terminals are spaced in a four-row zig-zag array (1.27 mm (0.050 in.) x 1.905 mm (0.075 in.)) for easy PC board design.
- Insulation is UL-approved (94 V-O), and is cleanable.
- Available in 30-182 contacts.

SCSI II TYPE TERMINATORS  
FCN-239P050-G/\*, FCN-239P068-G/\*/\*, FCN-789P050-L/\*

- Matable with SCSI II PCB-mount socket connector (1.27 mm pitch)
- One-touch lock mechanism or screw locks.
- Complete EMI protection by die-cast zinc cover (nickel-plated ABS for FCN789).
- Compliance to SCSI standards set forth by American National Standards Institute (ANSI).
- Single-ended Passive and Active alt 2 in 50 and 60 positions.
- Differential in 50 and 68 positions for A, B, and P cables in SCSI I-II, III spec.

FCN-240 SERIES  
RIBBON CONTACT BOARD  
PLUG/SOCKET CONNECTORS

1.27mm PITCH, RIBBON CONTACT BOARD  
PLUG/SOCKET CONNECTORS

FEATURES:

- The mating pin has a 1.27 mm (0.050 in.) pitch two-row configuration to enable high-density mounting.
- Ribbon contact provides excellent torsional strength.
- PCB terminal has a 4-row staggered arrangement (1.27 <0.05> x 1.905 <0.075> mm <in.>).
- The insulation material is completely washable and is approved by the UL (94V-0).
- Connectors for stacking boards from 8 to 14 mm are available.

# Test Clips, Posts, Sockets

APPROXIMATELY  
75% ACTUAL SIZE

## TEST CLIPS (FIGURES A THRU F)

Designed for panel mounting on test equipment or for breadboarding to allow rapid connections without manual opening and closing of jaws. Hex nut under each clip allows for tension adjustment. Insulated washers for 2-24 (Fig. D) and 2-4 (Fig. F) have shoulder to fit .250 and .375 inch diameter holes, respectively. They fit minimum panel thickness of .125 inches. Spring clips are nickel plated brass (beryllium copper for 2-41 and 2-42); insulators are molded phenolic.

\*Includes height of thru hole shoulder. For part numbers, see figures.

## BINDING POSTS (FIGURES G & H)

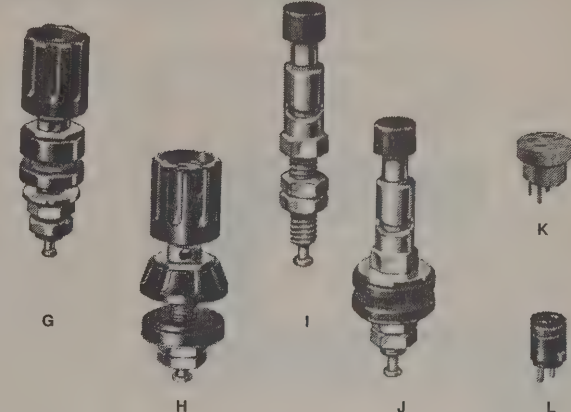

Standard screw type posts in dark red (RED suffix) or black (BLK suffix) let you color code connections. Flush hole prevents crimping. Non-turn D style insulating washers fit panels up to .188 inches. Open height above board is 1.02 inches; total length is 1.70 inches reference. Straight skirt style (Fig. G) fits .375 inch diameter hole with optional D shape width .343 inches. Flared skirt (Fig. H) fits .500 inch diameter hole for wider spacing; optional D shape width is .463 inches. Integral solder stud; 2 hex nuts for solder lug connections. Rated at 120 Vdc, 15 A continuously. Insulation Resistance: 120,000 megohms (Fig. G); 200,000 megohms (Fig. H). Voltage Breakdown (stud to panel): 1500 Vac (Fig. G); 3000 Vac (Fig. H). Insulating Material: Thermoset plastic per MIL-M-14, Type CFG.

- Binding Post with Straight Skirt: 29-1 RED or 29-1 BLK  
Binding Post with Flared Skirt: 29-3 RED or 29-3 BLK

## PUSH POSTS (FIGURES I & J)

Plunger type binding posts provides quick connect/disconnect action. To operate, press button, place lead in slot, and release button. Spring pressure assures firm positive contact. Red (RED suffix) or Black (BLK suffix) caps let you color code connections. Type 29-104 (Fig. J) has insulating washers .500 inch diameter wide, with shoulder to fit .391 diameter hole. Slot opening measures .06 inches. Post is .25 inches in diameter and total length is 1.44 inches. Height above board is .81 inches and .89 inches for Figures I and J respectively. Rated at 120 Vdc for 20 Amps continuously. Metal parts are nickel plated brass. Spring is tinned music wire; button cap is polyethylene; insulating washers (Fig. J) are black phenolic.

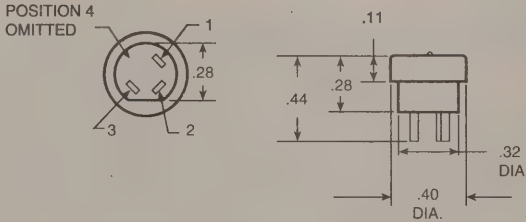

- Standard Push Post (Figure I): 29-100 RED or 29-100 BLK  
Insulated Push Post (Figure J): 29-104 RED or 29-104 BLK

## TRANSISTOR SOCKET (FIGURE K)

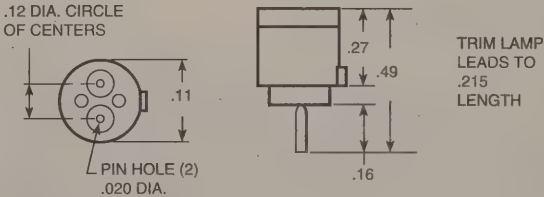

Transistor type accepts standard outline (TO-5, 9 11, 16, 26, 29, 31, & 39). Indicator for aligning transistor tab is molded into top. Solder socket into PC board, or mount thru a D-shaped hole and use retaining ring such as Walde Truarc ring number 115-31. Socket has wrap around, molded-in terminals. Socket also available with different D flat alignment, or with 4 terminals, or with 4 terminals plus screw/rivet mounting. Operating Temperature: 265°F maximum. Loss Factor: .06 at 1 Meg. Housing is natural color, molded, mica filled phenolic per MIL-M-15, Type MFE. Contacts are wrap-around type, silver plated beryllium, copper with gold plate.

Part Number: 22-16-3

## LAMP SOCKET (FIGURE L)

Use as Bi-pin lamp socket or pencil tube socket. Socket accepts standard T 1-3/4 or Chicago miniature T 1-1/4 lamps with leads trimmed to .215 length. Insulating material is Mica filled phenolic per MIL-M14, Type MFE. Contacts are gold plated beryllium copper. Part Number: 22-3

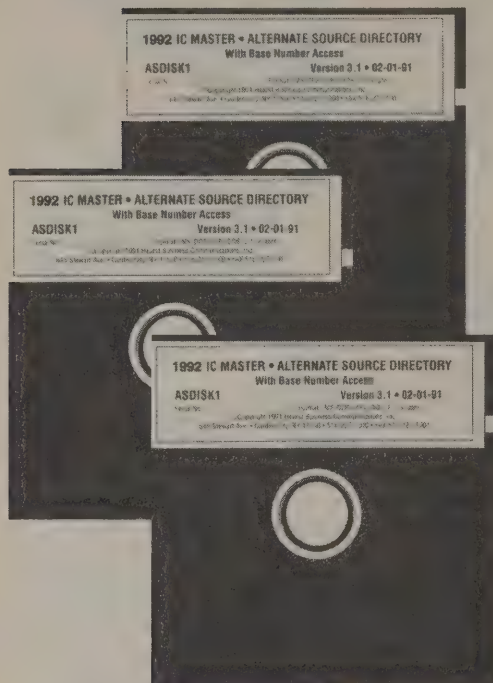

For prices and discounts, contact a local Sales Office, an authorized local Distributor, or Grayhill.

# ICMASD

## *Alternate Source Directory*

The all new 1992 ICMASD-IC Alternate Source Directory on Disk is identical to the Alternate Source Directory Section contained in Volume Two of the printed version of the 1992 IC Master. All you need is an IBM XT/AT or 100% compatible personal computer with hard drive.

ICMASD is the most comprehensive and reliable guide available to all ICs known to have a realistic replacement or alternative. Industry wide listings help you find the correct pin-for-pin replacement parts for both current and discontinued parts.

The electronic ICMASD is fast, convenient...and can be customized for your specific needs!

### **ENHANCED FLEXIBILITY**

ICMASD is organized in a similar fashion to the printed version in the IC MASTER. The database is arranged by manufacturer, showing the manufacturer's original basic part number. All known replacements for that part are listed in alphanumeric order.

The enhanced flexibility of the electronic ICMASD allows you to add comments, up to 19 digits long, to any device listing in the system. These comments can be part numbers, project notes, prices, or any information unique to your application.

### **USER FRIENDLY**

ICMASD is very user friendly. There are no tricky commands to learn. The software is completely menu driven. ICMASD comes complete with documentation that is brief and to the point. It can be ordered on four 5 1/4", double-sided, double-density disks OR on one 5 1/4" or 3 1/2" high-density disk.

*Published annually in March*

### **FAST AND CONVENIENT**

ICMASD includes a complete Manufacturers & Distributors Directory listing the addresses and phone numbers of every manufacturer in the IC industry. With this complete directory any manufacturer or distributor is just a phone call away.

**To order your 1992 ICMASD,**

## HARTING Products      Application Orientated Technology

Founded in 1945 HARTING ELEKTRONIK has become one of the World's leading manufacturers and suppliers of Industrial Power and PCB Connectors which are produced in ISO 9001 Certified manufacturing facilities.

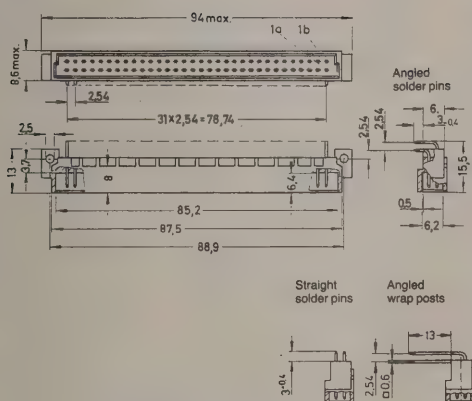

**Reliable Quality and Service from HARTING.**

With manufacturing facilities in Germany, Switzerland, Great Britain, France and Hong Kong and subsidiary companies throughout the world, HARTING's dedicated staff of connection technology experts forms the foundation of a company prepared to meet the challenge of today's ever changing and demanding market-customer requirements.

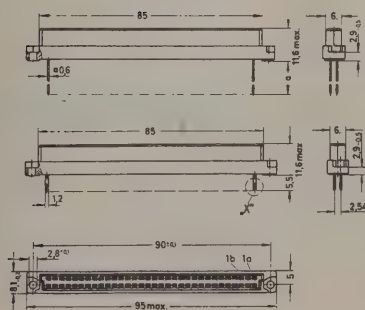

Internationally recognized as a major supplier of advanced technology and reliable quality connectors, HARTING ELEKTRONIK's market leader dedication in the research and development of connection technology and interconnection systems assures that only top-quality products complying with international standards are offered.

## MINIGLOSSARY ENCAPSULATION

### MATERIALS/HANDLING

**Catalyst:** A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

**Conformal coating** Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

**Curing agent:** See catalyst.

**Hardener:** See catalyst.

**Hermetic:** A permanent gas-tight seal.

**RTV:** Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

**Thermoplastic:** Plastic materials which can be made to flow *repeatedly* with the application of heat.

**Thermosetting:** Plastics which once cured cannot be made to flow again.

**Thixotropy:** The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

**Viscosity:** Measured in units of *poise* or *centipoise*. The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

### PROCESSING

**Casting:** Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

**Dip coating:** Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

**Embedding:** Wherein an encapsulant substantially fills all voids in and about an assembly.

**Impregnation:** A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

**Molding:** Similar to casting except this process usually implies multicavity molds and costly machines.

**Potting:** Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

### DIELECTRIC

**Arc resistance:** An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

**Breakdown voltage:** The voltage at which an encapsulant fails electrically.

**Capacitance:** The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

**Corona:** A luminous discharge of electricity due to air ionization when a cer-

tain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

**Dielectric:** Insulator (Nonconductor.)

**Dielectric constant:** The property of a material that determines its ability to store electrostatic energy.

**Dielectric strength:** The ratio of dielectric breakdown to the thickness of insulating material.

**Dissipation factor:** The ratio of a dielectric material's energy losses.

**Flashover:** Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

**Insulation resistance:** (IR) An insulating material's total DC leakage.

**Surface resistivity:** The resistance of the surface of an insulating material to the flow of direct current.

**Voltage endurance:** Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

**Volume resistivity:** The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

## CONNECTORS and SPECIALTY PROBES

When it comes to interconnections, you want the finest quality connectors and probes available. Why, then, settle for imitations? Unfortunately, there are a lot of them out there. And they all claim to be "Just like a Hirschmann."

For over 60 years Hirschmann has engineered interconnection solutions for industrial controls, sensors and test equipment, as well as computer and medical diagnostic equipment. Our connectors meet the most stringent requirements for reliability and safety — measured not only by industry standards, but by our customers who rely on them.

Whether it's a basic installation or an intricate custom assembly, specify Hirschmann. Because when it comes to quality and performance, there's nothing like a Hirschmann but a Hirschmann.

**RICHARD HIRSCHMANN OF AMERICA, INC.**  
Industrial Row, Riverdale, N.J. 07457  
(201) 835-5002 • Fax (201) 835-8354

Water-tight industrial connectors for control and machine tool applications (DIN 43650/IP65)

Circular connectors for sensors and instrumentation (IP 67)

Specialty probes and clips for medical diagnostic and test equipment (VDE)

Circular DIN connectors including miniature "DIN Style" for datacom and instrumentation (IEC)

# LOW INSERTION FORCE CONNECTORS

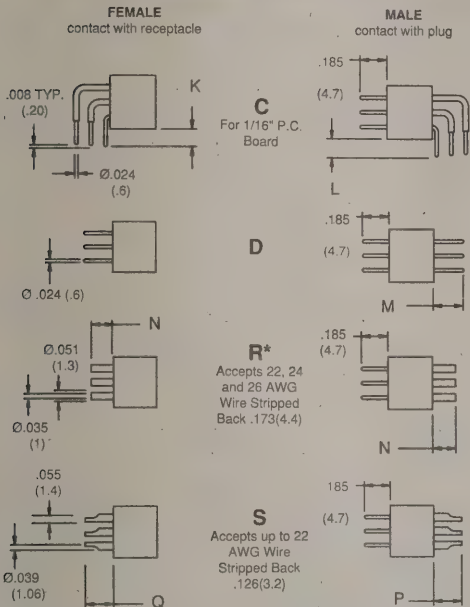

## KA SERIES

### 2 & 3 ROW P.C. BOARD CONNECTORS

- Average insertion force one ounce per contact
- Hard metric design
- Most models QPL'D to DOD-C-55302
- <5 milliohms contact resistance 3 ampere contact
- Choice of Crimp, Solder Cup, and straight dip terminals
- Over 100,000 cycles life

### TERMINAL STYLES

\*Contacts will be shipped unassembled Note: Dimensions in inches (mm)

# LOW INSERTION FORCE CONNECTORS

## L SERIES

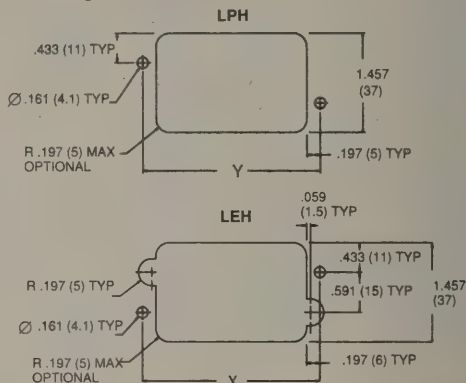

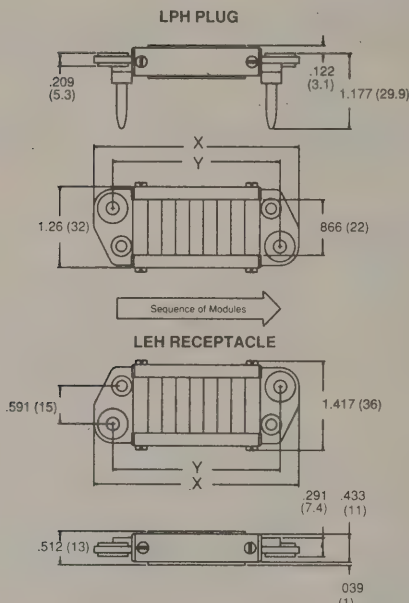

### CABLE AND RACK AND PANEL CONNECTORS

- Blind matable with up to .049" misalignment
- Jackscrew and rugged polycarbonate hood
- Custom design with optional 8, 15, 25, 50, 100 and 200<sup>4</sup> amperes contacts
- Small size and light weight

### HOUSING DIMENSIONS

#### TYPE H

Blind matable with up to .049" misalignment

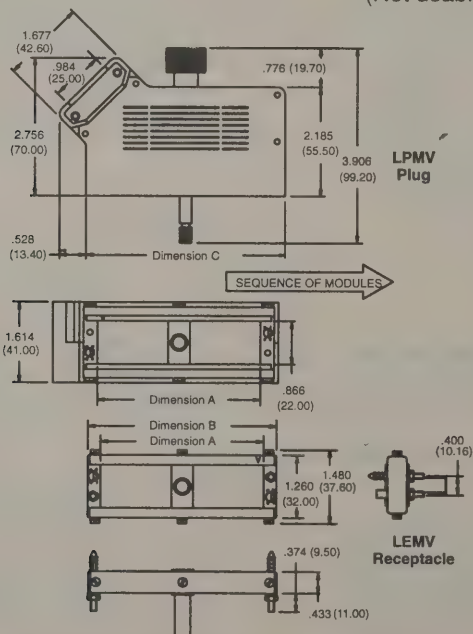

| UNITS | X             | Y            |
|-------|---------------|--------------|
| 4     | 2.559 (65)    | 1.969 (50)   |
| 5     | 2.776 (69.5)  | 2.185 (55.5) |
| 6     | 2.992 (76)    | 2.402 (61)   |
| 7     | 3.209 (81.5)  | 2.618 (66.5) |
| 8     | 3.425 (87)    | 2.835 (72)   |
| 9     | 3.642 (92.5)  | 3.051 (77.5) |
| 10    | 3.858 (98)    | 3.268 (83)   |
| 11    | 4.075 (103.5) | 3.484 (88.5) |

| UNITS | X             | Y             |
|-------|---------------|---------------|
| 12    | 4.291 (109)   | 3.701 (94)    |
| 13    | 4.508 (114.5) | 3.917 (99.5)  |
| 14    | 4.724 (120)   | 4.134 (105)   |
| 15    | 4.941 (125.5) | 4.350 (110.5) |
| 16    | 5.157 (131)   | 4.567 (116)   |
| 17    | 5.374 (136.5) | 4.784 (121.5) |
| 18    | 5.591 (142)   | 5.000 (127)   |
| 19    | 5.807 (147.5) | 5.217 (132.5) |
| 20    | 6.024 (153)   | 5.433 (138)   |

#### TYPE MV

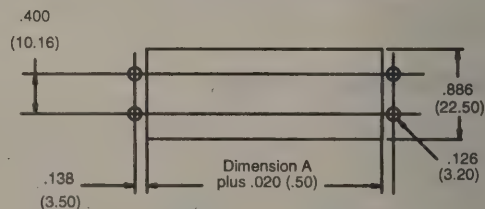

Adjustable cable clamp

With jackscrew and molded hood/black polycarbonate  
(Not usable with 100-200 AMP modules)

| NUMBER OF UNITS | DIMENSIONS     |                |                |
|-----------------|----------------|----------------|----------------|
|                 | A              | B              | C              |

LOW INSERTION FORCE CONNECTORS

L SERIES  
MODULES DIMENSIONS  
TYPES: A, B, C, D, AND M

TYPES G and K

File No. E102195

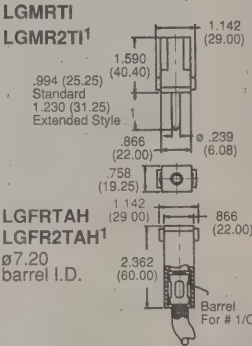

File No. LR83002

ORDERING INFORMATION

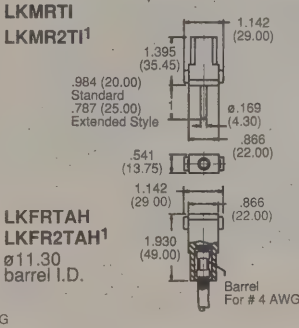

L P H 8 / 4 AMST / 2DMST / TG

P=Plug  
E=Receptacle  
Housing:  
H, MV (add 2  
units for  
jackscrew)  
Length of Rails  
4-20 Units  
Number of  
Modules  
Module combination by quantity  
(Refer to type of module and ter-  
minals style etc....using above  
outline as sample only) Module  
will be positioned in frame  
according to sequence listed

G MODULE  
3.5 units width

K MODULE  
2.5 units width

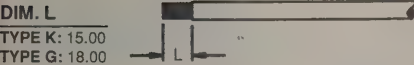

- Notes:
- 1) Extended pin option provides first mate, last break ground contacts
  - 2) Consult factory when ordering empty modules and replacement barrier
  - 3) Contacts shipped unassembled
  - 4) Approved to 180 amps by CSA for 30°C temperature rise

NOTE: Dimensions in inches (mm)

CRIMP INSTRUCTIONS

STEP 1: Strip wire insulation to dimension specified

STEP 2: Insert wire into contact crimp barrel until wire becomes visible in the inspection hole, then crimp using T1501 with applicable positioner

STEP 3: Insert contacts into insulator. An audible click should be heard when contacts are fully seated

### QUICK DISCONNECT CONNECTORS

- Wiping action pin & socket contacts
- <2 second operation
- 180° quick turn cam rated at >15,000 cycles
- Provides 60-300 contacts
- 5 or 9 ampere contacts
- Crimp, dip solder, solder cup, and wire wrap® contacts

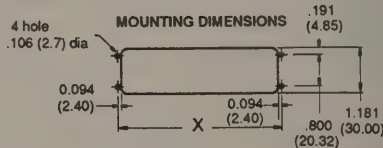

### GENERAL SPECIFICATIONS FOR MODULES

| MODULE TYPE                    | P                                                                                                                                         | T                 |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|-------------------|

## INTERNATIONAL SNAP-IN MOUNT RECEPTACLES

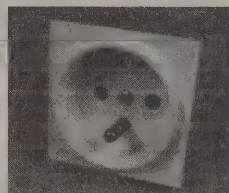

These modular-size outlets are ideal for use on exported equipment as one standard 53.5mm x 58.6mm panel cutout will accept the European, United Kingdom, Australian, French, Italian or Swiss outlet. Multiple outlets can also be ganged in various combinations.

Cat. 70100  
**EUROPEAN**  
"SCHUKO"  
CEE-7 Outlet  
Approvals: VDE,  
OVE, IMQ.  
16A 250VAC.

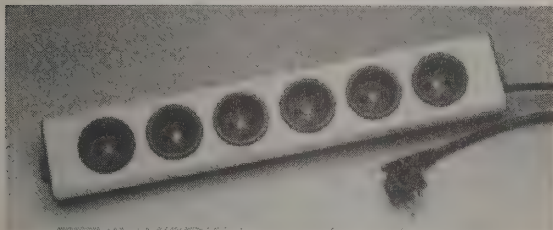

Cat. 72100  
**BRITISH**  
BS1363 Outlet  
Shuttered  
contacts.  
Approvals: BSI.  
13A 250VAC.

Cat. 71100  
**FRENCH**  
Outlet  
Approvals: UTE  
  
16A 250VAC.

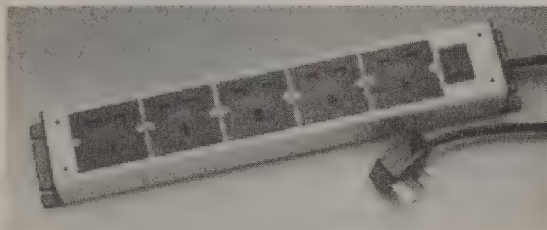

## INTERNATIONAL MULTIPLE OUTLET POWER STRIPS

### EUROPEAN "SCHUKO" CEE-7 TYPE

Cat. 52925: 5 Outlet with ON/OFF Switch  
Cat. 52906: 6 Outlet without Switch

### UNITED KINGDOM BS1363 TYPE

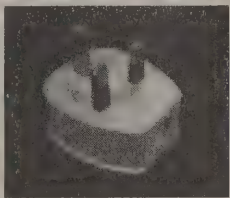

Cat. 52125: 5 Outlet with ON/OFF Switch  
Cat. 52106: 6 Outlet without Switch

NOTE: 19" Rack Mount, Surge-Suppression, GFCI, Fused and Circuit Breaker Types available.

## INTERNATIONAL ATTACHMENT PLUGS

Cat. 70140  
**EUROPEAN**  
"SCHUKO"  
CEE-7-7 PLUG  
Approvals: VDE,  
OVE, UTE, CEBEC  
16A 250VAC.

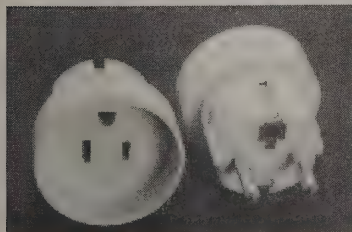

Cat. 72140  
**BRITISH**  
BS1363A  
PLUG  
Fused.  
Approvals: ASTA.  
13A 250VAC.

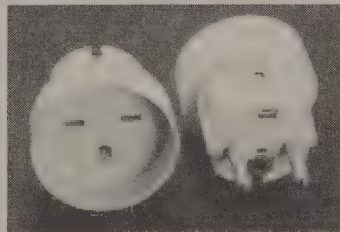

Cat. 74140  
**AUSTRALIAN**  
PLUG  
Approvals: EANSW  
  
10A 250VAC.

NOTE: Straight, Angle, High Impact and Heavy-Duty versions available.

## INTERNATIONAL PLUG ADAPTERS

Cat. 30110:  
Allows NEMA 5-15P  
Plugs to mate with  
"SCHUKO" Outlets

Cat. 30100:  
Allows NEMA 6-15P  
Plugs to mate with  
"SCHUKO" Outlets

- European Cordsets
- Adapters - 3-wire
- Outlet Strips

- European Plugs/Outlets
- European "GFCI" Outlets

**Safer DMM Test Lead Kits** like this model 5901 Bench Test Kit featuring silicone insulated wire, fully insulated clips, interchangeable tips.

**EIAJ QFP Adapters** provide .100" top-side connections while accessing 80- to 208-pin devices.

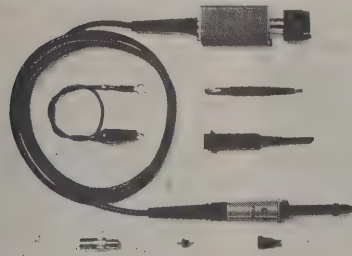

**World's First SQFP Test Clip** locks onto 80- and 100-pin SMT devices.

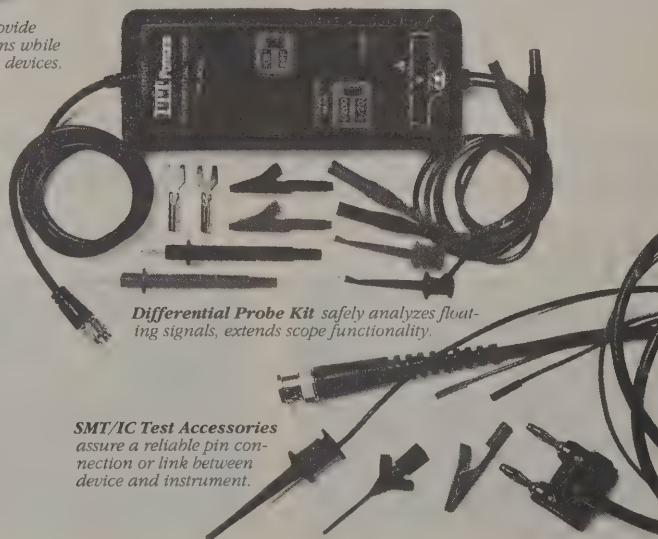

**Plugs, Jacks, Adapters and Cable Assemblies** designed for safe, positive electrical connections.

**QFP, SQFP and SSOP Test Clips** provide testable upper pins or PGA platforms for simultaneous lock-on access of every lead.

**100-300MHz Oscilloscope Probe Kits** feature modular tips, fast rise times and best-signal cable lengths. 11 versatile kits.

**Differential Probe Kit** safely analyzes floating signals, extends scope functionality.

**SMT/IC Test Accessories** assure a reliable pin connection or link between device and instrument.

**High Quality Boxes** include integral networks, voltage dividers, attenuators for noise-free interfaces.

## Simple Math For DMM & Scope Users and Testing SQFPs, SSOPs & ICs.

Nothing else equals Pomona's 142-page 1993-1994 *Electronic Test Accessories Catalog* and the 1993 *SMT/IC Test Accessories Catalog*. You will find over 6,000 solutions for testing leading-edge devices, interfacing with instrumentation or making reliable connections that will make your job easier. ■ Designed to meet new safety standards ■ 22 DMM & Scope Kits that extend testing capabilities ■ Test clips for 20- to 56-pin SSOPs and 80- to 100-pin SQFPs ■ 196-pin QFP test clip for 80486 ■ 132-pin QFP test clip for 68020/68030 ■ Test clips for 32-pin (7x9) EEPROMs and virtually every IC. All the interfaces needed between instrument and test point. All products are available through Pomona's Worldwide Distribution Network. The answer is simple. Get the book. It's FREE. Call or write today. ITT Pomona Electronics 1500 E. Ninth Street P.O. Box 2767 Pomona, CA 91769 Phone: (909) 469-2900 Fax (909) 629-3317.

## LOW PROFILE, HIGH DENSITY CONNECTORS

### TX1-5 SERIES: BOARD-TO-BOARD & BOARD-TO-CABLE CONNECTORS

This connector family offers two-piece PCB connectors with 0.050" high density contact spacing. These low profile, high density connectors provide design flexibility for board-to-board and board-to-cable applications. Available in 20 through 100 contact arrangements.

- TX1: IDC Sockets for flat ribbon cable on 0.025" centers
- TX2: IDC Sockets for flat ribbon cable on 0.050" centers
- TX3: Pin Headers with long or short latches, and straight or right angle through hole mounting
- TX4: Socket Receptacle with straight or right angle through hole mounting
- TX5: Pin Headers with straight or right angle through hole mounting

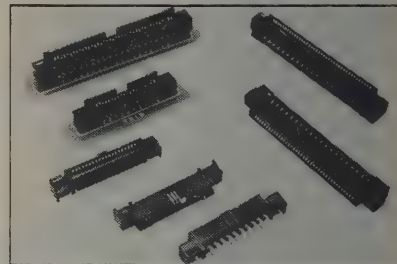

### TX11-13 SERIES: BOARD-TO-CABLE CONNECTORS

Developed for board-to-cable applications. Feature ribbon/leaf spring contacts to meet the high density packaging requirements of state-of-the-art electronic equipment. Sizes available 40 through 100.

- TX11: IDC cable connectors for flat ribbon cable on 0.025" centers
- TX12: IDC cable connectors for flat ribbon cable on 0.050"
- TX13: Male version with or without mounting ears, and straight or right angle through hole mounting
- IDC cable connectors have self-latching/self-ejecting lever for easier mating and unmating on the PCB
- Ribbon/leaf spring contact design prevents contact damage
- First mate/last break contacts
- 0.5 Amp operating current

### TX14/15 SERIES: BOARD-TO-BOARD CONNECTORS

Designed for high density applications. Board-to-board ribbon/leaf spring contact design features superior reliability and stability. Available in 40, 60, 80, 100, 120, 140, 160, 180 and 200 contact arrangements.

- Receptacle (TX14) and plug (TX15) can be arranged in horizontal, vertical or parallel positions
- Straight through hole and angled through hole types available
- Adaptable to parallel board assemblies spaced within a 0.472" (12mm) to 0.787" (20mm) range
- Available with 16 optional polarized keying positions
- Hook pin mounting eliminates threaded board mounting hardware
- First mate/last break contacts

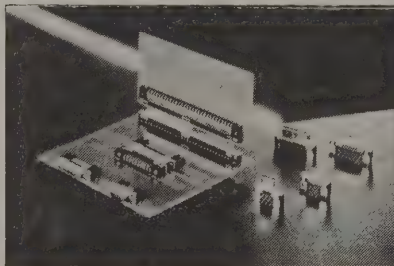

### SX SERIES: HIGH DENSITY SMT CONNECTORS

High density surface mount connectors designed for parallel board-to-board stacking. Two optional board stacking heights of .250" and .315" available. Contact arrangements of 40, 50, 70, 80, and 100 available on 0.050" contact pitch. Right angle-to-right angle available in 50 and 70 positions.

- High temperature thermoplastic insulator
- High density 0.050" contact pitch
- Gull wing-type surface mount terminals
- Ribbon/leaf spring contacts
- Hook-pin board mounts allow double sided mounting

### TX20/TX20A SERIES: BOARD-TO-BOARD & BOARD-TO-CABLE CONNECTORS

Low profile, two-piece connector with 0.21" (5.4mm) mated height on board.

- 0.050" (1.27mm) contact spacing
- Simple 0.050" X 0.075" 4-row offset board pattern
- EMI/RFI shielded and grounded to meet FCC Docket B
- Ribbon/leaf spring contacts
- Through hole board termination (TX20)
- Through hole and surface mount board termination (TX20A)
- 0.5 Amp operating current

| No. of Contacts | TX20 Board-to Board | TX20A Board-to Cable |
|-----------------|---------------------|----------------------|
| 10              | X                   | X                    |

MEMORY CARD CONNECTORS

JC20 SERIES

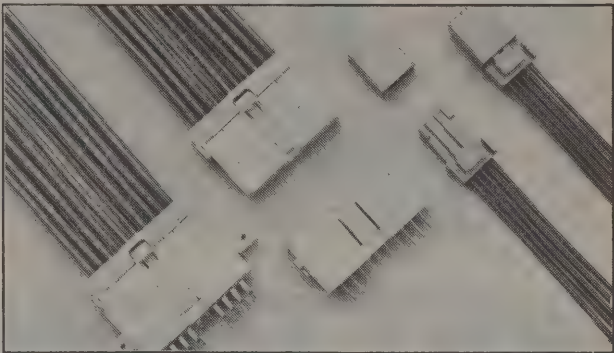

This two-piece memory card connector system consists of a surface mount socket connector for memory card side. The male pin header connector is offered in through hole and SMT configurations. Ejection version also available. First mate/last break extended male contacts offered in accordance with JEIDA (Ver. 4) and PCMCIA (Rev. 2).

| No. of Contacts | No. of Rows | Contact Spacing Inches (mm) |
|-----------------|-------------|-----------------------------|
| 20              | 1           | 0.050 (1.27)                |
| 32              | 1           | 0.050 (1.27)                |
| 38              | 1           | 0.050 (1.27)                |
| 40              | 1           | 0.039 (1.00)                |
| 45              | 1           | 0.039 (1.00)                |

HIGH CURRENT CONNECTORS

EX5-R/IL-AG5 SERIES

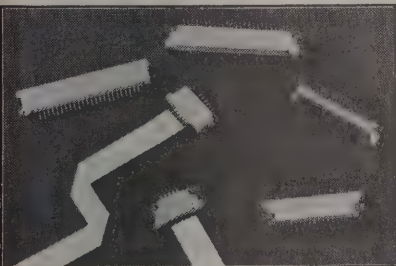

Miniature industrial-type connectors for wire-to-board applications. Meet the demands of the automotive, white goods and industrial controls industries.

- Sizes available:  
EX5-R: 16 pos.  
IL-AG5:  
Single Row: 5, 6, 7, 10  
Double Row: 14, 16, 18, 22 & 30
- Contact Pitch:  
EX5-R: 0.157" (4.0mm), double row  
IL-AG5: 0.098" (2.5mm), single and double row
- One-touch release mechanical locking mechanism
- Secondary contact locking mechanism (TPA feature) to assure contact positioning/retention
- Current Rating:  
EX5-R: 8 Amps  
IL-AG5: 3 Amps

BOARD-TO-FPC/FFC CONNECTORS

IL-402/IL-402R SERIES

- Developed to meet the demands of increased component density. Low profile 0.098" (2.5mm) mounting height. Sizes available: 4 through 30.
- 0.039" (1.0mm) contact spacing
  - Surface mount/right angle configuration
  - Zero insertion force design utilizes a slide actuator
  - Applicable for 0.012" (0.3mm) thick FPCs/FFCs
  - IL-402 bottom contact mating version
  - IL-402R top contact mating version
  - 0.5 Amp operating current

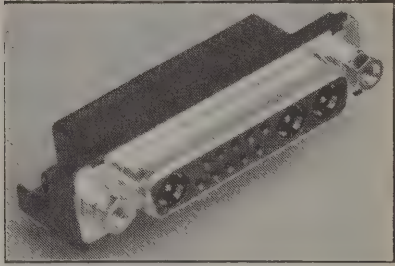

IL-404 SERIES

- Low profile, high density connectors designed for packaging applications requiring maximum flexibility and optimum space savings. Sizes available: 8 through 30.
- 0.049" (1.25mm) contact spacing
  - Zero insertion force design utilizes a slide actuator
  - Applicable for 0.012" (0.3mm) thick FPCs/FFCs
  - Straight or right angle through hole mounting
  - 0.5 Amp operating current

I/O CONNECTORS

DBML SERIES

- Designed for use with high resolution graphics I/Os for new generation Engineering Work Stations requiring 75Ω signal impedance. Combines Red-Green-Blue or gray scale graphics signals with data lines in a single, shielded connector.
- Combines coaxial contacts and signal contacts in a single-shielded connector
  - UL94V-0 flammability rating
  - Snap-in expansion post mounting eliminates costly threaded hardware on board mount connector

MAGNETRON CONNECTORS

## JETTRON'S

Extensive line of high voltage connections to 50KVDC including molded silicone CRT anode leads (leakproof & corona free), in-line connectors, splices, and CRT anode connector kits for customer assembly. Potting contacts of BeCu for the JEDEC J1-21, J1-22, J1-25, J1-30, and J1-32 anode terminals.

## NEW! LOW PROFILE TERMINAL BLOCKS

### THE TERMINAL BLOCKS FOR THE 90'S

#### BB-125 SERIES

Available in 2-12 Positions  
For P.C. board mounting

#### MATERIALS

Terminal: Brass, tin-lead plated  
Spring: Stainless steel  
Insulator: Polyester, blue (UL94 V-O)  
Screws: Stainless steel

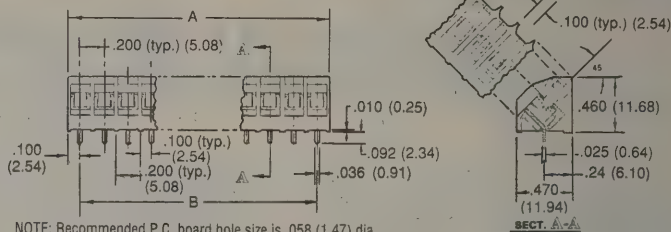

#### SPECIFICATIONS

Current Rating: 15 amps  
Voltage Rating: 500 Volts RMS  
Wire Size: #16 AWG maximum

| Terminals | A             | B             | JOLO Part No. |
|-----------|---------------|---------------|---------------|
| 2         | .400 (10.16)  | .200 (5.08)   | BB-125-02     |
| 3         | .600 (15.24)  | .400 (10.16)  | BB-125-03     |
| 4         | .800 (20.32)  | .600 (15.24)  | BB-125-04     |
| 5         | 1.000 (25.40) | .800 (20.32)  | BB-125-05     |
| 6         | 1.200 (30.48) | 1.000 (25.40) | BB-125-06     |
| 7         | 1.400 (35.56) | 1.200 (30.48) | BB-125-07     |
| 8         | 1.600 (40.64) | 1.400 (35.56) | BB-125-08     |
| 9         | 1.800 (45.72) | 1.600 (40.64) | BB-125-09     |
| 10        | 2.000 (50.80) | 1.800 (45.72) | BB-125-10     |
| 11        | 2.200 (55.88) | 2.000 (50.80) | BB-125-11     |
| 12        | 2.400 (60.96) | 2.200 (55.88) | BB-125-12     |

#### FEATURES

- Low profile, compact size - only .460" high, ideal for high density applications
- 45° angled entry - easy access where space is limited
- Polyester insulator (UL94 V-O) - low moisture absorption, excellent electrical characteristics
- Pedestal design - simplifies flux removal
- Butt mountable/end stackable
- Captive stainless steel screws

NOTE: Recommended P.C. board hole size is .058 (1.47) dia.

#### BB-122-XX SERIES

Available in 3, 4, 6, 8, 10 and 12 positions  
For P.C. board mounting

#### MATERIALS

Terminal: Brass, tin-lead plated  
Spring: Stainless steel  
Insulator: Polyester, blue (UL94 V-O)  
Screws: Stainless steel

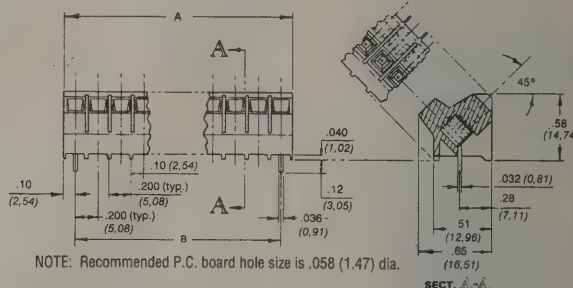

#### SPECIFICATIONS

Current Rating: 15 amps  
Voltage Rating: 500 Volts RMS  
Wire Size: #16 AWG maximum  
Resistivity: Minimum 10<sup>10</sup> ohms at 40°C and 95% relative humidity

| Terminals | A             | B             | JOLO Part No. |
|-----------|---------------|---------------|---------------|
| 3         | .600 (15.24)  | .400 (10.16)  | BB-122-03     |
| 4         | .800 (20.32)  | .600 (15.24)  | BB-122-04     |
| 6         | 1.200 (30.48) | 1.000 (25.40) | BB-122-06     |
| 8         | 1.600 (40.64) | 1.400 (35.56) | BB-122-08     |
| 10        | 2.000 (50.80) | 1.800 (45.72) | BB-122-10     |
| 12        | 2.400 (60.96) | 2.200 (55.88) | BB-122-12     |

#### FEATURES

- Designed to conform to IEC Standard 348
- 45° angled entry - easy access where space is limited
- Polyester insulator (UL 94 V-O) - low moisture absorption, excellent electrical characteristics
- Pedestal design - simplifies flux removal
- Butt mountable/end stackable
- Captive stainless steel screws

NOTE: Recommended P.C. board hole size is .058 (1.47) dia.

#### OS-120

#### FEATURES

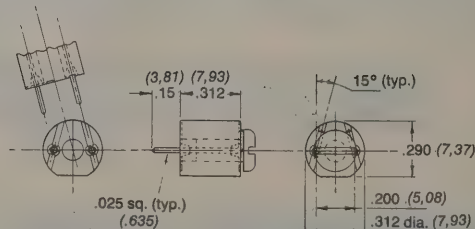

- Simple, reliable design
- Cost effective
- Vibration resistant
- P.C. Mount, .200" centers
- Polyester insulator (UL94 V-O)

#### MATERIALS

Terminal: Phosphor Bronze, tin plated  
Screw: Steel, tin plated  
Insulator: Polyester, black (UL94 V-O)

#### SPECIFICATIONS

Current Rating: 10 amps @ 110 V.R.M.S.  
Breakdown Voltage: 1800 V.R.M.S. (Min.) with screw backed out two full turns

13921 NAUTILUS DRIVE, GARDEN GROVE, CA 92643  
(714) 554-6840 / FAX 714-554-0306

ELECTRONIC INTERCONNECTION HARDWARE

## P.C. TEST JACKS

### Vertical Test Jack (Snap-In)

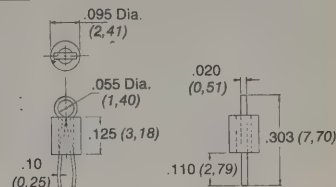

Snap into .044" - .050" diameter holes

Subminiature size for high density packaging

#### FEATURES

- For use with hook or clip probes
- Stands less than .200" off P.C. board
- Self-supporting during wave soldering
- Mounts on .100" grid pattern
- Eight colors available

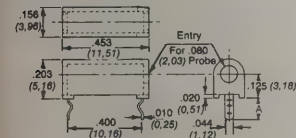

| Contact Material | Contact Finish    | JOLO Series  |
|------------------|-------------------|--------------|
| Phosphor Bronze  | .0002" electrotin | SPCJ-123-XX* |

\*XX=Insulator color code

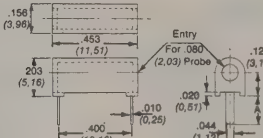

### Horizontal Test Jacks

#### .400" Ctrs/Snap-in style Single or Double Entry

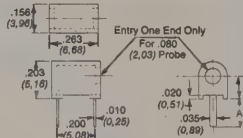

#### .400" Centers/ Std style Single or Double Entry

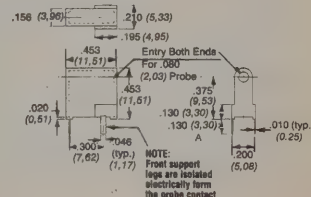

| Ctr Spacing | Entry  | Style   | A    | Contact Finish   | Contact Mat'l | JOLO Series |
|-------------|--------|---------|------|------------------|---------------|-------------|
| .400"       | Double | Std     | .150 | Gold or Tin      | BeCu          | PCJ-100     |
| .400"       | Double | Std     | .150 | Tin              | Phos Br       | PCJ-200     |
| .400"       | Double | Snap-in | .110 | Gold             | BeCu          | PCJ-124     |

| .400"       | Single | Std     | .110 | Gold or Tin-Lead | Phos Br       | PCJ-419     |
| .200"       | Single | Std     | .150 | Gold or Solder   | BeCu          | PCJ-112     |
| Tri-Mount   | Double | Std     | .130 | Gold or Tin      | Phos Br       | PCJ-216     |

#### .200" Centers/ Std style Single Entry

#### Tri-Mount/Std style Double Entry

#### FEATURES

- For use with .080" probes
- Pedestal design enables flux removal
- Closed entry prevents insertion of probes greater than .085" diameter
- Snaps into .060" dia. holes (Snap-in style)
- Ten colors available

#### MATERIALS

Insulator: Nylon  
Contact: Beryllium Copper or Phosphor Bronze  
Support: Brass (Tri-Mount Only)

#### SPECIFICATIONS

Current Rating: 5 amps  
Operating voltage: 1500 V.R.M.S.  
Contact resistance: 5 milliohms max. at 5 amps  
Probe insertion force: 8 oz. min., 15 lbs. max.

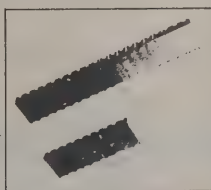

#### INSULATOR COLOR CODE

|     |       |     |        |
|-----|-------|-----|--------|
| -01 | white | -06 | orange |
| -02 | red   | -07 | blue   |
| -03 | black | -08 | yellow |
| -04 | brown | -09 | gray   |
| -05 | green | -10 | purple |

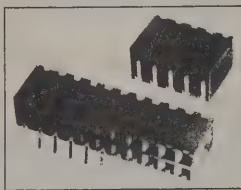

## .025 SQ. PIN HEADERS and SOCKETS (.100" ctrs.)

**Pin Headers**  
• mate with .025 sockets and shunts  
• straight / right angle

**Top Entry Sockets**  
• high density packaging  
• mate with .025 pin headers

**Horizontal Sockets**  
• mother-daughter board applications  
• mate with .025 pin headers

#### FEATURES

Pin headers and sockets available in single or dual row, 72 contacts max.

#### MATERIALS

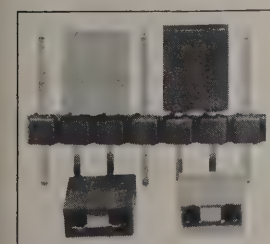

Contact: Phosphor bronze  
Insulator: Glass-filled polyester, UL 94V-0  
Plating: Tin-lead or selective gold/tin-lead

| Description | Style                        | JOLO Series |
|-------------|------------------------------|-------------|
| Pin header  | Single row, straight         | 1-PHS-977   |
| Pin header  | Single row, rt. angle        | 1-PHS-975   |
| Pin header  | Dual row, straight           | 1-PHD-976   |
| Pin header  | Dual row, rt. angle          | 1-PHD-974   |
| Socket      | Top entry, single row        | 1-TSS-982   |
| Socket      | Top entry, dual row          | 1-TSD-983   |
| Socket      | Horizontal entry, single row | 1-HSS-989   |
| Socket      | Horizontal entry, dual row   | 1-HSD-988   |

#### SPECIFICATIONS

Current rating: 3 amps  
Contact resistance: 15 milliohms maximum  
Insulation resistance: 1 x 10<sup>6</sup> megohms @ 500V dc  
Insertion force: 5.40 ozs. maximum, per contact (gold)  
Withdrawal force: 1.08 ozs. minimum, per contact (gold)

## JUMPER SOCKETS / SHUNTS (.100" ctrs.)

#### FEATURES

- hardware programming switches
- side and end stackable
- four styles (open, closed, w/handle, double)
- four colors (red, black, blue, gray)

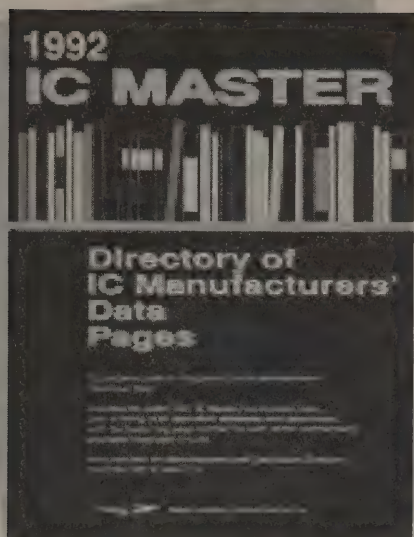

#### MATERIALS

Contact: Phosphor bronze  
Insulator: Glass-filled polyester, UL 94V-0  
Plating: Tin-lead or selective gold/nickel

| Style               | JOLO Series |
|---------------------|-------------|
| Open top            | 1-JSO-75    |
| Closed top          | 1-JSC-77    |
| Closed top w/handle | 1-JSH-79    |
| Double, open top    | 1-JSD-85    |

#### SPECIFICATIONS

Current rating: 2 amps  
Contact resistance: 20 milliohms maximum  
Insertion force: 14.4 ozs. nominal, per contact (gold)  
Withdrawal force: 3.3 ozs. nominal, per contact (gold)

# THE FAST AND EASY WAY TO FIND IC MANUFACTURERS' DATA BOOKS!

The **1992 DIRECTORY OF IC MANUFACTURERS' DATA PAGES** is a quick guide designed to save you time and help you find the manufacturers' precise data book or sheet that you need on any integrated circuit listed in the 1992 IC Master.

Simply look up any IC by base number. The cross-reference will show you the manufacturer's complete device number together with the name of the applicable manufacturers' data book and the identification number of the data book.

For example: If you wanted the complete manufacturers' data on device number ADOP07. Look up base number 07. Following the base number is the manufacturer's name...Analog Devices, the complete device number ADOP07 and the page number of where the device is described in the IC Master. The listing will then show you that the manufacturer's data book is Analog Devices "Linear Products DataBook" and that the book carries the identifying number "G1183a-150".

Now you can contact Analog Devices by phone or FAX and request the EXACT data book you need. No wasted words, no wasted time.

Plus, where and whom to call for technical information, at any IC manufacturer, is at your fingertips in the complete Manufacturers & Distributors Directory.

A guaranteed time saver, this unique directory is a must for every engineering department!

Don't waste another precious engineering minute.

**ORDER THE 1992 DIRECTORY OF IC MANUFACTURERS' DATA PAGES...TODAY!**

**To order your 1992 Directory of IC Manufacturers' Data Pages,  
send your purchase order and check for \$84.50 plus tax\* to:**

**NEW 88 CIRCUIT MEMORY CARD CONNECTOR**  
**Series ICM-D**, high density type DRAM memory card connector with 88 circuits (2 row) on 1.0 mm (.039") pitch. Side entry. SMT reflow or DIP type solder tails. Includes mating receptacle & header. Features low insertion force, polarization, and rugged construction. Conforms to PCMCIA/JEIDA DRAM Ver. 1.0. Contacts rated 0.5A, 50V AC/DC. Selective gold plating. J.S.T. Corp., 800/947-1110 Ext. 80, 1200 Business Center Dr., #400, Mt. Prospect, IL 60056.

#### SMT MINIATURE CONNECTORS

Miniature SMT connectors for wire-to-board, board-to-board, flexible flat cable, flexible printed circuitry and memory card applications have a 1.0 mm, 1.25 mm, 1.50 mm, 2.0 mm pitch for optimum board density. Available on embossed tape, suitable for robotic placement. OK for vapor phase & low temperature solder. J.S.T. Corp., 800/947-1110 Ext. 80, 1200 Business Center Dr., #400, Mt. Prospect, IL 60056.

#### NEW HALF-SIZE CIRCULAR DIN CONNECTOR

Ideal for high density instrument panels & A/V equipment, the new **Series MD** is a 1/2 size & EMI shielded. The plug has an exclusive one-piece crimp contact and ground clip which eliminates soldering. Rated at 1 amp AC/DC (50 V AC/DC) using #26 AWG wire. 4-9 circuits with AWG #30 to #24 wires. Low profile shielded/unshielded sockets (straight & right-angle) up to 9 circuits. J.S.T. Corp., 800/947-1110 Ext. 80, 1200 Business Center Dr., #400, Mt. Prospect, IL 60056.

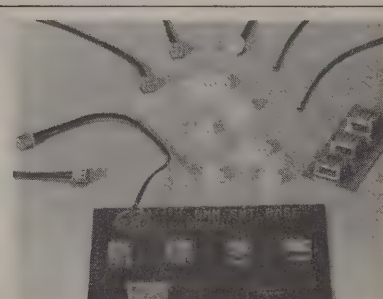

#### D-SUB CONNECTORS OFFER MORE CIRCUITS

**Type JK** D-subminiature connectors offer a 67% increase in circuits over standard D-subminiature housings. Conforms to MIL-C-24308. Plug connectors (15, 26, 44 positions) have brass or phosphor bronze crimp contacts (selectively gold or tin-plated) for #24 - #28 AWG wires. Housing insulator is glass-filled PBT rated UL94V-0. Rating is 1 amp AC/DC at 250 V AC/DC. J.S.T. Corp., 800/947-1110 Ext. 80, 1200 Business Center Dr., #400, Mt. Prospect, IL 60056.

### J.S.T. CORPORATION

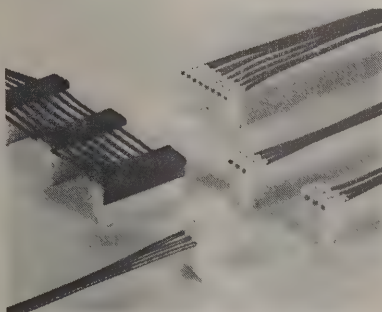

1200 Business Center Dr., #400  
 Mount Prospect, Illinois 60056  
 1-800-947-1110 Ext. 80  
 In IL: 708-803-3300 Ext. 80  
 FAX: 708-803-4918

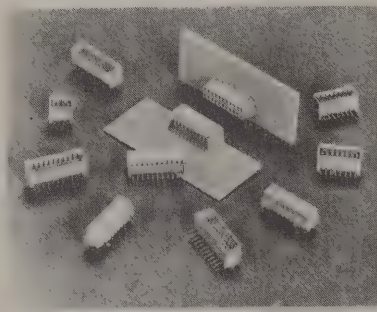

#### COMPACT IDC & CRIMP SMT CONNECTORS

Insulation displacement (**Type ZR**) and crimp style (**Type ZH**) connectors provide a size advantage with 1.5 mm (.059") pitch contacts (a 60% savings in width over conventional IDC connectors). They accommodate 2 thru 13 circuits with AWG #28 & #30 (ZR); AWG #26 - #32 (ZH) wires. Contacts are tin-plated phosphor bronze, rated at 50 Volts, 0.7 amps AC/DC. Insulation material is 94V-0 rated nylon. J.S.T. Corp., 800/947-1110 Ext. 80, 1200 Business Center Dr., #400, Mt. Prospect, IL 60056.

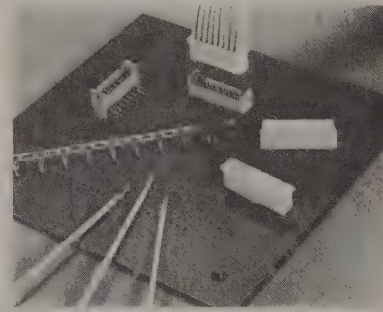

#### INSULATION DISPLACEMENT CONNECTOR

**Series VR** disconnectable, IDC type connectors may be daisy chained, or end connected to accommodate power circuits. Up to 15 circuits on 3.96 mm (.156) pitch. Color coded for wire sizes #26- #18 AWG. Contacts are brass, tin-plated, rated 7A AC/DC (250V AC/DC). Housings are Nylon 66, rated UL94V-2. Mating, friction lock headers with top or side entry are available. J.S.T. Corp., 800/947-1110 Ext. 80, 1200 Business Center Dr., #400, Mt. Prospect, IL 60056.

#### BOARD-TO-BOARD CONNECTOR

**Type JED**, board-to-board, dual-in-line connector features 1.25 mm pitch for high density packaging. A housing lock assures positive mating. A polarized, shrouded header prevents misinsertion. Contacts are brass, tin-plated and rated at 1A AC/DC, 50V AC/DC. Housings are glass-filled nylon 66, rated UL94V-0. Both top & side entry types available. J.S.T. Corp., 800/947-1110 Ext. 80, 1200 Business Center Dr., #400, Mt. Prospect, IL 60056.

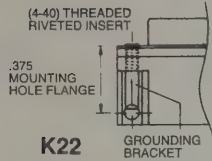

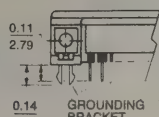

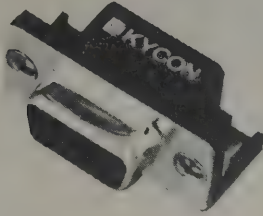

#### LOW PROFILE CRIMP TYPE CONNECTORS

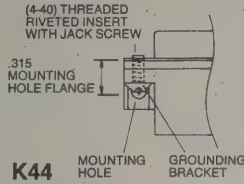

**Series PHD** connectors have a height of only 8.8 mm (.346") after mounting and a width of only 5.0 mm (.197"). They are ideally suited for high density wire-to-board interconnects. 10-32 dual row circuits. Rated 3 amps AC/DC (250V AC/DC). Chain contacts accommodate AWG #28 to #22 wires. Top & side entry shrouded headers are offered. Available with 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, & 32 positions. J.S.T. Corp., 800/947-1110 Ext. 80, 1200 Business Center Dr., #400, Mt. Prospect, IL 60056.

## KYCON RIGHT ANGLE D-SUBS

K22

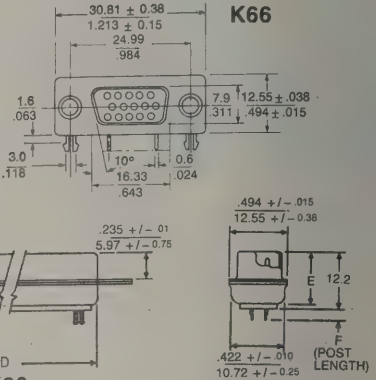

K44

### FEATURES

- 4-40 Riveted Threaded Inserts
- 4-40 Female Jackscrews available
- Grounding board locks (Other mounting options available)
- **Shell:** Steel material, tin finish
- **Insert:** PBT Thermoplastic 94V-0 Rated
- **Pin:** Brass
- **Socket:** Phosphor Bronze
- **Contact Finish:** Gold Flash
- — 15 Option: 15 U Gold
- — 30 Option: 30 U Gold
- **Temperature Rating:** —55 to +125°C

| Part Number | Gender | No. of Contacts | Foot Print |

**KYCON 13W3 CONNECTOR**

- FEATURES**
- 13W3 Coax/D-Sub Combination Connector
  - **Body:** UL94V-0 Rated 30% Gold Filled Polyester
  - **10 Signal Contacts:** 15 U Inch Gold Plated
  - **3 Inner Coaxial Contacts:** 50 U Inch Gold Plated
  - **75 Ohm Impedance**

| Part Number  | Description                                   |
|--------------|-----------------------------------------------|
| K100-J13W3-N | RIGHT ANGLE FEMALE WITH GROUNDING BOARD LOCKS |

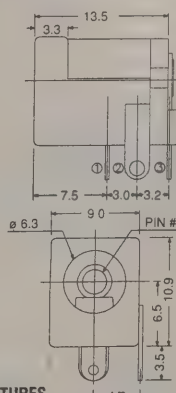

**KYCON DIN CONNECTORS**

- FEATURES**
- 5 Pin Circular DIN Socket
  - **Body:** PBT, UL 94V-0
  - **Contact:** Brass, silver plated
  - **Shield:** Iron, nickel plated
  - **Insertion Force:** 5KG-7.0KG
  - **Extraction Force:** 4KG-7.0KG
  - **Rated Voltage:** 12V DC, .02A-1.0A
  - **Temperature Rating:** -25°C to 100°C

| Part Number | Description               |
|-------------|---------------------------|
| KCD-5S-N    | NON-SHIELDED              |
| KCD-5S-S    | SHIELDED, 10 MM SPACING   |
| KCD-5S-S2   | SHIELDED, 5 MM SPACING    |
| KCD-5S-S-PS | WITH SPRINGY FRONT SHIELD |

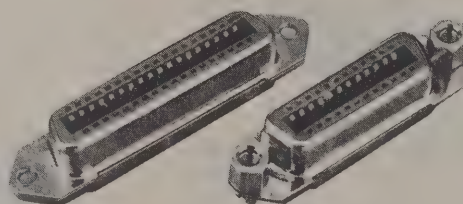

**KYCON POWER JACKS**

- FEATURES**
- **Body:** UL 94V-0-Rated Material
  - **Center Pin:** Brass
  - **Between Terminal Resistance:** 60 miliohm
  - **Plug to Sleeve Resistance:** 100 miliohm
  - **Operating Rating:** -25°C to 70°C

| Part Number | Inner PIN Dia. | Ht.     | Length  |

## KYCON GANG JACKS

GA/GP Series

Dimensions in mm

## FEATURES

- Available right angle or top entry
- Metal locking brackets
- UL Recognized E134345
- -50 plating option will comply with FCC requirements under #47 C.F.R., Part 68 Subpart F. (50 U Gold)
- **Housing:** 25% glass-filled nylon 66
- UL 94V-0 Rated
- **Contact:** Phosphor Bronze
- **Plating:** -15 U Gold standard  
-50 U Gold available
- **Current Rating:** 1.5 Amps

KYCON PGA SOCKETS

PGA GRID PATTERNS  
CUSTOM  
PATTERN  
(DESIGN YOUR OWN)

NOTE: 100 (2.54) GRID

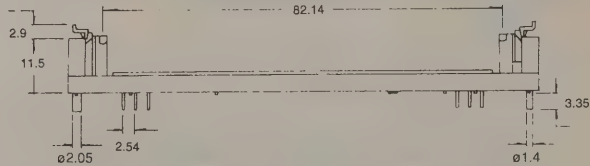

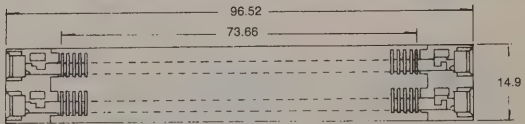

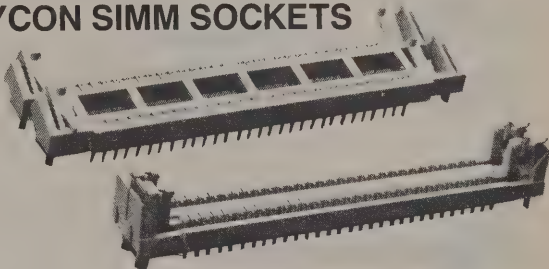

FEATURES

- Precision four finger contacts
- Body: Polyester GV, VO, UL 94V0-Rated
- Contact Springs: Beryllium Copper
- Surface: Gold plating over nickel
- Contact Sleeve: Screw machined brass
- Low Insertion Force
- Current Rating: 3 Amps

| Part Number   | No. of Contacts | Grid Size |
|---------------|-----------------|-----------|
| KPGA-68-B-11  | 68              | 11        |

# Introducing LEMO Circular Connectors

## WHY LEMO CONNECTORS?

If your application requires high reliability, high quality and consistency of a signal and/or power transmission you should be using LEMO connectors. LEMO connectors are specified for critical applications such as medical life support and monitoring systems, test and measurement instruments, high speed process control equipment, military and aerospace control and simulation systems, secured communication devices and nuclear power facilities, to mention only a few of the environments where you will find LEMO connectors.

## THE QUICK-LOK™ FEATURE ADVANTAGES

### Speed

- Connectors engage simply and quickly by pushing them axially into the mated receptacle; and disengage by pulling on the outer shell to remove the plug easily.

### Space Savings

- No need to twist or turn a locking ring means space savings since only finger clearance on two sides is needed to engage and disengage connectors.

### Reliability

- Connections and disconnections are quick and foolproof since when lock is engaged, connection is assured.

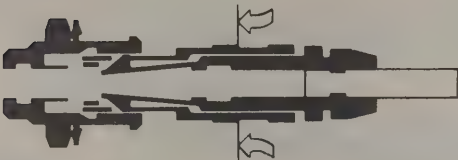

### Ruggedness

- Locking mechanism is protected by rugged outer shell. This virtually eliminates accidental disconnections, damage to locking mechanism, cable and contacts.

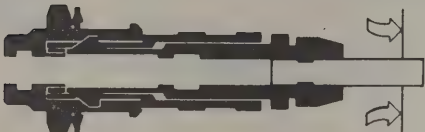

## LEMO'S QUICK-LOK™ FEATURE

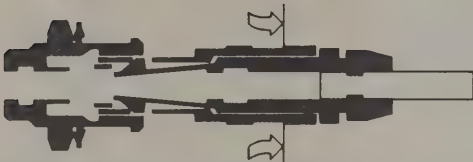

The self-latching system assures the connector to be mated by simply pushing the plug axially into the receptacle.

Connection is made simply by pushing plug directly into receptacle. An audible click is heard assuring lock is engaged.

Connection remains intact resisting stresses of pulling on the cable and any other component part except the outer shell.

When required, the connection is disengaged by a single straight axial pull on the outer shell.

## CONSTRUCTION DESIGN

- **Aesthetic functional design** to complement the most advanced instruments, components and systems.
- **Constructed of precision machined brass** with a hard satin chrome plated finish assures rugged housing for maximum safety and uniform mating.
- **Gold plated contacts** for best conduction possible.
- **Crafted metal collet type strain relief** securely grips any round cable around its circumference preventing accidental damage to the connection if cable is stressed.
- **Available bend relief** adds additional cable protection and possible color coding.

# LEMO's Family of Quality Connectors

## GUIDELINES FOR CONNECTOR SPECIFIERS

LEMO will make your connector specifying easy. There is no need to learn the LEMO part numbering system. All you have to do is identify the 6 variables below, give us a call at (800)444-5366 and we will be happy to find the right connector for your application. Just tell us:

- 1) Shell Style (see next page)
- 2) # of contacts (pages 4 to 9)
- 3) AWG (pages 4 to 9)
- 4) Operating voltage & current (pages 4 to 9)
- 5) Cable jacket outer diameter (for cable collet)
- 6) Any environmental conditions

## The LEMO Choices - Table of Contents

### Keyed Connectors

Pages 4 to 10

#### Mechanical Keying - B Series

- Contacts from 2-64 pins
- Wire gauges from 10-30 AWG
- Alignment key on shell
- Polarized keying system
- Contact termination in crimp/solder/printed circuit
- Vacuum sealed and watertight shells available

#### Hermaphroditic Keying - S Series

- Contacts from 2-106 pins
- Wire gauges from 4-26 AWG
- Hermaphroditic inserts
- Contact terminations in solder or printed circuit
- Vacuum sealed and watertight shells available

### Environmentally Sealed

#### Keyed Connectors

Pages 4 to 10

#### Mechanical Keying - K Series

- Contacts from 2-64 pins
- Wire gauges from 10-30 AWG
- Alignment key on shell
- Polarized keying system
- Contact termination in crimp/solder/printed circuit

#### Hermaphroditic Keying - E Series

- Contacts from 2-106 pins
- Wire gauges from 4-26 AWG
- Hermaphroditic inserts
- Contact terminations in solder or printed circuit
- Vacuum sealed and watertight shells available

### Coaxial & Triaxial Connectors

Pages 11 to 12

- NIM-CAMAC - 50Ω Connectors
- 01 Minax - LEMO's smallest 50Ω coaxial connectors
- 0A Telecommunications Series 50 & 75Ω
- Video Triax Connectors for TV Camera Applications

### Plastic Connectors

Page 12

- PSU (Polysulfone) Autoclaveable Shell Designs
- Redel Miniatures from 2-9 contacts, 20-28 AWG
- 3P Series from 6-18 contacts and mixed, 22-24 AWG

### Underwater Connectors - 03 Series

Page 13

- Available in 50Ω coaxial or 2-4 pin contact arrangements
- Measures less than 1 inch long with max. cable of 3mm
- Watertightness guaranteed for up to 870 psi

### Fluidic/Pneumatic Connectors

Page 13

- Available in single or multiple tubes as well as mixed
- Working pressure up to 20 bar (290 psi)

### Other LEMO Connectors - Not Shown

(Please call LEMO USA for more information)

### High Voltage Connectors

- Available in many sizes and insert arrangements including multi high voltage
- Favorable size to voltage relationship

### Fiber Optic Connectors

- For multimode transmissions on single or multifibers
- Terminations made by the epoxy/polish method

### Thermocouple Connectors

- Designed to assure continuous & accurate monitoring of hostile environments where extreme surface or ambient temperatures, gases or liquids must be controlled

### LEMO CABLE ASSEMBLIES & OVERMOLDS

- Complete assemblies with both coax & multipin cables
- Design, fabrication, continuity & capacitance testing, and heat stamped cable or shrink marker identification

**CUSTOM DESIGNS ARE ALWAYS WELCOME!**

Contacts: Material and treatment

Solder contacts

The conductor bucket of these contacts is machined at an angle to form a cup into which the solder can flow.

Crimp contacts (only available in B and K Series)

The crimp method used for low voltage contacts of multiple and mixed connectors is the standard four indent according to MIL-C-22520F, class 1, type 1.

Printed Circuit Contacts

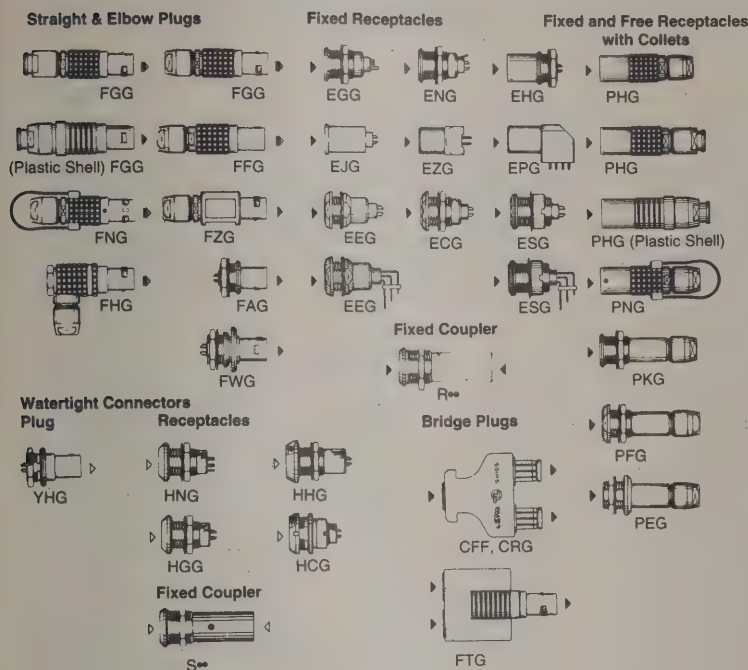

Printed Circuit Contacts can be supplied in receptacles without collet. They can easily be connected by soldering to rigid or flexible printed circuits.

| Type          | Material (Standard) | Surface treatment (µm) |    |     |
|---------------|---------------------|------------------------|----|-----|
|               |                     | Cu                     | Ni | Au  |
| Male solder   | Brass (UNS C 385)   | 0.5                    | 3  | 1.5 |
| Male crimp    | Brass (UNS C 345)   | 0.5                    | 3  | 1.5 |
| Male print    | Brass (UNS C 385)   | 0.5                    | 3  | 1.5 |
| Female solder | Bronze (UNS C 544)  | 0.5                    | 3  | 2.0 |
| Female crimp  | Bronze (UNS C 544)  | 0.5                    | 3  | 2.0 |
|               | Cu-Be (QQ-C-530)    | 0.5                    | 3  | 2.0 |
| Female print  | Cu-Be (QQ-C-530)    | 0.5                    | 3  | 2.0 |
| Male sleeve   | Brass (UNS C 385)   | 0.5                    | 3  | 1.5 |
| Female sleeve | Bronze (UNS C 544)  | 0.5                    | 3  | 1.5 |

# LEMO Inserts - Mechanically Keyed Connectors

B Series - Standard Connectors / K Series - Environmental

Below are the insert configuration choices you have, please identify the number of contacts you need and verify the electrical characteristics and wire gauge for your application. Call LEMO for more information (800) 444-5366.

## Multi-Contact Connectors\*

| Shell Size | Number of Contacts | Contact Ø (mm) | AWG             |                | Operating Voltage |      | Test Voltage |      | Rated Current (Amps) |
|------------|--------------------|----------------|-----------------|----------------|-------------------|------|--------------|------|----------------------|
|            |                    |                | Solder Wire Max | Crimp Wire Max | AC                | DC   | AC           | DC   |                      |
| 00         | 2                  | .5             | 30              | —              | 350               | 500  | 1000         | 1500 | 4                    |
|            | 3                  | .5             | 30              | —              | 350               | 500  | 1000         | 1500 | 3                    |

LEMO Inserts - Mechanically Keyed Connectors

B Series - Standard Connectors / K Series - Environmental  
Below are the insert configuration choices you have, please identify the number of contacts you need and verify the electrical characteristics and wire gauge for your application. Call LEMO for more information (800) 444-5366.

In many cases where coaxial contacts are shown, you may substitute fluidic/pneumatic, high voltage or fiber optic contacts.

Mixed-Contact Connectors\*

| Shell Size | Number of Contacts | Contact Ø (mm) | AWG             |                | Operating Voltage |      | Test Voltage |       | Rated Current (Amps) |
|------------|--------------------|----------------|-----------------|----------------|-------------------|------|--------------|-------|----------------------|
|            |                    |                | Solder Wire Max | Crimp Wire Max | AC                | DC   | AC           | DC    |                      |
|            |                    |                |                 |                |                   |      |              |       |                      |

## S Series - Standard / E Series - Environmental

Below are the insert configuration choices you have, please identify the number of contacts you need and verify the electrical characteristics and wire gauge for your application. Call LEMO for more information (800) 444-5366.

## Multicontact Connectors

LEMO Inserts - Hermaphroditic Connectors - continued

S Series - Standard / E Series - Environmental  
Below are the insert configuration choices you have, please identify the number of contacts you need and verify the electrical characteristics and wire gauge for your application. Call LEMO for more information (800) 444-5366.

Multicontact Connectors—cont.

| Shell Size | Number of Contacts | Contact Ø | Wire Sizes |     | Operating Voltage |      | Test Voltage |      | Rated Current (Amps) |
|------------|--------------------|-----------|------------|-----|-------------------|------|--------------|------|----------------------|
|            |                    | (mm)      | Maximum    | AWG | (mm)              | AC   | DC           | AC   |                      |
| 5          | 2                  | 6.0       | 5          | 5.5 | 1100              | 1600 | 3700         | 5200 | 50                   |

# LEMO Inserts - Hermaphroditic Connectors - continued

## S Series - Standard / E Series - Environmental

Below are the insert configuration choices you have, please identify the number of contacts you need and verify the electrical characteristics and wire gauge for your application. Call LEMO for more information (800) 444-5366.

### Mixed Contact Connectors (coaxial & signal)-cont.

| Shell Size | Number of Contacts       | Contact Ø (mm) | Solder Wire AWG | Operating Voltage |      | Test Voltage |      | Rated Current (Amps) |

LEMO Inserts - Hermaphroditic Connectors - continued

S Series - Standard / E Series - Environmental

Below are the insert configuration choices you have, please identify the number of contacts you need and verify the electrical characteristics and wire gauge for your application. Call LEMO for more information (800) 444-5366.

Mixed Contact Connectors (High Voltage & Signal)

| Shell Size | Number of Contacts | HV Dielectric Ø | Contact Ø | Wire Sizes Maximum |        | Operating Voltage |      | Test Voltage |       | Rated Current (Amps) |
|------------|--------------------|-----------------|-----------|--------------------|--------|-------------------|------|--------------|-------|----------------------|

# LEMO NIM-CAMAC (NBS ND-549) Connectors

LEMO's 00 family of 50 ohm coaxial connectors is ideal for applications where high density of connectors is necessary, especially for patch panels. These connectors have served as the norm for NIM-CAMAC (NBS ND-549) applications as well as many more and are available in a wide selection of shell configurations to meet a variety of needs.

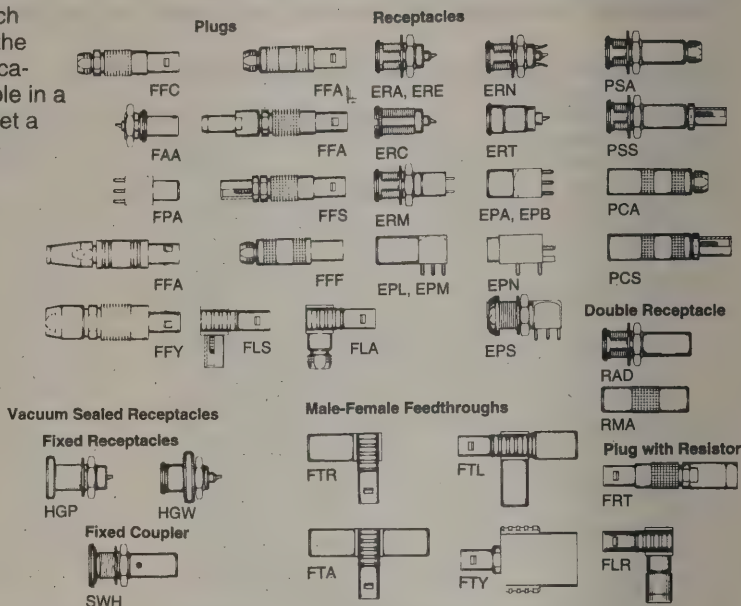

## Electrical Characteristics

| Characteristic           | Value             |
|--------------------------|-------------------|
| Impedance                | 50Ω               |
| Operating Voltage (50Hz) | .7kV rms          |
| Test Voltage (50Hz)      | 2.1kV rms         |
| Rated Current            | 4A                |
| Contact resistance       | <5 m              |
| Insulating resistance    | >10 <sup>12</sup> |
| VSWR (f+GHz)             | 1.01+.18f         |

## Recommended Cables:

|           |                  |
|-----------|------------------|
| RG.58C/U  | RG.188A/U        |
| RG.174A/U | RG.196A/U        |
| RG.178B/U | RG.316/U         |
| RG.179B/U | CCH.99.281.505   |
| RG.180B/U | CCE.99.281.505   |
| RG.187A/U | HF.2114 Datwyler |

## Shell Styles

## 01 Series - Minax Connectors

The plugs and receptacles of the 01 series are amongst LEMO's smallest 50 ohm coax connectors. In spite of their small size and light weight, their technical characteristics remain excellent. Available in a wide range of housing configurations, they are especially useful in printed circuit board applications.

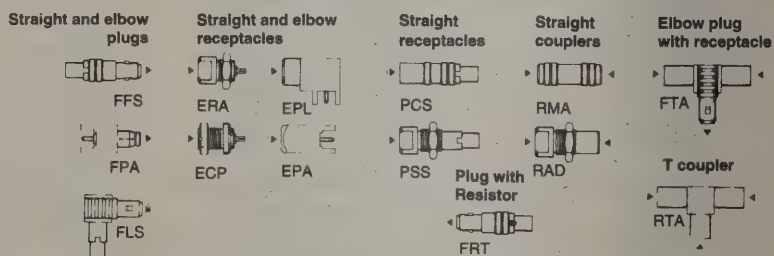

## Electrical Characteristics

| Characteristic           | Value             |
|--------------------------|-------------------|
| Impedance                | 50Ω               |
| Operating Voltage (50Hz) | .3kV rms          |
| Test Voltage (50Hz)      | 1.0kV rms         |
| Rated Current            | 4A                |
| Contact resistance       | <6 m              |
| Insulating resistance    | >10 <sup>12</sup> |
| VSWR (f+GHz)             | 1.03+.04f         |

## Recommended Cables:

|           |                |
|-----------|----------------|
| RG.174A/U | RG.316/U       |
| RG.178B/U | CCH.99.281.505 |
| RG.196A/U | CCE.99.281.505 |
| RG.188A/U |                |

## Other LEMO Coaxial Connectors

### 0A - Telecommunications Series 50 & 75 ohm

Designed to accommodate the following cables:

|                     |                         |
|---------------------|-------------------------|
| RG.58C/U            | CCH.99.281.505 LEMO     |
| RG.59B/U            | 2YCY(0.4/2.5) Siemens   |
| RG.174A/U           | 2YCCY(0.4/2.5) Siemens  |
| RG.179B/U           | 0722 102 11 001 Philips |
| RG.315/U            | 0722 102 29011 Philips  |
| CCE.99.281.505 LEMO | HF-5408/1 Datwyler      |

### Standard Series Coaxial & Triaxial Connectors:

Other 50 and 75 ohm coaxial and triaxial connectors are available to accommodate cables up to .866"/22.0mm. These are also available in an environmentally sealed design. Please see LEMO EEM page 6.

# LEMO Video Triax Connectors

For video applications, LEMO offers a range of triaxial connectors specially designed for the connection of television cameras to their control equipment and are widely used by manufacturers of professional video cameras. These connectors can be used in indoor or outdoor environments.

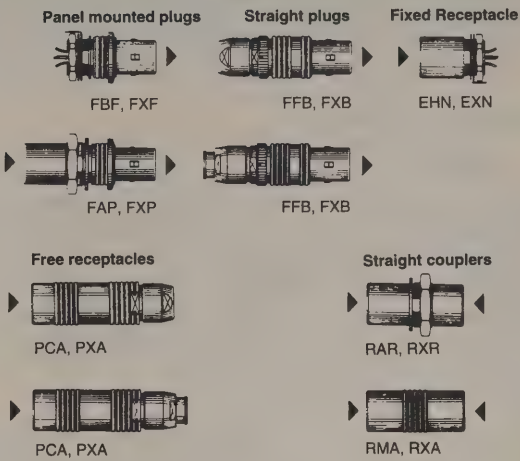

### Electrical Characteristics

|                            |             |
|----------------------------|-------------|
| Impedance                  | 75 Ω        |
| Operating frequency        | 2.5 GHz     |
| VSWR (f=GHz)               | 1.01+0.076f |
| Central contact resistance | <3m Ω       |
| Contact resistance         |             |
| Inner screen               | <1m Ω       |
| Watertightness (IEC 529)   | IP61        |

### Recommended Cables:

|                  |                 |                      |
|------------------|-----------------|----------------------|
| 8231-Belden      | 10069-C-G20-BIW | 9232-Belden          |
| HF-2426-Datwyler | 12766400-F&G    | 10070-C-G14-BIW      |
| 12765700-F&G     | 12766601-F&G    | 12766700-F&G         |

### Shell Styles

# LEMO Plastic Connectors

### Redel Mini Plastic Connectors

These connectors features LEMO's self-latching quick connect-disconnect design. Their polysulfone (PSU) shell material was chosen because of its weight, corrosion resistance and good thermal properties as well as their ability to withstand steam or gas sterilization. Insert arrangements come in from 2-9 solder or printed circuit contacts.

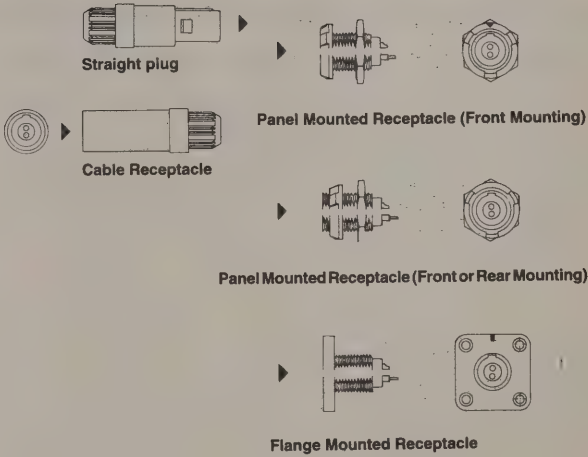

| Number of Contacts | Wire Max AWG | Test Voltage |      | Current |
|--------------------|--------------|--------------|------|---------|
|                    |              | AC           | DC   |         |
| 2                  | 20           | 1200         | 1800 | 10      |
| 4                  | 22           | 1200         | 1800 | 8       |
| 5                  | 22           | 1050         | 1500 | 7       |
| 6                  | 26           | 1050         | 1500 | 6       |
| 7                  | 26           | 1050         | 1500 | 5       |
| 9                  | 28           | 850          | 1200 | 3       |

### LEMO's 3P Plastic Connectors

LEMO's largest series of plastic connectors are available in the same polysulfone shell material as the Redel connectors (see above) but are equipped with o-ring seals which make them weather resistant. Their design offers 11 different keying arrangements and they are available in 6-18 crimp, solder and printed circuit contacts as well as mixed contact arrangements.

| Number of Contacts | Wire Max AWG | Test Voltage |       | Current |
|--------------------|--------------|--------------|-------|---------|
|                    |              | AC           | DC    |         |
| 6                  | 22           | 1200         | 1800  | 6       |
| 10                 | 22           | 1200         | 1800  | 5       |
| 14                 | 22           | 1050         | 1500  | 4       |
| 18                 | 24           | 1050         | 1500  | 3       |
| 9+ 1 HV            | 22           | 850          | 1200  | 4       |
|                    | 22           | 16800        | 22667 | 4       |

### 3P Plastic Shell Styles

# LEMO Underwater Connectors

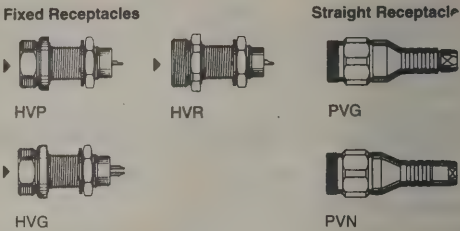

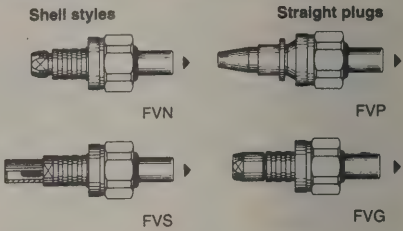

This new series of connectors has been specifically developed for applications where the connection must be guaranteed under very high pressure. The push-pull LEMO self-latching system is replaced by a screw thread connector coupling system which provides very high security, particularly against vibration. The watertight coupling is achieved by the compression of an O-ring made of Viton. After cable assembly, the rear of the plug is covered by a heat shrink tube. This series is available as 50 Ω coaxial or multipin with 2, 3 or 4 contacts.

### Mechanical and climatical

| Characteristics                    | Value                         | Standard      | Method |
|------------------------------------|-------------------------------|---------------|--------|
| Cable pull off Force <sup>1)</sup> | > 100 N                       | MIL-STD-1344A | 2007.1 |
| Protection index                   | > IP68                        | IEC 529       |        |
| Acceptable hydrostatic pressure    | ap. 60 bars                   | MIL-STD-1344A | 1006.1 |
| Endurance                          | > 1000 cycles                 | MIL-STD-1344A | 2016   |
| Operating temperature              | -55°C + 200°C (-67°F + 392°F) |               |        |

1) Average value  
1N = 0.102 kg

# LEMO Fluidic/Pneumatic Connectors

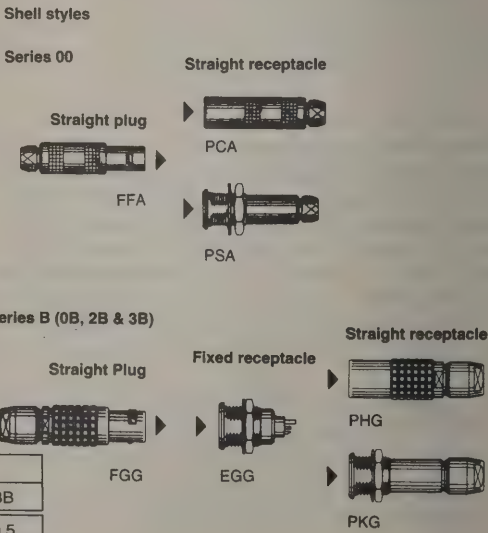

LEMO's fluidic connectors are found in many applications, for example in medical and dentistry equipment among others. These connectors may be of the monotube type available in the series 00 and 0B or the multitube type and/ or mixed with electrical contacts available in the series 2B and 3B. On request other types not mentioned in this catalog can be developed. Mixed connectors combining fluidic and signal contacts are also available. Please see page 6—in many cases where coaxial contacts are shown, fluidic/pneumatic many be substituted.

| Fluidics |         |                |                |                |                             |            |           | Low Voltage       |      |              |      |                   |  |
|----------|---------|----------------|----------------|----------------|-----------------------------|------------|-----------|-------------------|------|--------------|------|-------------------|--|

1) Refer to the table for the diameters of the collets.  
2) For the monofluidic connector types, this diameter indicates the outside diameter of the fluidic tube being fitted.

### Mechanical and climatical

| Characteristics       | Unit   | Series                 |    |     |     |

Page 13 of 13

**Connector terminology** is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

**Shape**—Circular, cylindrical, and rectangular.

**Electrical application**—High voltage, RF, microwave, input/output, etc.

**Mechanical application**—Printed circuit, rack & panel, cable, etc.

**Conductor type**—Coaxial, flat cable, ribbon cable, flex circuit, etc.

**Termination method**—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

**Contact:** The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

**Contact alignments:** Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

**Male vs. female:** In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

**Closed entry:** A female contact which prevents entry of a male contact larger than a specific size.

**Open entry:** A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

**Hermaphrodite:** Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

**Hermetic seal:** Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

**Waterproof seal:** May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

**Printed circuit connector:** Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

**Edgeboard.** May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

**Two-piece:** One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

**Readout:** Describes the arrangement at the terminating edge of a PC board.

May be single or double. A double read-out PC board has termination strips on each side not usually interconnected.

**Ribbon connectors:** A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

**Ribbon contact connector:** Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

**Solderless terminal:** Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

**Crimp termination:** A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

**Insulation displacement:** Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

**Service rating:** The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

**Withstanding voltage:** Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

**2010 Series**  
**2.00mm (.079") Crimp Terminal Latch Socket**

- Features:**
- Available in 2 through 15 circuits
  - Low profile
  - With molded locking ramp
  - Nylon 6/6 UL94V-0
  - Accepts Leoco 2033 crimp terminal
  - Mates with Leoco 2011 straight or right angle version header

UL: Recognized No. E82349 CSA: Certified No. LR65731

**2011 Series**  
**2.00mm (.079") Header**

- Features:**
- Available in 2 through 15 circuits
  - Low profile
  - Fully shrouded
  - With Polarized slot
  - Nylon 6/6 UL94V-0
  - 0.50mm (0.20") tin plated square pin
  - Mates with Leoco 2010 socket

### 2543 Series

#### 2.54mm (.100") Dual Row PCB Connector

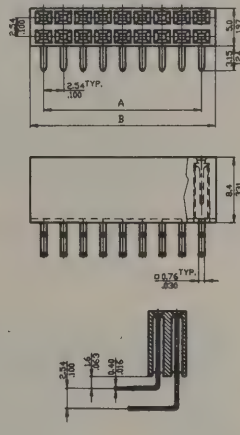

##### Features:

- Available in 4 through 80 circuits
- Color black
- Dual row
- With locking ramp P.C. Board standoff
- Standard with tin plated solder tail terminal
- Plating options available
- Glass filled polyester UL 94V-0
- Accepts 0.64mm(.025") square pin
- Contact: Phosphor bronze
- Mates with Leoco 2558, 2559, 2568, 2569 and 2666 header

##### Top Entry (V version)

##### Side Entry (H version)

A = 2.54mm x No. of spaces  
B = A + 3.04mm

##### Ordering Information:

| 2543S | 80 | V | U | 00 |
|-------|----|---|---|----|
| 1     | 2  | 3 | 4 | 5  |

1. Series No.
2. No. of circuits
3. V = Top entry  
H = Side entry
4. Contact plating:  
T = Tin plated  
U = Gold flash over 50  $\mu$ in. nickel  
W = 15  $\mu$ in. gold over 50  $\mu$ in. nickel  
Z = 30  $\mu$ in. gold over 50  $\mu$ in. nickel
5. Special options

UL: Recognized No. E82349

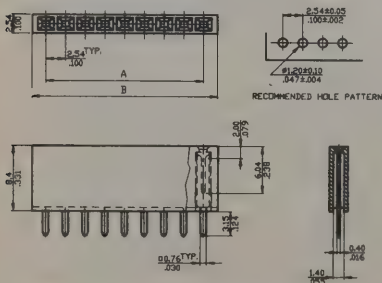

### 3594 Series

#### 2.54mm (.100") PCB Connector

##### Features:

- Available in 2 through 40 circuits
- Color black
- Single row
- With locking ramp P.C. Board standoff
- Standard with tin plated solder tail terminal
- Plating options available
- Glass filled polyester UL 94V-0
- Accepts 0.64mm(.025") square pin
- Contact: Phosphor bronze
- Mates with Leoco 2556, 2557, 2566 and 2567 header

##### Top Entry (V version)

A = 2.54mm x No. of spaces  
B = A + 3.05mm

## 2512 Series

### 2.50mm (.098") Board in Connector

#### Features:

- Available in 2 through 20 circuits
- Low profile
- Use with 1.57mm (.062") thick P.C. Board
- Nylon 6/6 UL94V-0
- Accepts Leoco 2512 crimp type board in terminal

CSA: Certified No. LR65731

## 2512 Series

### 2.50mm (.098") Board in Terminal

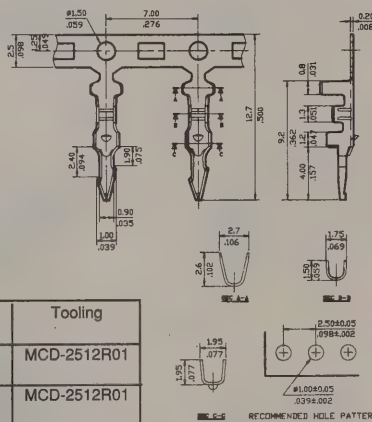

#### Features:

- Compliant tip holds terminal to P.C. Board
- Directly soldered on P.C. Board
- Used in Leoco 2512 connector
- Accommodate wire range 22 through 28
- Material: Pre-tinned phosphor bronze

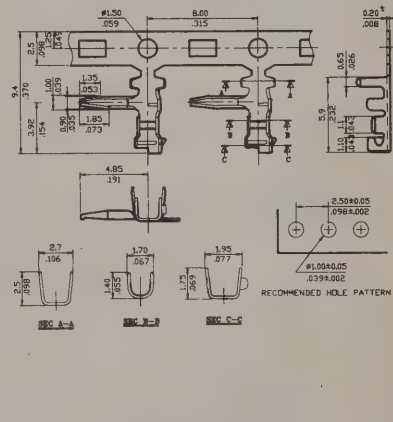

#### Specifications & Ordering Information:

## 9193 Series

### Board in Terminal

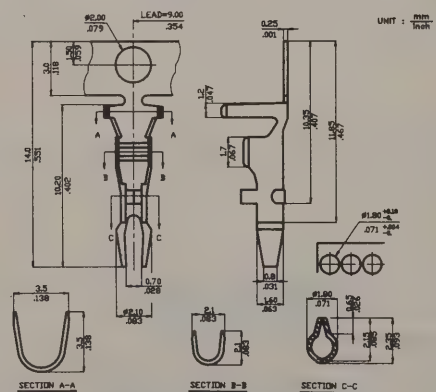

#### Features:

- Retaining clip shape secure wire to P.C. Board
- No additional contact resistance
- Accepts 18-24 AWG wire range
- Suitable for 1.57mm (.062") thick P.C. Board

#### Specifications & Ordering Information:

| Part No.    | Wire Ranges | Material          | Insulation Diameter | Reel Q'ty | Application Tooling |             |

6700 Series  
2.00mm(.079") Diameter Receptacle and Plug Connector

- Features:**
- Can be used 6703, 6704, 6713, 6714 crimp terminal
  - Available in 1 through 15 circuits
  - Standard color natural

- Material:**
- Receptacle: Nylon 6/6 UL94V-2
  - Plug: Nylon 6/6 UL94V-2
  - Terminal: Brass, tin plated

Temperature Range: -25 to +85 degree C

## 2556 Series

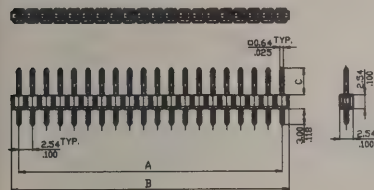

### 2.54mm (.100") Single Row Breakaway Straight Angle Header

#### Ordering Information:

| 2556P | 40 | T | A00 |
|-------|----|---|-----|
| 1     | 2  | 3 | 4   |

- Series No.
- No. of circuits
- Contact plating:  
T = Tin plated  
U = Gold flash over 50  $\mu$ m. nickel  
J = 15  $\mu$ m. selective gold over 50  $\mu$ m. nickel  
K = 30  $\mu$ m. selective gold over 50  $\mu$ m. nickel
- Special options  
A00: Dim.C = 6.26mm  
B00: Dim.C = 7.26mm  
C00: Dim.C = 8.86mm  
D00: Dim.C = 5.86mm

UL: Recognized No. E82349  
TUV Licensed No. R9052132

A = 2.54mm x No. of spaces  
B = A + 2.54mm

#### Features:

- 40 circuits as standard size
- Glass filled polyester UL 94V-0
- Color black
- With standoff minimize flux wicking
- Easy breakaway to desired circuits
- Stackable row by row and end to end
- Mates with 2.54mm(.100") socket
- 0.64mm(.025") square pin
- Pin length and plating options available
- Pin omit options available in any circuits

RECOMMENDED HOLE PATTERN

## 2557 Series

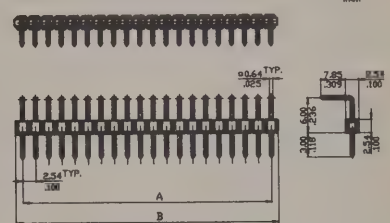

### 2.54mm (.100") Single Row Breakaway Right Angle Header

#### Ordering Information:

| 2557P | 40 | T | 000 |
|-------|----|---|-----|
| 1     | 2  | 3 | 4   |

| 2560SX00001 | 10 $\mu$ m gold plated over 50 $\mu$ m nickel |
| 2560SW0001  | 15 $\mu$ m gold plated over 50 $\mu$ m nickel |
| 2560SZ00001 | 30 $\mu$ m gold plated over 50 $\mu$ m nickel |

UL: Recognized No. E82349

## 2544 Series

### 2.54mm (.100") Dual Row Edge Connector

#### Features:

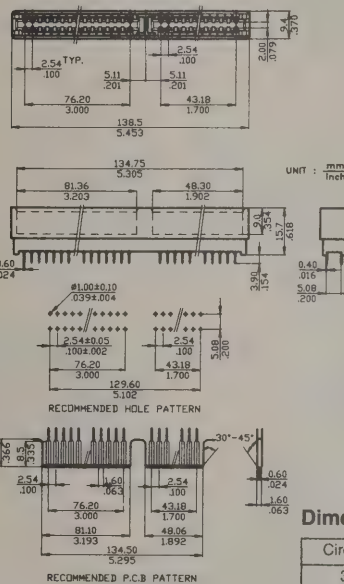

- Available in 36 through 98 circuits
- With molded standoffs
- Plating on contact surface (selective gold plated)
- Contact material: Phosphor bronze
- Insulator: Glass filled polyester UL94V-0
- Pin length or plating options available

## 2142 Series

### 2.54mm (.100") SIMM Socket Vertical Type

P/N: 2142S60TAE0

P/N: 2142S60TAM0

## 8111 Series

### 1.27mm (.050") SMT Chip Carrier

### Features:

- Surface mount type
- Insulator: P.P.S UL94V-0
- Contact: Phosphor bronze

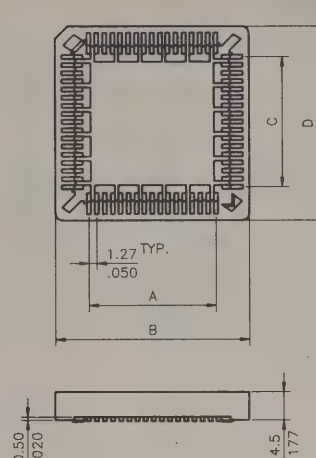

1. Series No.
2. No. of circuits
3. Contact plating  
T = Tin plated  
U = Gold flash over 50  $\mu\text{in.}$  nickel
4. Special Options  
000 = Black color (standard)

## 8300 Series

### 2.54mm (.100") Dual In Line IC Socket

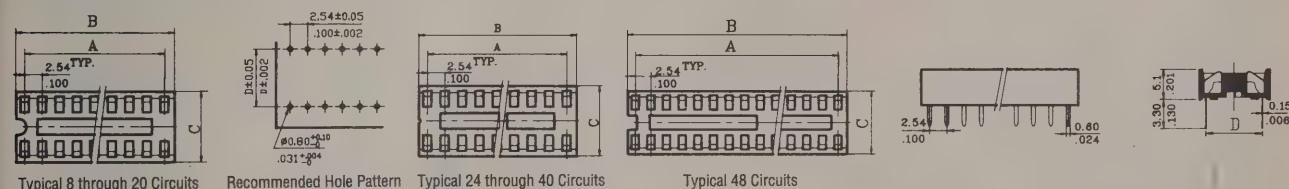

### Features:

- Low Profile
- Dual contact terminal
- Available in 8, 14, 16, 18, 20, 24, 28, 40, 42 and 48 contacts
- Glass filled polyester UL 94V-0
- Anti-solder wicking
- Contact: Phosphor bronze
- Plating: Tin plated

**UL: Recognized No. E82349**

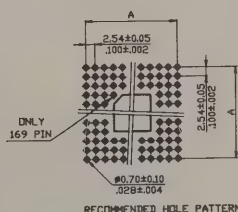

## 8350 Series

**2.54mm x 2.54mm (.100" x .100") Pin Grid Array (PGA) Socket**

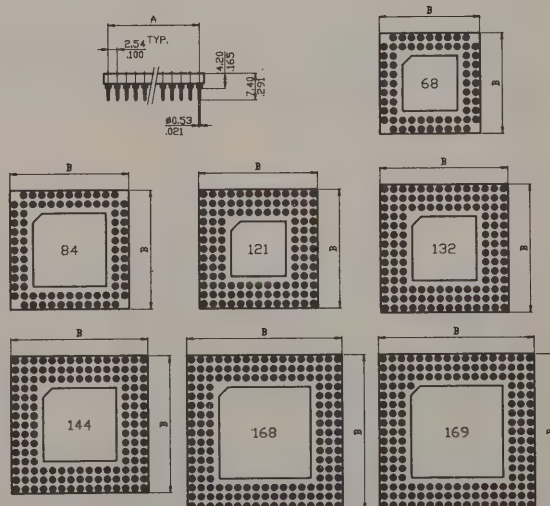

### Features:

- Anti solder wicking
- With 6 inner finger contact
- Insulator: P.P.S. UL94V-0
- Contact plating
  - Inner contact - 10  $\mu\text{m}$ . gold over nickel
  - Outer sleeve - Tin plated brass

## 2540 Series

**2.54mm x 2.54mm (.100" x .100") I.D.C. Connector for 1.27mm (.050") Center Ribbon Cable**

### Features:

- Available in 10, 14, 16, 20, 24, 26, 30, 34, 40, 50, 56, 60, 62, and 64 circuits
- Accommodate wire range 26 through 28
- Selective gold plating
- Can be assembled by Leoco LHM-1204000 bench press
- Insulator: Glass filled polyester UL94V-0
- Contact material: Phosphor bronze
- Accept with 6001PK-0006 polarization key
- Mates with Leoco 2545, 2575, 3575 straight or right angle version shrouded header

### Ordering Information:

UL: Recognized No. E82349

## 2545 Series

**2.54mm x 2.54mm (.100" x .100")**

**Straight Shrouded Header**

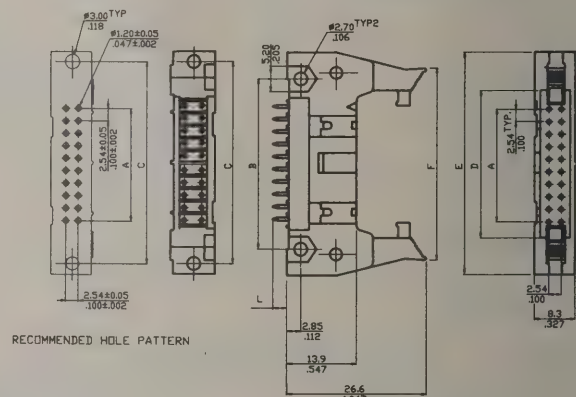

### Features:

- Available in 10, 14, 16, 20, 24, 26, 30, 34, 40, 50, 60, and 64 circuits
- Fully shrouded polarized
- Latches connector with or without strain relief
- With ejector latch lever
- Optional length of P.C. Board solder or pin wrap foil available
- Glass filled polyester UL94V-0
- 0.64mm (.025") square pin
- Mates with Leoco 2540 ribbon cable connector

### Ordering Information:

## 2.54mm x 2.54mm (.100" x .100") Right Shrouded Header

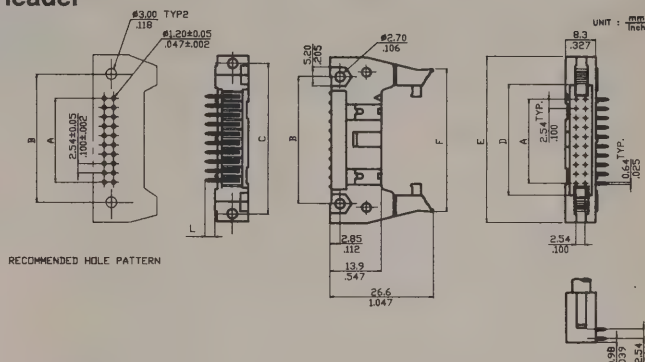

### Features:

- Available in 10, 14, 16, 20, 24, 26, 30, 34, 40, 50, 60, and 64 circuits
- Fully shrouded polarized
- Latches connector with or without strain relief
- With ejector latch lever
- Optional length of P.C. Board solder or pin wrap foil available
- Machine screw 10mm(Max.) and hexagon nut M2 used for mounting
- Glass filled polyester UL 94V-0
- 0.64mm(.025") square pin
- Mates with Leoco 2540 ribbon cable connector

# 3575 Series

## 2.54mm x 2.54mm (.100" x .100") Shrouded Header

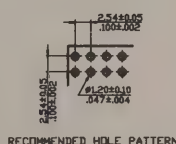

### Features:

- Available in 10, 14, 16, 20, 24, 26, 30, 34, 40, 50, 60, and 64 circuits
- Low profile
- Fully shrouded
- Optional length of P.C. Board solder or pin wrap foil available
- Plating options available
- Glass filled polyester UL94V-0
- Accepts 0.64mm(.025") square pin
- Mates with Leoco 2540 ribbon cable connector

### Ordering Information:

## 7606 Series

### PCB Gang Jack Side Entry Type

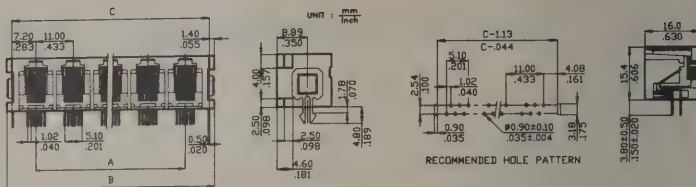

#### Features:

- Housing: Glass filled Nylon 6/6 UL94V-0
- Contact: 0.46mm(.018") Dia. Phosphor bronze
- Metal foot: 0.50mm(.020") thickness brass tin plated

#### Ordering Information:

| 7606 | 2 | 6 | 06 | W | 0 |
|------|---|---|----|---|---|
| 1    | 2 | 3 | 4  | 5 | 6 |

1. Series No.
2. No. of Parts: 2, 3, 4, 5, 6, 7, and 8
3. No. of positions: 6
4. No. of contacts: 2, 4, and 6
5. Contact plating  
 W = 15 µin. gold over 50 µin. nickel  
 Z = 30 µin. gold over 50 µin. nickel  
 G = 50 µin. gold over 50 µin. nickel
6. 0 = Gray color (Standard)  
 1 = Black color

## 7624 Series

### PCB Mount Telephone Jack

#### Features:

- Mated with 1.57mm(.062") thick P.C. board
- Industry compatible
- Right angle
- Options material or color available
- Housing: Glass filled Nylon 6/6 UL94V-0
- Contact: 0.46mm(.018") Dia. Phosphor bronze

P/N 7624-040\*\*\*

## DPL Series

### 8.10mm (.319") Foot Print Plug Connector

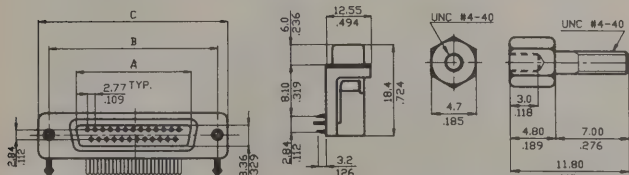

#### Features:

- Available in 9, 15, 25 and 37 circuits
- Full rear insulation cover
- Other optional female hexagonal screwlocks available
- Available with ground strap or retaining clip ground strap
- Tin plated metal shell as standard
- Selective gold plated terminal

#### Material:

- Insulator: Glass filled polyester UL94V-0 Color black
- Contact: Brass
- Shell: Steel, tin plated as standard

Standard Female Screwlock P/N: HW-H118EN00

#### Ordering Information:

| DB-25 | PL | U | R | L2 |
|-------|----|---|---|----|
| 1     | 2  | 3 | 4 | 5  |

1. Shell size:  
 DE-09 = 9 circuits, DA-15 = 15 circuits, DB-25 = 25 circuits, DC-37 = 37 circuits
2. Contact designation:  
 PL = Right angle plug terminal in 8.10mm(.319") foot print
3. Contact Plating  
 U = Selective gold flash over 50 µin. nickel  
 W = 15 µin. selective gold over 50 µin. nickel  
 Z = 30 µin. selective gold over 50 µin. nickel
4. Female screwlock variations:  
 C = Assembled type with standard #4-40 UNC female screwlocks  
 R = Riveted with #4-40 UNC flush insert (Without female screwlocks)  
 (Available for retaining clip ground strap only)  
 N = Riveted #4-40 flush insert then preloaded with #4-40 UNC hexagonal female screwlocks (Available for retaining clip ground strap only)
5. Ground fixture variations:  
 L1 = With standard #4-40 UNC ground strap  
 L2 = With standard retaining clip ground strap

## DHSL Series

### PCB Mount High Density Socket Connector

#### Features:

- Available in 15, 26, 44 and 62 circuits
- Full rear insulation cover
- Other optional female hexagonal screwlocks available
- Available with ground strap or retaining clip ground strap
- Tin plated metal shell as standard
- Selective gold plated terminal

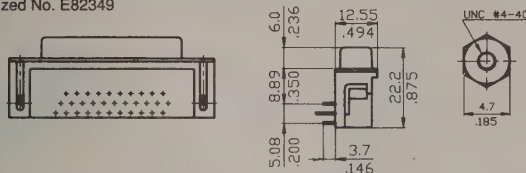

#### Material:

- Insulator: Glass filled polyester UL94V-0 color black
- Contact: Phosphor bronze
- Shell: Steel, tin plated as standard

#### Dimensional & Ordering Information

 L2 = With standard retaining clip ground strap

#### Standard Female Screwlock

P/N: HW-H118EH00

## LCTL Series

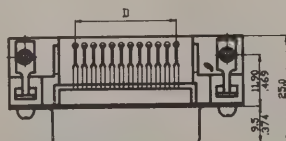

### Side Entry PCB Mount Centronic Connector

#### Features:

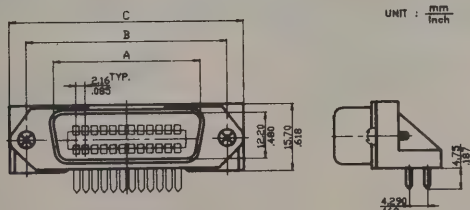

- Available in 14, 24, 36 and 50 circuits
- Options with standard ground straps or retaining clip
- Nickel plated metal shell
- Socket connector standard with bail locking device
- Available in reversed version

#### Material:

- Insulator: Glass filled polyester UL94V-0
- Contact: Phosphor bronze

Plug LCTL 30 Series

| 249 200 | .600" / 15.24 MM         | 2 to 12          |
| 202 200 | .200" / 5.08 MM          | 2 to 36          |
| 268 200 | .400" / 10.16 MM         | 2 to 18          |
| 269 200 | .600" / 15.24 MM         | 2 to 12          |

- 180 degree plug
- Wire perpendicular to clamping screw
- Horizontal wire entry, 14 AWG, 15 A, 300 V\*
- Optional polarizing keys

|         |                 |         |
|---------|-----------------|---------|
| 245.300 | .200" / 5.08 MM | 2 to 36 |
|---------|-----------------|---------|

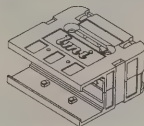

- Wire parallel to clamping screw
- Vertical wire entry, 14 AWG, 15 A, 300 V
- Optional polarizing keys & locks

|         |                 |         |
|---------|-----------------|---------|
| 202 400 | .200" / 5.08 MM | 2 to 36 |
|---------|-----------------|---------|

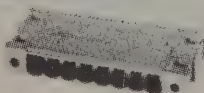

## STRAIN RELIEF COVERS

- Can be used with 202, 205, & 245 series pluggable connectors
- Available in 8, 12, 16 and 18 positions
- Accepts .200", .300", .400" and .600" pluggable connectors

## DOUBLE-SIDED HEADERS

- Double horizontal header
- Sides closed 10 A, 300 V\*
- \* Series 259 200 = 600V

|         |                  |         |

## BARRIER TERMINAL BLOCKS

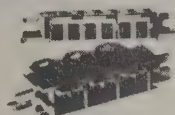

- Screw connection or solder tab  
2 × 16 AWG, 10 A, 300 V

| SERIES | CENTER TO CENTER SPACING | NO. OF POSITIONS                  |
|--------|--------------------------|-----------------------------------|
| 44 100 | .300" / 7.62 MM          | 2 to 20 screw connections         |
| 44 200 | .300" / 7.62 MM          | 3 to 20 screw and tab connections |

## HIGH POWER SOCKET CONNECTORS

- With perpendicular or parallel screw and wire contact
- Mates with all power socket connectors  
12 AWG, 25 A, 300 V

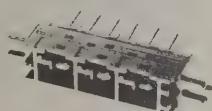

|         |                 |                       |
|---------|-----------------|-----------------------|
| 207 100 | .300" / 7.62 MM | 4 to 12 perpendicular |
| 207 300 | .300" / 7.62 MM | 4 to 12 parallel      |

- With terminal tab contacts
- Mates with all power socket connectors  
12 AWG, 25 A, 300 V

|         |                 |         |
|---------|-----------------|---------|
| 217 100 | .300" / 7.62 MM | 4 to 10 |
|---------|-----------------|---------|

- With wire wrap contacts
- Mates with all power socket connectors  
12 AWG, 25 A, 300 V

|         |                 |         |
|---------|-----------------|---------|
| 227 100 | .300" / 7.62 MM | 4 to 10 |
|---------|-----------------|---------|

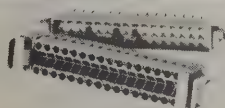

- With pin P.C.B. contacts
- Mates with all power socket connectors  
12 AWG, 25 A, 300 V

|         |                 |         |
|---------|-----------------|---------|
| 237 100 | .300" / 7.62 MM | 4 to 10 |
|---------|-----------------|---------|

## DIN 41612 TYPE E CONNECTORS

- 32 screw contacts
- Mates with 09050486924 vertical header or 09050486921 horizontal header  
14 AWG, 10 A, 300 V
- Option polarizing key

|               |                 |    |
|---------------|-----------------|----|
| 302 432-02/32 | .200" / 5.08 MM | 32 |
|---------------|-----------------|----|

## EDGE CARD / TERMINAL BLOCK CONNECTORS

- Various configurations 45° etc.  
14 AWG, 5 / 10 A, 300 V
- Option polarizing keys
- Option card guides

|           |                               |                                          |
|-----------|-------------------------------|------------------------------------------|
| 505 100   | .200" / 5.08 MM (Panel mount) | 12-15-18-20-24 screw connectors          |
| 505 200   | .200" / 5.08 MM P.C.B.        | 12-15-18-20-24 P.C.B. / screw connectors |
| 505 316-2 | .200" / 5.08 MM 45°           | 16 pos. for 19 inch racks / Horizontal   |
| 505 416-2 | .200" / 5.08 MM 45°           | 16 pos. for 19 inch racks / angled       |
| 515 000   | .200" / 5.08 MM               | 6-9-12-15-18 tab terminals               |

## QUICK CONNECT TERMINAL BLOCKS

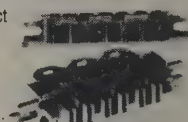

- With .250" / 6.3 MM tabs
- Various configurations available  
20 A

| SERIES | CENTER TO CENTER SPACING | NO. OF POSITIONS |
|--------|--------------------------|------------------|
| 47 000 | .512" / 13 MM            | 2 to 20          |

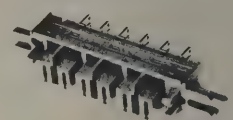

## HIGH POWER HEADER CONNECTORS

- With perpendicular or parallel screw and wire contact
- Mates with all power header connectors  
12 AWG, 25 A, 300 V

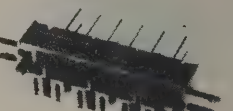

|         |                 |                       |
|---------|-----------------|-----------------------|
| 207 200 | .300" / 7.62 MM | 4 to 12 perpendicular |
| 207 400 | .300" / 7.62 MM | 4 to 12 parallel      |

- With tab terminals
- Mates with all power header connectors  
12 AWG, 25 A, 300 V

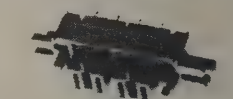

|         |                 |         |
|---------|-----------------|---------|
| 217 200 | .300" / 7.62 MM | 4 to 10 |
|---------|-----------------|---------|

- With wire wrap contacts
- Mates with all power header connectors  
12 AWG, 25 A, 300 V

|         |                 |         |
|---------|-----------------|---------|
| 227 200 | .300" / 7.62 MM | 4 to 10 |
|---------|-----------------|---------|

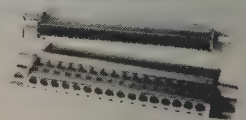

- With pin P.C.B. contacts
- Mates with all power header connectors  
12 AWG, 25 A, 300 V

|         |                 |         |
|---------|-----------------|---------|
| 237 200 | .300" / 7.62 MM | 4 to 10 |
|---------|-----------------|---------|

## THROUGH PANEL EDGE CARD CONNECTORS

- Horizontal or 45 degree wire entry  
14 AWG, 5 / 10 A, 300 V

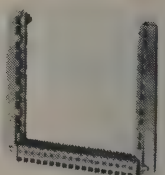

|         |                 |                             |
|---------|-----------------|-----------------------------|
| 505 300 | .200" / 5.08 MM | 8-12-16-20-24-25 horizontal |
| 505 400 | .200" / 5.08 MM | 8-12-16-20-24-25 45 degree  |

## CARD GUIDES

- P.C.B. thickness = .63" / 1.6 MM
- Heights from 1.575" / 40 MM to 4.724" / 120 MM
- Option P.C.B. board retainer

Mounting instructions engage the notch swing into place

## FEATURES OF LMI CONNECTORS

### UL 94 VO RATED MATERIAL

- Tough plastic housing won't bend or crack
- Temperature range from -40°F/-40°C to 258°F/125°C

### CAPTIVE SCREWS

- Won't fall out
- Recessed to prevent arcing

### TEST PROBE HOLES

- Easy and Accurate Readings

### DEAD FRONT DESIGN

- Prevents accidental short circuiting
- User friendly
- Safe and Secure connections

### LARGE WIRE RANGE

- Solid or Stranded
- No ferrules or crimp-on connections
- 22 to 14 awg

### COMPATIBLE

- Plugs and Headers mate with many other major manufacturers of European Style connectors

### WORLDWIDE APPROVALS

- Designed for both the American and European markets, all LMI Connectors bear the following approvals: UL, CSA, VDE

### NATIONWIDE REPRESENTATION

- Trained LMI representatives and distributors are available from coast to coast

### FAST DELIVERY

- Prototype and pre-productions orders are shipped the same day
- Large volume orders are shipped in 2-3 weeks

# DIN RAIL MOUNTED ELECTRONIC INTERFACE MODULES

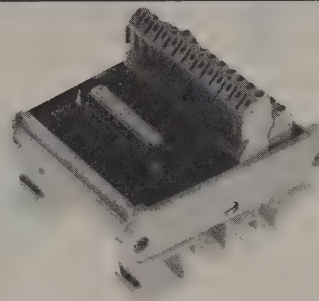

**lmi**

## FLAT RIBBON INTERFACE MODULES

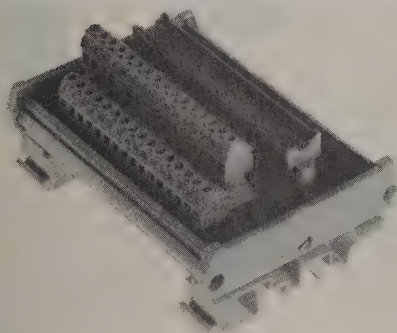

- Discrete wire to flat ribbon connector
- 1 amp, 125 Volts
- 10-64 poles
- Option: Pluggable terminal block

## D-SUB INTERFACE MODULES

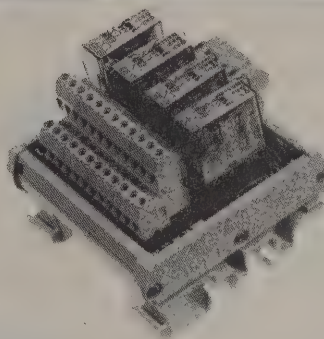

- Discrete wire to Male or Female D-sub Connector
- 1.5 amps, 125 Volts
- 9-50 poles
- Option: Pluggable terminal block

## DIN 41612 TYPE C, D, E, AND F INTERFACE MODULES

- Discrete wire to DIN 41612 type C, D, E or F Connector
- 6 Amps, 250 Volts
- 16, 32, 48 or 64 poles

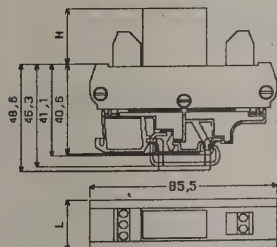

## 1, 4, 8, 16, RELAY MODULES

- 1, 4, 8, 16 or 32 relays (SPDT or DPDT)
- AC or DC
- 12, 24, 48, 110 or 220 Volts

## MODULE SHELLS SERIES 991100.00 EXTRUDED PVC

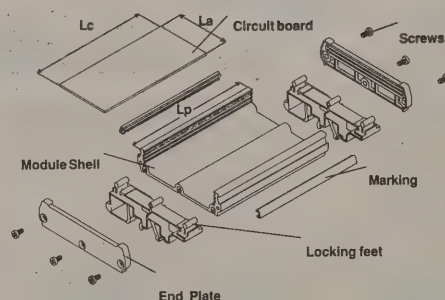

### SIZES FOR MODULE - FITTING

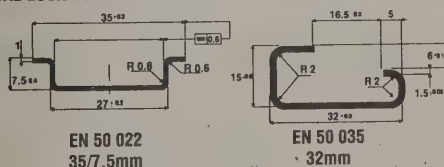

- 2 PCB Widths: 71mm or 72mm
- PCB Length 18mm to 1000mm (Up to 3000mm special request)
- PCB Thickness: 1.6mm
- Universally mounts on DIN Rails (EN 50 045, 50 022, 50 035)

# DC POWER JACKS

**SPECIFICATIONS:** Contact Resistance: 30 MΩMax  
Insulation Resistance: 50 MΩ min at 100 VDC  
Insulation Withstand Voltage: AC 250V  
R.M.S. for 1 minute

## SCHEMATIC

**Pin Diameter: 2.0mm or 2.5mm**  
**Specify "A" Suffix for 2.0mm E.G. DJ001A**  
**Specify "B" Suffix for 2.5mm E.G. DJ001B**  
**except for PN's: WK01, WK02, RL24**

## Locking Power Plug

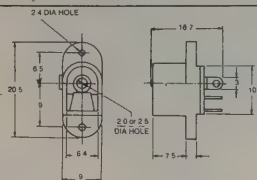

LZ1001A: 2.1/5.5/10mm

LZ1001B: 2.5/5.5/10mm

## DC Power Plugs

Assembly  
Type

**HP114A:** 2.1/5.5/10 mm I.D./O.D./Shaft Length  
**HP114B:** 2.5/5.5/10 mm I.D./O.D./Shaft Length  
**HP114C:** 1.3/3.4/10 mm I.D./O.D./Shaft Length

# DC power cords 6 ft. long 22 AWG, stripped and tinned leads

### DC10A

5.5 x 2.1mm plug

### DC10B

5.5 x 2.5mm plug

### DC12

3.5mm Stereo plug-3 cond.

### DC11A

2.5mm mini plug

### DC11B

3.5mm mini plug

### DC15A

Fused Cigarette Lighter Plug Assembly to  
DC10A Type Plug 2.1 x 5.5mm

### DC15B

Same except to DC10B Type Plug  
2.5 x 5.5mm

### DC16A

5.5 x 2.1mm with Locking plug

### DC16B

5.5 x 2.5mm with Locking plug.

## OPTIONS:

- Plugs on both ends
- Round Cords

- Round Shielded Cords
- Special Lengths
- Right Angle Plugs

We can make any cable or molded cable assembly to your specifications.

## PCB MOUNT CONNECTORS, SHIELDED & UNSHIELDED.

### SPECIFICATIONS

- CONTACT RESISTANCE: 20m  $\Omega$  Max.
- INSULATION RESISTANCE: DC 500 V 10<sup>9</sup> M  $\Omega$  Min.
- VOLTAGE WITHSTANDING: AC 500V 1 MINUTE.
- INSERTION FORCE: 5.0 Kg. Max.
- WITHDRAWAL FORCE: 1-3.5 Kg.
- LIFE TEST: 5,000 CYCLES MIN. AFTER TESTING, CONTACT RESISTANCE SHALL NOT EXCEED 100m  $\Omega$
- MATES WITH PLUG DIA.: .520  $\phi$   $\pm$  .008 (13.2  $\pm$  0.2)  
.536  $\phi$   $\pm$  .004 (13.6  $\pm$  0.1)

## LOCKING POWER CONNECTORS & PLUGS

Available in 3 and 4 positions.

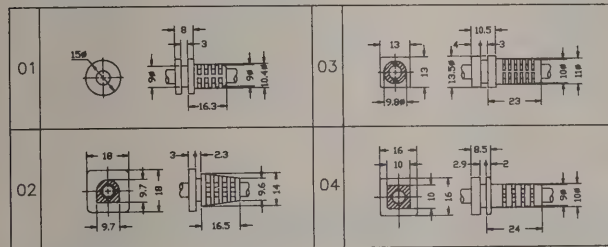

**Applications:** Computers, peripherals, medical, communications, power supplies.

### CABLE ASSEMBLY WITH LOCKING PLUG

| PN      | DESCRIPTION                              |
|---------|------------------------------------------|
| LZLP3P6 | 3 pos. Locking Plug Assembly, 6 ft. long |
| LZLP4P6 | 4 pos. Locking Plug Assembly, 6 ft. long |

### OPTIONAL STRAIN RELIEF

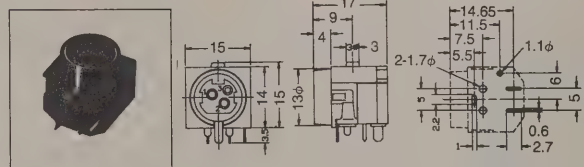

### SPECIFICATIONS

1. Rating: DC20V 1A Max.
2. Contact Resistance: 30mΩ Max.
3. Insulation Resistance: DC250V 50MΩ Min.
4. Voltage Withstanding: AC250V 1 Minute.
5. Insertion Force: 4Kg Max.
6. Withdrawal Force: 0.5Kg-3Kg

Fig. 2

The figure consists of two parts. On the left is a photograph of a dark, rectangular component, possibly a sensor or a small electronic module, with some internal components visible. On the right is a technical drawing of a cylindrical component. The drawing shows a cross-section of the cylinder with the following dimensions: a diameter of 10.7, a total length of 14.5, and a section length of 11.25. The base of the cylinder has a diameter of 21.5.

Fig. 2

050-1424

Fig. 3

The figure shows a perspective view of a cylindrical component with several electrical leads extending from one end. To the right of the perspective view is a cross-sectional diagram of the component. The diagram shows a central core with a diameter of  $\phi 11.0$  and a total length of 23.0. The component has a flange at one end and a central hole.

3. Electrical Characteristics  
Dielectric withstanding voltage  
1,000 VAC 60 Hz 1 min.  
Insulation resistance 500  
megohms minimum.  
Surge test to 1,000 volts.

- 1) All Multi-port connector blocks have locking tabs at both ends. These provide enhanced PCB mounting stability.
- 2) The 6- and 8-port versions have an additional locking tab, centered in the middle of the row (between the 3rd and 4th port of 6-port block and between the 4th and 5th port of an 8-port block).

Technical drawing of a three-hole punch plate. The drawing shows a top-down view of the plate with three circular punch holes arranged horizontally. The overall width is labeled 'C' and the overall height is labeled 'D'. The distance between the centers of the outer holes is labeled '15.40'. The distance between the center of the middle hole and the right edge is labeled '4.00'. The distance between the center of the middle hole and the left edge is labeled '15.7'. The distance between the center of the middle hole and the right edge is labeled '2.50'. The distance between the center of the middle hole and the left edge is labeled '0.98'.

Technical drawing of a mechanical part, likely a valve or plug, showing dimensions in millimeters. The drawing includes a top view and a side view. Key dimensions are: 2.10, 0.82, 15.40, 6.06, 4.60, 181, 16.00, 6.70, and 630.

R = Right Angle

## SPECIFICATION:

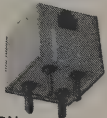

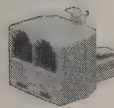

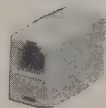

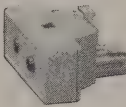

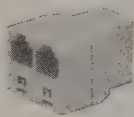

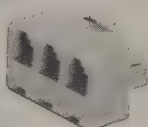

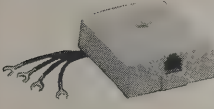

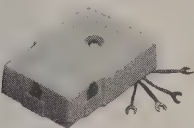

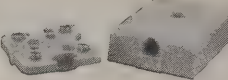

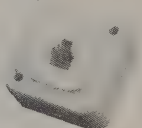

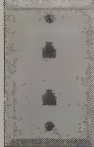

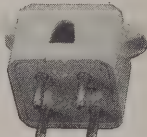

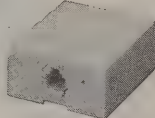

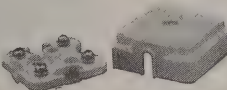

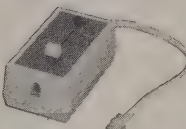

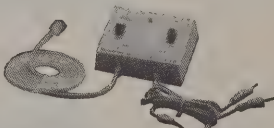

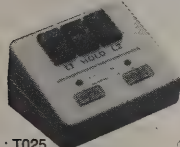

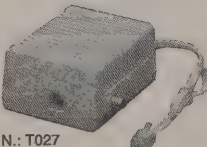

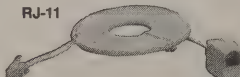

Insulation Resistance: :  $\geq 500$  megohms  
 Dielectric Strength : 500 Vac rms, 60 Hz  
 Contact Resistance :  $\leq 15$  milliohms  
 Current Rating : 1 1/2 AMP

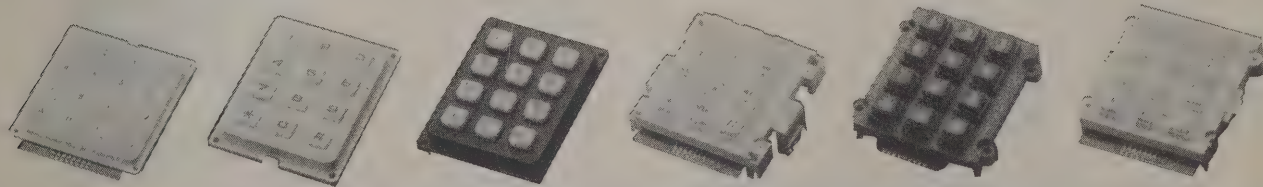

## BLISTER PACKS:

1. Blister Packs are available at slightly higher cost.
2. Minimum order is 2,000 units per each item.
3. Your own brand name is available too.

\*Add S or R after the P.N.

S = Straight thru wiring. R = Reverse sequence wiring.

|                                                                                                                                                                                                    |                                                                                                                                                                                                  |                                                                                                                                                                                               |                                                                                                                                                             |                                                                                                                                                                                                                   |                                                                                                                                                  |

# AC POWER ENTRY CONNECTORS

## PANEL MOUNTED RECEPTACLES

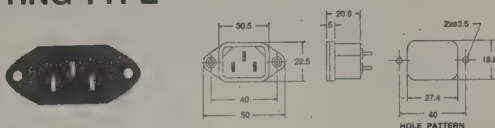

### General Specifications:

- **Insulation Resistance:** 100 Mohms at 500 VDC • **Dielectric Strength:** 2000 VAC for 1 minute
- **Contact Resistance:** 30 Mohms or less at 2.5 VDC, 1A • **Housing Material:** Black thermoplastic • **Terminals:** Copper alloy

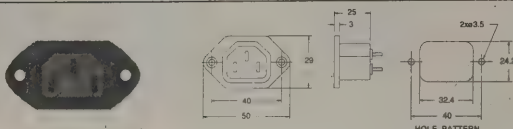

### SCREW MOUNTING TYPE

#### ACC008

- **Power Rating:** 10 A 250 VAC
- **Approval:** VDE, SEV, SEMKO, SETI, DEMKO, NEMKO
- **Power Rating:** 15 A 250 VAC
- **Approval:** UL, CSA

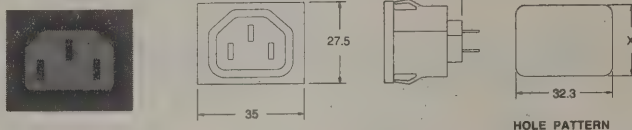

#### ACC010

- **Power Rating:** 10 A 250 VAC
- **Approval:** UL, CSA, VDE, SEV, SEMKO

### SNAP-IN MOUNTING TYPE

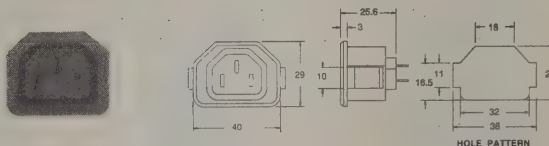

#### ACC014

- **Power Rating:** 10 A 250 VAC
- **Approval:** UL, CSA, VDE, SEV, SEMKO

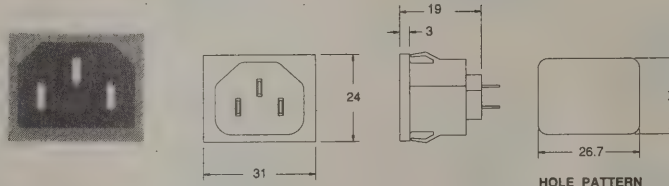

| HOLE PATTERN    |      |
|-----------------|------|
| PANEL THICKNESS | X    |
| 0.8mm - 1.2mm   | 25.2 |
| 1.3mm - 2.0mm   | 25.4 |

#### ACC014AR

- **Power Rating:** 10 A 250 VAC
- **Approval:** UL, CSA, VDE, SEV, SEMKO

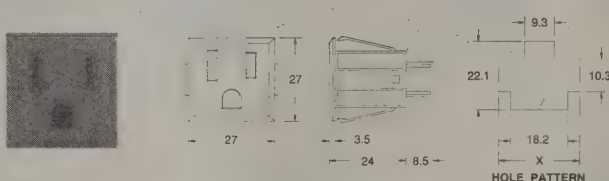

#### ACC016

- **Power Rating:** 10 A 250 VAC
- **Approval:** VDE, SEV, SEMKO, SETI, DEMKO, NEMKO
- **Power Rating:** 15 A 250 VAC
- **Approval:** UL, CSA

| HOLE PATTERN    |      |
|-----------------|------|
| PANEL THICKNESS | X    |
| 0.8mm - 1.2mm   | 20.3 |
| 1.3mm - 2.0mm   | 20.5 |

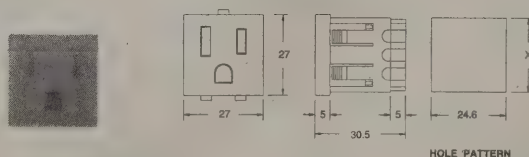

#### ACC011

- **Power Rating:** 15 A 125 VAC
- **Approval:** UL, CSA

| HOLE PATTERN    |      |
|-----------------|------|
| PANEL THICKNESS | X    |
| 0.8mm           | 24.0 |
| 1.0mm           | 24.6 |
| 1.2mm           | 25.2 |
| 1.6mm           | 26.2 |

#### ACC011 IDC FOR IDC WIRING (POWER STRIPS)

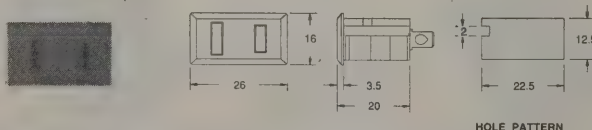

- **Power Rating:** 15 A 125 VAC
- **Approval:** UL, CSA

| HOLE PATTERN    |      |
|-----------------|------|
| PANEL THICKNESS | X    |
| 0.8mm - 1.2mm   | 24.6 |
| 1.3mm - 2.0mm   | 24.8 |

#### ACC004 POLARIZED

#### ACC005 NON-POLARIZED

- **Power Rating:** 15 A 125 VAC
- **Approval:** UL, CSA

PANEL THICKNESS  
0.8mm - 1.5mm MAX.

Notes: 1. All dimensions are in mm. 2. For termination options, see next page.

## EMI Filtered D Subminiature Connectors

### PRODUCT BENEFITS

- Provides optimum positioning of interference control at interconnect interface.
- Provides maximum volumetric efficiency.
- Design is based on proprietary ceramic technology of proven reliability and RF performance.
- Connectors mount in existing chassis hole pattern.
- A cost effective solution to electro-magnetic compatibility (EMC).
- Provides a wide range of filter performance options.
- Adaptor styles provide for ease of retrofitting existing equipment.
- Testing 100% for key parameters ensures quality levels.
- Designed to provide compatibility with EIA RS-232 and RS-449.

M.C.I. has the world's largest inventory of filtered D-Subminiature connectors. These connectors are manufactured by the leader of the industry... Spectrum Control, Inc. Spectrum Control's Filtered D Subminiature connectors are designed to provide a cost effective method of complying with FCC Part 15, Sub Part J, VDE and MIL STD 461 A/B regulations. The filters are feed-thru capacitors and pi sections.

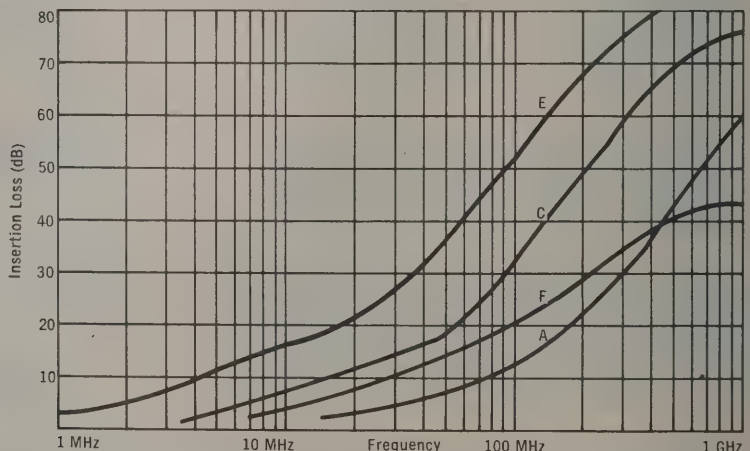

Our in-house stock includes all five shell sizes, 9, 15, 25, 37 and 50 position connectors in pin contacts (plugs), socket contacts (receptacles) and in the very versatile pin/socket adaptors. The four standard electrical configurations along with their performance values follows:

### EMI FILTER PERFORMANCE

| Filter Designation | *Filter Circuits | Capacitance |             | 3 dB Max Cut-Off Frequency (MHz) | Dielectric W/standing Voltage | Contact Rating | Contact Resist. | DC Working Voltage<br>-55°C to +125°C | Minimum Insertion Loss — Decibels (dB) |        |        |        |         |         |         |       |
|--------------------|------------------|-------------|-------------|----------------------------------|-------------------------------|----------------|-----------------|---------------------------------------|----------------------------------------|--------|--------|--------|---------|---------|---------|-------|

Waved Metal Gaskets Complete EMI Protection For Filtered or Non-Filtered D Subminiature

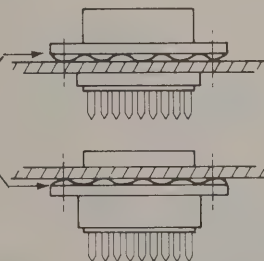

Proper mounting of any EMI filter — including the EMI filtered D Subminiature — is critical to the achievement of electromagnetic compatibility. The mounting surface for grounding the connector must be free from paint or any other insulating ma-

terial. The sketches below indicate the use of one of Spectrum's EMI gaskets to fill any tolerance gaps and adjust for irregularities in the flatness of the mounting surface.

Spectrum EMI Filtered D Subminiature... Unique

Spectrum D subminiature connectors feature a unique ground plane to effectively block bulkhead leakage of EMI. The design also provides line to line isolation separation to limit cross talk (line to line mutual coupling) to an absolute minimum. Another, and a most important feature, is the coaxial spring contact that provides proper electrical grounding when mating one connector to another connector.

## MINIGLOSSARY CONNECTORS

**Connector terminology** is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

**Shape**—Circular, cylindrical, and rectangular.

**Electrical application**—High voltage, RF, microwave, input/output, etc.

**Mechanical application**—Printed circuit, rack & panel, cable, etc.

**Conductor type**—Coaxial, flat cable, ribbon cable, flex circuit, etc.

**Termination method**—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

**Contact:** The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

**Contact alignments:** Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

**Male vs. female:** In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

**Closed entry:** A female contact which prevents entry of a male contact larger than a specific size.

**Open entry:** A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

**Hermaphrodite:** Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

**Hermetic seal:** Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

**Waterproof seal:** May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

**Printed circuit connector:** Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

**Edgeboard.** May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

**Two-piece:** One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

**Readout:** Describes the arrangement at the terminating edge of a PC board.

May be single or double. A double read-out PC board has termination strips on each side not usually interconnected.

**Ribbon connectors:** A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

**Ribbon contact connector:** Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

**Solderless terminal:** Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

**Crimp termination:** A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

**Insulation displacement:** Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

**Service rating:** The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

**Withstanding voltage:** Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

## NOBODY TURNS OUT THE VOLUME LIKE MILL-MAX

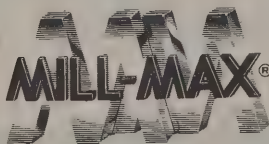

**N**eed interconnect components in record time? Mill-Max is your ticket. By producing over 80 million machined parts per week, we top the U.S. charts for our wide variety of items from stock.

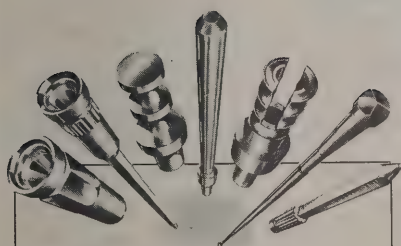

But what makes Mill-Max "the King" is the superior quality we attain by manufacturing under one roof. And instrumental to the reliability of all our sockets is the "multi-finger" inner contact made famous by Mill-Max.

Sure, we've become very popular, but we never turn down a small gig: our prototypes and custom products are big hits.

Looking for a connector supplier in tune with your needs? Then make a note to get a free Mill-Max or Preci-Dip catalog by writing Mill-Max, 190 Pine Hollow Rd., Oyster Bay, NY 11771. Or by calling us at (516) 922-6000. Fax (516) 922-9253. For the Mill-Max rep nearest you, consult the EEM Yellow Pages.

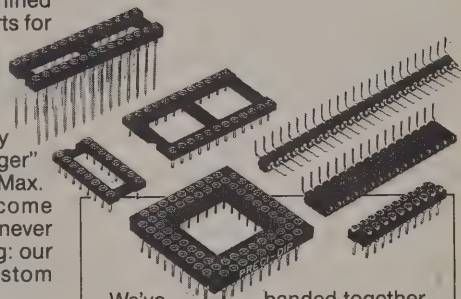

### TAKING THE LEAD

Bar none, Mill-Max is America's leading source for interconnect components. Here's a brief medley of our top selling hits:

- PCB pins
- Pin receptacles
- I.C. socket pins
- Solder terminals
- Wrapost receptacles and terminals
- Custom products

**MILL-MAX®**

We've banded together a complete line of Preci-Dip IC sockets and connectors that are real crowd pleasers.

- DIP, SIP and PGA sockets
- Disposable socket carriers
- Square and round pin headers
- Sockets for automatic insertion or surface mount
- PCB connectors
- Custom products

**PRECI-DIP®**

# The Industry Performance Standard: Connectors from Multi-Contact.

**Outstanding Design.  
Experienced Manufacturing.  
Guaranteed Safety. Excellent  
Quality. Superior Service.**

From design to manufacturing, Multi-Contact connectors are produced to satisfy the highest industry standards of performance and reliability.

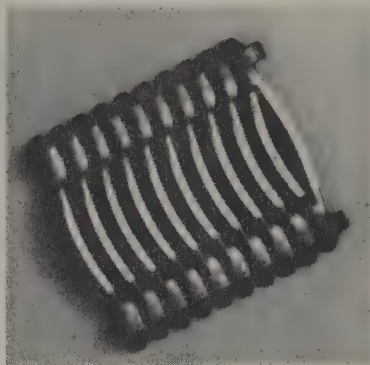

Sophisticated R&D efforts, in-house testing, and stringent quality controls have one simple, critical result: state-of-the-industry connector technology.

Multi-Contact connectors are made from solid brass (CuZn40Pb2), first nickel plated, then sealed with either a hard gold or hard silver plating.

MC-MULTILAM™ connectors exemplify Multi-Contact's innovative technology and commitment to quality. The precision, multiple louvered contact interface assures optimum contact performance. The MC-MULTILAM™ contact band is made from beryllium-copper, then precision-stamped and tempered, and finally hard gold- or hard silver-plated.

MC-MULTILAM™ connectors can be used for unlimited applications due to their design flexibility and advanced features:

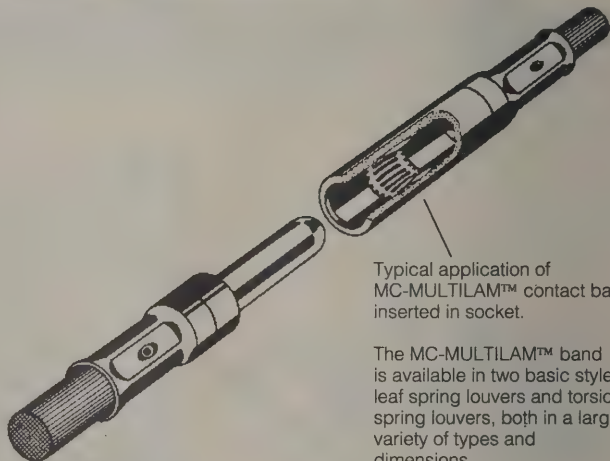

- High contact pressure—yet low insertion force
- High specific current capacity
- Lowest contact resistance
- Low voltage drop—minimal heat rise
- Mechanical strength—tens of thousands of mating operations
- Precious metal plating—excellent corrosion protection, even in aggressive and hostile environments

## The MC-MULTILAM™ System...

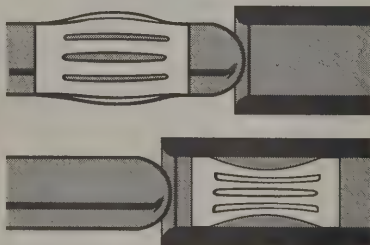

...efficient solutions for all applications.

MC-MULTILAM™ contact band with overlapping, silver-inlaid torsion spring louvers for high current connectors.

Typical application of MC-MULTILAM™ contact band inserted in socket.

The MC-MULTILAM™ band is available in two basic styles: leaf spring louvers and torsion spring louvers, both in a large variety of types and dimensions.

MC-MULTILAM™ contact band convex-fitted to plug

MC-MULTILAM™ contact band concave-inserted into socket

# From Low Current to High Current: Always the Right Connector.\*

\* If we don't have it on the shelf, we can custom design it.

## Comprehensive Selection. Ongoing Innovation. Reliable Service.

Multi-Contact offers connectors for virtually any low or high current application—from signal currents to kilo-amperes. The stock includes connectors in a wide variety of sizes, configurations, dimensions and colors. In addition to this wide range of standard products, Multi-Contact offers assembly of stock parts to customer specifications.

## True Custom Design.

New designs often demand novel components for optimum performance. Over many years, Multi-Contact has established an enviable record of successful custom-engineered and produced connectors that have satisfied numerous electronic and electrical applications. First-hand experience in conjunction with knowledge of the industry makes Multi-Contact an ideal source for customers needing specific or unique solutions. Very low minimum quantities are required: An average of only 200 units for custom-assembled products, only 3,000 units for custom-produced units.

However, regardless of how unusual or complicated the newly custom-produced unit may be, it still carries the guarantee of top performance and unsurpassed reliability.

# From High Current to Low Current: Always the Right Connector.\*

\* If we don't have it on the shelf, we can custom design it.

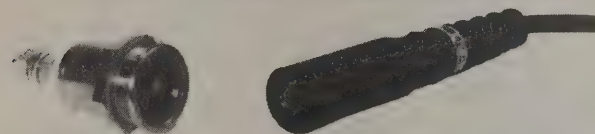

Plugs and sockets with external threads for connection to bus bars from 10 to 5000 Amps

## High Current Contact Devices

Plugs and sockets with rear copper sleeves for crimp connections from 10 to 2500 Amps

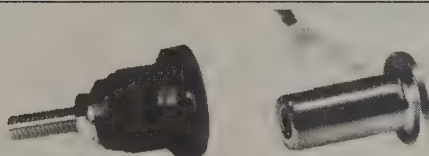

Panel-mount and cable in-line connectors for 180 and 280 Amps with quick-lock device

Plugs with threaded studs and sockets with spade-lug rear connections from 90 to 280 Amps with quick-lock device

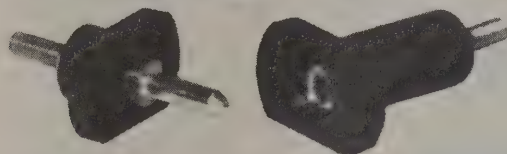

Insulated, color-coded panel-mount plugs and sockets for 90 Amps with quick-lock device

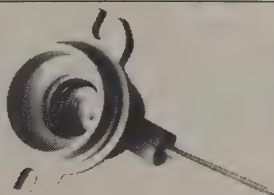

Rotating grounding connectors for medical environments

## Equipotential Grounding Connectors

Custom connectors made from tellurium-copper with floating contacts

## Custom Designs

Custom connector for high temperature applications

# COAXIAL CONNECTORS SMT, MICROMINIATURE

### FEATURES

- Ultra-miniature for High density mounting (11.6mm<sup>2</sup>).
- Ultra-low profile (3.2mm Max.).
- SMD and reflow solderable.
- Tape and reel packaging.
- High performance. (VSWR: 1.2 Max. at 3GHz)
- Available with ultra-thin FEP coaxial cables (1.25mm dia.).

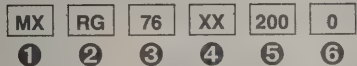

### APPLICATIONS

Portable, mobile and cordless telephone, GPS, any other microwave radio and measurement equipment, high-end workstations.

### PART NUMBERING – RECEPTACLE

| PART NUMBER    | PACKAGING         | QUANTITY     |
|----------------|-------------------|--------------|
| MM6329-2700    | Bulk package      | Specify      |
| MM6329-2700TB1 | 178mm Dia. Taping | 1000pcs/reel |
| MM6329-2700TB2 | 330mm Dia. Taping | 4000pcs/reel |

### PART NUMBERING – CABLE ASSEMBLY

- ① Cable assembly
- ②④ Connector code for each end of cable

| Code | Connector               |
|------|-------------------------|
| RG   | ESC type Plug connector |
| XX   | No connector            |

#### ③ Cable code

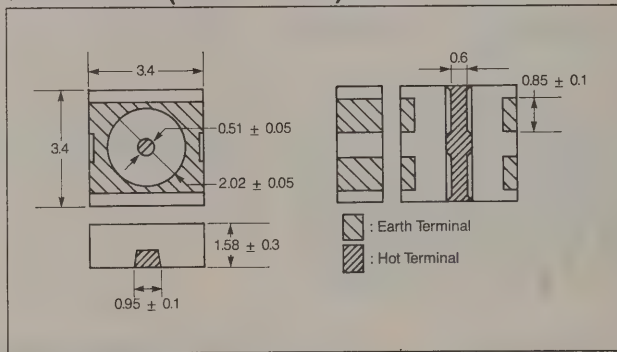

| Code | Cable | Outer Diameter | Outer conductor construction | Minimum Bending radius |
|------|-------|----------------|------------------------------|------------------------|
| 76   | 0.8D  | 1.25mm         | Single shield                | 6mm                    |
| 79   | 0.8D  | 1.25mm         | Single shield                | 6mm                    |

- ⑤⑥ Full length of cable assembly  
Length L(mm) = ⑤ × 10<sup>⑥</sup>  
Ex. 500mm = 500 × 10<sup>0</sup> = 5000  
1000mm = 100 × 10<sup>1</sup> = 1001

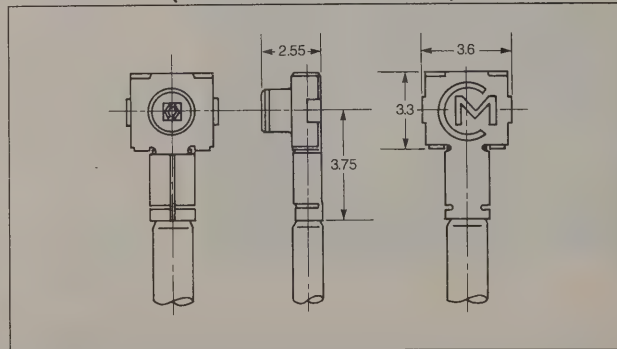

### SPECIFICATIONS

| Item                  | Rating and Characteristics |
|-----------------------|----------------------------|
| Frequency             | From DC to 3GHz            |
| VSWR                  | 1.2 Max.                   |
| Nominal Impedance     | 50Ω                        |
| Temperature Range     | -40°C to +90°C             |
| Voltage               | 250Vrms                    |
| Contact Resistance    | 15mΩ Max.                  |
| Withstand Voltage     | 300VAC rms                 |
| Insulation Resistance | 500MΩ Min.                 |
| Mating Cycles         | 50cycles                   |

## Designing for Export? We make it easy!

- **Export Designer's Reference/Catalog** gives detailed information about world electrical requirements; each product section begins with a review of international regulations. Call toll free for your free copy of our current edition.
- Components carry approvals by UL, CSA, VDE, SEMKO, SEV, etc.
- Most items are available for fast shipment from our large inventory.
- We have no minimum order and can ship prototype orders quickly.
- Designer's Kits, shown below, aid design of international products.
- "Time to market" component packages permit quick design of the primary power section of export products

## Interpower™ International Designer's Kits & Panels

### Panel of IEC 320 Inlets/Outlets

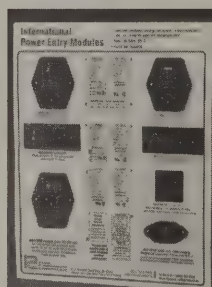

For convenience in designing the power entry portion of your product, this panel contains four IEC 320 power inlets and four accessory power outlets. Both 10A international/15A North American and 16A international/20A North American models are included. Push-in, panel- and pc-mounting types are included in this panel.

**#83010010:** Designer's Panel of IEC 320 Inlets & Outlets

Size: 9 x 12 x 2"; approx. 2#

*This panel is free upon request.*

### Panel of Power Entry Modules

Designer's panel contains seven international multifunction power entry modules, rated 6-10A/250VAC. Depending on model, these modules combine: IEC 320 power inlet, voltage selector, fuse, RFI filter, power switch, accessory outlet

**#83111010:** Designer's Panel of Power Entry Modules

Size: 9 x 12 x 2"; approx. 3#

*This panel is free upon request.*

### Kit of International Plugs

For use in designing electrical and electronic equipment that will be exported with foreign power cords/cordsets, this kit contains nine of the most common international plugs.

**#88090020:** Designer's Kit of International Plugs

Size: 12 x 13 x 4"; approx. 2#

### Kit of International Sockets

For use in design and burn in of electrical and electronic equipment that will be exported with foreign power cords/cordsets. Kit contains nine of the most common international sockets.

**#88090030:** Designer's Kit of International Sockets

Size: 12 x 13 x 4"; approx. 2#

### Designer's Kit of International Cordsets

The nine cordsets in this kit represent the major plug standards used in the world today. For use in designing the power entry portion of export products, the kit can also be used by international travelers who carry and use equipment which must be properly plugged in and grounded (be sure to set equipment at the proper voltage and frequency before operation). Each cordset is terminated with the IEC 320 connector, a common standard in the industrialized world. Complete specifications on each cordset are included for use in developing your purchasing specifications. The kit also contains information on world plug and socket standards and world electrical voltages and frequencies.

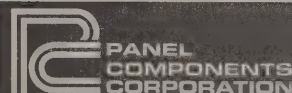

**#86599010:** Designer's Kit of International Cordsets

Size: 19 x 15-1/2 x 4"; approx. 9#

*Cordsets are illustrated and described in EEM section 6000*

# IEC 320 Power Inlets & Connectors

10-15A/65°C

10-15A/120°C

16-20A/65°C

The IEC 320 power inlet is the most commonly used means of connecting a detachable cordset to electrical or electronic equipment that consumes up to 16A at 220-240V (20A/120V) or less. (European voltages and frequencies are typically 220-240VAC, 50Hz). IEC 320 inlets are used in Europe, North America, and throughout the industrialized world. An IEC 320 power inlet allows the manufacturer to

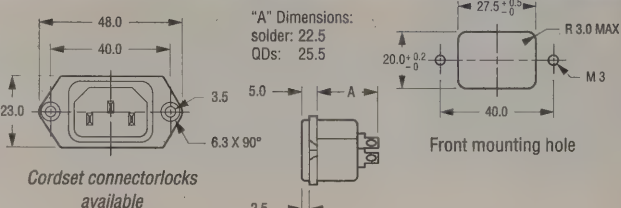

attach the correct international cordset just before shipment (see Sec. 6000 for cordsets).

Modules that combine an IEC 320 power inlet and other functions and accessory power connections based on IEC 320 are shown on the following pages. All items normally available from stock; no minimum order.

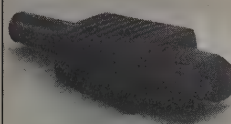

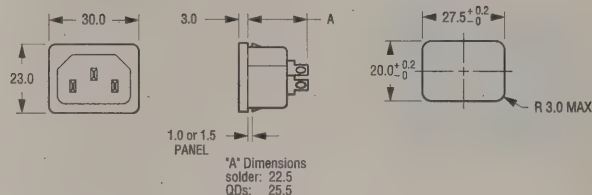

## IEC 320 inlets & connector — 10A international (15A North America)

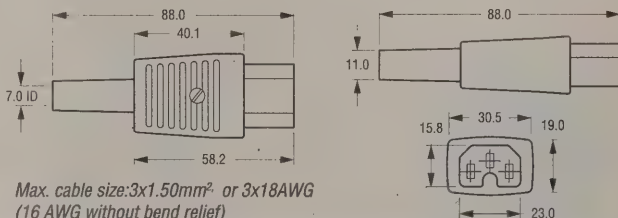

**#8301211:** with solder tabs  
**#8301212:** with 4.8 mm (.187") solder/QDs  
**#8301213:** with 6.3 mm (1/4") solder/QDs  
 Screw mount. Nickel-plated brass contacts; UL 94-V2 polyamide thermoplastic insulator.  
**Approvals:** VDE, DEMKO, IMQ, KEMA, NEMKO, OVE, SEMKO, SETI, SEV (10A/250VAC); UL & CSA (15A/250VAC).

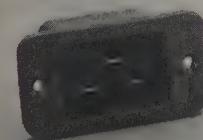

**#8301311:** 1.5mm panel, solder tabs  
**#8301312:** 1.5mm panel, 6.3mm sold./QDs  
**#83013121:** 1.0mm panel, 6.3mm sold./QDs  
 Push-in mount. Nickel-plated brass contacts; UL 94-V2 polyamide thermoplastic insulator.  
**Approvals:** VDE, DEMKO, IMQ, KEMA, NEMKO, OVE, SEMKO, SETI, SEV (10A/250VAC); UL & CSA (15A/250VAC).

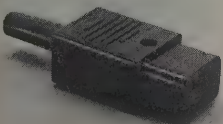

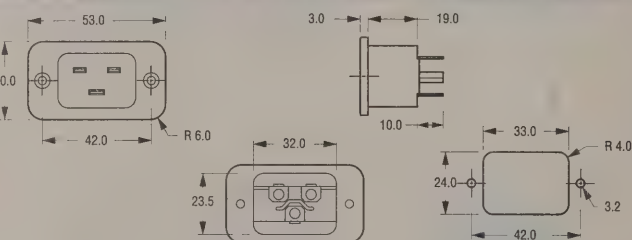

**#8943.W.60:** Rewirable IEC 320 power cord connector for use at 120°C. Mates with both 10A/65°C (above) and 10A/120°C standard receptacles (not shown). Screw-type connections. UL 94-V2 polyamide-type thermoplastic insulator.  
**Approvals:** OVE, SECV, SEMKO, SEV, VDE (10A/250VAC), CSA cert. & UL recog. (15A/250VAC)

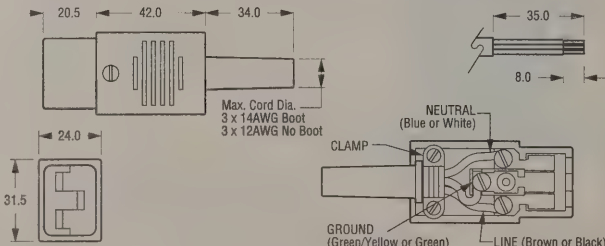

## IEC 320 inlet & connector — 16A international (20A North America)

**#83011340:** IEC 320 (C-20) power inlet (65°C) for detachable connections at higher ratings. UL 94-V0 nylon insulator. Nickel-plated brass contacts. Solder tabs.  
**Approvals:** UL recog., CSA cert. (21A/250VAC); VDE (16A/250VAC)  
 Accessory outlet and receptacle also available—see following pages

**#83011380:** Rewirable IEC 320 (C-19) power connector for detachable connections at higher ratings. Nylon insulator. Nickel-plated brass contacts. Screw-type connections. Made to order cable assembly services available.  
**Approvals:** UL recog.; CSA cert. (21A/250VAC); VDE (16A/250VAC)  
 See Sec. 6000 for cordsets with molded on connectors.

DESIGNING FOR EXPORT? WE MAKE IT EASY! See also EEM sections 4050, 4300, 5600, & 6000

# International Power Entry Modules

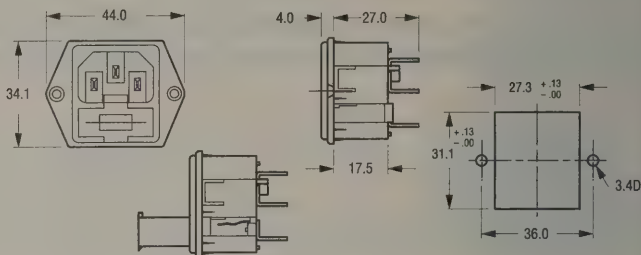

Power modules aid in configuring a product with the correct cord-set, voltage, and fusing for international or North American markets, and can also save on space, assembly costs, and components management because several functions are combined in one unit. A power module can also make a product safer; because it is possible to

interlock the power entry connector with access to a fuseholder or voltage selector, the equipment user must remove the power cord before changing a fuse or adjusting a voltage selector. See Sec. 4300 for fuses. All items normally available from stock with no minimum order.

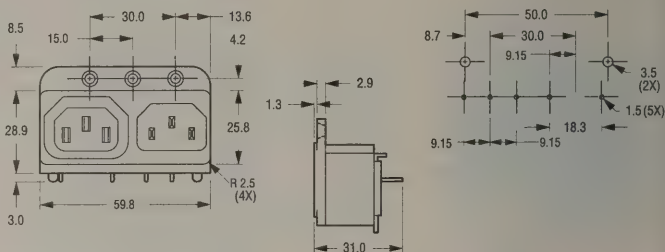

## 2 Function Module

**#83110111:** solder contacts  
**#83110131:** 6.3mm solder/QDs  
 Combines 1) IEC 320 inlet and 2) carrier for 5x20 mm fuse (with space for spare fuse); order fuse separately.  
**Approvals:** VDE, SEMKO, SEV, UL recog., CSA cert. at 10A/250VAC  
*Push-in mount models are also available.*

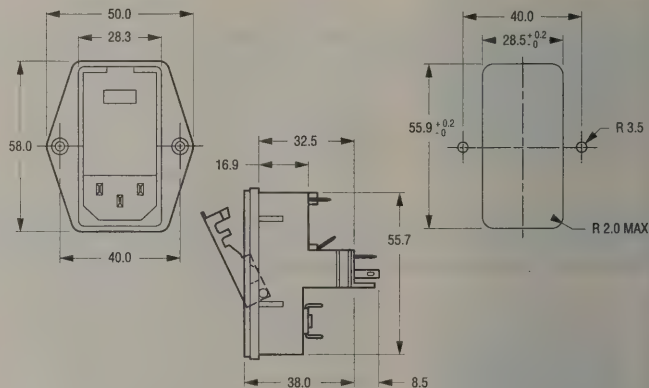

## 2 Function Module

**#83511400:** Printed circuit board mounting power entry module combines: 1) IEC 320 inlet; 2) accessory outlet. Connections made by solder pins.  
**Approvals:** UL recog., CSA cert., VDE at 10-15A/250VAC

## 3 Function Module

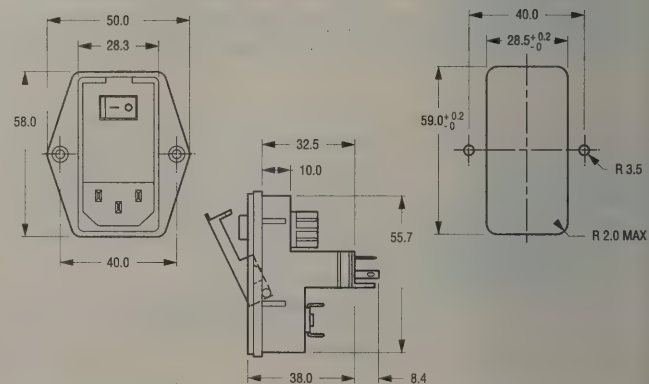

**#83110011:** Power entry module combines: 1) IEC 320 inlet; 2) fusing for international 5 x 20mm or North American 1/4 x 1-1/4" fuse; 3) 4-position voltage selector (100, 120, 220 & 240V). Connections made via solder tabs.  
**Approvals:** UL, CSA, VDE, 6A/250VAC  
**Order fuse carrier separately:**  
 #83110050: for int'l. 5x20mm fuse  
 #83110040: for 1/4 x 1-1/4" 3AG-fuse

## 3 Function Module

**#83110032:** Panel-mount power entry module combines: 1) IEC 320 inlet; 2) carrier for int'l. 5 x 20 mm fuse or North American 3AG fuse; 3) double-pole off/on rocker switch. Connections made via solder tabs & 4.8mm solder/QDs.  
**Approvals:** UL, CSA, VDE, 4-6A/250VAC

**Order fuse carrier separately:**  
 #83110050: for int'l. 5x20mm fuse  
 #83110040: for 1/4 x 1-1/4" 3AG-fuse

Dimensions are in mm

## 3 Function Module

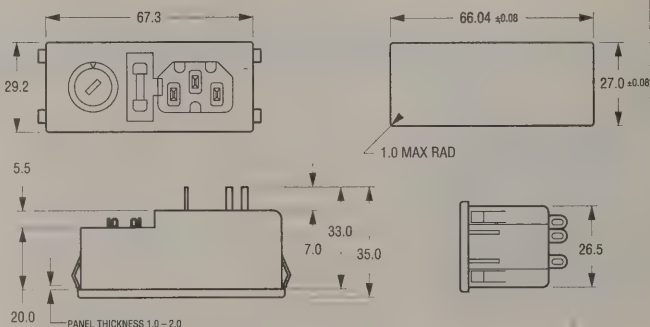

#83510160: Power entry module combines: 1) IEC 320 inlet; 2) integral carrier for 5 x 20 mm fuse; 3) double-pole off/on rocker switch. Snap-in mounting for panel thickness of 1.0-2.0mm (0.04-0.08"). Connections made via solder tabs. Approvals: UL and CSA—6A/125VAC (4A/250VAC); VDE—4A/250VAC

## 3 Function Module

#83510170: Power entry module combines: 1) IEC 320 inlet; 2) integral carrier for 5x20mm fuse; 3) and 2-position voltage selector for No. Amer. 110VAC & Cont. European 220VAC. Snap-in mounting for panel thickness of 1.0-2.0mm (0.04-0.08"). Connections are made via solder tabs. Order fuses separately (see Section 4300).

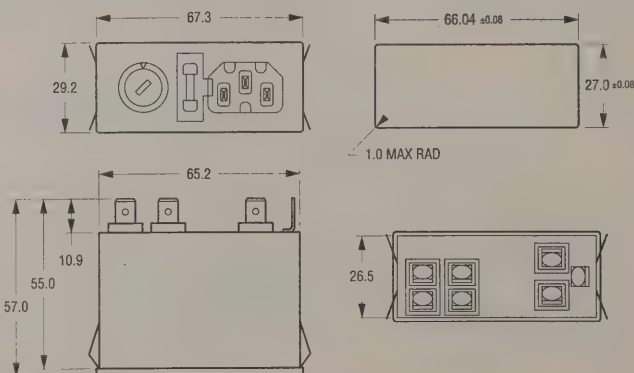

Approvals: VDE, UL recog., CSA cert. at 6A/250VAC

## 4 Function Module

#83510071: Power entry module combines: 1) IEC 320 inlet; 2) integral carrier for 5x20mm fuse; 3) 2-position voltage selector for No. Amer. 110VAC & Cont. European 220VAC; 4) RFI line filter. Snap-in mounting for panel thickness of 1.0-2.0mm (0.04-0.08"). Connections are made 6.3mm QDs. Order fuses separately (see Section 4300).

Approvals: VDE (4A/250VAC), UL recog., CSA cert. at 6A/125VAC

Note: Voltage selector is not designed to be switched while power is applied; selection must be made before connecting the unit to the power mains.

Note: Voltage selector is not designed to be switched while power is applied; selection must be made before connecting the unit to the power mains.

Dimensions are in mm

# International Power Entry Modules, continued

Normally available from stock • No minimum order

## 5-Function Module

**#83511420:** Power entry module combines: 1) IEC 320 inlet; 2) carrier for 5x20mm or No. Amer. 3AG fuse; 3) double-pole off/on rocker switch; 4) 2-position voltage selector (110-120VAC No. Amer. or 220-240 int'l); 5) RFI power line filter. Screw mount. Voltage selector, filter, and connections are internally wired; make connections via 6.3mm/sold. QDs.

**Approvals:** UL recog., VDE, 10A/250VAC; CSA cert., 6A/250VAC

*The integral fuse drawer doubles as a voltage selector by rotating the drawer. Insert a North American 3AG fuse in the "110-120VAC" side of the fuse drawer or an international 5x20mm fuse in the "220-240VAC" side.*

### SPECIFICATIONS:

**Body:** UL 94-V0 rated polyamide-type thermoplastic

**Max. leakage current:** L to G @ 115VAC, 60Hz: 0.25mA

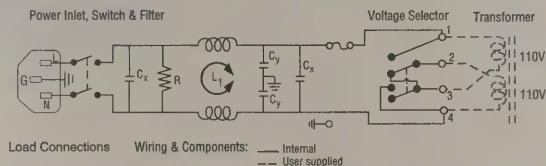

L to G @ 250VAC, 50Hz: 0.45mA

**Hipot rating (one minute):** L to G: 2250VDC

L to L: 1450 VDC

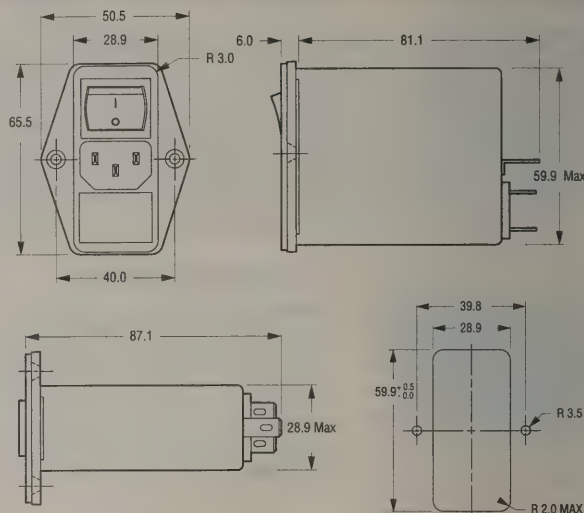

**Operating Frequency:** 50-60Hz

**Rating:** 115-250VAC, 65°C

### Filter Performance:

| Minimum insertion loss<br>in dB (50 ohm system) | Frequency—MHz |     |     |     |     |     |    |    |

## 5-Function Medical Modules—with low leakage RFI filter

These power entry modules combine the features of Part #83511420 shown above, but utilize a low-leakage RFI power line filter rated at 6A for use in medical applications. Two models are available to accommodate the different fusing requirements for international and North American medical applications:

**#83511430:** for international medical applications requiring two 5x20 mm fuses (to fuse both line and neutral where the connections are unpolarized).

**Approvals:** VDE, 6A/250VAC

**#83511440:** for North American medical applications which requires the use of only one 3AG fuse.

**Approvals:** UL recog., CSA cert., 6A/250VAC

*See model #83511420 above for dimensional drawings*

### SPECIFICATIONS:

**Body:** UL 94-V0 rated polyamide-type thermoplastic

**Max. leakage current:**

Line to ground @ 115VAC, 60Hz: 2.0  $\mu$ A

Line to ground @ 250VAC, 50Hz: 5.0  $\mu$ A

**Hipot rating (one minute):**

Line to ground: 2250VDC

Line to line: 1450 VDC

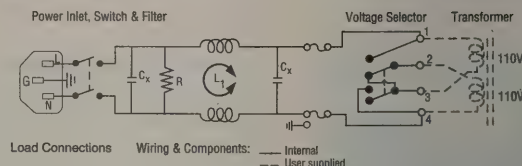

**Operating Frequency:** 50-60Hz

**Rating:** 115-250VAC, 65°C

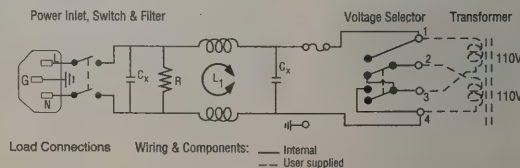

### Filter Performance:

# Accessory Power Outlets & Connectors

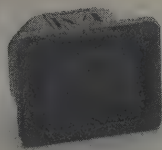

Normally available from stock  
No minimum order

Accessory power connections based on IEC 320. For multiple accessory connections, see the International Power Strip and Jumper Cordset on the following page.

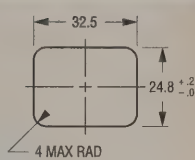

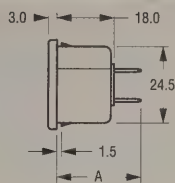

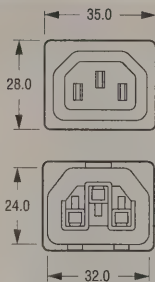

We offer in-house made-to-order cord assembly services; contact us for a quotation.

## Accessory Power Outlets

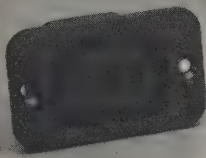

Normally available from stock • No minimum order

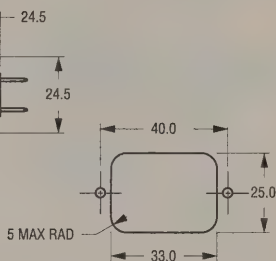

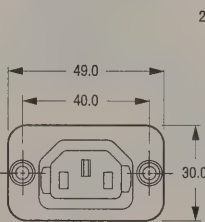

**#8301611:** with solder tabs  
**#8301612:** with 6.3 (.25") solder/QDs  
Accessory power outlet in two contact styles. Push-in mounting for 1.5mm panel. Insulators molded from UL 94-V2 polyamide-type thermoplastic. 65°C. Nickel-plated brass contacts.  
**Approvals:** VDE, IMQ, SEV, FI, OVE, SEMKO, KEMA at 10A/250VAC; UL recognized, CSA certified at 15A/250VAC.  
*Screw mount models also available.*

"A" Dimension:  
solder tabs: 24.1  
QDs: 27.9

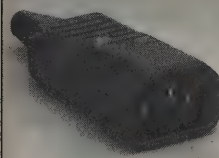

**#83011220:** with 6.3 (.25") QDs  
Accessory power outlet. Special safety feature: line & neutral contacts are shuttered to prevent contact with object other than mating plug. Insulators molded from UL 94-V0 polyamide-type thermoplastic. 65°C. tin-plated lead contacts.  
**Approvals:** VDE, BEAB, SEV, UL recognized, CSA certified at 10A/250VAC.  
Push-in mount model also available.

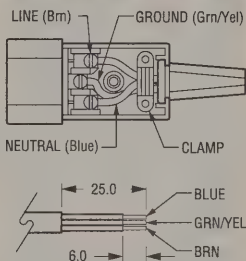

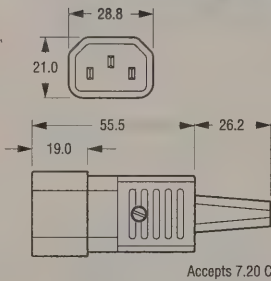

Note: line & neutral are shuttered

## Accessory Power Cable Connectors

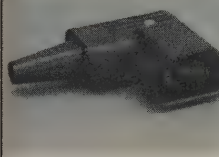

Made-to-order Assembly Services Available

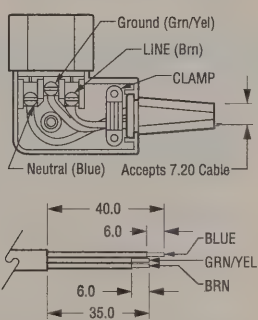

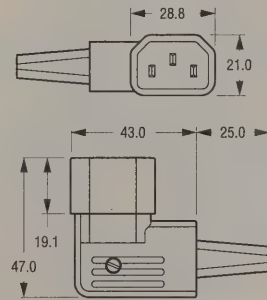

**#83011080:** Cable-mount accessory power connector. Insulator molded from polyamide-type thermoplastic. 65°C. Nickel-plated brass contacts. Screw-type connections.  
**Approvals:** BEAB, VDE, SEV, UL recog., CSA cert. (10A/250VAC)

Accepts 7.20 Cable

**#83011090:** Angled entry cable-mount accessory power connector. Insulator molded from polyamide-type thermoplastic. 65°C. Nickel-plated brass contacts. Screw-type connections.  
**Approvals:** BEAB, VDE, SEV, UL recog., CSA cert. (10A/250VAC)

Accepts 7.20 Cable

Dimensions are in mm

# International Power Strip & Jumper Cords

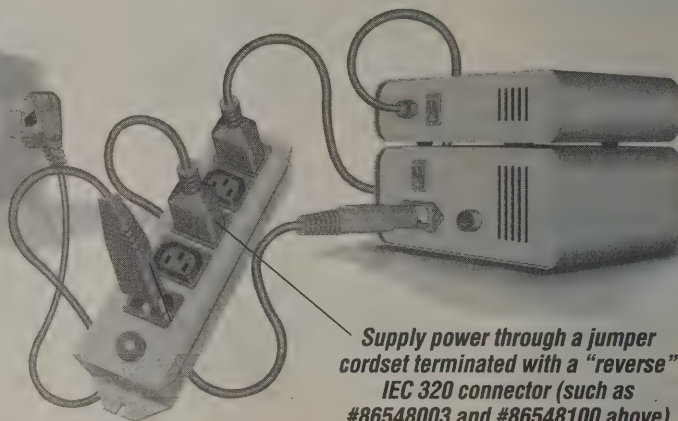

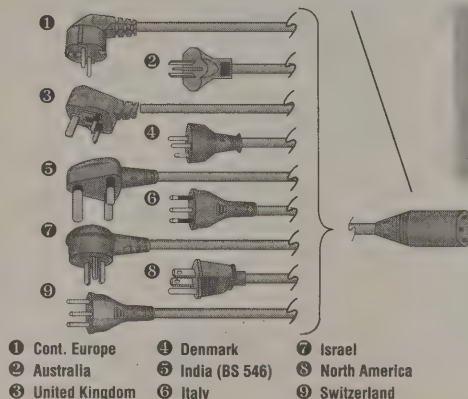

A power distribution system based on IEC 320 (instead of country-specific sockets) is ideal when you are designing a product for both

International and North American markets. See "Universal" Power Distribution System below. All items normally available from stock.

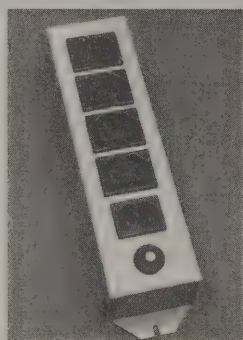

## A "Universal" Power Distribution System based on IEC 320

This power distribution system is based on the standard IEC 320 connector outline which makes it easy to design a power distribution system for both North American and international markets.

*Supply input power to the International Power Strip through a cordset terminated with an IEC 320 connector.*

## International Power Strip

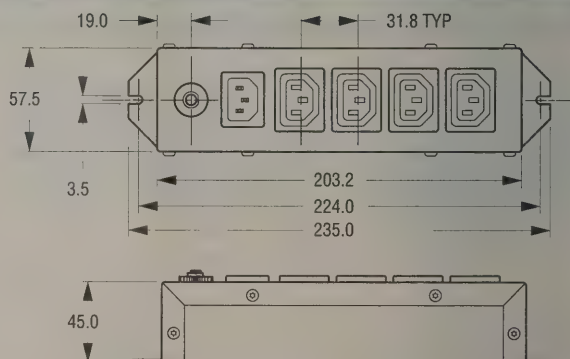

**Now rated at 10 Amps!**

**#85010070:** Interpower™ International power strip contains one IEC 320 power inlet; 4 "reverse" IEC 320 power outlets. Gray metal casing; 10 amp single pole circuit breaker.

**Approvals:** UL recognized, CSA certified, VDE Gutachten (10A/250VAC)

*Dimensions are in mm*

## "Universal" Jumper Cordsets (UL, CSA, SEV & VDE)

**#86548003:** Jumper cordset for use with International Power Strip; meets requirements of North American and international safety agencies. 1 meter long.

**Approvals:** VDE, SEV, UL recog., CSA cert. (10A/250VAC)

**#86548100:** same as 86548003 except 2.5 meters long.

| Part #   | Current Rating | Maximum Temperature    | Color | Length (±0.1m) | Cordage                       |
|----------|----------------|------------------------|-------|----------------|-------------------------------|
| 86548003 | 10A<br>250VAC  | 60°/UL, CSA<br>65°/VDE | Black | 1 meter        | 3 x 18 AWG/SJT PVC Harmonized |
| 86548100 | 10A<br>250VAC  | 60°/UL, CSA<br>65°/VDE | Black | 2.5 meter      | 3 x 18 AWG/SJT PVC Harmonized |

**DESIGNING FOR EXPORT? WE MAKE IT EASY! See also EEM sections 4050, 4300, 5600, & 6000**

Toll-free FAX (800) 645-5360

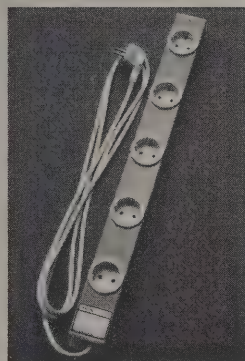

# International Socket Strips

All items normally available from stock.  
No minimum order.

For power distribution systems based on specific socket patterns. See "Universal" Power Distribution System shown on previous page if

you are designing a product for both International and North American markets.

## "Continental Europe" (German)\*

**Continental European socket strip with 5, 9 or 13 CEE 7 sockets** (see below). Cable is 2.5M long, terminated with CEE 7/4 plug. Metal casing. Color: Orange. Current Rating: 16A/250VAC. Approval:

| Part No. | # of skts. | Dimensions (mm)    |
|----------|------------|--------------------|
| 85023050 | 5          | 52W x 38H x 566L   |
| 85023090 | 9          | 52W x 38H x 966L   |
| 85023130 | 13         | 52W x 38H x 1365L* |

\*length includes mounting flange

### With lighted rocker switch

**Continental European socket strip with rocker switch and 4, 8 or 12 CEE 7 sockets** (see below). Cable is 2.5M long, terminated with CEE 7/4 plug. Metal casing. Color: Orange. Current Rating: 16A/250VAC. Approval: VDE.

| Part No. | # of skts. | Dimensions (mm)    |
|----------|------------|--------------------|
| 85003040 | 4          | 52W x 38H x 546L*  |
| 85003080 | 8          | 52W x 38H x 946L*  |
| 85003120 | 12         | 52W x 38H x 1346L* |

\* length includes mounting flanges

### With circuit breaker

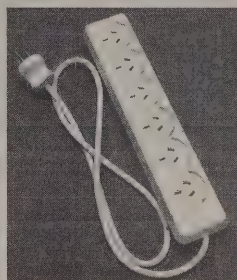

**Continental European socket strip with circuit breaker and 4 CEE 7 sockets.** Cable is 2.5M long, terminated with CEE 7/4 plug. Metal casing. Color: Orange. Current Rating: 16A/250VAC. Approval: VDE.

| Part No. | # of skts. | Dimensions (mm)   |
|----------|------------|-------------------|
| 85013040 | 4          | 52W x 38H x 611L* |

\*length includes mounting flanges

\* Continental European CEE 7 sockets are used in Germany, Austria, Finland, the Netherlands, Norway, Sweden. French and Belgian socket strip (with male grounding pin in socket) also available.

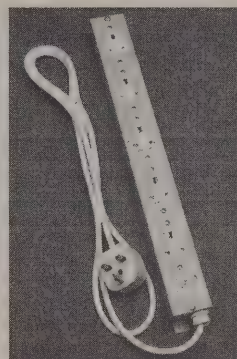

## Australia/New Zealand

**Australian socket strip with six AS 3112 sockets and circuit breaker.** Used in Australia, New Zealand, Fiji, Papua New Guinea. Also used in People's Republic of China. Cable is 1.75M long, terminated with an Australian plug. Current rating: 10A/250VAC. Plastic casing. Color: White. Approval: EANSW.

| Part No. | # of skts. | Dimensions (mm)    |
|----------|------------|--------------------|
| 85010050 | 6          | 64W x 32.5H x 310L |

## United Kingdom

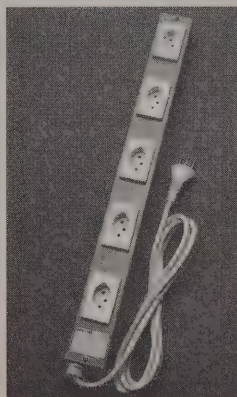

**British socket strip with six BS 1363 sockets and fuse.** Used in the U.K. & Ireland. Cable is 2.4M long, terminated with a BS 1363 plug. Current rating: 13A/250VAC. Metal casing. Color: Gray.

| Part No. | # of skts. | Dimensions (mm)     |
|----------|------------|---------------------|
| 85031052 | 5          | 51W x 38.3H x 474L* |

\* length includes mounting flanges

## Switzerland

**Swiss socket strip with five SEV 1011 sockets.** Cable is 2.5M long, terminated with a SEV 1011 plug. Current rating: 10A/250VAC. Metal casing. Color: Orange.

| Part No. | # of skts. | Dimensions (mm)     |
|----------|------------|---------------------|
| 85030050 | 5          | 51W x 39.5H x 565L* |

\* length includes mounting flanges

# International Plugs & Sockets

All items normally available from stock  
In-house made-to-order assembly services available

International sockets are used for power distribution and in test and burn-in racks for equipment that is being exported (note our International Power Source in EEM Section 4050).

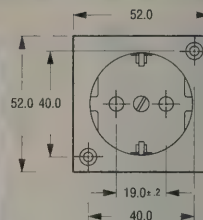

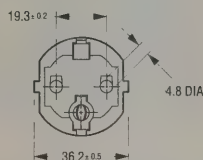

International cords and cordsets are available—see EEM Section 6000. Designer's Kits of International Plugs and Sockets also available.

## "Continental Europe" (German standard)

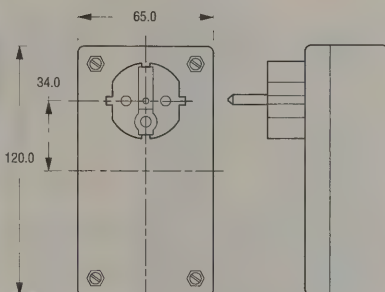

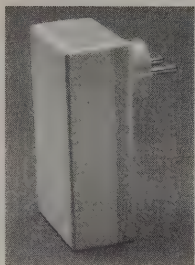

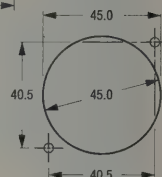

**#88010801:** Cont. European "Schuko" CEE 7/7 plug used in Germany, Austria, Finland, the Netherlands, Norway, Sweden. Color: Gray.

**Approvals:** VDE, OVE, KEMA, NEMKO, SEMKO, SETI, 16A/250VAC

**#88010610:** Cont. European "Schuko" CEE 7 socket used in Germany, Austria, Finland, the Netherlands, Norway, Sweden. Color: Ivory.

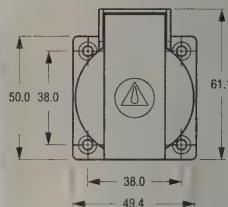

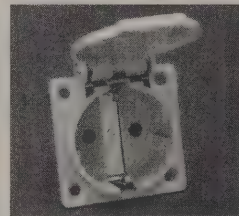

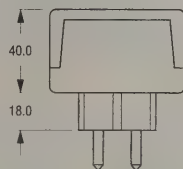

**Approvals:** VDE, KEMA, SEMKO, 16A/250VAC

**#88010120:** Cont. European "Schuko" CEE 7 plug box (no circuitry included) for use in design and manufacture of the power supply or control circuit of your export product. Color: Gray.

**Approvals:** VDE, OVE, KEMA, NEMKO, SEMKO, SETI, 16A/250VAC

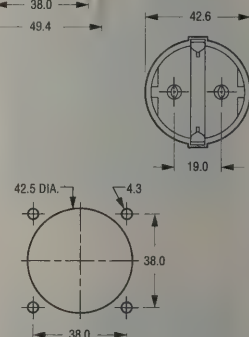

**NOTE:** Europlug, British, and North American models also available

**#88010300:** Cont. European "Schuko" CEE 7 socket with snap cover. Used in Germany, Austria, Finland, the Netherlands, Norway. Mounting box available separately. Color: Gray.

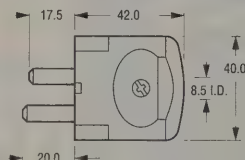

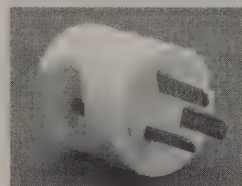

**Approvals:** VDE, NEMKO, SETI, OVE, KEMA, 16A/250VAC

**NOTE:** French/Belgian and Swiss snap-cover models also available

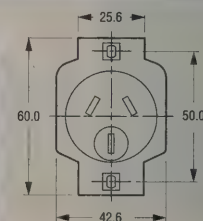

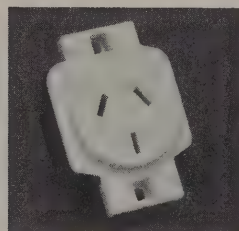

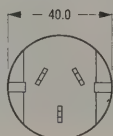

## Australia/New Zealand

In-house made-to-order assembly services available

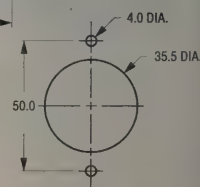

**#88010713:** Australian AS 3112 plug. Color: white.

**Approval:** EANSW, 10A/250VAC

**#88010512:** Panel-mount Australian AS 3112 socket. Color: white.

**Approval:** EANSW, 10A/250VAC

Dimensions are in mm

International Plugs & Sockets, continued

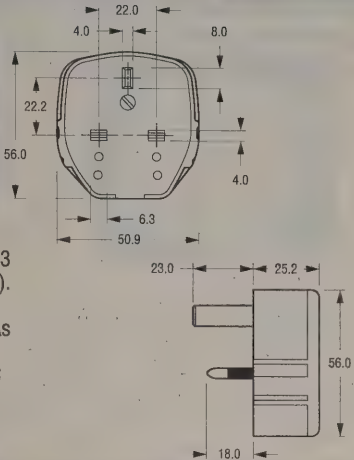

All items normally available from stock

United Kingdom & Ireland

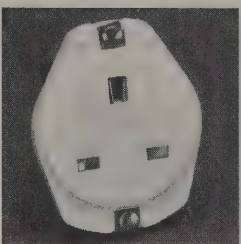

In-house made-to-order assembly services available

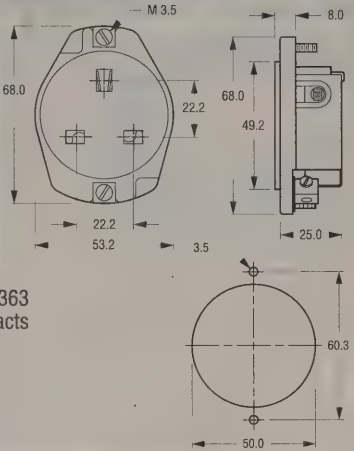

#88010720: British BS 1363 plug (contains 13-amp fuse). Color: white.  
#88010721 (not pictured): As above but black.  
Approvals: ASTA, 13A/250VAC

Top view dimensions: 22.0, 4.0, 8.0, 22.2, 56.0, 6.3, 50.9, 4.0.  
Side view dimensions: 23.0, 25.2, 56.0, 18.0.

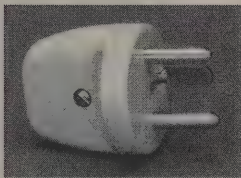

#88010621: British BS 1363 socket. Line and neutral contacts shuttered. Color: white.  
Approvals: BSI, 13A/250VAC

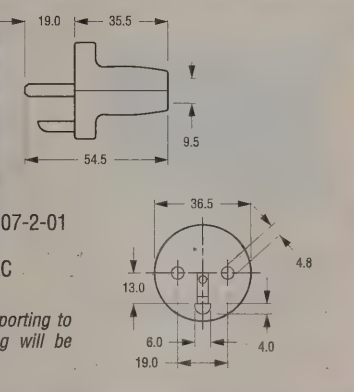

Top view dimensions: 68.0, 22.2, 53.2, 3.5, 8.0.  
Side view dimensions: 68.0, 49.2, 25.0.  
Front view dimensions: 60.3, 50.0.

Denmark

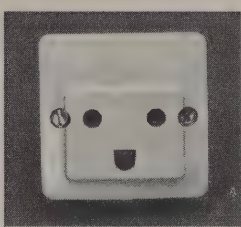

In-house made-to-order assembly services available

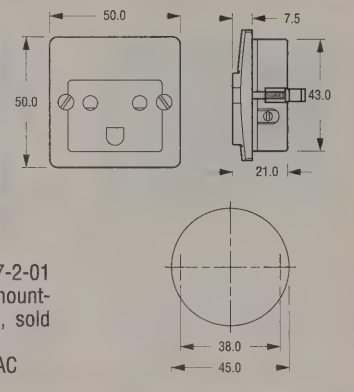

#88010740: Danish Afsnit 107-2-01 plug. Color: gray.  
Approval: DEMKO, 10A/250VAC

Side view dimensions: 19.0, 35.5, 54.5, 9.5.  
Front view dimensions: 36.5, 4.8, 13.0, 6.0, 19.0, 4.0.

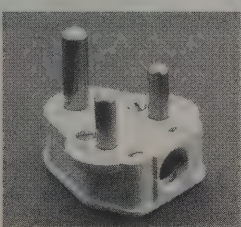

#88010540: Danish Afsnit 107-2-01 socket. Color: gray. Requires mounting bracket, Part #55020100, sold separately.  
Approval: DEMKO, 10A/250VAC

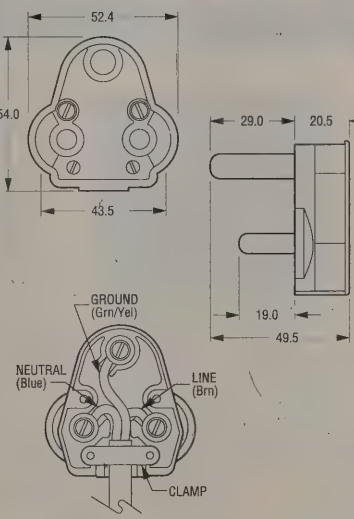

Top view dimensions: 50.0, 50.0, 7.5.  
Side view dimensions: 43.0, 21.0.  
Front view dimensions: 38.0, 45.0.

India (old British standard BS 546)

In-house made-to-order assembly services available

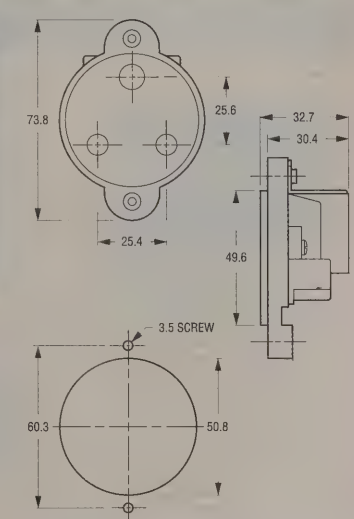

#88010763: Old British standard BS 546 plug used in India & Hong Kong. Color: white.  
Current rating: 15A/250VAC

Top view dimensions: 52.4, 54.0, 43.5.  
Side view dimensions: 29.0, 20.5, 19.0, 49.5.  
Internal wiring diagram labels: GROUND (Grn/Yel), NEUTRAL (Blue), LINE (Brn), CLAMP.

#88010561: Old British standard BS 546 socket used in India & Hong Kong. Color: white. Line and neutral contacts are shuttered. Current rating: 15A/250VAC

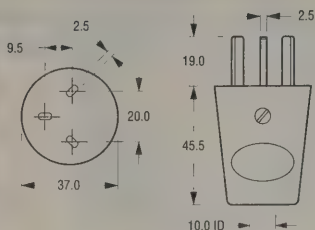

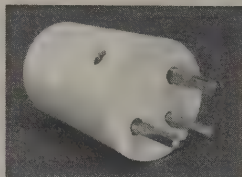

Top view dimensions: 73.8, 25.6, 32.7, 30.4, 25.4.  
Side view dimensions: 49.6.  
Front view dimensions: 60.3, 50.8, 3.5 SCREW.

# International Plugs & Sockets, continued

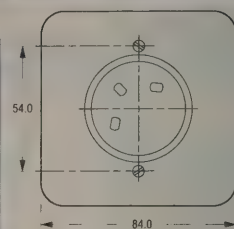

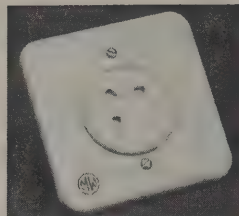

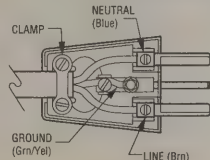

All items normally available from stock.

## Israel

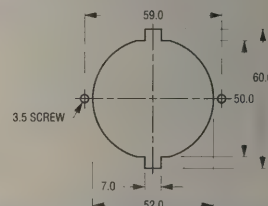

In-house made-to-order assembly services available

**#88010780:** Israeli SI 32 plug.  
Color: white.  
Approval: SII, 16A/250VAC

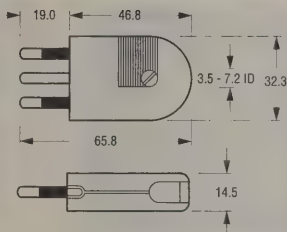

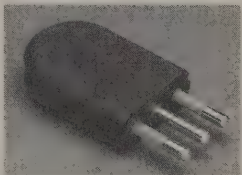

**#88010580:** Israeli SI 32 socket.  
Safety shuttering system reduces possibility of accidental shock.  
Color: white.  
Approval: SII, 16A/250VAC

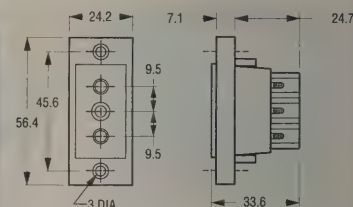

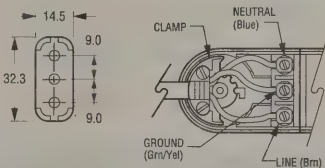

## Italy

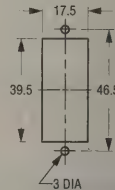

In-house made-to-order assembly services available

**#88010771:** Italian CEI 23-16/VII 10 amp plug.  
Color: dark gray.  
Approval: IMQ, 10A/250VAC

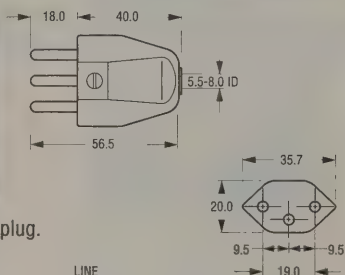

**#88010570:** Italian 10 amp socket.  
Color: brown.  
Approval: IMQ, 10A/250VAC

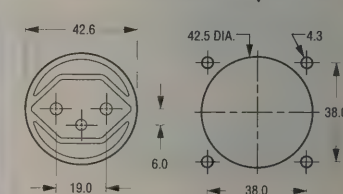

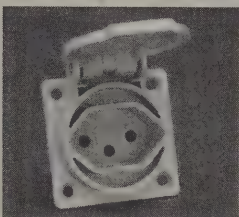

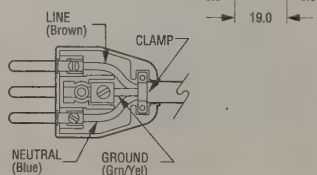

## Switzerland

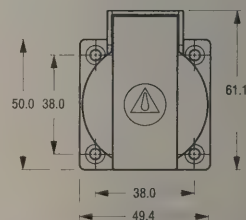

In-house made-to-order assembly services available

**#88010732:** Swiss SEV 1011 plug.  
Color: black.  
Approval: SEV, 10A/250VAC.

**#88010330:** Swiss SEV 1011 socket.  
Mounting box available separately.  
Color: gray.  
Approval: SEV, 10A/250VAC.  
Note: Continental European and French/Belgian snap-cover models also available.

# North American Plugs & Sockets

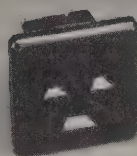

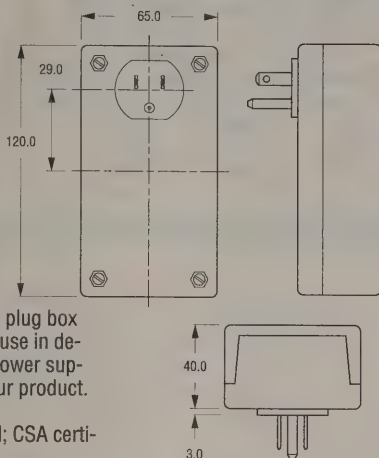

North American plugs, in-line connectors, and sockets rated 15-20A, 125-250VAC. Both straight blade and locking styles are available. Call our Customer Service Department for more information.

## 15A/125VAC Straight blade models (NEMA 5-15)

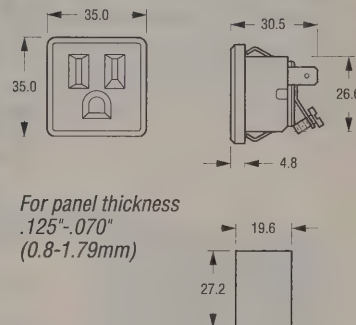

**#88010130:** NEMA 5-15P plug box (no circuitry included) for use in design and manufacture of power supply or control circuit of your product. Color: gray.

**Approvals:** UL recognized; CSA certified, 15A/125V AC/DC.

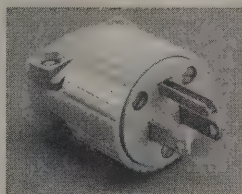

**#88010641:** NEMA 5-15R receptacle. Screw-type wire connections. Color: black.

**Approvals:** UL recognized; CSA certified, 15A/125V

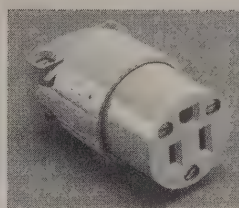

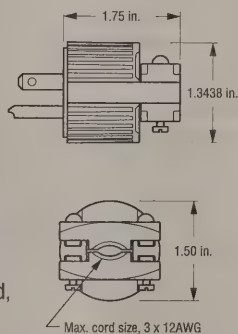

Dimensions are in mm

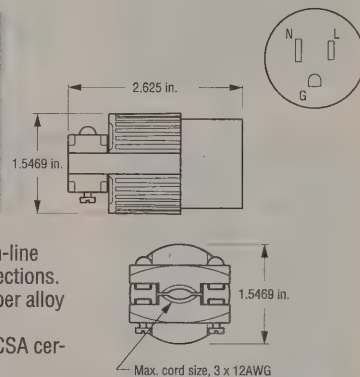

**#88020100:** NEMA 5-15P plug. Screw-type connections. Polycarbonate housing; copper alloy contacts. Color: gray.

**Approvals:** UL recognized; CSA certified, 15A/125VAC.

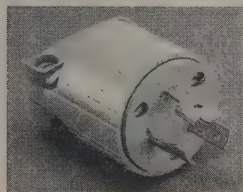

**#88020110:** NEMA 5-15R in-line connector. Screw-type connections. Polycarbonate housing; copper alloy contacts. Color: gray.

**Approvals:** UL recognized; CSA certified, 15A/125VAC

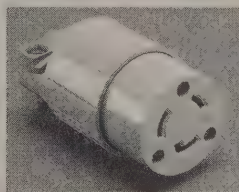

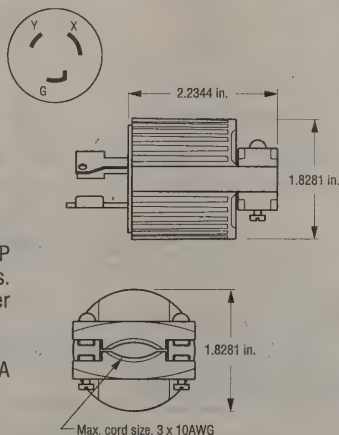

## 20A/250VAC Locking Pair (NEMA L6-20)

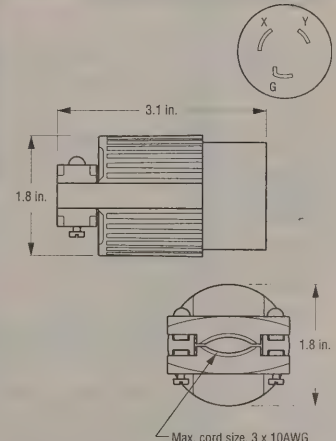

**#88020160:** NEMA L6-20P plug. Screw-type connections. Polycarbonate housing; copper alloy contacts. Color: gray.

**Approvals:** UL recognized; CSA certified, 20A/250VAC

**#88020170:** NEMA L6-20R in-line connector. Screw-type connections. Polycarbonate housing; copper alloy contacts. Color: gray.

**Approvals:** UL recognized; CSA certified, 20A/250VAC

# International Socket Strips—test products before export

The International Socket Strip incorporates seven of the main overseas socket standards in one device. Connect it to your own power source in burn-in racks or test labs where products with international cords or cordsets are being prepared for export; or, use it for receiving inspection on international cords and cordsets.

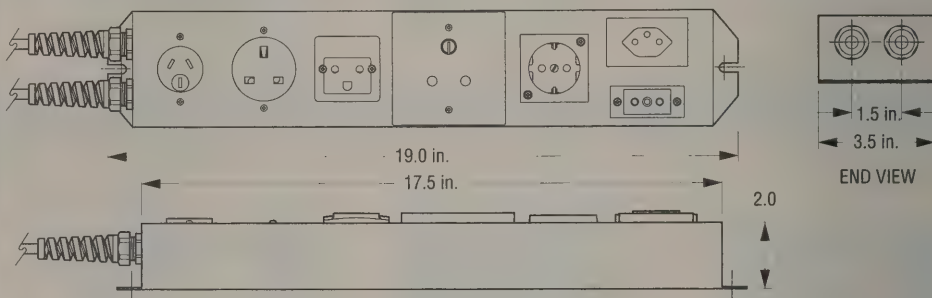

**Installation to your power source:** The International Socket Strip is equipped with two unterminated power cords—one for connection to your 220VAC/50Hz power source, the other to a 240VAC/50Hz power source. Conductor size is 1.5mm<sup>2</sup>—slightly larger than 16 AWG which is 1.23mm<sup>2</sup>. Each circuit is rated at 16 amps max. for all

of the sockets combined. Each cord is 2.5 meters long and clearly marked as to voltage. The jacket and primary insulation are stripped and ready for installation to the appropriate power source. The primary insulation is color-coded in accordance with international standards: green/yellow=ground • brown=line • blue=neutral. Usually available from stock.

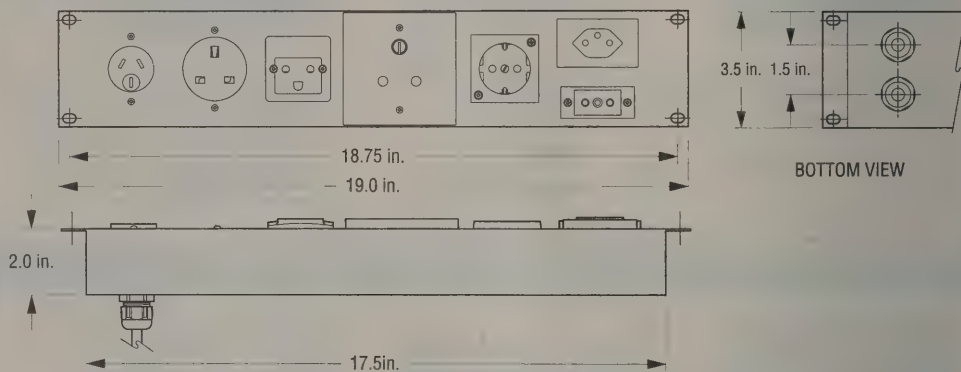

**Note:** Our "International Power Source" converts standard North American input voltage of 120V/60Hz to output voltages of 0-260VAC at 47-150Hz or 150-500Hz; see EEM section 4050.

*Dimensions are in inches*

## #85010101: Table mount model

## #85010111: Rack mount model

### INTERNATIONAL SOCKETS INCLUDED AND THEIR RATINGS:

#### 220VAC/50Hz circuit:

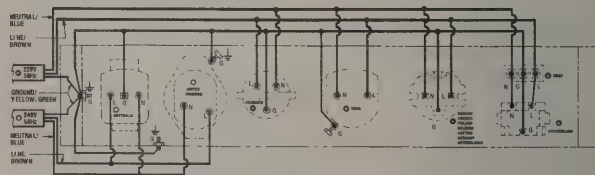

|                       |     |
|-----------------------|-----|
| Cont. Eur. (CEE 7/7)* | 16A |
| Danish                | 10A |
| Italian               | 10A |
| Indian (BS 546)       | 16A |
| Swiss                 | 10A |

#### 240VAC/50Hz circuit:

|                       |     |
|-----------------------|-----|
| Australia/New Zealand | 10A |
| United Kingdom        | 13A |

\* CEE 7/7 is used in Austria, Finland, Netherlands, Norway, Sweden, Germany; variation is used in France and Belgium.

**INTERNAL WIRING:** Each circuit is rated at 16 amps maximum for all of the sockets combined.

The following information is excerpted from our catalog. Please contact us for your complete guide to the components available from RDI Electronics.

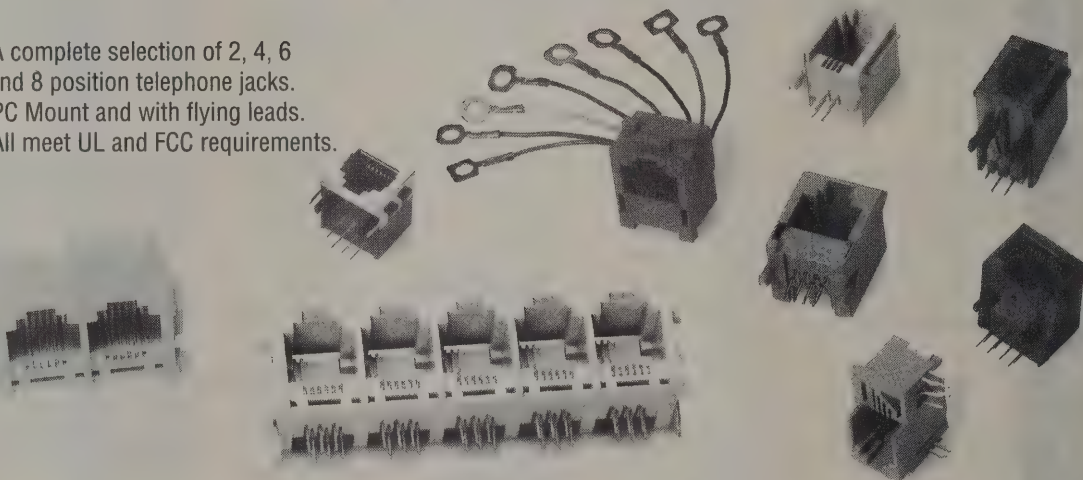

## JACKS

Barrel, Stereo panel and PC Mount, DIN and Mini-DIN, Sub-Miniature enclosed, RCA Type, Coaxial

## TELEPHONE JACKS

- A complete selection of 2, 4, 6 and 8 position telephone jacks.
- PC Mount and with flying leads.
- All meet UL and FCC requirements.

## AC RECEPTACLES

### AC INLETS

- Panel or Chassis mount.
- With or without fuses.
- UL/CSA and VDE Approvals.

FROM PROTOTYPE TO PRODUCTION, SPECIFY RDI ELECTRONICS FOR QUALITY, SERVICE AND COMPETITIVE PRICING.

RDI Electronics, Inc.,/ Dept. E, 147 Palmer Ave., Mamaroneck, NY 10543 Tel: 914-777-7000/ Fax: 914-777-7070

## CONNECTORS

### D-SUB TYPE

- Right angle, vertical and high density PC Mount.
- Panel & Chassis Mount.
- UL/CSA Approved.

#### MATERIAL AND FINISH

**Shell** Steel zinc plated or tin plated

**Bracket** Brass Strip-H, Tin plated

**Pin contact** Phosphor bronze gold plated over nickel

**Rivet** Brass, nickel plated

**Insulator** PBT with glass fiber reinforced UL-94-V0,

**Color** Black

#### SPECIFICATIONS

**Rated Current** 5A

**Rated Voltage** 300V DC

**Withstand Voltage** 500V (r.m.s.) AC for 1 min

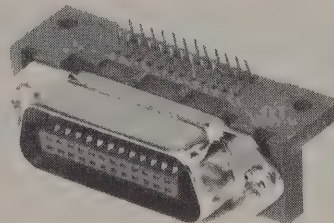

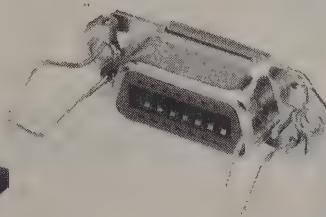

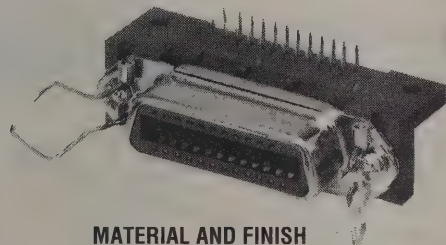

**Insulation Resistance** More than 1000M $\Omega$  Max at 500DC

**Dielectric Strength** 1000V for one min

**Temperature** -55°C~+105°C

### CENTRONIC TYPE

- Right angle and vertical PC Mount.
- I.D.C. in-line type.
- UL/CSA Approved.

#### MATERIAL AND FINISH

**Shell** Steel nickel plated

**Bracket** Steel tin plated

**Screw** Brass nickel plated

**Pin Contact** Phosphor bronze gold plated over nickel

**Insulator** PBT with glass fiber reinforced UL-94-V0,

**Color** Blue

#### SPECIFICATIONS

**Rated Current** 5A

**Rated Voltage** 500V (r.m.s.) AC for 1 min

**Insulation Resistance** More than 1000M $\Omega$  Max at 500DC

**Contact Resistance** 25 m $\Omega$  max

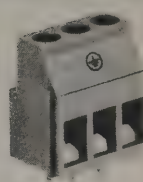

**Dielectric Strength** 1000V for one min

**Temperature** -55°C~+105°C

## Riacon® Terminal Strips

### The Best Less Money Can Buy.

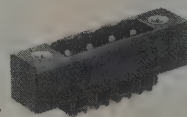

Up to now you've only been able to buy RIACON electronic terminal strips under the Buchanan name. But now you can get the full line of these versatile terminal strips from your distributor, delivered directly from the RIA corporation — the makers of RIACON terminal strips — with an even greater selection. We're introducing 13 new models you haven't seen before.

RIACON electronic terminal strips give you more connection options, more sizes, more shapes, more features — all with the high quality and reliable performance you're looking for. And RIA can custom design a connector with the pin length, mounting method, or even color to do your job.

Call (908-389-1300) or FAX (908-389-9066) for our catalog.

## Get More from RIACON connectors.

RIACON printed circuit board terminal strips & connectors for industrial & commercial field/factory wiring applications provide the widest variety of connection options, sizes, shapes, & features available. Styles include one-piece, two-piece pluggable and single-pole terminations. Centerlines range from 3.5mm (.138"), 5mm(.197"), 5.08mm (.200") up to 7.62mm (.300"). Wire protector & lift system termination versions. UL, CSA & VDE rated. Custom designed configurations can also be supplied. Call today for our catalog.

### NEW!

#### Type 165 Plug-in Mini Terminal Strip with a Screw-Type Terminal, 3.5mm(.138") Centerline

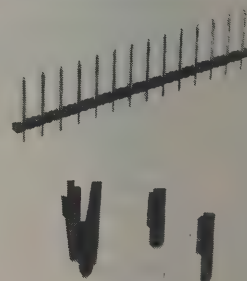

The new miniature (plug-in) terminal strip is designed to minimize the amount of board space required for an interconnection. A 3.5mm (.138") centerline, 8.9 (.351") width and 10mm (.394") height provide the smallest dimensions on the market. See pages that follow for more information.

### NEW!

#### Accessories for Plug-in Miniature Terminal Type 165

The range of field applications is increased with the addition of various accessories available with Type 165. Pin strip 24 provides a 2 piece connection with plug-in terminal strip Type 165. Type 24 is available in 2-24 position (3.5mm=.138") & 2-12 (7mm=.276"). Coding pins prevent misalignment.

**NEW!**

## Plug-in Mini Terminal Strip With A Screw-Type Terminal Type 165 - 3.5mm (.138") Centerline

### Description

A reliable electrical and mechanical connection is formed when the miniature terminal strip is plugged on to the header strip which features 1.3mm (.051") diameter pins. This allows easy pc board exchange for field servicing.

### The following accessories are available

Pin strip header Type 24 for vertical plug-in connections. Mounting flanges for 1mm (.040") and 1.5mm (.062") thick circuit boards. Coding pins — short or long.

### Configurations

2-24 circuit versions 3.5mm (.138") centerline. • 2-12 circuit versions 7.0mm (.276") centerline. • Dark brown color. Other colors available upon request. • Standard version is without numbering. • Numbering is available 1-xx upon request.

### Materials

**Molding** — Polyamid 6.6 (unbreakable), Temperature range: -40°C to +100°C, UL 94-V2

**Terminal body** — Brass 5µm tin plating over 2µm Ni plating.

**Terminal screw** — M2, Steel Zinc plated and yellow chromated

**Wire protection** — CuNi 18 Zn 20 — New Silver

| 7                         | 31024207 |             |          |

### Materials

**Plug strip** — Polyamid 6.6 (unbreakable), Temperature range: 40°C to 100°C, UL 94-V2

**Pin** — Brass 5µm Silver over 2µm Ni.

**Pin Spacing** — 3.5mm (.138") or 7mm (.276")

### Mounting Flange

These connectors are designed to lock onto 1mm (.040") and 1.5mm (.062") thick pegboards. The mounting flanges lock securely onto the terminal strip molding.

### Part number

| Mounting flange for... |             |
|------------------------|-------------|
| Short coding pin       | 720158-01-0 |
| Long coding pin        | 720158-02-0 |

### Coding Pin

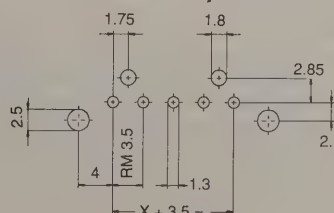

The coding pin prevents misalignment of the terminal strip to the pin header.

### Part number

|                  |             |
|------------------|-------------|
| Short coding pin | 720159-01-0 |
| Long coding pin  | 720159-02-0 |

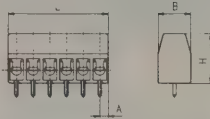

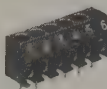

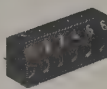

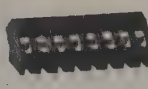

### Circuit board hole pattern

| mm   | inch |
|------|------|
| 1.3  | .051 |
| 1.75 | .069 |
| 1.8  | .071 |
| 2.1  | .083 |
| 2.5  | .099 |
| 2.85 | .112 |
| 3.5  | .138 |
| 4.0  | .157 |

## Part Numbering System

### A. Hot stamp options

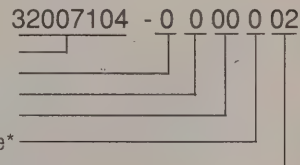

Standard P/N  
Series Type  
Center Spacing  
# of Positions  
Color of the housing standard style\*  
0 = standard  
Hot stamp options  
9 = Numbers left to right (1 2 3 4 ...)  
8 = Numbers right to left (4 3 2 1 ...)  
7 = Numbers upside down (4 3 2 1 ...)  
6 = Numbers upside down (1 2 3 4 ...)

### B. Plating options

Available for pluggable terminal types and headers only.  
When ordering plating options prefix part number with 32.

Part number options style  
Color of the housing standard style\*  
Hot stamp standard style\*  
Pin length standard style\*  
Screw size and material standard style\*  
Plating options  
02 = Gold (.000012")  
04 = Gold (.000030")

\* Various options on request.

Minimum order quantity for hot stamp options, plating and all other special options are 3000 circuits per item.

## AC POWER CONNECTORS AND PLUGS •

International Standards: CEE, IEC, DIN, SEV, SNV, EN

### Flange mount type - Class I

6100.3100 solder tabs (3.5 x 0.8mm)  
6100.3200 quick connect (4.8 x 0.8mm)  
6100.3300 quick connect (6.3 x 0.8mm)

UL, CSA 15A/125V VDE, SEMKO, SEV 10A/250V

### Flange mount type - Class II

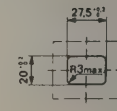

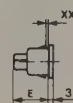

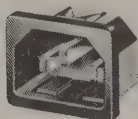

6102.3100 solder tabs (3.5 x 0.8mm)  
6102.3200 quick connect (4.8 x 0.8mm)  
6102.3300 quick connect (6.3 x 0.8mm)

E = solder 20.5 mm or quick connect 23.5mm

### Snap-in mount type - Class I

6100.41XX solder tabs (3.5 x 0.8mm)  
6100.42XX quick connect (4.8 x 0.8mm)  
6100.43XX quick connect (6.3 x 0.8mm)

UL, CSA 15A/125V VDE, SEMKO, SEV 10A/250V

### Snap-in mount type - Class II

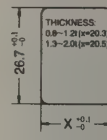

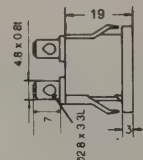

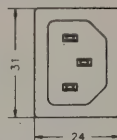

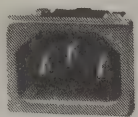

6102.51XX solder tabs (3.5 x 0.8mm)  
6102.52XX quick connect (4.8 x 0.8mm)  
6102.53XX quick connect (6.3 x 0.8mm)

XX = panel thickness: 1.0, 1.2, 1.5, 2.0, 2.5, 3.0mm (e.g. 6100.5110=1.0mm)

E = solder 22.5 mm or quick connect 25.5mm

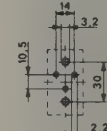

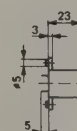

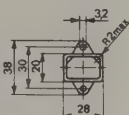

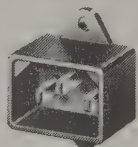

### Snap-in mount type - Class I

UL, CSA 15A/125V  
VDE, SEMKO, SEV 10A/250V  
4300.0704

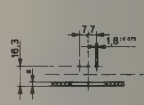

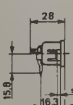

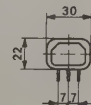

### PC board Flange mount type - Class I

UL, CSA 10A/250V  
VDE, SEMKO, SEV 10A/250V  
4300.0076

### PC board Snap-in mount type - Class I

UL, CSA 15A/125V  
VDE, SEMKO, SEV 10A/250V  
6130.56XX

XX = panel thickness: 1.0, 1.2, 1.5, 2.0, 2.5, 3.0mm (e.g. 6130.5610=1.0mm)

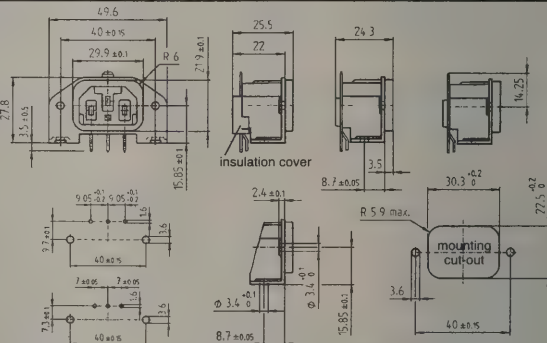

### PC board Flange mount type - Class I

UL, CSA 15A/250V  
VDE, SEMKO, SEV 10A/250V

GSP1.3101.1 9.05/9.7mm terminal spacings, holes for cylindric M3 screws, solder/quick-connect ground terminal 4.8x0.8mm (90° to connector axis)  
GSP1.4111.1 7.0/7.3mm terminal spacings, holes for cylindric M3 screws, solder/quick-connect ground terminal 4.8x0.8mm (90° to connector axis) with mounted insulation cover

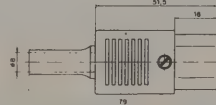

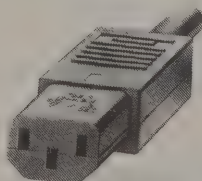

Request full-line catalog for complete ordering information.

Options include: flange for M3 or self-tapping 3mm screws, pre-inserted nuts, four different pcb terminal spacings, solder/quick-connect ground terminal in 4.8 x 0.8mm or 6.3 x 0.8mm for top or rear access, insulation cover (mounted or separate), protection class II (without ground)

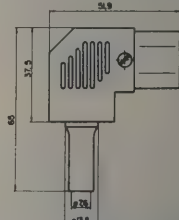

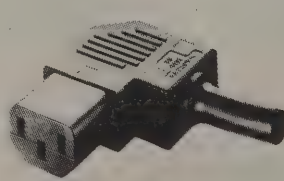

### Plug with straight cable entry - Class I

UL, CSA, VDE, SEMKO, SEV 10A/250V  
4300.0602

### Plug with angled cable entry - Class I

UL, CSA 10A/250V  
VDE, SEMKO, SEV 10A/250V  
4300.0606

# eem/electronic engineers master

## 4,400 PAGES OF TECHNICAL DATA AT YOUR FINGERTIPS!

If you don't have your own EEM/ELECTRONIC ENGINEERS MASTER catalog, you can obtain your own copy by ordering now.

Write for your copy or order by telephone as described below.

EEM is the world's most comprehensive and authoritative catalog of electronic products. With over 4,400 pages of technical data from nearly 1,000 manufacturers, you can find the product you need, when you need it, with a minimum of time and effort.

Organized in four separate and "stand alone" volumes, EEM can save you countless hours of search time and - like no other reference in the industry - insure that you find the right product for the job.

### THE 1993/94 4 VOLUME SET CONTAINS:

**VOLUME A** - Electronic Components

**VOLUME B** - Electromechanical, Electro-optical, & Military Components

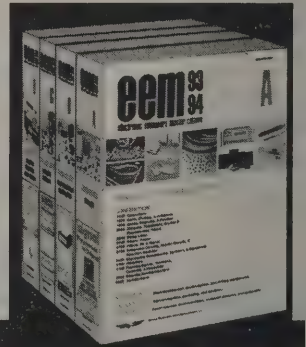

**VOLUME C** - Interconnections, Packaging, & Hardware

**VOLUME D** - Power Sources, Instrumentation, Computer Products, & Equipment

### IT'S EASY TO ORDER...

- You can order the 1993/94 EEM simply by charging it to your VISA or MasterCard. To place your credit card order call now: 1-800-833-7138.
- Or mail your purchase order and check for \$95.00\* plus sales tax to :  
EEM/Hearst Business Publishing  
645 Stewart Avenue  
Garden City, NY 11530  
Att: Marie Botta  
(516) 227-1300

**ORDER  
YOUR  
COPY  
NOW!**

\*Price valid in USA only. Request price for delivery outside the USA.

*EEM is published annually in October.*

# SHOGYO BATTERY HOLDERS & SNAPS

Your design deserves Shogyo quality and reliability.

You deserve...

Shogyo Service...comprehensive, responsive and fast  
Shogyo Professionalism...the helpful experience you need

Shogyo Prices...always competitive, usually better  
and...

Shogyo Selection...with complete custom design capabilities

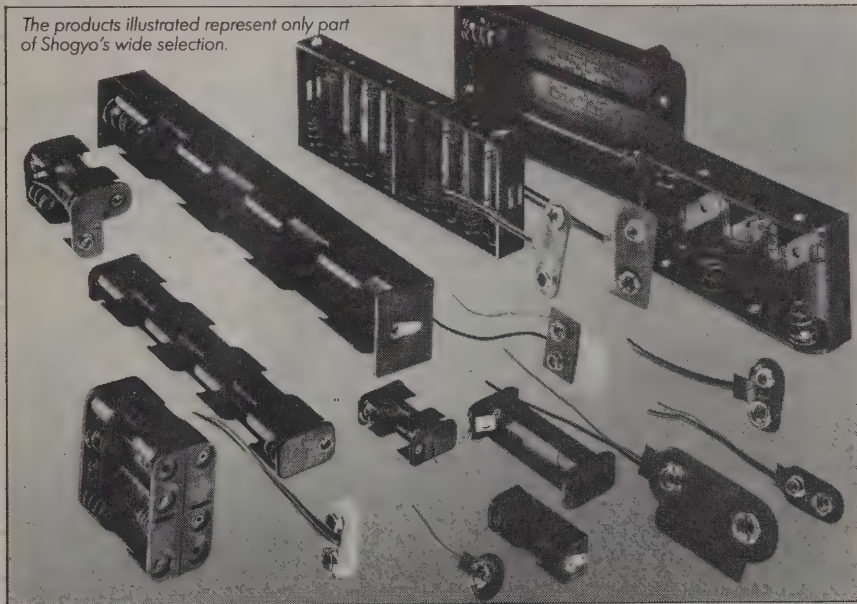

Including a diverse offering of:

- D, C, A, AA, AAA holders.
- 1, 2, 3, 4, 6, 8, 10 cell holders.
- Specialty holders (eg. two C cell/one 9V holders).
- Standard and high-retention holders.
- Holders and snaps with PC mountable pins.
- Holders with pre-fitted mounting holes; battery snaps, lead wires, or solder terminals; black, white or metal

finishes; and polyethylene, UL 94 VO or stainless steel construction.

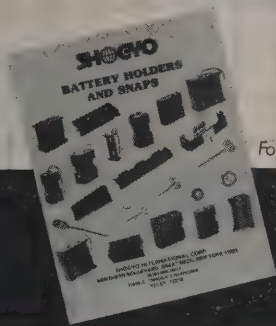

- Snaps in your choice of mountings, or unmounted.
- Snaps made from stainless steel or extra high-retention phosphorous-bronze.
- Hand straps in nylon, vinyl and cloth, your choice of lengths and attachment devices.
- And much more.

The products illustrated represent only part of Shogyo's wide selection.

For immediate assistance and specific information on the product(s) you require:  
Dial 516-466-0911 or  
FAX 516-466-0922

For complete product listings and specifications, request our free catalog.

# SHOGYO

# SHOGYO CORD SETS AND CABLE ASSEMBLIES

Your design deserves Shogyo quality and reliability.

You deserve...

Shogyo Service... comprehensive, responsive and fast  
Shogyo Professionalism... the helpful experience you need

Shogyo Prices... always competitive, usually better

and...

Shogyo Selection... with complete custom design capabilities

Including a diverse offering of:

• Telecommunication:

coiled, straight, round, flat, or oval; copper, stranded or tinsel; with 4, 6 or 8-position modular plugs or spade lugs; and keyed or un-keyed for mating with connectors

• Audio:

shielded, unshielded, single or multi-conductor, with molded plugs and in-line jacks

• Zip:

standard or custom lengths, gauges, insulation thicknesses and jacket colors, with DC or phone plugs in a variety of sizes

• Computer/Video:

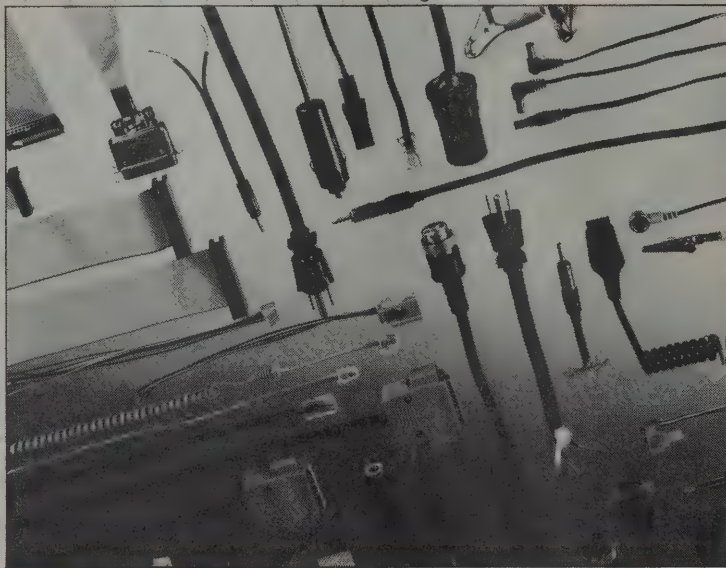

(from 9-50 pins, male or female; plastic or metal, low-profile, edgewise or multi-polar), DIN cables produced to spec (available with shielding), and RCA phono

• Power:

European or American, single or multi-conductor, custom made to specified current and temperature ratings, standard SPT-1 & 2, ST, SVT, SJT, XT or PXT, UL/CSA approved

And featuring:

- A comprehensive selection of lengths, thicknesses, coilings, and end terminations

The products illustrated represent only part of Shogyo's wide selection.

For immediate assistance and specific information on the product(s) you require:

Dial 516-466-0911 or FAX 516-466-0922

# SHOGYO CONNECTORS, JACKS & PLUGS

Your design deserves Shogyo quality and reliability.

You deserve...

Shogyo Service... comprehensive, responsive and fast  
Shogyo Professionalism... the helpful experience you need

Shogyo Prices... always competitive, usually better  
and...

Shogyo Selection... with complete custom design capabilities

Including a diverse offering of miniature and microminiature:

• Connectors:

modular, panel mount, chassis mount, pin printed circuit mount, DIN, coaxial cable, cable, miniature, consent, feeder consent, tube socket, BNC, UHF, and MIC

• Jacks:

RCA phono and chassis mount, communications, phone, multi-conductor, closed and open circuit, stereo, in-line, barrel, sub miniature enclosed phone, PC mount, panel mount, DC, open frame, DC power, earphone, DIN, headphone, combination, auto an-

tenna, pin polarized, and banana

• Plugs:

phone, communication, barrel, microphone, DC, automobile, automobile antenna, DIN, RCA phono, pin, coaxial, banana, solderless, pin tip, and polarizing

• Modular telephone apparatus:

a full line of jacks, connectors, handset and line cords

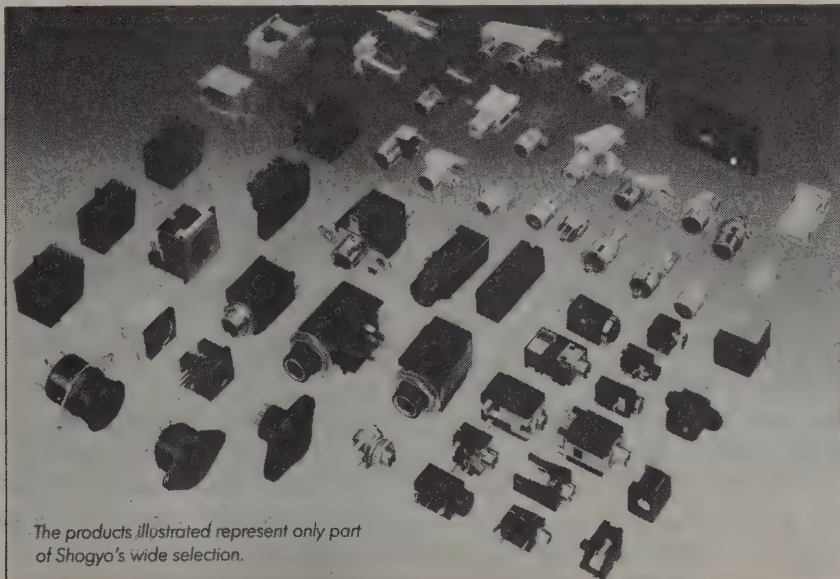

• Terminal boards, binding posts, barrier strips, clips, and fuse holders

And featuring:

• Shielding

• A wide variety of angles, mountings, sizes and shapes

• Mating components for virtually all items

The products illustrated represent only part of Shogyo's wide selection.

For immediate assistance and specific information on the product(s) you require:

**SHOGYO**

**FOR THE JAPANESE,  
SHOKAI  
MEANS  
INTRODUCTION**

## **WHAT DOES SHOKAI MEAN FOR YOU? (HINT: IT MAKES YOUR IDEAS PROFITABLE)**

Let's face it. As a source for electronic and electromechanical components, the quality and pricing of the Far East can't be matched on our side of the ocean. But you can't go to the Far East whenever you need to source a product.

That's why, if up to now, your knowledge of Japanese was limited to "sushi" and "sayonara", we respectfully suggest that you learn another word . . . SHOKAI® . . . Your introduction to the Far East.

SHOKAI® is an American company, with over 30 years experience manufacturing and importing components from the Far East. We were serving American manufacturers long before everybody with a fax machine and a foreign telephone book could claim to be an overseas supplier. And we will be here long after they are gone.

We speak your language. We understand you - your time frames - your requirements - your problems - the quality and personal attention you and your customers demand. As hundreds of "Top 500" companies have learned, let SHOKAI® be your source for components from Japan, Taiwan, Hong Kong and the rest of the Far East.

### OUR PRODUCT LINE INCLUDES:

- Adapters
- Battery Holders
- Cable Assemblies
- Circuit Breakers
- Connectors (Audio, Battery, DC Power, DIN, Cable, Circular, D-Sub, Microphone, PCB, Telephone, Video)
- Fuses & Holders
- Lenses- Optical & Magnifying
- Mirrors
- Sockets (Card-Edge, CRT, IC, PGA, SIMM)  
Terminals and Terminal Blocks
- Switches (DIP, Illuminated, Keyboard, Momentary, Pushbutton, Rocker Rotary, Slide, Toggle)

And many more. Try us. You can start by requesting a catalog. Let us know what product you're looking for. Or better yet, tell us exactly what you want. You won't be disappointed.

Why don't you use your new word as soon as possible. You won't have to eat raw fish to try it. Just pick up your phone. We're waiting for your call.

#### Specifications

- Rating: 0.1A @ 12V DC
- Insulation Resistance: 100MΩ min. @ 500VDC
- Initial Contact Resistance: 100mΩ max.
- Breakdown Voltage: 500VAC for 1 minute

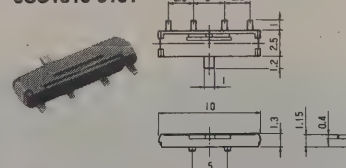

- Stroke: 1.5mm.
- Operating Force: 120±80gf
- Life: 10,000 cycles
- Changeover timing: Non-Shorting

## Part Number Description

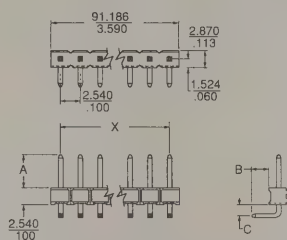

| Series                     | 2H | S | XX | S | XX | -XX | Tail Length           |
|----------------------------|----|---|----|---|----|-----|-----------------------|
| 2H "A" dim. = (5.84)/.230" |    |   |    |   |    |     | 01 = B = 3.75/.125    |
| 3H "A" dim. = (8.08)/.318" |    |   |    |   |    |     |                       |
| No. of Rows                |    |   |    |   |    |     | Plating               |
| S = Single Row             |    |   |    |   |    |     | 02-tin                |
| D = Dual Row               |    |   |    |   |    |     | 05-5µ selective gold  |
|                            |    |   |    |   |    |     | 15-15µ selective gold |
|                            |    |   |    |   |    |     | 30-30µ selective gold |
| Size                       |    |   |    |   |    |     | Post                  |
| No. of pins/row 01 thru 36 |    |   |    |   |    |     | S = Straight          |

EXAMPLE: 2HD30S02-01

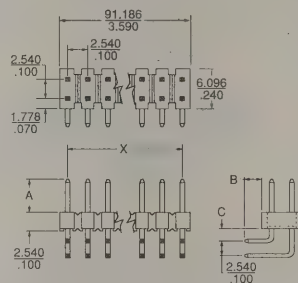

DESCRIPTION: A 2H series dual row pin header with 30 pins in each row, straight pins tin plated overall with .125" tail length.

- NOTES: 1. Consult factory for plating and product specifications.  
2. Available with PCB retention tails; for ordering information consult factory.  
3. For high temperature applications add the prefix "H" to the part number.  
Example: H2HSXXX-XX. Material: High temperature thermoplastic. Color: tan.  
4. Consult factory for other tail lengths.

## Single Row - Right Angle 2H, 3H SERIES

## Dual Row - Right Angle 2H, 3H SERIES

## Part Number Description

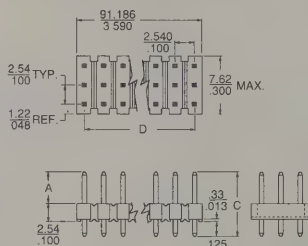

| Series                     | 2H | S | XX | R | XX | -XX | Tail Length           |
|----------------------------|----|---|----|---|----|-----|-----------------------|
| 2H "A" dim. = (5.84)/.230" |    |   |    |   |    |     | 01 = B = 3.75/.125    |
| 3H "A" dim. = (8.08)/.318" |    |   |    |   |    |     | C = 1.52/.060         |
| No. of Rows                |    |   |    |   |    |     | Plating               |
| S = Single Row             |    |   |    |   |    |     | 02-tin                |
| D = Dual Row               |    |   |    |   |    |     | 05-5µ selective gold  |
|                            |    |   |    |   |    |     | 15-15µ selective gold |
|                            |    |   |    |   |    |     | 30-30µ selective gold |
| Size                       |    |   |    |   |    |     | Post                  |
| No. of pins/row 01 thru 36 |    |   |    |   |    |     | R = Right Angle       |

EXAMPLE: 3HD22R02-01

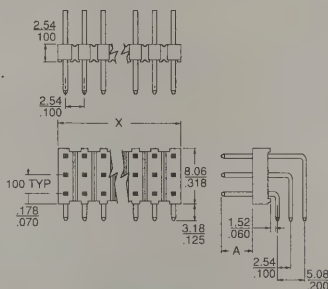

DESCRIPTION: A 3H series dual row pin header with 22 pins in each row, right angle pins tin plated overall.

- NOTES: 1. Consult factory for plating and product specifications.  
2. Available with PCB retention tails; for ordering information consult factory.  
3. For high temperature applications add the prefix "H" to the part number.  
Example: H2HSXXX-XX. Material: High temperature thermoplastic. Color: tan.

## Three Row - Straight 2H, 3H SERIES

## Three Row - Right Angle 2H, 3H SERIES

## Part Number Description

|                            |    |   |    |   |    |     | R = Right Angle       |

EXAMPLE: 2HT16R15-01

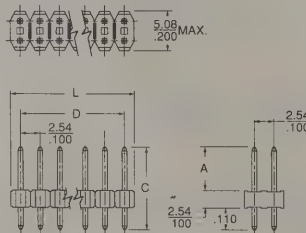

DESCRIPTION: A 2H series three row pin header with 16 pins in each row, right angle pins with 15µ selective gold plating and tin plated tails.

- NOTES: 1. "Straight" only.  
2. Consult factory for plating and product specifications.  
3. Available with PCB retention tails; for ordering information consult factory.  
4. For high temperature applications add the prefix "H" to the part number.  
Example: H5HSXXX-XX. Material: High temperature thermoplastic. Color: tan.  
5. Consult factory for other tail lengths.

## Economy - Single Row 2L, 3L SERIES

## Economy - Dual Row 2L, 3L SERIES

## Part Number Description

| Series                     | 2L | S | XX | S | XX | -XX | Tail Length           |
|----------------------------|----|---|----|---|----|-----|-----------------------|
| 2L "A" dim. = (5.84)/.230" |    |   |    |   |    |     | .110" Standard        |
| 3L "A" dim. = (8.08)/.318" |    |   |    |   |    |     |                       |
| No. of Rows                |    |   |    |   |    |     | Plating               |
| S = Single Row             |    |   |    |   |    |     | 03-pre-plated tin     |
| D = Dual Row               |    |   |    |   |    |     | 05-5µ selective gold  |
|                            |    |   |    |   |    |     | 10-10µ selective gold |
|                            |    |   |    |   |    |     | 06-5µ gold all over   |
|                            |    |   |    |   |    |     | 11-10µ gold all over  |
| Size                       |    |   |    |   |    |     | Post                  |
| No. of pins/row 01 thru 40 |    |   |    |   |    |     | S = Straight          |

EXAMPLE: 2LD12S10-01

DESCRIPTION: A 2L series dual row straight pin header with 12 pins in each row, 10µ selective gold plated with tin plated tails.

SPECIFICATIONS: • Housing Material: Glass filled thermoplastic, UL flammability rating 94 V-0. Color, black.  
• Contact Material: Phosphor bronze

- NOTES: 1. L = (No. of Positions - 1) X (.100) + .090  
2. D ± .005 = (No. of spaces) X .100  
3. Consult factory for plating and product specifications.

EXAMPLE: SCD-25-1.45-.318-15

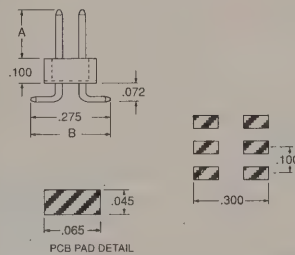

DESCRIPTION: Stacking connector dual 25 (50 pins) with the "A" dimension of 1.45, post height of .318". Selective plating 15 micro-inches of gold with tin plated tails.

- NOTES:
- Consult factory for plating and product specifications.
  - Available with PCB retention tails; for ordering information consult factory.
  - For high temperature applications add the prefix "H" to the part number.  
Example: HSCSXXXSXX-XX. Material: High temperature thermoplastic. Color, tan.
  - Consult factory for other tail lengths.

EXAMPLE: 2M3HD25S30-01

DESCRIPTION: A 3H series surface mounted dual row pin header with 25 pins in each row, 30µ selective gold plating and tin plated tails.

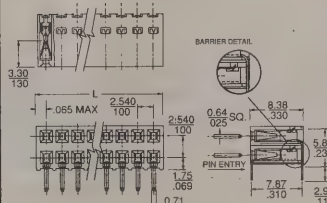

- NOTES:
- Consult factory for plating and product specifications see page 14.
  - Material: High temperature thermoplastic. Color, tan.
  - Available in other "A" and "B" dimensions. Consult factory.

## .025" Square, Receptacles Dual Beam Box

# Great Connections to Global EMC Compliance

## Solve your EMI problems with the industry's most complete line of filtered interconnect products

### EMI Filtering Expertise

Satisfying your requirements for EMC and physical packaging can be a challenging process. We can help. Our foundation as a producer of capacitors, EMI filters and filtered connectors gives us the design expertise and manufacturing flexibility to develop the most effective and space efficient solution to your EMI problem.

We offer a broad range of EMI filtered connectors including economical, capacitive types, high performance Pi filter connectors, and high reliability connectors for commercial and military applications.

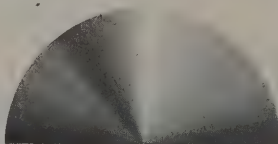

### Our Complete Filtered Interconnect Line

- D-subminiature connectors
- Hi-density D-subminiature connectors
- High reliability circular connectors
- MIL spec connectors
- Terminal blocks
- Filter plates

### Custom Connector Solutions

Despite the breadth of our EMI/RFI filter and connector product line, certain applications demand custom EMC solutions. Our engineering staff will work with your production team to design an EMI/RFI connector which meets your individual requirements for filtering and packaging. And we ensure a timely and dependable delivery schedule.

*For more information on our EMI filter products, see our catalog under Filters, RF & Signal.*

**SPECTRUM CONTROL INC.**

# MODULAR INTERCONNECT SYSTEMS

Products are designed and manufactured to FCC specifications.

## COMPU-SHIELD PLUGS & JACKS

- Totally field installable.
- Shielded for EMI/RFI/ESD.
- Shielding enclosed by plastic.
- Contact selectively plated.
- Keying available.
- Completely modular.

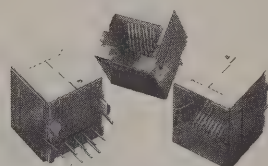

## CABLE ASSEMBLIES

- Custom cable assemblies any length.
- Connectors on one or both ends.
- Stranded, solid or shielded cable.
- Manufactured to your specifications.
- All cable individually tested.
- Small and large volume assemblies.

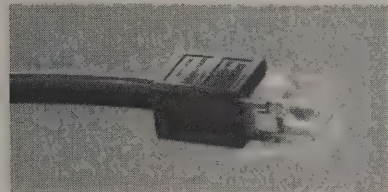

## MODULAR PLUG

- One-piece construction with preloaded contacts.
- Selectively gold plated contacts.
- Various positions and styles available.
- Semi-automatic and automatic termination capabilities.

## SHIELDED JACKS

- Meets 1,000 volt dielectric requirement.
- Fully enclosed, individually guided contacts.
- Designed for direct mounting on PC boards.
- Shielded for RFI/EMI and ESD applications.
- Available, flangeless (with panel stop), and no flange.

## SHIELDED MODULAR - 6 & 8 PLUGS

- Shielded for EMI/RFI & ESD.
- Completely modular.
- Low profile design.
- Keying available.
- Field installable plug.

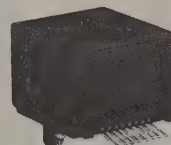

## CABLE READY JACK

- Available in 8 & 10 contact configurations.
- Quick "Load & Care" wire management.
- Narrow profile.
- For shielded versions contact factory.

## HARMONICAS

- Shielded available thru 8 ports.
- Unshielded available thru 13 ports.
- All contact leads are fully enclosed.
- Locating tabs allow for snapping into PCB.
- Housing can be shielded for EMI and RFI.
- Available in RJ-11 configurations.

## SMT JACKS WITH 'SOF-LOK' ATTACHMENT

- Coplanarity assured with "POGO" action contacts.
- "Sof-Lok" board attach for low impact mount.
- Keying available.
- Available in RJ45 styles. (consult factory for additional styles)
- Available as .040" centered footprint.

## FFC/FPC Connector-Pitch 1.0

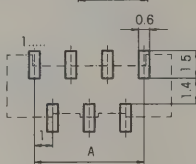

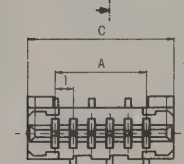

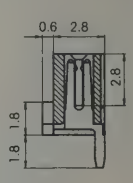

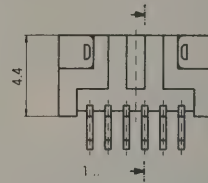

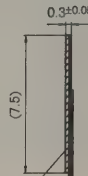

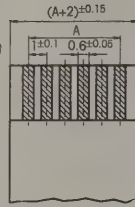

Flexible circuits with .3mm (.012") cable thickness in conjunction with Stocko 1.0 mm low insertion force (LIF) connectors are the answer to most applications where space is extremely limited. The SMT connector is designed for IR-reflow temperatures and uses a fork-type contact in tin plated phosphor bronze.

## 68-Pin Uni-Memory Card Connector/a Universal PCMCIA Connector

For all PCMCIA/JEIDA Applications, accepts:

Type I, II, III, IV cards; LAN, MODEM, I/O, including 1.8" and 1.3" HDA's

The Stocko Universal connector accepts all PCMCIA products. Cards: [I, II, III] Disk Drives, Modems, LANs, I/O's, Extended cards, etc. The proven design features: LH or RH ejector, flat or raised versions, ground-in (ESD), longer eject-buttons.

### Materials:

Connector Housing: LCP

Contacts: • Phosphor Bronze • 4μ" Gold over PdNi

Ejector Housing: PBT

Push Button: PBT

# STOCKO CONNECTORS

Your Source for Innovative Connector Technology. Call 1-800-STOCKO-3.

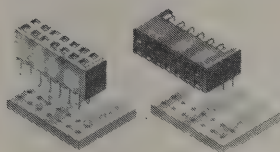

## Memory Card Connector

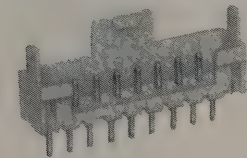

68-Pin connector with and without ejector, per PCMCIA 2.0 and JEIDA 4.0; 10,000 mating cycles, DIP and SMT; for type I, II and type III cards; 32 with and without ejector; for Mitsubishi BEE and MEL cards; Call for Custom adaptations.

## 2x2mm Board-Board System

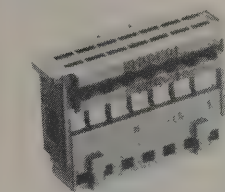

Headers and receptacles; straight and right-angle; gold-plated; closest board spacing less than 5mm; 4-50 positions.

## 2mm (.079") IDC & Crimp System

IDC-AWG 28-24; crimp-AWG 32-24; 2-15 positions; shrouded lock-headers; UL recognized.

## .100" IDC System

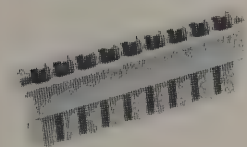

1-step termination; 5 Amps per line; AWG26-22; built-in strain relief, discrete and ribbon cable; cable notching not required; 3,4,5,6,7,8,9,10,12,14, 16,20 positions, shrouded lock headers for error-free insertion; UL approved.

## .100" Double Row System

For standard 50 mil ribbon cable; gold-plated; 10,14,16,26, 34,40,50 positions; shrouded headers with and without lock latch; straight and right angle.

## 2.5mm Crimp System (Series 19000)

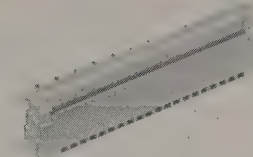

Low profile mini crimp connector; shrouded lock headers; round pins; in-line solder tails, kinked; AWG 28/22; max insulation diam. .075"; 2-20 position.

## Horizontal PCB Extension Connector

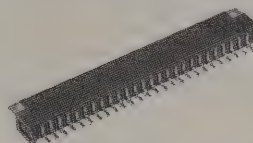

For laptop applications, 68 (XT) and 98 (AT) positions; solderless connector is secured in place with two rivets or screws (etc.).

## ZIF Connector for FFC / FPC, 1.25mm

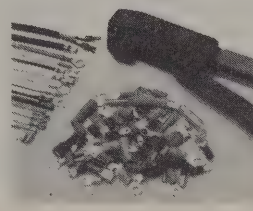

Straight and right angle; for cable thickness .1mm (.004") and .3mm; (.012") 3-35 positions.

## LIF Connector FFC/FPC 1.00mm

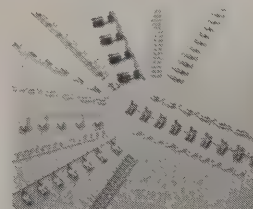

Straight and right angle, for .3mm (.012") cable thickness, SMT, 3-20 positions. For details, see opposite page.

## Solderless Terminals

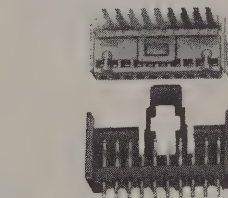

Ring/Spade terminals; brazed; insulated or non-insulated; pin terminals; butt/end splices; wire sleeves; .250/.187 quick disconnects; insulation sleeves/housings; application tooling.

## Chain / Strip Terminals

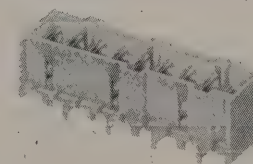

.250 / .187 / .110 crimp terminals and tabs; spades and lugs; splices; specialty items; tooling; AMP compatible applicators; UL approved.

## 2.5mm IDC & Crimp System

1-step termination; 5 Amps per line; AWG26-22; built-in strain relief; discrete and ribbon cable; cable notching not required; 2 through 20 positions, shrouded lock headers for error-free insertion.

## 5mm (.197") IDC Power Connector System

2-12 positions; additional pos. without loss of pitch, wide variety of codings and lock lings, European RAST 5 compliant; 1/4" tab connectors for shrouded headers and card edge type direct connectors; UL, CSA, VDE.

## FEATURES

- .050, .100, .125, .150 & .156 Contact centers
- High and Low Profile Insulators
- Wire Wrap, Solder Tail, SMT and Solder
- Eyelet Terminations
- Test and Burn-in contacts and materials
- Many mounting styles
- Over 600, 000 styles of connectors available
- Hundreds of modifications available

## MATERIALS

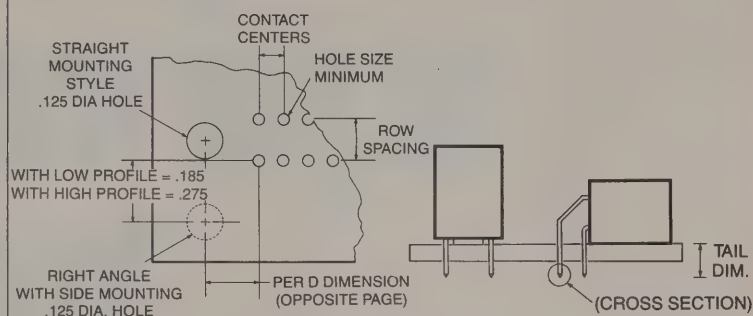

Insulator Material:

- VALOX – 65°C to +135°C (Glass-filled thermoplastic polyester)
- RYTON – 65°C to +220°C (Glass-filled polyphenylene sulfide)
- XYDAR – 65°C to +310°C (Liquid crystal polymer)

Contact Material:

- Phosphor bronze – 65°C to +125°C
- Beryllium copper – 65°C to +150°C
- Spinodal (Plinodal) – 65°C to +200°C
- Beryllium nickel – 65°C to +300°C

## MOUNTING STYLE (High Profile Shown)

# Are you getting all you want from eem?

EEM/Electronic Engineers Master is **user**-named, **user**-driven, and **user**-sensitive.

**You**, the electronic engineer, are the individual the thousands of manufacturers represented in EEM are trying to reach. **You** are the reason hundreds of manufacturers place their data pages in EEM—so that **you can specify their product in your project.**

EEM wants to know:

- what's new
- what products you are looking for
- what you call them
- what are their basic parameters
- where do they belong in the EEM Product Sections

What kind of reference material/engineering aids will help you make your electronic component choices:

- glossaries
- nomographs
- charts
- product selection guides

Write to the editor: The Editor  
EEM/Electronic Engineers Master  
645 Stewart Ave.  
Garden City, NY 11530

# 5-WAY® Binding Posts

*in wide color, metal and design choices*

- Standard, Miniature, Custom Color Ring, Militarized, Double Assembly and Grounding Types
- Choice of gold, nickel or tin plated current-carrying parts on most types
- Hex and fluted thumbnut styles
- Standard size types rated 30 A, 1000 V working
- Miniature size types rated 15 A, 1000 V working

The original five-way binding posts — the first choice of electrical and electronic equipment manufacturers — are now available with more selections than ever before. All are designed to prevent accidental contact with current-carrying parts. Captive thumbnuts have a positive stop that allows enough space to make connections yet reduces the likelihood of accidental contact with electrically "hot" surfaces.

Plastic parts are molded of either Lexan® polycarbonate resin or nylon plastic per MIL-P-20693A, Type IV for excellent resistance to corrosive atmospheres, heat, oil or grease, abrasion and impact, chipping and cracking. Color selections are red, white, blue, yellow, black and green to assure ready circuit and polarity identification and more attractive panels.

Most types are available with either gold, nickel or tin plated brass current-carrying parts for improved conductivity and corrosion resistance. All metal parts are recessed for user and instrument protection and none touch the metal panel. Panel collars have

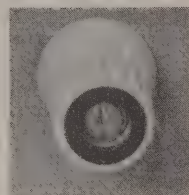

"D" type shoulders for locking in keyed panel holes if desired. Types with larger No. 10-32 studs are also available.

**Double Assembly Binding Posts** — Available in a wide choice of red and/or black thumbnut color combinations in Custom Color Ring, Standard, Miniature and Larger Stud Types. They provide faster, more accurate 3/4-inch (19 mm) center mounting on panels. Plastic insulating parts and metal current-carrying parts have the same specifications and features of single assembly types. All current-carrying parts are of gold plated finely machined brass. Thumbnut color combinations are red/black, black/black and red/red.

**Militarized Binding Posts** — Military specification types meet Military Specification MIL-P-55149/1B, a specification approved for use by all Departments and Agencies of the U.S. Department of Defense. They are available in standard size hexagonal nut and miniature size fluted nut types. Both styles are available with either black or red nylon plastic insulating parts. Current-carrying parts are gold plated brass per QQ-B-626. Operating temperatures are -40° to 225°F and dielectric strength is 3000 V.

## Custom Color Ring Binding Posts

Cataloged Custom Color Ring Series types have neutral gray plastic insulating parts with thumbnut rings in red, white, blue, yellow, black or green colors for panels with superb visual appearance. The gray plastic parts coordinate and harmonize with most modern equipment finish colors. Contingent on minimum quantity requirements, the colors of insulating parts can be customized to meet the specific needs of any application. Miniature fluted nut types are rated for 15 A, 1000 V working; standard and larger stud hex and fluted nut types for 30 A, 1000 V working.

## SUPERCON® Electrical Connectors

Socket and pin type single-conductor plugs and receptacles with nylon plastic parts and gold plated brass current-carrying parts. Wiring connections can be soldered or solderless with plug fastening screws that accept a wide range of cable sizes. Simple, 2-piece threaded plug construction in distinctive, functionally designed grip. Available in 25, 50, 100 and 250 A ratings. The 25, 50 and 100 A types are rated 125-250 VAC or DC current interrupting, 600 V unenergized connect or disconnect use only; 250 A types are rated 600 V unenergized connect or disconnect use only.

## 5-WAY® Test Probes

For test connections to PC boards and other components. Designed for fast, secure hook-on connections and will grip a component lead or IC package pin with 16 ounces of clamping force. For touch contact, the probe tip can be locked in the extended position. The large end of the probe has a banana plug receptacle for test lead connection. Current-carrying parts are beryllium copper and the plastic body is durable nylon available in either red or black. The compression spring is stainless steel for long life and resistance to corrosion.

Call 1-800-446-6161 today for immediate attention.

## AUDIO CONNECTORS

### Q-G® AUDIO CONNECTORS

"Quick-Ground" (Q-G) connectors have dual-point shell grounding. All-metal zinc die cast housing is extremely rugged and is available in satin nickel finish, non-reflective Black Velvet or gray chrome finishes. Gold contacts are available on 3-contact A, AA, QGP, D and E series versions. Plugs have efficient cable clamp and cable flex relief.

#### A Series Q-G Cord Plug Connectors

Industry-standard audio connector with high-performance "greenie" insulation, locking or FAS-DISCONNECT retention, dual pressure plates on flex relief for positive cable clamp.

#### D Series Q-G Receptacles

Panel mount receptacles for panel or chassis mounting in 3 to 7 pin configurations. Available with Black Velvet finish and gold-plated contacts.

#### E Series Q-G Receptacles

3-contact panel/PC mount receptacles. Quick-release insert for PC applications. Choice of three terminations - conical spring solder, straight PC and right-angle PC.

A3F

A3MB

E3F

D3MB

### Q-G CONNECTORS PART NUMBERING SYSTEM

Q-G connectors can be supplied in hundreds of variations for a wide variety of applications. Refer to the "Part Numbering System" for information. Contact Switchcraft for assistance in specifying, if required.

#### EXAMPLE:

#### E3MSTBAU

E series receptacle, 3 pins, straight PC terminals, black finish, gold-plated contacts.

ADDITIONAL FEATURES

3  
4  
5  
6  
7

F - Female  
M - Male

**A** - Female and male cord plugs  
**AA** - Female and male cord plugs, 1-piece cable clamp  
**B** - Panel mount female and male receptacles. Round escutcheon  
**C** - Panel mount female and male receptacles. Round escutcheon  
**D** - Panel mount female and male receptacles. Rectangular flange  
**E** - Panel mount female and male receptacles. Quick-release insert for PC applications. Also solder springs 3-contact version only

**J** - Wall plate with female receptacle  
**K** - Wall plate with 2 female receptacles  
**P** - Gooseneck mount male and female microphone plugs fit on standard 5/8-27 thread  
**R** - Right-angle female and male cord plugs  
**T** - Female cord plug with in-line switch for microphone control  
**Y** - Panel/chassis mount female and male receptacles with straight PC terminals.

**AU** - Gold contacts for low, stable resistance and corrosion resistance  
**B** - Black finish  
**BAU** - Black finish and gold contacts  
**D** - "FAS-DISCONNECT" detent  
**PC** - Straight PC terminals (Y series only)  
**RA** - Right-angle PC terminals  
**S** - Small cable relief - accepts up to .1/4" (6.35mm) cable diameter  
**ST** - Straight PC terminals

**NOTE:** Unless otherwise specified, cord plugs accept cables with .21-to .30-inch diameter.

**ORDERING:** Order by part number. Contact Switchcraft for part number, price and delivery information.

## AUDIO CONNECTORS

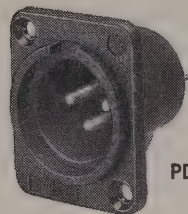

### PD Series Q-G® Receptacles

Light, compact, yet rugged PD series connectors come in 3-contact configurations and a variety of pin-out types. All feature PC mount terminals, and FRA, FRU, and FRR models have combination bifurcated PCB/solder lug terminals. Machined pins, glass reinforced, black, thermoplastic housing.

Contact Switchcraft for additional specifying assistance.

**PD3FRA2** 3-contact receptacle, right-angle (bottom) PC terminal exit. Separate ground lug, rear mount

**PD3MS1** 3-pin receptacle, straight, rear exit PC terminals. Front mount

PD3MS1

### TINI Q-G® Miniature Connectors

These high-quality audio plugs are miniature versions of our full-size Q-G line. They are ideal for use with miniature microphones, wireless belt packs, instrument pickups, and anywhere space is too tight for conventional microphone plugs. Features are: positive latch lock, secure cable strain relief, integral flex relief and nickel finish. Available in 3- to 6- contact configurations.

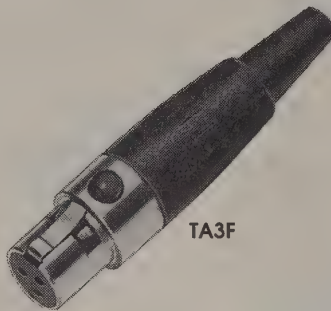

**TA3F** Female plug, 3 contacts, solder lugs

**TA3M** Male plug, 3 pins, solder lugs

**TB3M** Male receptacle, 3 pins, chassis/panel mount, solder lugs

**TRA3M** Male receptacle, 3-pins, right-angle PC mount. Threaded bushing for chassis/panel mount also

**TY3F** Female receptacle, 3 contacts, solder lug, separate ground lug

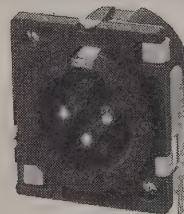

TA3F

### PQG Series PC Mount Receptacles

PQG 3-contact PC mount Q-G receptacles offer a variety of features to suit most any audio application. Vertical or right-angle mount, with optional chassis-grounded NiAg mounting plate. Also optional: "Tri-Mounting" plate with bifurcated PCB terminals for secure board retention during wave soldering. Durable glass reinforced, black, thermoplastic housing.

**PQG3MRA112** Male receptacle, 3 contacts. Right-angle PC terminals, latch lock, ground terminal. "Tri-Mounting" plate with bifurcated PC retainers for positive lock-in to PCB

**PQG3FST200** Female receptacle, 3 contacts. Straight PC terminals FAS-DISCONNECT (detent) latch

PQG3MRA112

## TT AND LONG FRAME JACKS AND PLUGS

### TT-Jax® JACKS (BANTAM-TYPE)

Miniature telephone jacks with rugged die-cast frames and crossbar welded palladium contacts in shunts which mate with Switchcraft TT-Plugs, TT-Patch Cords and other BANTAM-TYPE plugs. Jack has .176" inside diameter bushing.

**TT34BDC** 3-conductor, shunted tip and ring, solder lugs

**WTT34BDC** 3-conductor, shunted tip and ring, wire-wrapping terminals

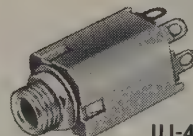

TT34BDC

### MINIATURE ENCLOSED JACKS

3-conductor chassis/panel/PC mount jacks mate with Switchcraft TT-Plugs, TT-Patch Cords and other BANTAM-TYPE plugs. Jack has .176" inside diameter bushing.

**UJ-2B** 3-conductor, open circuit, bushing and/or PC mount, solder lugs

**UJ-4B** 3-conductor, double closed-circuit, bushing and/or PC mount, solder lugs

UJ-4B

### TT-PLUGS (BANTAM-TYPE)

Miniature non-shorting plugs designed for use with Switchcraft TT-Jax and other BANTAM-TYPE jacks with .176" inside diameter bushings. Handle screws onto plug and cable for secure cable anchor.

**TT-253** 3-conductor, black handle, screw terminals

**TT-254** 3-conductor, red handle, screw terminals

TT-253

### MIL LITTEL PLUG® PLUGS

3-conductor plugs fit standard long frame telephone jacks.

**480** 3-conductor, screw terminals, black plastic handle, strain relief "U" clamp, .206" inside diameter bushing

**482** 3-conductor, screw terminals, red plastic handle, cable jacket threads into housing, 1/4" inside diameter bushing

**483** same as 482 but with black plastic handle, 1/4" inside diameter bushing

480

### "MT" 1/4" LONG FRAME TELEPHONE JACKS

Full size 3-conductor long frame jacks with shunted tips and rings. Accepts all 1/4" diameter finger, 3-conductor telephone plugs.

**MT-334B** 3-conductor, shunted tip and ring, solder lugs.

WEco equivalent - No. 239A; MIL equivalent M641/3-2

**WMT-334B** 3-conductor, shunted tip and ring, wire wrapping terminals. WEco equivalent - No. 239AM

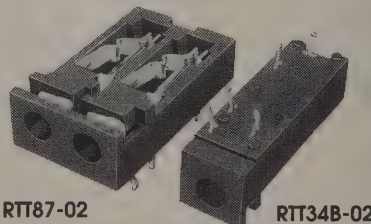

WMT-334B

### RTT RIGHT-ANGLE MINIATURE PHONE JACKS

Right-angle miniature phone jacks provide low profile packaging. Single and twin 3-conductor jacks provide plug/jack access to communication circuits for patching and/or testing. Tips and rings are shunted. These jacks mate with Switchcraft miniature "TT" plugs and patch cords.

Jacks are designed for right-angle mounting on .062" (1.6 mm) maximum thickness PC boards. Also available with "snap-in" terminals for PC mounting. Snap-on covers in colors are available and can be installed or removed in the field without special tools.

## PHONE JACKS, POWER JACKS AND PLUGS

### LITTEL-JAX® 1/4" PHONE JACKS

2- and 3- conductor phone jacks to mate with 1/4" commercial phone plug. Mounts in 3/8" diameter hole in panels up to 5/32" thick.

- 11 2-conductor, open circuit
- 12A 2-conductor, single normally closed circuit
- 12B 3-conductor, double open circuit
- 14B 3-conductor, double normally closed circuit

### HI-D JAX® 1/4" ENCLOSED PHONE JACKS

2- and 3- conductor enclosed jacks for panel/chassis mount on .625" minimum centers. Mounts in 3/8" diameter hole in panels up to .156" thick. Also available with advanced spring lock PC terminals.

- 111 2-conductor, open circuit, solder lugs
- 112B 3-conductor, double open circuit, solder lugs
- 114BPC 3-conductor, double closed circuit, PC terminations

### 1/4" EXTENSION JAX

2- and 3-conductor extension phone jacks for standard 1/4" diameter finger phone plugs. Screw-on handle.

- 80 2-conductor, screw termination, black handle
- 88 2-conductor, solder termination, black handle
- 120 2-conductor, screw termination, shielded handle
- 121 2-conductor, solder termination, shielded handle
- 131 3-conductor, solder termination, shielded handle
- 830 3-conductor, screw termination, black handle
- 128 2-conductor, shielded handle, solder lugs
- 1238 3-conductor, shielded handle, solder lugs

### RIGHT-ANGLE PC MOUNT

#### 1/4" COMMERCIAL PHONE JACKS

Low profile 2- and 3-conductor phone jacks for PC and panel/chassis mount (via threaded bushing). Mates with 1/4" diameter finger phone plugs. PC board thickness: RA series; .625" maximum. RN series; .125" maximum.

- RA49B-11 2-conductor, open circuit
- RN-112APC 2-conductor, single closed circuit
- RA49C-14B 3-conductor, double closed circuit

### MINIATURE POWER JACKS

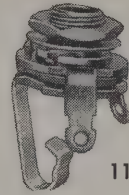

2-conductor straight and right-angle miniature power jacks for AC/DC power converters, solid state portable radios, tape recorders, TV receivers and battery charger connections. Automatic switchover from AC to DC.

- PC712A Mounts in .313" diameter hole in panels up to .125" thick (maximum). Pin outside diameter is .10". PC terminals
- PC722A Same as PC712A, except pin is .08" outside diameter
- RAPC712 Right-angle mount, PC terminals. Mounts in PCB up to .062" thick. Pin outside diameter is .10"
- RAPC722 Same as RAPC712, except pin is .08" outside diameter
- 712A Mounts in .313" diameter hole in panels up to .125" thick (maximum). Pin outside diameter is .10"
- 722A Same as 712A, except pin is .08" outside diameter

### MINIATURE POWER PLUGS

2-conductor battery charger plugs. Mates with Switchcraft power Jacks.

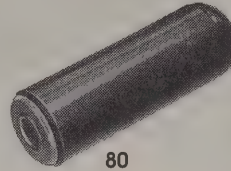

- S760 .08" center hole. Black handle, solder lugs. Mates with 722A
- S765 Same as S760, but has red handle
- 760 .10" center hole. Black handle, solder lugs. Mates with 712A
- 765 Same as 760, but has red handle
- 2P1628 .10" center hole. Black handle, solder lugs. Locking ring provides secure power connection. Mates with 712A

ENCLOSED PHONE JACKS, PHONE PLUGS, PHONO JACKS AND PLUGS

## MINIATURE ENCLOSED 3.5mm PHONE JACKS

2-conductor jacks mate with plugs having 3.5mm diameter fingers (Switchcraft 740). Panel or PC mount types.

**142A** 2-conductor, closed circuit, solder lugs. Mounts in 1/4" diameter hole in panels up to .125" thick

**PC-142A** 2-conductor, closed circuit, PC terminations

142A

## SUBMINIATURE ENCLOSED PHONE JACKS

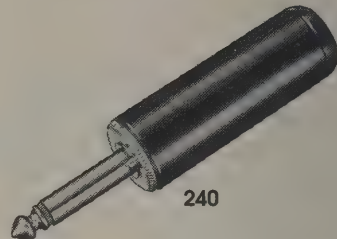

Super small 2-conductor jacks (.312" x .344" x .688") feature insulated box construction and mate with Switchcraft micro-plug (typical part number 850). PC, panel and right-angle mount types.

**MDSL-2A** 2-conductor, solder lug, threaded bushing; mounting washer and locknut supplied

**MDPC-2A** 2-conductor, PC lug

**MDSL-2A-RA** 2-conductor, right-angle solder lug, threaded bushing; mounting washer and locknut supplied

**MDPC-2A-RA** 2-conductor, right-angle PC plug

240

## Littell-Plug® 1/4" PHONE PLUG

Small handle phone plug, fits standard 1/4" phone jacks such as Littell-Jax.

**240** 2-conductor, screw termination, black handle

**245** 2-conductor, screw termination, red handle

**250** 2-conductor, solder lug, cable clamp, black handle

**260** 3-conductor, screw termination, black handle

**267** 3-conductor, solder termination, black handle, cable clamp.

**270** 2-conductor, screw termination, shielded handle.

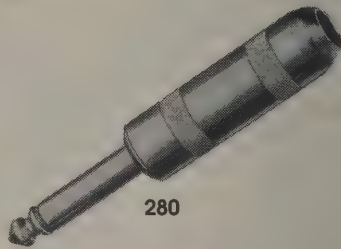

**280** 2-conductor, solder termination, shielded handle, cable clamp.

**285** 2-conductor, solder termination, shielded handle, cable clamp for larger cables (shipped unassembled)

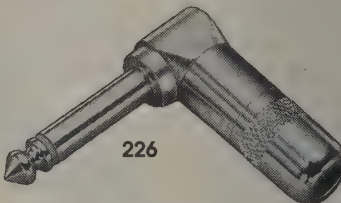

**285L** Same as 285 except handle has .375" diameter hole for larger cables

**290** 3-conductor, screw termination, shielded handle

**297** 3-conductor, combination clamp and solder termination, shielded handle

280

226

## RIGHT-ANGLE 1/4" PHONE PLUGS

Low profile 2- and 3-conductor phone plugs have all-metal exterior for ruggedness and long life. 3-piece construction.

**226** 2-conductor, solder termination, cable clamp

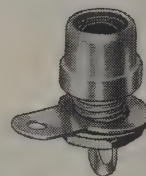

**236** 3-conductor, solder termination, cable clamp

## PHONO JACKS

2-conductor jacks for stereo components and home studio equipment.

**3501FP** Phono chassis jack for front panel mount in 1/4" diameter hole

**3503** Phono "Extension Jax", shielded screw-on handle, cable clamp

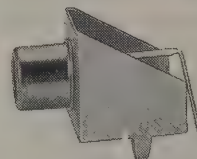

3501FP

## PC MOUNT PHONO JACKS

2-conductor, accepts plugs with pins up to .563" long.

**3514PC** 2-conductor

**3517PC** 2-conductor, right-angle

3517PC

## PHONO PLUGS

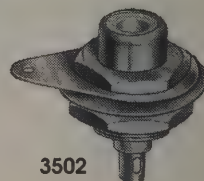

Economy 2-conductor plugs for stereo components and home studio equipment.

**3502** Shielded screw-on handle, cable clamp.

**3558-1** Red handle, cable clamp.

**3558-2** Black handle, cable clamp.

**3558-5** White handle, cable clamp.

## AUDIO AND VIDEO PATCH PANELS AND CORDS

Audio patch panels are 19" wide and are rack-mountable with 48 premium performance 3-conductor jack circuits. Rear panel has insulation displacement connectors (IDCs) for inputs/outputs and are color-coded for easy identification.

Series 20Q audio patch cords have a 3-conductor telephone-type plug (1/4" diameter) on each end. Cords are available in 5 colors.

### AUDIO PATCH PANELS

**APP334BNO** Completely shielded and wired,  
48 jacks with normals out

**APP334BNS** Completely shielded and wired,  
48 jacks with normals at jacks

**APP336BNO** Completely shielded and wired,  
48 jacks with sleeve normals out

**APPM5334BNO** Wired with 4' cable for remote rear panel  
installation, 48 jacks with normals out

**APPM5334BNS** Same as APPM5334BNO, except  
normals are at jacks

Video Insulated Panels, Series VIP, patch 24 or 26 channels from DC to 400 MHz with high efficiency in a standard 19" wide rack. Dual jacks have open or 75-ohm terminations. Rear panel connections are via standard BNC receptacles. Through-connections are made without plugs or patch cords. Patching is achieved from the front with Video Patch Cords, Series VPC, or other standard plugs or patch cords. Cable is black, RG59B/U, 75-ohm nominal impedance. Handles are metal shielded and may be "booted"

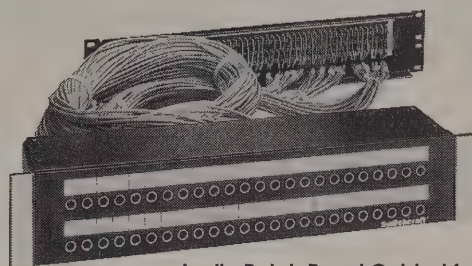

### VIDEO PATCH PANELS

**VIP2B224S08B** 24 jacks, light gray, open termination

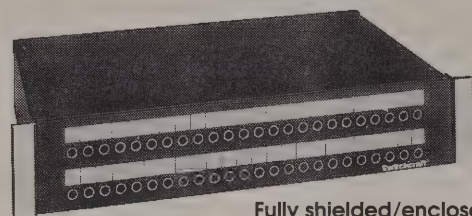

**VIP2B224S08C** 24 jacks, light gray, 75-ohm termination

**VIP2B226S08B** 26 jacks, light gray, open termination

**VIP2B226S08C** 26 jacks, light gray, 75-ohm termination

# Switchcraft

A Raytheon Company

DIN AND EAC  
CONNECTORS

## CIRCULAR DIN CONNECTORS

Designed for low level circuitry, for unlimited use in computer, commercial, industrial, consumer and military applications. "Switchcraft/DIN" 2 to 8 contact connectors include male and female plugs and receptacles with bright nickel-plated barrels and plastic snap-on shells. Lock-ring coupling, silver-plated contact pins for low contact resistance, contact friction coupling for low mechanical interference noise, exclusive "automatic" grounding and polarization provisions. Full line of receptacles offer through-panel PC board and surface mounting. Positioning "Ground Key-Rib" or "Ground Contact" - electrically integral with the connector shell - is provided in each plug and receptacle (except those with plastic housing or shells) to ground or shield the connector shell. Right-angle PC board mount for common ground use also available.

## MINI-DIN RECEPTACLES

Miniature DIN right-angle connectors are designed for personal computer and enhancements, as well as data communications, medical and instrumentation equipment and systems.

## RIGHT-ANGLE PC MOUNT RECEPTACLES

Available with 3 through 8 contacts, receptacles also have a standard (and separate) ground contact system. Ground terminal can be straight or "snap-in" type. "Snap-in" terminals are bifurcated to assure tight hold down on PC board.

Dimensions: .552 inch (14mm) wide x .502 inch (12.8mm) maximum depth x .642 inch (16.3mm) high, including terminals.

## "EUROPEAN AC RECEPTACLES

**EAC-233** 2-pin, 10A, 250V male receptacle with right-angle housing for PC mount. PC terminals project .130 inch (3.3mm) to extend through PC board. Rear of panel mount. Two, .136 inch (3.45mm) diameter holes permit fastening to PC board; two additional .136 inch (3.45mm) holes are for fastening to panel or chassis, if required. UL, CSA, VDE, DEMKO and SEMKO recognized

**EAC-305** Grounding type, 3-contact female receptacle. Rated: 10A, 250V AC: UL and CSA listed. Front panel/chassis mount in 1.275 inch (32.39mm) x 1.56 inch (39.62mm) hole with 2, #5 screws or .125 inch (3.18mm) rivets (not supplied). EAC-405 is same except has "snap-in" mount

**EAC-309** Grounding type, 3-pin male receptacle. 10A, 250V AC: UL, CSA and VDE listed. Rear mounts in 1.201 inch (30.51mm) x .875 inch (22.22mm) hole or front mounts in 1.08 inch (27.43mm) x .785 inch (19.94mm) hole in chassis/panel with 2, #5 screws or .125 inch (3.18) diameter rivets (not supplied). Longer grounding pin allows ground circuit to "make" before power circuit, and "break" after power circuit disconnects. Pins .045 inch (1.14mm) x .157 inch (3.99mm) and terminals: silver-plated. EAC-409 is same except has "snap-in" mount

**EAC-311** 3-pin male receptacle with FASTON terminals. Mounts from front or rear of panel with 2, #5 screws or .125 inch (3.18mm) diameter rivets (not supplied)

**EAC-333** 3-pin, 10A, 250V male receptacle with right-angle housing for PC mount. PC terminal and hole mounting details are the same as for EAC-233. Ground pin is integral with ground solder lug on rear of receptacle. UL, CSA, VDE, DEMKO and SEMKO recognized

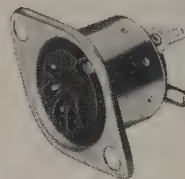

**EAC-333S** Similar to EAC-333, but with 2 snap-in retainers through mounting flanges for PC mount

# COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

- A**  
A/D acrylonitrile butadiene-styrene  
A/D analog to digital  
ADC analog to digital converter  
ADP automatic data processing  
AFC audio frequency control  
AFT automatic filter test  
ALGOL algorithmic language  
AM a logical operator  
AQL acceptable quality level  
ASCI American national standard code for information interchange  
ASIC application specific IC  
ATE automatic test equipment  
ATG automatic test generation  
AWG American wire gauge
- B**  
BALUN balanced to unbalanced  
BASIC beginners' all-purpose symbolic instruction  
BCD binary-coded decimal  
BNC baby "N" connector  
BUS basic utility system
- C**  
CAD computer-aided design  
CAE computer-aided engineering  
CAM computer-aided manufacture  
CAMAC computer-automated measurement and control  
CAPP computer-aided process planning  
CAT computer-aided test  
CATV cable television or community antenna television  
CCC (lead) ceramic chip carriers  
CCD computer-controlled display  
CERMET ceramic metal element  
CIE computer-integrated engineering  
CIM computer-integrated manufacturing  
CLCC ceramic leadless chip carriers  
CMOS complementary metal-oxide semiconductor  
Comm. communications  
CPS characters per second  
CPU central processing unit
- D**  
D/A digital to analog  
DAC digital to analog converter  
DBMS data base management system  
DC direct current  
DFT design for testability  
DIAC bidirectional trigger diode  
DIL dual in-line  
DIN Deutsche Industrie Normenausschuss  
DIP dual in-line package  
DPM digital panel meter  
DRAM dynamic RAM  
DTL diode transistor logic
- E**  
EDA electronic design automation  
EDP electronic data processing  
EBCDIC extended binary coded decimal interchange code  
EEPROM electrically erasable PROM
- EIA** Electronic Industries Association  
EMC electromagnetic compatibility  
EMI electromagnetic interference  
EMP electromagnetic pulse  
EPROM erasable programmable ROM
